Getting started

2.1 Set-up

Removing the back cover

Installing the battery

Inserting and removing the SIM Card

Place the SIM card with the chip facing downwards and slide it into its housing. Make sure that it is correctly inserted. To remove the SIM card lift the bottom up a bit and slide it out in the directions of the arrows. Please power off your phone before you remove the SIM card. 4.1 Call memory

Power on your phone

Hold down the key until the telephone powers on.

2.3 Power off your phone

Hold down the key from the main screen.

Note: If your battery is fully out of energy, it is normal situation that the phone maybe no any charging indicator reflection within 5~15 minutes while you charge the phone.

3.1 Making a call

Dial the desired number then press the key to place the call. If you make a mistake, you can delete the incorrect digits by pressing the right softkey.

Calls

To hang up the call, press the key.

Making an emergency call

If your phone is covered by the network, dial emergency number and press the key to make an emergency call. This works even without a SIM card and without typing the PIN code or unlocking the keypad.

3.2 Calling your voicemail (1)

To access your voicemail, hold down the loo key.

.3 Receiving a call

When you receive an incoming call, press the key to talk and then hang up using the key.

3.4 Available functions during the call

During a call, you can use your directory, organizer, short messages, etc. without losing your correspondent by pressing the key.

Call register

You can access your call memory by pressing the key from the main screen

4.2 Events

By holding down the key from main screen or accessing from main menu, it allows you to view a list of your all latest 20 events (SMS, MMS, WAP Alerts, Voicemail and unanswered calls).

Contact your network operator to check service availability.

⊀ Games

Your phone may include some games

13.1 Game settings

Insert and remove the memory card

Legal & Safety Warning: Use of an improper be explosion, leakage, or other hazard.

Battery Use & Safety

Important: Handle and store batteries properly to avoid injury or damage. Most battery issues arise from improper handling of batteries, and proper disposal and recycling may be found on the Web: particularly from the continued use of damaged batteries. DON'Ts

- Don't disassemble, crush, puncture, shred, or otherwise attempt to change the form of your battery.
- Don't let the phone or battery come in contact with water. Water can get into the phone's circuits, leading to corrosion. If the phone and/or battery get

 Warning: Never dispose of batteries in a fire because they may wet, have them checked by your carrier or contact Motorola, even if they appear to be working properly.
- Don't allow the battery to touch metal objects. If metal objects such as iewelry, stay in prolonged contact with the battery contact points, the battery could become very hot
- Don't place your battery near a heat source. Excessive heat can damage the phone or the battery. High temperatures can cause the battery to swell, leak. or malfunction Therefore:
- · Do not dry a wet or damp battery with an appliance or heat source, such as a hair dryer or microwave oven
- Avoid leaving your phone in your car in high temperatures
- . Do avoid dropping the battery or phone. Dropping these items, especially on a hard surface, can potentially cause damage.
- Do contact your service provider or Motorola if your phone or battery has been damaged from dropping or high temperatures.

Important: Use Motorola Original products for quality assurance and original or counterfeit batteries (that may not have adequate safety protection), Motorola provides holograms on its batteries. Consumers should confirm that any hattery they purchase has a "Motorola Original" hologram NOTE: Some mobile phones may contain a non Motorola-branded battery without

a hologram when purchased. Those batteries are designed for use with your phone If a replacement is needed, and a Motorola-branded battery is not available, only the type and model that came with your phone are recommended for use

Important: Refer to Motorola's warranty for details of coverage and exclusions.

Proper and safe battery disposal and recycling: Proper battery disposal is not only important for safety, it benefits the environment. Consumers may recycle their used batteries in many retail or service provider locations. Additional information on www.motorola.com/recycling

• www.rbrc.org/call2recycle/ (in English only) Disposal: Promptly dispose of used batteries in accordance with local regulations. Contact your local recycling center or national recycling

organizations for more information on how to dispose of batteries

Battery Charging

Notes for charging your phone's battery

- When charging your battery, keep it near room temperature
- Never expose batteries to temperatures below 0°C (32°F) or above 45°C (113°F)
- New batteries are not fully charged.
- New batteries or batteries stored for a long time may take more time to charge.
- Motorola batteries and charging systems have circuitry that protects the battery from damage from overcharging

Specific Absorption Rate

Your model wireless phone meets international guidelines for exposure to radio waves

Your mobile device is a radio transmitter and receiver. It is designed to not exceed the limits for exposure to radio waves recommended by international guideling These guidelines were developed by the independent scientific organization ICNIRP safeguards. To aid consumers in identifying authentic Motorola batteries from nonregardless of age and health, and to account for any variations in measurements. The guidelines use a unit of measurement known as the Specific Absorption Rate (SAR). The ICNIRP SAR limit for mobile devices used by the general public is 2 watts on the Web site per kilogram (W/kg), and the highest SAR value for this mobile device when tested at the ear is 0.91 W/kg. As mobile devices offer a range of functions, they can be used in other positions such as on the body as described in this guide. In this case the highest tested SAR value is 1.10 W/kg. The tests are carried out in accordance with international guidelines for testing. The SAR information includes the Motorola

> As SAR is measured utilizing the mobile device's highest transmitting power, the actual SAR of this mobile device while operating is typically below that indicated above This is due to automatic changes to the power level of the mobile device to ensure it only uses the minimum level required to reach the network.

> testing protocol, assessment procedure, and measurement uncertainty range for this

and at various positions, they meet the governmental requirements for safe the sale of a product. exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to Safety & General Information be within the guidelines

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure, then you can do so by limiting the length of calls or using a handsfree device to keep the mobile device away from the head and body.

Additional Information can be found on the Web sites of the World Health Your mobile device contains a transmitter and receiver. When it is ON, it receives Organization (http://www.who.int/emf) or Motorola, Inc. (http://www.motorola.com/rfhealth).

This section contains important information on the safe and efficient operation of your mobile device. Read this information before using your mobile device.

Exposure to Radio Frequency (RF) Energy

and transmits RF energy. When you communicate with your mobile device, the system handling your call controls the power level at which your mobile device transmits. Your mobile device is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

Operational Precautions

For optimal mobile device performance, and to be sure that human exposure to RF energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions.

Product Operation

When placing or receiving a phone call, hold your mobile device just like you would a landline phone.

If you wear the mobile device on your body, always place the mobile device in a Motorola-supplied or approved clip, holder, holster, case, or body harness. If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 centimeters (1 inch) from your body when transmitting

Using accessories not supplied or approved by Motorola may cause your mobile device to exceed RF energy exposure guidelines. For a list of Motorola-supplied or

RF Energy Interference/Compatibility

Nearly every electronic device is subject to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy Motorola products may include copyrighted Motorola and third-party software compatibility. In some circumstances, your mobile device may cause interference stored in semiconductor memories or other media. Laws in the United States and with other devices.

by implication, estoppel, or otherwise, any license under the copyrights, patents, or

If you have an implantable medical device, such as a pacemaker or defibrillator consult your physician before using this mobile device.

Persons with implantable medical devices should observe the following recautions:

- ALWAYS keep the mobile device more than 20 centimeters (8 inches) from the implantable medical device when the mobile device is turned ON.
- DO NOT carry the mobile device in the breast pocket
- Use the ear opposite the implantable medical device to minimize the potential for interference
- . Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your mobile device with your implantable medical device, consult your healthcare provider

Driving Precautions

The use of wireless phones while driving may cause distraction. Discontinue a call if you can't concentrate on driving.

Additionally, the use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of

Responsible driving practices can be found in "Smart Practices While Driving."

Operational Warnings

Obey all posted signs when using mobile devices in public areas.

Potentially Explosive Atmospheres

Areas with potentially explosive atmospheres are often, but not always, posted and can include fueling areas, such as below decks on boats, fuel or chemical transfer or storage facilities, or areas where the air contains chemicals or particles, such as

When you are in such an area, turn off your mobile device, and do not remove. install, or charge batteries. In such areas, sparks can occur and cause an explosion

Symbol Key

battery, charger, or mobile device may contain symbols, defined as follows:

Do not dispose of your battery or mobile device in our battery or mobile device may require recycling accordance with local laws. Contact your local egulatory authorities for more information. Do not throw your battery or mobile device in the trash Do not let your battery, charger, or mobile device get istening at full volume to music or voice hrough a headset may damage your hearing.

nportant safety information follows.

Definition

Symbol

Caution: Improper treatment or use of batteries may present a danger of fire, explosion, leakage, or other hazard. For more information, see "Battery Use &

Keep Your Mobile Device and Its Accessories Away From Small Children These products are not toys and may be hazardous to small children. For example

- A choking hazard may exist for small, detachable parts.
- Improper use could result in loud sounds, possibly causing hearing injury.
- · Improperly handled batteries could overheat and cause a burn.

15

Glass Parts

Some parts of your mobile device may be made of glass This glass could break if the product is dropped on a hard surface or receives a substantial impact. If glass breaks, do not touch or attempt to remove. Stop using your mobile device until the glass is replaced by a qualified service center.

Seizures/Blackouts

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when playing video games. These may occur even if a This device complies with part 15 of the FCC Rules. Operation is subject to the person has never had a previous seizure or blackout

If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your physician before playing video games or enabling a flashing-lights feature (if available) on your mobile device

Discontinue use and consult a physician if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. It is always a good idea to hold the screen away from your eyes, leave the lights on in the room, take a 15-minute break every hour, and stop use if you

Caution About High Volume Usage Warning: Exposure to loud noise from any source for extended periods of time

www.motorola.com/hearingsafety (in English only).

may affect your hearing. The louder the volume sound level, the less time is required before your hearing could be affected. To protect your hearing:

- · Limit the amount of time you use headsets or headphones at high volume.
- · Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can't hear people speaking near you If you experience hearing discomfort, including the sensation of pressure or

fullness in your ears, ringing in your ears, or muffled speech, you should stop listening to the device through your headset or headphones and have your hearing checked. For more information about hearing, see our Web site at

Repetitive Motion

When you repetitively perform actions such as pressing keys or entering fingerwritten characters, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. If you continue to have discomfort during or after such use, stop use and see a physician. [lan0109]

FCC Notice to Users.....

The following statement applies to all products that have received FCC approval. Applicable products bear the FCC logo, and/or an FCC ID in the format FCC-ID:xxxxxx on the product label

Motorola has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user's authority to operate the equipment, See 47 CFR Sec. 15.21.

following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(3).

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the ECC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential and, if not installed and used in accordance with the instructions, may cause harmful hody. Source: WHO Fact Sheet 193 interference to radio communications. However, there is no guarantee that Further information: http://www.who.int/peh-emf interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- . Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use & Care

To care for your Motorola phone, please keep it away from:

liquids of any kind Don't expose your phone to water, rain, extreme humidity, sweat, or

other moisture. If it does get wet, don't try to accelerate drying with the use of an oven or dryer, as this may damage the phone. extreme heat or cold

Don't try to dry your phone in a microwave oven

12

Don't expose your phone to dust dirt sand food or other inannronriate materials

cleaning solutions

To clean your phone, use only a dry soft cloth, Don't use alcohol or other cleaning solutions

the ground Don't drop your phone.

Information from the World Health Organization

WHO Information Present scientific information does not indicate the need for any special precautions for the use of mobile phones. If you are concerned, you may want to limit your own or your children's RF exposure by limiting the length of calls installation. This equipment generates, uses and can radiate radio frequency energy or by using handsfree devices to keep mobile phones away from your head and

Disposal of your Mobile Device & Accessories

Caring for the Environment by Recycling This symbol on a Motorola product means the product should not be

disposed of with household waste

Please do not dispose of mobile devices or electrical accessories (such as chargers, headsets, or batteries) with your household waste. Do not dispose of your battery or mobile device in a fire. These items should be disposed of in accordance with the national collection and

recycling schemes operated by your local or regional authority. Alternatively, you may return unwanted mobile devices and electrical accessories to any Motorola Approved Service Center in your region, Details of Motorola approved national recycling schemes, and further information on Motorola recycling activities can be found at: www.motorola.com/recycling

Disposal of your Mobile Device Packaging & Product Guide

Product packaging and product guides should only be disposed of in accordance with national collection and recycling requirements. Please contact your regional authorities for more details.

Privacy & Data Security

Privacy & Data Security Motorola understands that privacy and data security are important to everyone. Because some features of your mobile device may affect your privacy or data security please follow these recommendations to enhance protection of your information:

- . Monitor access-Keep your mobile device with you and do not leave it where others may have unmonitored access. Lock your device's keypad where this feature is available
- Keep software up to date—If Motorola or a software/application vendor releases a patch or software fix for your mobile device that updates the device's security install it as soon as possible Erase before recycling—Delete personal information or data from your mobile
- device prior to disposing of it or turning it in for recycling. For instructions on how to delete all personal information from your device, see your product guide. Note: For information on backing up your mobile device data before erasing it, go to www.motorola.com and navigate to the "downloads" section of the
- consumer Web page for "Motorola Backup" or "Motorola Phone Tools." Understanding AGPS—To provide location information for emergency calls. certain Motorola mobile devices incorporate Assisted Global Positioning System (AGPS) technology. AGPS technology also can be used in non-emergency applications to track and monitor a user's location—for example, to provide driving directions. Users who prefer not to permit such tracking and monitoring should avoid using such applications.

If you have further questions regarding how the use of your mobile device may impact your privacy or data security, please contact Motorola at privacy@motorola.com, or contact your service provider.

Smart Practices While Driving Drive Safe, Call Smart

Check the laws and regulations on the use of mobile devices and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas-for example, handsfree use only. Go to www.motorola.com/callsmart

(in English only) for more information.

Your mobile device lets you communicate by voice and data-almost anywhere anytime, wherever wireless service is available and safe conditions allow. When driving a car, driving is your first responsibility. If you choose to use your mobile device while driving, remember the following tips:

· Get to know your Motorola mobile device and its features such as speed dial and redial. If available, these features help you to place your call without taking your attention off the road.

· Position your mobile device within easy reach. Be able to access your mobile device without removing your eyes from the

road. If you receive an incoming call at an inconvenient time, if possible, let your voicemail answer it for you.

- · Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous | 1-888-390-6456 (TTY/TDD United States for hearing impaired) weather conditions. Rain, sleet, snow, ice, and even heavy traffic can be 1-800-461-4575 (Canada)
