2) Click on the thumbnail to view videos.

Chose the thumbnail of the picture, press the Menu key, you can share, delete, and view the detailed information of the video.

Google apps

Signing In to Your Google Account

Signing in to your Google Account lets you synchronize Gmail/Google Mail, Calendar, and Contacts between your phone and the web. You also need to sign into a Google Account to use Google Apps such as

Google Talk™ and Player Store. When you turn on the phone for the first time, you are given the option to sign in to your Google Account.

- 1. In the Setup accounts screen, tap Google account > Yes > Next.*
- 2. Tap Sign in. Enter your user name and password, and then tap Sign in. After signing in, all emails, contacts, and calendar events on your Google Account will automatically synchronize with your phone.*

Using Gmail/Google Mail

Gmail/Google Mail is Google's web-based email service. Gmail/Google Mail is configured when you first set up your phone. Depending on

your synchronization settings, Gmail/Google Mail on your phone is automatically synchronized with your Gmail/Google Mail account on the web.

To open Gmail/Google Mail

Folder (or Label) and number of unread email messages.

Unread messages are displayed in bold. Starred message. Tap to add or remove the star.

Message label Actions for checked email(s). This will not show, if there is no item selected in the inbox.

Select one or more emails to apply an action.

The Inbox conversations list (here in after referred to as Inbox) is your default Gmail/Google Mail view. All your received emails are delivered to your Inbox.

To refresh Gmail/Google Mail

Press menu and then tap refresh to send or receive new emails and to synchronize your emails with your Gmail/Google Mail account on the web.

To create and send an email

- 1. In the Inbox, press menu and then tap Compose.*
- 2. Enter the message recipient's email address in the To field. If you*

are sending the email to several recipients, separate the email addresses with a comma. You can add as many message recipients as you want.

3. Enter the email subject, and then compose your email.

4. After composing your email, tap *Send*.

To add a signature to emails

You can add a signature to email messages that you send.

1. In the *Inbox*, press menu and then tap *Settings > Signature*.

2. Enter your signature in the text box, and then tap *OK*.

5.2.3.3 *To view you're sent messages*

In the Inbox, press menu and then tap View labels > Sent 

Receiving and reading emails

Depending on your notification settings, the phone plays a ring tone,

vibrates, or displays the email message briefly in the status bar when you receive a new email.

Gmail/Google Mail groups each message you send with all the responses you receive. This conversation list continues to grow as new replies arrive, so you can always see your messages in context. Conversations are also referred to as message threads. A new message or a change to the subject of a current message will begin a new thread.

Using Google Maps

Google Maps lets you track your current location, view real-time traffic situations, and receive detailed directions to your destination. It also provides a search tool where you can locate places of interest or an address on a vector or aerial map, or view locations in street level.

To enable Location source

Before you open Google Maps and find your location or search for places of interest, you must enable My location sources.

1. Press home > menu and then tap Settings > Location & Security.

2. *Select Use wireless networks.*

To find your location on the map

Open the map, automatically locate your location.

Searching for places of interest

1. *On the Google Maps screen, press Search.*

2. *Enter the place you want to search in the search box. You can enter an address, a city, or type of business or establishment (for example, museums in London).*

3. Tap search. The search results are displayed on the map.
4. Tap the callout to show the Address, Details (if available), and Reviews (if available) for the search item.

Viewing maps

While viewing a map, take advantage of the following zoom and navigation techniques.

To zoom in or out on a map

Tap  to zoom in; tap  to zoom out.

To change map modes

When viewing a map, you can switch to another map mode. Select from Traffic, Satellite, Terrain, and Latitude.

Using Google Latitude (Available by Country)

Google Latitude™ user location service lets you and your friends share locations and status messages with each other. It also lets you send instant messages and emails, make phone calls, and get directions to your friends' locations.

Your location is not shared automatically. You must join Latitude, and then invite your friends to view your location or accept their

invitations.

Opening Latitude

While viewing a map in any mode, press menu and then tap Latitude.

Sharing your locations

After you join Latitude, you can start sharing your locations with your friends. Only friends that you have explicitly invited or accepted can see your location.

Using Player Store

Player Store provides direct access to useful applications and fun games which you can download and install on your phone. Player Store also allows you to send feedback and comments about an application, or flag an application that you find objectionable or incompatible with your phone.

Settings

Customization

You can set Theme to Default or Slicer and set Wallpaper from Gallery, Live wallpapers and System Wallpapers.

SIM management

You can choose to use the SIM1 or SIM2, or both of them. If you insert one SIM card, just the one would be choice.

SIM Information

Tap check box to choose enable or disable a SIM card, or tap a SIM card to change its information.

Default SIM

You could choose which the default SIM card is when you have a voice call, video card, sending a message or connection.

General settings

You could change roaming settings or associate contacts with a specific SIM.

Wireless & networks

Your phone's networking capabilities allow you to access the Internet through GPRS or Wi-Fi.

Airplane mode

The place where you cannot use the wireless signal, such as aircraft, you have to turn off or turn on fly Mode. Turn flight mode, the title bar would have the icon  and have notifications.

Wi-Fi

Wi-Fi provides wireless Internet access over distances of up to 100 feet (100 meters). To use Wi-Fi on your phone, you need access to a wireless access point or “hotspot”.

Turning Wi-Fi on and connecting to a wireless network

1. Tap *Settings > Wireless controls*.
2. Select the *Wi-Fi* check box to turn *Wi-Fi* on. The phone will scan for available wireless networks.
3. Tap *Wi-Fi settings*. The network names and security settings (*Open network* or *Secured with WEP*) of detected *Wi-Fi* networks are displayed in the *Wi-Fi networks* section.
4. Tap a *Wi-Fi* network to connect. If you selected an open network, you will be automatically connected to the network. If you selected a network that is secured with *WEP*, enter the key and then tap *Connect*.

Checking the wireless network status

You can check the current wireless connection status from the following:

Status bar

When your phone is connected to a wireless network, the Wi-Fi icon  appears in the status bar and tells you the approximate signal strength (number of bands that light up). If Network notification in Wi-Fi settings is enabled  this icon appears in the status bar whenever the phone detects an available wireless network

within range.

Wi-Fi networks

On the Wireless controls screen, tap Wi-Fi settings, and then tap the wireless network that the phone is currently connected to. A message box will be displayed showing the Wi-Fi network name, status, speed, signal strength, and more.

To connect to another Wi-Fi network

On the Wireless controls screen, tap Wi-Fi settings. Detected Wi-Fi networks are displayed in the Wi-Fi networks section.

Tips: To manually scan for available Wi-Fi networks, on the Wi-Fi settings screen, press menu and then tap Scan.

Tap another Wi-Fi network to connect to it.

Bluetooth

Bluetooth on your phone operates in three different modes:

- On. Bluetooth is turned on. Your phone can detect other Bluetooth-enabled devices, but not vice versa.*
- Discoverable. Bluetooth is turned on, and all other*

Bluetooth-enabled devices can detect your phone.

- Off: Bluetooth is turned off. In this mode, you can neither send nor receive information using Bluetooth.*

Turning on Bluetooth and making the phone discoverable

1. Tap Bluetooth Settings.

2. Select the Bluetooth check box to turn on Bluetooth. When on, the Bluetooth icon appears in the status bar

3. Tap Bluetooth settings, then tap Discoverable to chose how long the phone discoverable to other Bluetooth devices

that are within range, never, in 2 minutes or forever.

USB Tethering

You can tether your phone to your computer with a USB cable, to share your phone's internet connection with your computer.

Portable Wi-Fi hotspot

You can turn your phone into a portable Wi-Fi hotspot, to share your phone's internet connection with one or more computers or other devices.

VPN Settings

From your phone, you can add, set up, and manage virtual private networks (VPNs) that allow you to connect and access resources inside a secured local network, such as your corporate network.

Mobile Networks

You can set mobile networks related options such as Data usage, Network Mode, Access Point Names and Network operators in Mobile Networks.

Call settings
