Frequently Asked Questions

1.) How do I lock/unlock the phone?
a. To lock: Press and hold the **Lock** icon to immediately lock the phone.
b. To set auto-lock timing, go to **Settings**> **Security settings**> **Phone Security**> **Auto Keypad lock** and choose 5 sec, 30 sec, 1 min or 5 mins as desired.
c. To unlock, press and hold the **Lock** icon for a few seconds.

2.) How do I activate the silent mode?
Go to **User Profile** and then tap the **Silent** option to activate the silent mode.

3.) How can I set WAP/GPRS to access the Internet?
To set WAP/GPRS for Internet access:
a. Go to Connectivity and tap the **Data Account** icon.
b. Select the desired Data account or add new account from **Options**.
c. Select **SIM1** or **SIM2** (applicable when two SIM cards are inserted).
d) Next, go to **Connectivity**> **Internet Services**> **Settings** and set the homepage and other preferences for Net browsing.

4. How can I set MMS for sending multimedia messages?
To configure MMS setting for Multimedia messages:
a. From the main menu, go to **Messages**>**Message Settings**.
b. Select **Multimedia message**.
c. Select **SIM1** or **SIM 2** (applicable if both the SIMs are inserted).
d. Select **Data Account**.
e. Select the MMS profiles listed by your network provider.

7

---

5. Is there a facility to blacklist specific numbers?
Yes, you can blacklist a list of numbers so that you do not receive calls from them.
a. From the main menu, go to **Settings** .
b. Select **Call settings**> **Advanced Settings**.
c. Select **Blacklist**> **Add Blacklist Numbers** and add the desired numbers.
Note: Your blacklist status needs to be ON to block calls from these numbers.

6. Is there a facility to receive calls from specific numbers only?
Yes, you can add a list of numbers to your whitelist so that you receive calls from these numbers only. To whitelist a number:
a. From the main menu, go to **Settings**.
b. Select **Call settings**> **Advanced Settings**.
c. Select **Advanced Settings**> **Whitelist** and add the desired numbers.
Note: Your whitelist status needs to be ON to receive calls from these numbers. If both your blacklist and whitelist contain the same numbers, and both are turned on, you will still receive their calls.

7.) Is there a security code to lock/unlock the phone?
Yes. The default security code to unlock the phone is 0000. To change the security code:
a. Go to **Settings** > **Security settings** > **Phone security**> **Change Password**.
b. Input the default code (0000) and then the new code to change the security code.

8

---

8. Is there a facility to track my mobile phone?
You can track your phone in case of loss or theft by activating the Theft Tracker mode and configuring an alternate number for receiving messages from the unauthorized user's SIM. .
a. From the main menu, go to **Menu**> **Settings**> **Security Settings**> **Theft Tracker**.
b. Input the password. Default is 0000.
c. Enable Theft Tracker mode and enter the number for receiving the messages from the lost mobile's SIM card.

9. Can I secure Privacy for messages, phonebook and call logs?
a. Go to **Menu**> **Settings**> **Security Settings**> **Privacy Protection**
b. Enter the default password **0000** to set the privacy protection.
c. Tap **Protected objects** and select the desired objects to protect and save the choice. Each time you access the protected feature such as messages, phonebook and call logs, you will be asked for the password.
Note: You can also change the default password to a password of your choice. The new password will be required to access the protected objects (messages/phonebook/call logs).

10. Can I Lock my SIM from Unauthorized Use?
The mobile phone allows you to lock your SIM(s) from unauthorized use.
1.Go to **Settings** > **Security settings** > **SIM1/SIM2 Security**> **PIN Lock**.
2.Set the SIM lock status to **ON**.

9

---

3. Change the SIM password by providing the correct old PIN and the desired new PIN.

Each you switch on the mobile with the SIM, you need to provide the SIM access code you had set, thus preventing unauthorized use. The default password to use this feature is 0000 (You can change this as required)

Safety Guidelines

Please read these simple guidelines. Not following them may be dangerous or illegal.

SAR Information
- Your phone is designed not to exceed the limits of emission of radio waves recommended by international guidelines.
- SAR (specific absorption rate) is the unit of body-absorbed RF energy when the phone is in use.
- The Highest SAR value of the handset is 0.963 W/kg @1g (head) and 1.100 W/kg @ 1g (body).

SAR Recommendations
- Please keep your calls short and use SMS whenever convenient. This advice applies especially to children, adolescents and pregnant women.
- Prefer to use your cell phone when the signal quality is good.
- People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.

Safe Driving
- Do not use the phone while driving. When you have to use the phone, please use the personal hands-free kit.

10

- Please put the phone safely in the phone stand. Do not put it onto any passenger seat or any place from which it may fall down in case of vehicular collision or emergency braking.

Unsafe Areas
- Please turn off your phone when you are close to a gas station or in the vicinity of any place where fuel and chemical preparations, or any other dangerous goods are stored.

During Flight
- Flight is influenced by interference caused by the phone. It is illegal to use a phone on the airplane. Please turn off your phone during a flight.

In Hospitals
- Your Phone's radio waves may interfere with the function of inadequately shielded medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external RF energy. Switch off your device when regulations posted instruct you to do so.
- To avoid potential interference with implanted medical devices such as a pacemaker or cardioverter defibrillator:
- Always keep your phone at least 15.3 centimetres (6 inches) from the medical device.
- Do not carry the wireless device in a breast pocket.
- Turn off the phone if there is any reason to suspect that interference is taking place.
- Follow the manufacturer directions for the implanted medical device.
- If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

11

Taking Care of Your Device ⚠

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery without turning on the device, wipe it with a dry cloth and take it the service center.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components may get damaged.
- Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.
- Do not attempt to open the device other than as instructed in this guide. Repairing this phone by yourself other than our authorized service agents/centers goes against the warranty rules.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of the device.
- Do not store your device near magnetic fields or allow your device to come in contact with magnetic fields for extended period of time.
- Use manufacturer approved batteries, chargers, accessories and supplies. Micromax will not be held responsible for user's safety when using unapproved accessories or supplies.
