User Manual
Verykool i122

Welcome!

PLEASE READ THIS INFORMATION PRIOR TO USE IN ORDER TO PROPERLY OPERATE YOUR PHONE. WE ARE NOT RESPONSIBLE FOR ANY DAMAGE DUE TO YOUR FAILURE TO UNDERSTAND THIS INFORMATION AND ANY SUBSEQUENT INCORRECT ACTIONS.

We reserve all rights to revise and change the description of this product and its software as well as this user's manual without any obligation to notify anyone of these revisions and changes.

The manual is for your better use of this phone and does not constitute an approval of any accessories. All the pictures in this manual are for reference only. There may be slight difference between the appearance of phone and keys and contents of display used in this manual and those of your phone. Please refer to your phone for the actual situation. Some features introduced in this manual are network or subscription-dependent features. Please contact your service provider.

Contents

1. Safety Information

Caution: Using your mobile device inappropriately may result in personal injury or your device not complying with local laws.

Battery:
Keep away from conductive materials. Connect the exposed terminal. A short circuit may result in property damage, bodily injury or burns. To avoid risk of leaking electricity, take care when handling a charged battery particularly when placing it inside your pocket, purse or any other container with metal objects.

Keep your mobile phone away from water:
Keep your mobile phone away from water, liquids, etc.

Use while driving
Always obey the laws and regulations concerning the use of mobile phones in the area where you drive.

Aircraft
Please power off your mobile phone before boarding an airplane.

Blasting areas
Always obey the relevant limitations and regulations and do not use your mobile phone in blasting areas. Turn off your mobile phone in areas posted with a "turn off electronic phones" notice.

Potentially explosive atmospheres
Turn off your mobile phone in the gas station and areas near fuel and chemical containers. Turn off your mobile phone in areas posted with a "turn off electronic phones" notice.

Medical phones
Turn off your mobile phone whenever instructed to do so by posted signs near any medical equipment. Mobile phones may interfere with pacemakers, hearing aids and some other medical transplant equipment. Do not put your mobile phone near pacemakers or carry it in the breast pocket.

Accessories and battery
Use accessories, batteries and chargers approved by the manufacturer. Use of batteries not approved by manufacturer may cause injury.

Emergency calls

Turn on your phone and keep it on in service areas, and dial emergency phone numbers, and then press send key to make a call.

When losing your phone
To avoid any financial loss, please notify the Network provider to lock your SIM card if you lose your phone. When you inform the service provider to lock your SIM card they need to know the IMEI No. of your phone, which you can find printed on the label on the back of your phone, when you remove the battery. Please make a note of this number for future needs.
For safety considerations, you can take preventative measures such as setting a PIN Code for your SIM card to prevent other persons using your SIM card without your permission.

Keep away from children
Keep the phone, battery and charger away from children to avoid any personal injury.

2. Use and Care

To care for this mobile phone, keep it away from:

Any kind of fluid
Keep the phone away from water, rain, humidity, sweat or other moisture.

Extreme heat or cold
Avoid temperatures below -10℃/14℉ or above 45℃/113℉.

Microwave
Don't try to dry your phone in a microwave oven.

Dust and dirt
Don't expose your phone to dust, dirt, sand, food or other inappropriate materials.

Cleaning solutions
Use only a dry soft cloth to clean your phone. Don't use alcohol or other cleaning solutions.

Ground
Don't throw your phone or allow it to fall on the ground.

3. Essential

3.1 Install the SIM card

Keep your SIM card away from children.

Please consult your SIM card provider about the services and usage. The SIM card provider can be the service provider, network provider or others.

Note: Turn off your mobile phone and disconnect it from the charger or any other phone before removing the battery cover. Place the cover on the phone before storing and using your mobile phone.

1，Remove the battery cover:

Press and push the battery cover upward letting it slide down the phone, and then remove the battery cover.

2，Insert the SIM card into the card slot.

Now you can see two card slots side by side. Please insert the SIM cards in the right direction per the chart.

3.2 Battery Use and Installation

Battery tips

Battery life depends on the network, signal strength, temperature, and accessories you use.

Always use original batteries and chargers. The warranty does not cover damage caused by non-original batteries, chargers and/or accessories.

New batteries or batteries that were stored for a long time may take more time to charge.

When charging your battery, keep it at room temperature.

When storing your battery, keep it uncharged in a cool, dark, dry place.

Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F).

Never dispose of batteries in a fire because they may explode.

Battery installation

1. Slide the battery cover down and then remove it.

2. Aim the metal terminals of the battery in the direction of those in the battery slot and then push down on it.

Battery charging:

Open the protective cover on your phone's connector port, then insert the battery charger plug into the port on the side of your phone, and plug the other end into an electrical outlet. It might require several hours to charge fully. When your phone is powered off, it might take a few seconds to show the charging display, and it will indicate that the charge is complete when finished. When your phone is connected, the battery icon flickers when it starts charging and becomes still with full bars in the battery icon when finished. Your phone might heat up while charging, which is normal.

3.3 Memory Card

You can use the removable memory card with your phone to store information.

 Caution: Don't bend or scratch your memory card. Keep it away from static electricity, water, and dirt.

Insert the memory card into the slot.

3.4 Turn it on/off

Caution: When powering on, the phone may ask you to enter SIM card PIN code to unlock the SIM card. If your phone shows the Input PUK code, this means your SIM card is locked, please contact your service provider. Press and hold the power on/off key for two seconds to power on your phone. If prompted, enter your four-to-eight-digit SIM card PIN code and/or four-digit unlock code.

If you haven't inserted a SIM card, your phone will display Insert SIM. None of the functions related to the SIM card can be used, and you can make an emergency call only.

To turn off your phone, press and hold the power on/off key for two seconds.

3.5 Make a call

Note: For Dual-SIM models, please select SIM1/SIM2 before proceeding

1. On the Idle Screen, input the telephone number directly.
2. After inputting the number, press the dial key corresponding to the SIM card to make a call.
3. After calling, select Option-End or press the **power on/off key** to end the call.

3.6 Answer or reject a call

When there is an incoming call, the phone rings and / or vibrates showing the number or the corresponding name.

Not any key: Press the dial key to answer a call.

Any key: Except for the power on/off key and right soft key, press any key to answer a call.

Earphone mode: When plugging in the earphone, you can answer a call using the earphone. When it is not convenient for you to press the key, you can turn on the auto-answer mode (only in earphone mode), making certain that the earphone is plugged in. Your phone auto-answers a call 5 seconds after it rings and/or vibrates.

3.7 Operation during a call

Press Option to perform an operation during a call.

Hold Single	Hold this call.
End Single	Hang up and end this call.
New call*	Enter a new dialing display to make a new call.
Phone Book	Enter the phone book menu.
Messages	Enter the messages menu.
Sound Recorder	Start the recorder during calling.
mute	Set mute on or off. When setting mute on, your voice cannot be heard on the line.
Swap*	Switch between the current call and call holding.
Conference*	You can add additional parties to a call.
DTMF	Send DTMF tone.

Note: Menus marked with * must be supported by your SIM card. For details, please contact your service provider. Only when two or more calls are occurring, can the Swap and Conference & support by SIM1 functions operate.

3.8 Insert international access code

When dialing an international call, press the * **key** until the international call prefix "+" is

displayed and then enter the number in the following order:

+ Country code dial number

3.9 Emergency calls

You can make emergency calls when your current location is within network coverage, which you can determine by checking the signal strength bar displayed on the top left corner of the screen.

Note: Emergency numbers vary by country. The emergency number(s) in your phone may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

4. Basic

4.1 Display

"Idle" is displayed when you turn your phone on:

"Idle" mainly includes the Clue icon area, Letter area and Application area.

Icons Display area

Malfunctions & Appropriate Measures

Here are listed any malfunctions that may occur and the appropriate measures to take. If these measures cannot solve the problem, please contact authorized after service center. Thank you!

Can't turn the phone on
- Check the battery installation, and install the battery correctly
- Check if battery level is low, and change the battery
- Check if the PIN code is entered correctly, 3 times in a row. If yes, the phone is locked, then you should enter PUK code(please contact your network provider for the PUK code)

SIM Card Void

When the phone displays "SIM Card Void", you can try the following:
- Power the phone off and then restart to solove the problem.
- If your SIM card is a prepaid card, check whether the card has insufficient funds.
- Please contact your network provider, and when you are refused registration in the network for other reasons.

Weak signal or no signal
- You may be in a location where the reception is bad, please relocate and try again.
- You can try to turn around slightly or going to the window if you are in a room.

Poor talking quality
- Weak signal, you can try the solutions above.
- Low battery, change to a new battery or charge the battery.
- Use the up volume key to adjust speaker volume.

Can't make a call
- Check if you have entered the correct number and then press the send key.
- Check if you have set the call barring, and, if yes, cancel it.

Can't receive calls
- Check if your phone is turned on.
- Check if the screen indicates there is no signal, and, if yes, try the solutions above.
- Check if you set call barring, if yes, cancel it

Screen is dark
- Check if battery is low, and change the battery or charge the battery.
- Adjust the brightness in settings.
- Your phone may be affected with by dampness, keep it dry.

Tips: if all suggestions and solutions do not solve your problem, please contact an authorized service center. Please do not disassemble or repair your phone without professional guidance.

Specific Absorption Rate Data

This model meets international guidelines for exposure to FM Radio waves.

Your mobile phone is a FM Radio transmitter and receiver. It is designed not to exceed the limits for exposure to FM Radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The ICNIRP SAR limit for mobiles phones used by the general public is 2 W/kg.

As SAR is measured utilizing the phone's highest transmitting power, the actual SAR of this

phone while operating is typically below that indicated above. This is due to automatic changes to the power level of the phone to ensure it only uses the minimum level required to reach the network.

New phones must meet the international guidelines before entering the market. The highest SAR value for this phone when tested at the ear was 0.85 W/kg and the lowest tested SAR value is 0.44 W/kg.

Information from the World Health Organization

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of SAR Data mobile phones. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a "hands-free" phone to keep the mobile phone away from the head and body. Improvement of this phone may cause a little change of the SAR data. However, the phone is designed in accordance with the guidelines in any case.

Battery Tips

- The phone is provided with a reusable rechargeable battery.
- The new battery only needs to be charged and discharged two or three times fully to achieve optimum performance.
- The battery can be recharged many times for repeated use, but it will eventually be exhausted. When the talk and standby time is significantly shorter than usual, then it is necessary to replace the battery.
- Use on a battery which the handset manufacturers have approved, and only use an authorized charger to charge the battery.
- Unplug the power supply when you are not using the charger.
- Do not connect the battery to the charger for more than one week, charging the batter for a long time will affect the battery life.
- Storing the battery for too long will affect the battery. And the battery will automatically discharge, when it is not used for a long time.
- Do not use a damaged battery or charger.
- Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F).
- Always take your phone with you when you leave your vehicle.
- It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.
- Do not let the batteries short-circuit. When metal objects (such as: coins, etc.) are directly connected to the battery anode and cathode (with the metal side), an accidental short-circuit will occur. You should be particularly careful when carrying a spare battery in your pocket or handbag. Short-circuits will damage the battery.
- Please dispose of used batteries according to the relevant regulations.
- Never dispose of batteries in a fire because they may explode.

Product Maintenance

Your phone is a product having outstanding design and superior quality. Please take good care of it, when using it. You are strongly suggested to follow the following advice which should help you comply with the warranty conditions and extend the usage period of the product.

- Keep your phone and its parts away from children.
- Keep your phone dry. Keep it away from rain, dampness or any kind of fluids.
- Don't touch your phone with wet hands when charging as this may cause bodily injury or damage to the phone.
- Keep your phone away from extreme heat which can shorten your phone's life, damage the battery, and twist or melt some plastic parts.
- Keep your phone away from extreme cold because when the temperature goes up, water vapor accumulated inside the phone may damage the electronic circuit.
- Keep your phone away from dust and dirt.
- Keep your phone away from ignited cigarettes, fire or heat source.
- Don't disassemble your phone by yourself.
- Don't drop, beat or shake your phone. Any rough handling can damage the inner electronic circuit board.
- Don't drop your phone because it could jam the earpiece, microphone or any other removable part and disable your phone.
- Clean the camera lens or screen with neat, soft and dry cloth. Don't use alcohol or other cleaning solutions.
- If your phone, battery, charger or parts are not working, please take them to an authorized service center for assistance.
