Security and performance

◆To touch the screen of the mobile phone with sharp articles is prohibited. Dust particles and nails may scratch the screen. Please maintain the screen clean. Please remove the dust on the screen with soft cloth gently, so as not to scratch the screen.

◆In thunder raining days, please do not use the mobile phone when charge it or outdoor, so as to avoid being struck by thunder or other injuries.

◆Please do not put the battery in high-temperature environment (high temperature will lead to heat of the battery upgrading), or else it may result in fire or explosion.

◆Please keep the mobile phone being charged and the charger away from people or other flammable and explosive articles in order to avoid fire, explosion or other dangers!

◆Please strictly adhered to the rules and do shut down the mobile phone on occasions which use of mobile phone is prohibited!

Please do not put the mobile phone, battery and charger in the equipment with strong electromagnetic field, such as induction cooker and microwave oven; otherwise it will lead to circuit failure, fire or explosion.

◆Please do not arbitrarily refit the mobile phone, or teardown the mobile phone and accessories without authorization. Improper refitting or teardown easily triggers fire and explosion of the mobile phone. Only the authorized organizations can repair the mobile phone.

◆Please do not use batteries, charger or accessories of non-standard original models.

◆Please do not join the two poles of the battery, so as not to result in battery short-circuit.

◆If the power wire has been damaged (such as the exposed and fractured), or the connector has been loosened, please don't use it, so as to avoid electric shock, short circuit of the charger or fire.

◆The mobile phone should be powered off in the hospital or other places where use of mobile phone is prohibited. Mobile phone will affect proper work of electronic equipment and medical devices, such as pacemakers, hearing aids and other medical electronic equipments. Pacemaker manufacturer proposes to keep the distance between the mobile phone and the pacemaker at least 15 cm, in order to avoid potential interference to the pacemaker by the mobile phone.

◆Please do not use the mobile phone when drive a car. In case of emergency, please use hand-free devices (which may be bought separately); otherwise, please park your car on the road side before making a call.

◆Please do not put the mobile phone on car insurance airbag or region reachable by the airbag after spreading. Otherwise when the airbag expands or ruptures, the mobile phone is likely to cause serious damage to the people in the car due to strong external force.

◆Please keep the mobile phone, battery and charger at place out of the reach of children. Please do not let children use the mobile phone, battery and charger in the absence of adults' supervision.

◆In order to comply with provisions of RF leakage, when you wear a mobile phone or use the data functions of the mobile phone, please maintain the distance between the antenna and the body at least 1 inch (2.5 centimeters).

◆Please power off the mobile phone before cleaning and maintenance. If the mobile phone is connected to the charger, you need to unplug the charger from the power outlet, and disconnect the connection between the charger and the mobile phone in order to avoid electric shock, short circuit of battery or charger.

◆Do not use chemical lotion, scrubbing cleanser to wipe the mobile phone or the charger, otherwise it may damage the components or cause fire. Slightly wet and anti-static soft clean cloth can be used.

◆Please do not throw the old and abandoned lithium batteries into trash can, send them to the designated locations or return them to our company.

◆Please do not charge the mobile phone in environment with much dust, humidity, too high, or too low temperature (the permitted charging temperature range is 0°C~ 40°C), and the power wire cannot be nearby the heating containers.

◆Please do not use the phone to make bold to camera, video and recording that may infract the rights of the copyright owners.

The company will not be responsible for any losses caused by not recording, deleting, destructing or damage of the photos, video and recordings caused by its accessories or software on the use of the functions including camera, video and audio.

◆In the use of network function, if the users download a file with virus, which make the mobile phone cannot be used normally; the company does not undertake any responsibility arising therefore.

Warning: The original manufacturer will not take on any responsibility for the users who are not in compliance with the above advices or improperly use the mobile phone.

Note: The application of value-added services of the mobile phone is provided by relevant service providers. Please refer to the relevant help or providers' notes for detailed information.

Statement: The Company reserves the right to improve the product without making any advance notice, and keeps final interpreting rights on the product performance. The company commits to improve the product quality and gradually launches new versions of products. So if the contents stated in the manual are slightly different from the function, specification or design, please refer to the mobile phone. Such changes are not notified additionally, your understanding is appreciated.

1 Start Using

Battery

The battery is attached with the mobile phone. The battery is not charged when the mobile phone is purchased but can support power on. Please recharge it for use after complete use up the battery for the first three times, which makes this battery easier to achieve the best using state.

1.1.1 Uninstallation and installation of battery

■ Put the back of the mobile phone upward; release the bolts to unlock the cover according to the mark on the back, and then take off the rear cover according to the chat below.

■ Pull the battery out.

■ When installing the battery, insert the metal teeth at the top of the battery into corresponding slot of the mobile phone, and then press the battery down to install the battery in place. The battery must be ensured to be installed before power on.

■ Finally install the rear cover and fix the bolts of the mobile phone.

1.1.2 Charging the battery

When the power of the battery was lower than normal, the phone will prompt battery low. Please charging for the battery, otherwise you will lose the files which not saved. If you don't charge for a long time, the phone will be powered off automatically.

When charging, the battery icon at the right upper corner of the screen will appear in a dynamic rolling manner. During the charging period, the battery, mobile phone and charger will become hot, which is normal a phenomenon.

Warning:

The stated charging temperature ranges from 0°C to 40°C. Please do not use charging equipment if the temperature exceeds the range. Please do use the charger provided by the supplier. Application of unauthorized charger may trigger

danger and breach the mobile phone maintenance warranty.

1.1.3 Use of battery

In actual use, the standby time and talk time of the mobile phone varies with the network status, working environment and different using manners.

SIM card

Your network operator will provide you a SIM card which is the key for your access to the digital GSM network. **Prior to use the phone, you need to insert effective SIM card in the mobile phone.**

All relevant information concerning network connection will be recorded in the SIM card. SIM card can be removed from your mobile phone and be used in any other GSM mobile phone (new mobile phone automatically read SIM card).

In order to prevent loss and damage to the information in the card, you should avoid touching the metal area and keep it away from electricity and magnetic places. SIM card once being damaged, you will not be registered to the GSM network.

Warning:

You must power off the mobile phone before removing the SIM card. Inserting or removing the SIM card is absolutely prohibited when the external power supply is connected, otherwise SIM card and mobile phone may be damaged.

1.2.1 Insertion of SIM card

- Power off the mobile phone, remove the rear cover and battery.
- Insert the SIM card correctly in the card slot; finally install the rear cover and battery of the mobile phone.

1.2.2 Unlock the SIM card

In order to prevent illegal use, SIM card adopts PIN code (personal identification code) encryption protection.

If this function is selected, PIN code should be input correctly each time when you power on the mobile phone, thus to unlock the SIM card for normal use. Users can disarm the SIM card protection but illegal use of the SIM card cannot be prevented.

If the PIN code input is error for three consecutive times, your SIM card will be locked by the network. The mobile phone will enquire the PUK code which will be provided by your network operator. If the PUK code input is wrong for 10 times, the SIM card will be permanently barred.

Note:

Your network operator will set a standard PIN code (4 to 8 numbers) for you and you should change it to private password as soon as possible.

Plug and unplug the Memory card

- Power off the mobile phone, remove the rear cover and battery.
- Open the memory card holder, and insert the memory card into

the slot at the bottom according to the chat below, then close the memory card holder.

Plug and unplug the earphone

Open the USB cover and insert the connector of the earphone to the earphone jack at the right side of the mobile phone. Gently pull out the earphone to remove it.

Status bar and content

In standby screen you can get the information that you need from the indication icons on the screen.

	Indicating the current signal strength of SIM1
	Indicating that the SIM1 is connecting network currently

12	Volume key	Moving up/down in menu list; short press to adjust volume when calling or on

		standby screen.
13	Camera lens	For finding a view with the camera.
14	Speaker	For activating the speaker, you can listen audio or calls in hands-free mode.

1.5.2 Text input and edit window

Enter the text input screen, you can short press the * key to enter the symbols selecting screen; short press the # key to switch input method. There are preset some input methods in your phone; you can select the one which you liked. You can also activate **Options**, to select **Input method** so as to switch the preferred input methods.

2 Dial and answer the call

Making a call

When the network operator's logo appears on the screen, the mobile phone enters into the normal standby state in which you can dial or answer a call. The network signal strength indicator at the top of the screen. The call quality is relatively largely impacted by obstacles. Therefore, movement in a small range can effectively improve the signal strength.

1.6.1 Direct dial

Making domestic call

In the standby screen, input the call numbers (please add the area code for domestic long-distance calls), then press **LSK** to make the call.

Calling extension of fixed number

When calling the extension number of a fixed number, you need to dial the host number and then dial the extension number according to the corresponding voice hints. If you insert "p" between the host number and extension number, the mobile phone will automatically dial the extension number for you.

Making an international call

To make an international call, you simply need to input the symbol “+”, then input the country code and complete phone number that you want to dial.

1.6.2 Making a call from Phonebook

In the Phonebook, select corresponding contact person and phone number press **LSK** or **Snd** key to dial.

1.6.3 Speed dial

In Speed dial, you can separately set number keys 2-9 to set up phone numbers.

On the standby screen, long press the number keys and you can automatically dial the number that has been set up. If speed dial has not been set for the number key you long pressed, the mobile phone will hint you “No speed dial number”.

Answering a call

1.7.1 Answering new call

If there is a new incoming call when in call progress, the mobile phone will pop up caller screen (call waiting is activated) and the mobile phone will give a short prompt to tell you that you have a new call. At this time, you can press **Snd** key or activate **Options** to select **Answer** to answer the new call. When you answer a new call, the original call will enter holding status. At this time, you can activate **Options** to select **Swap** to the original call, and the new call will enter holding status.

Note:

When you are in call progress, the new call to another SIM card can't be dialed in.

1.7.2 Connecting two calls at the same time

When two telephone numbers are connected, activate **Options**, and you can operate as follows:

Swap: switch call.

Conference: when making conference call, you can have a talk

separately with designated conference participant.

End single call: hang up the current call.

End all calls: hang up all the current calls.

Transfer (network support is required): transfer the current call to your designated phone number.

New call: input new phone number to dial.

Phonebook: enter the phonebook screen.

Call history: enter call history screen.

Messaging: edit the message to send it.

Sound recorder: record the current call.

DTMF: on/off settings can be conducted. If the function is activated, when calling the telephone exchange, you can call the extension in accordance with voice clues; the aforesaid functions are unavailable if the function is off.

1.7.3 Conference call

During the conference call, activate **Options**, and you also can operate as follows:

Hold conf. call: hold the current call with members of the conference, then others cannot hear your voice; and the option of **Hold conf. call** changed to **Retrieve conf. call**, select it and you can recover normal conference call.

Split: separate the selected member from the conference call.

Emergency call

In any country using the digital GSM network, if you are in the network coverage area (you can check the network signal strength at the top of mobile phone screen), even without the SIM card, you are also able to make an emergency call.

Inputting the PIN code or unlock the phone unlocking screen, press **SOS** and you can make an emergency call.

Note:

The emergency call numbers in different countries or regions are different. Please refer to the local numbers for specific

emergency service numbers.

3 Main menu structure

In the standby screen, press **OK** key to enter the main menu. Menu Functions Form:

Applications	Phone book	Call center
SNS	Messaging	Services
Organizer	Multimedia	Settings

On the main menu screen, you can press navigation keys to select the menu you want to enter. You can also enter the menu screen through pressing corresponding number keys with the function menu.

4 Applications

For richness your entertainment life, the mobile phone provides you the interesting application. Please get more information in the instructions of the phone.

You can install java file and play in the applications, you also can edit the settings for java.

5 Phonebook

Enter the phonebook screen, input the first letter of name, you can search the accordant records in Phonebook. Select Add new contact to add the contact. When the record is not empty; press **LSK** key to conduct the following operations:

1.40.1 SIM1/SIM2 security

SIM1/SIM2 PIN lock: this function can prevent others from using your SIM card without your permission. After the SIM card PIN code is activated, correct PIN code must be input every time when the mobile phone is powered on; otherwise you can only make emergency call.

Note:

PIN code is the operating password and relative with the SIM card. The SIM card will be locked, if the PIN code is wrong for 3 consecutive times. At this time, you need the PUK code to unlock the SIM card. The PUK code may be provided for you together with the PIN code and the SIM card. If not, please contact your network provider.

Change PIN/PIN2: you can change the password of SIM1/SIM2 PIN and SIM1/SIM2 PIN2 through the system prompts.

1.40.2 Phone security

This function is to lock the phone and prevent other people from using the mobile phone without permission (default password is 0000). After enable the phone lock, you must input the correct password every time powering on the mobile phone, unless the mobile phone cannot be used normally.

You can change the phone lock through the system prompts.

1.40.3 Auto keypad lock

After this function is activated, when the phone is in standby status and without any operation, the keypad will be locked automatically after the set time. Then the standby screen will show keypad locked icon. At the left bottom corner of the screen, word of **Unlock** will appear. If you need to unlock the mobile phone, you can press any key, and then operate according to relevant screen prompts.

1.40.4 Certificate manager

You can view the certificates in Certificate manager.

1.40.5 Private security

Upon entering Private Security, the password input screen appears, where you can enter the security control menu list if you input the correct password (default password is 0000). Then you can select phonebook, messages, call log or file manager to set up the privacy protection. For example: if you have set up privacy protection for the phonebook, when you enter the phonebook, the password input screen appears. You must input the correct password to be able to enter and use the phonebook.

1.40.6 Calls & SMS firewall

Enter calls & SMS firewall, there displays the lists of blacklist and whitelist. You can press left/right navigation key to switch between blacklist and whitelist.

In every sheet, activate **Options**, you can operate as follow: add new, and block settings.

1.40.7 Phone control

12.6.7.1 SIM binding

In SIM bonding, you can see the menu as below.

Activation: you can set the SIM bonding function on/off. The default password is "0000".

The SIM binding function is offered to help end user to find his phone just in case it has been lost or stolen. In fact, is previously activated, the SIM binding function shall be able to recognize a different SIM card inserted in the phone and immediately alert by SMS the 5 trusted numbers previously set in the phone.

If a not bound SIM card is inserted on SIM1 or SIM2 slot, the phone shall display the "Input phone password" popup. The default password is "0000".

- If the password is correctly inserted, the phone shall starts regularly, but a popup should advise the user the SIM card is

changed: “SIM card is changed. Do you want to bind it?”
Choosing “Yes”, the current SIM cards will be bound replacing the old ones; Choosing “No”, the old binding will remain active.

- If the password is wrongly inserted, the phone shall start and provide the “new” user all the functionalities except the “SIM binding” menu. In the meantime, one alert SMS (Attention: this phone number is using your mobile phone IMEI: XXXXXXXXXXXXXXXX) shall be sent to all the set notification phone numbers set in the menu.

Every time the power on password is wrongly inserted, the phone shall continue to send SMS out. If SIM1 has no money or is out of range, SIM2 shall provide to send alert SMS out. If the SMS is not correctly sent out for any reason, the phone shall attempt to send the SMS out periodically, until the SMS is correctly sent out.

12.6.7.2 Remote control

In Remote control, you can see the menu as below.

Activation: you can set remote control function on/off. The default password is “0000”.

The Remote control function is offered to provide end user the possibility to manage some phone functions remotely from another phone able to send SMS out. Using this function, end user can, when he has not the phone with him, forward calls, power the phone off, activate the answering machine. Once the Remote control function has been activated and one or more trusted numbers have been inserted, the phone shall be ready to accept command from remote authorized phone numbers.

Using the remote control command can achieve the function below:

Function	Content of order (e.g. Receiving number is “123456789”)
Forward calls	*#CALLFWD*#123456789

Power off the phone (and activate the phone password at power on)	*#SHUTDOWN*#
---	--------------

Note: the SMS text content should be not “case sensitive”. So the following text shall have exactly the same function:

- ***#CALLFWD*#123456789**
- ***#callfwd*#123456789**
- ***#Callfwd*#123456789**
- ***#CallFwd*#123456789**

12.6.7.3 Trusted numbers

Here you can set 5 numbers to realize SIM banding, remote control functions.

Restore factory settings

Enter into the restore factory settings, the mobile phone will prompt you to input password (default password is 0000). You can carry on corresponding operation after inputting the correct password.

After running the Restore factory settings, the environment setup (e.g. user profile) restore to factory default setting.

After running the Restore settings and data, the phone clear up the messages saved in phone while the environment setup (e.g. contact person and SMS that saved in phone) restore to factory default setting.

Misc. settings

1.42.1 UART settings

This option can be activated for either SIM1 or SIM2. With this option, you can choose the access of PC software to SIM1 and SIM2.

13 Other Functions

Mass Storage Function

The mobile phone supports Mass Storage function. Insert the Memory Card in the mobile phone; connect the mobile phone and

PC with the attached USB cable, then the mobile phone becomes a mass storage. If you connect USB cable to PC under the power on status, according to tips you can select **Mass Storage** to enable USB mass storage function or select **Back** to maintain the power on status, and charge the mobile phone.

Webcam Function

In power on status, connect the phone to PC through USB cable and select **Webcam**, the Webcam function is activated, you can do the video chat with other person.

Requirements on PC configuration for use of webcam function:

1. The PC's operation system is or newer than Windows XP SP2.
2. The tools for video chat need to be installed.
3. Internet network connection is smooth.

Other descriptions:

1. This function supports plug-and-play function.
2. The actual refresh rate of video chat is related with Internet network speed, instead of the reasons of the mobile phone.

COM port

In power on status, connect the phone to PC through USB cable and select **COM port**; you can synchronize your phone with PC. Details about the related tools, please consult with Customer Service Center.

14 Common Questions

The mobile phone cannot be powered on

- The mobile phone cannot be powered on since the battery voltage is too low. Please recharge the battery.

Unable to make some calls

- Call barring has been set and barred utilization of the mobile phone. Please check and cancel call barring.

Other person is answering my call

- The mobile phone has been set into divert your calls to another phone number. Please check and cancel call divert.

The mobile phone cannot search for the network

- The mobile phone is outside of the network coverage area (or there are physical obstructions between the mobile phone and the transmitter), and calls cannot be made or answered.

If you are in one room, please move close to the window.

In the operation process, the mobile phone may display the following operating tips:

“Please Insert SIM”

- You must insert the SIM card before using the mobile phone. If the SIM card has been inserted, please get it out and wipe clean with a dry cloth on the golden region, and then insert the SIM card.

“Emergency”

- You are outside the network coverage area of the service provider. But another network area where you locate allows you to make emergency call according to the signal strength.

“Invalid SIM”

- The SIM card of the mobile phone is locked and the inserted SIM card is unable to be accepted. Please insert the correct SIM card or contact with the vendor.

“Please Enter PUK”

- The SIM card has been locked since the wrong PIN code has been inputted for three times. You must consult your network provider for special PUK code with eight numbers to unlock the SIM card (The PUK code may have been provided with your PIN code at the same time).

Warning:

The SIM card will be permanently locked if you input the wrong PUK code for ten consecutive times and you must apply for a new SIM card from your network provider.

15 Maintenance Guideline

Welcome to use R23. If there is a problem when you using the

mobile phone, please contact with the vender or consult the local maintenance center. If your mobile phone is in need of repair, you can take your mobile phone to local maintenance center, if there is no local maintenance center, please pass your phone and the purchasing invoice to the vendor.
