Need Add below in safety column

SAR

The highest SAR value for this mobile phone is < 1.6 W/Kg, in accordance with the requirements of the ICNIRP, which recommended the limit for exposure to radio waves is 1.6 watts/kilogram (W/kg) averaged over 1 gram of tissue. For more information, please visit (website) to query

SAFETY TIPS

Use of wireless hands-free system (headphone, headset) with a low power Bluetooth emitter.

Make sure the cell phone has a low SAR.

Keep your calls short or send a text message (SMS) (instead.

This advice applies especially to children, adolescents and pregnant women.

Use cell phone when the signal quality is good.

People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.

Please read the instruction file first

Before you use this phone, please read all the safety cautions in the instructions in detail, to ensure safety and correct use.

- *The descriptions are based on the default settings*
 - *The pictures and screen shots may different from the actual product.*
 - *The phone with sound resource, wall paper and picture are permitted to use limited in Intex or among all the owners.*
- Against the commercial and other reason to extract and use these file will violate the copyright law. Intex is not responsible*

for this behave of right violation.

- *Receive and send message, upload and download, automatic synchronism or GPRS service may cause other kinds of fee. If you want to avoid the extra fee, choose the probable charging plan. Any relevant information, please contact the service supplier.*
- *To the unknown software, be careful when install, the strange website pop up when browsing the internet, you can click but better to avoid the operation or the phone will be poisoned.*
- *Please properly keep this instruction book for the future reference.*

Mobile phone parts diagram

1 Install

1.1 Install the SIM card or USIM card and battery

1, If the phone is on power, please turn it off, press the power off key->choose power off->confirm to turn off the phone, take off the battery

2, Take off the battery, put the SIM card into the corresponding card slot

3, Put back the battery and battery cover

1.2 Battery charging

- *When using the phone at the first time, need to charge for the phone, can use charger or connect the phone with the computer via data cable.*
- *The phone will issue warning tone and display electricity shortage information when low battery, the battery icon will turn red, moreover, the phone will turn off automatically when electricity is too low. Need to charge then you can use the phone.*
- *If the battery is power off, can't turn on the phone immediately even connect to the charger, before you turn on the phone, please charge for several minutes.*
- *When charging with the charger, Please put the small end plug of the charger into the mobile phone in the multi-function socket, put the big end into the standard*

power socket, be attention the improper charger connection will lead to serious damage to the phone, to the damage caused by disoperation, will not guarantee to repair.

- Can use the phone when charging, but thus will influence the charging time of the phone, the phone may get hot when charging, this is normal phenomenon, do not affect the using life and performance.
- When the batteries get full electricity (battery icon doesn't move), please disconnect the charger and the phone, and take down the charger from the socket. Do not take off the battery when charging, this might damage the phone.

Reduce battery loss

If launched automatic synchronization, Bluetooth function or WLAN function in the background, the battery will consumes faster. If you want to save electricity, please shut down unnecessary application. You can also reduce background light time and the brightness of the display screen, or press the power off key to switch over to sleep patterns.

1.3 Insert the storage card

If you want to store more multi-media file, you should insert storage card, the biggest storage card can be used in this phone is 32GB (depending on the storage card manufacturer and category)

Karbons use the public storage card industry standard, but some brand may can't compatible with the phone, if use incompatible storage card might damage the phone and storage card, and also damage the data in the card.

Install the storage card:

1, Take down battery cove and battery, insert the storage card into the phone, and let the golden electric shock surface downward.

2, Push the storage card into the socket until it lock in place.

3, Put back the battery and battery cover.

1.4 Remove the storage card

Before you remove the storage card, please uninstall for safely remove.

1, Under standby pattern, setting>storage>uninstall SD card>confirm

2, Take down the battery cover and battery.
