Legal Notices

All rights reserved. Reproduction, transfer, distribution or storage of part or all of the contents in this document in any form without the prior written permission of VIDEOCON is prohibited.

VIDEOCON operates on a policy of continuous development. VIDEOCON reserves the right to make changes and improvements to any of the products described in this document without prior notice.

Under no circumstances shall VIDEOCON be responsible for any loss of data or income or any special, incidental, consequential or indirect damages howsoever caused. The contents of this document are provided as it is. Except as required by applicable law, no warranties of any kind, either deselected or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose, are made in relation to the accuracy, reliability or contents of this document. VIDEOCON reserves the right to revise this document or withdraw it at any time without prior notice.

The availability of particular products may vary by region. Please check with VIDEOCON Executive.

Software Update Information

To enhance device performance, we recommend that you get in touch with the nearest VIDEOCON Authorized Service Center, regarding the availability of updated firmware for your device. Please see the enclosed Service Center Directory for the VIDEOCON Authorized Service Center nearest to your location.

Disclaimer

Some applications accessible through your mobile belong to third parties and are protected by patent, copyright, trademark and/or other intellectual property laws. Those applications are provided solely for your personal non-commercial use. You may not use any application in a manner that has not been authorized by the application owner or provider.

Without limiting the foregoing, unless expressly authorized by the applicable content owner or service provider, you may not modify, copy, republish, upload, post, transmit, translate, sell, create derivative works, exploit, or distribute in any manner or medium any content or services displayed through this device.

"Third party content and services are provided "as is". VIDEOCON does not warrant content or services so provided, either expressly or impliedly, for any purpose. VIDEOCON expressly disclaims any implied warranties, including but not limited to, warranties of merchantability or fitness for a particular purpose. VIDEOCON does not guarantee the accuracy, validity, timeliness, legality, or completeness of any content or service made available through this device. Under no circumstances, including negligence, shall VIDEOCON be liable, whether in contract or tort, for any direct, indirect, incidental, special or consequential damages, attorney fees, expenses, or any other damages arising out of, or in connection with, any information contained in, or as a result of the use of any content or service by you or any third party, even if advised of the possibility of such damages."

Third party services may be terminated or interrupted at any time, and VIDEOCON makes no representation or warranty that any content or service will remain available for any period of time. Videocon reserves the right, in its sole discretion to change/modify/update the software (including without limitation, the availability of any feature or content) of the phone at any time without prior notice.

Content and services are transmitted by third parties by means of networks and transmission facilities over which VIDEOCON has no control. Without limiting the generality of this disclaimer, VIDEOCON expressly disclaims any responsibility or liability for any interruption or suspension of any content or service made available through this device.

VIDEOCON is neither responsible nor liable for customer service related to the content and services. Any question or request for service related to content or services should be made directly to respective content and service providers.

*** Memory Capacity** - Memory capacity is dependent on Operating System usage. Available storage capacity may be less as it includes pre-installed operating system, such as Android and/or pre-installed applications, or media content, shared video/system memory.

SAR

Your phone meets the SAR requirements for exposure to radio waves, recommended by Govt. of India. Your mobile phone is a radio transmitter and receiver. It is designed and manufactured so as not to exceed the limits for exposure to radio-frequency (RF) energy, as recommended by the Govt. of India. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The limits include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health. The exposure standard for mobile phones employs a unit of measurement known as SAR (Specific Absorption Rate). The SAR limit recommended by the Govt. Of India is 1.6 Watt/kg taken over a volume containing a mass of 1 gram of tissue. The highest SAR value for A15 is 0.828W/Kg. Dial *#07# to check the SAR value on your phone display.

Using this manual

Thank you for purchasing this mobile phone. This user manual has been specially designed, to guide you through the functions and features of your device.

Read me first

- Please read all safety precautions and this manual carefully before using your device to ensure safe and proper use.
- The descriptions in this manual are based on the default settings of your device.
- Images and screenshots used in this manual are based on the default settings of your device.
- Available features and additional services may vary by software or service provider.

Safety and usage information

To prevent injury to yourself and others or damage to your device, read all of the following information before using your device.

Safety warnings**Keep your device away from small children and pets**

Keep your device and all accessories out of the reach of small children or animals. Small parts may cause choking or serious injury if swallowed.

Protect your hearing

Excessive exposure to sound at high volumes can cause hearing damage. Always turn the volume down before plugging the earphones into an audio source and use only the minimum volume setting necessary to hear your conversation or music.

Install mobile devices and equipment with caution

Ensure that any mobile devices or related equipment installed in your vehicle are securely mounted. Avoid placing your device and accessories near or in an air bag deployment area. Improperly installed wireless equipment can cause serious injury when air bags inflate rapidly.

Avoid interference with pacemakers

Maintain a minimum of 15cm between mobile devices and pacemakers to avoid potential interference, as recommended by manufactures and the independent research group, Wireless Technology Research. If you have any reason to suspect that your device is interfering with a pacemaker or other medical device, turn off the device immediately and contact the manufacturer of the pacemaker or medical device for guidance.

Turn off the device in potentially explosive environments

Do not use your device at refueling points (service stations) or near fuels or chemicals. Turn off your device whenever directed by warning signs or instructions. Your device could cause explosions or fire in and around fuel or chemical storage and transfer areas or blasting areas. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or accessories.

Handle and dispose of batteries and charger with care

- Use only approved batteries and chargers specifically designed for your device. Incompatible batteries and chargers can cause serious injuries or damage to your device.
- Never dispose of batteries or devices in a fire. Follow all local regulations when disposing used batteries or devices.
- Never place batteries or devices, on or in, heating devices, such as microwave ovens, stoves, or radiators. Batteries may explode when overheated.
- Never crush or puncture the battery. Avoid exposing the battery to high external pressure, which can lead to an internal short circuit and overheating.

Do not use the device if the screen is cracked or broken

Broken glass or acrylic could cause injury to your hand and face. Bring the device to service center to replace the screen. Damage caused by careless handling will void your manufacturer's warranty.

Safety precautions**Drive safely at all times**

Avoid using your device while driving and obey all regulations that restrict the use of mobile devices while driving. Use hands-free accessories to increase your safety when possible.

Follow all safety warnings and regulations

Comply with any regulations that restrict the use of a mobile device in a certain area.

Turn off the device near medical equipment

Your device can interfere with medical equipment in hospital or health care facilities. Follow all regulations, posed warnings, and directions from medical personnel.

Turn off the device or disable the wireless function when in an aircraft

Your device can cause interference with aircraft equipment. Follow all airline regulations and turn off your device or switch to a mode that disables the wireless functions when directed by airline personnel.

Handle your device carefully and sensibly

- Do not disassemble your device due to a risk of electric shock.
- Do not allow your device to get wet with liquids as it may cause serious damage and will change the color of the label that indicates water damage inside the device. Do not handle your device with wet hands. Water damage to your device can void your manufacturer's warranty.
- Avoid using or storing your device in dusty, dirty areas to prevent damage.
- Your device is complex electronic device, try to protect it from impacts and rough handling to avoid serious damage.
- Do not paint your device, as paint can clog certain parts and prevent proper operation.
- If your device has a camera flash or light, avoid using it close to the eyes of children or animals.
- Your device may get damaged by exposure to magnetic fields. Do not use carrying cases or accessories with magnetic closures or allow your device to come in contact with magnetic fields for extended periods of time.

Protect batteries and chargers from damage

- Avoid exposing batteries to very cold or very hot temperatures (below 0°C or above 45°C). Extreme temperatures can reduce the charging capacity and life of your batteries.
- Prevent batteries from contacting metal objects, as this can create a connection between the + and - terminals of your batteries and lead to temporary or permanent battery damage.
- Never use a damaged charger or battery.

Use your device in the normal position

Avoid contact with your device's internal antenna.

Ensure maximum battery and charger life

- Avoid charging batteries for more than a week, as overcharging may shorten battery life.
- Over time, unused batteries will discharge and must be recharged before use.
- Disconnect chargers from power sources when not in use.
- Use batteries only for their intended purpose.

Handle SIM cards and memory cards with care

- Do not remove a card while the device is transferring or accessing information, as this could result in loss of data and/or damage to the card or device.
- Protect cards from strong shocks, static electricity, and electrical noise from other devices.
- Frequent writing and erasing will shorten the life span of memory cards.

- Do not touch gold-colored contacts or terminals with your fingers or metal object. If dirty, wipe the card with a soft cloth.

Ensure access to emergency services

Emergency calls from your device may not be possible in some areas or circumstances. Before travelling in remote or undeveloped areas, plan an alternated method of contacting emergency service personnel.

FCC and WHO Advice

- The FCC advice: "Many people mistakenly assume that using a cell phone with a lower reported SAR value necessarily decreases a user's exposure to RF emissions, or is somehow "safer" than using a cell phone with a high SAR value. While SAR values are an important tool in judging the maximum possible exposure to RF energy from a particular model of cell phone, a single SAR value does not provide sufficient information about the amount of RF exposure under typical usage conditions to reliably compare individual cell phone models."
- World Health Organization (WHO) Advice: Organizations such as the World Health Organization and the US Food and Drug Administration have stated that if people are concerned and want to reduce their exposure they could use a hands-free device to keep the phone away from the head and body during phone calls, or reduce the amount of time spent on the phone.

Assembling

Install the SIM card and battery

When you subscribe to a cellular service, you will receive a Subscriber Identity Module (SIM) card, with subscription details, such as your personal identification number (PIN) and optional services.

If the device is on, press and hold **[Power key] → Power off** to turn it off.

1. Remove the back cover.
2. Insert/Removal the SIM cards.

Note

- Place the SIM cards into the device with the gold-colored contacts facing down.
- If you do not insert SIM cards, you can only use your device's non-network services and some menus.

3. Insert /Removal of T card.

4. Insert the battery.

Charge the battery

Before using the device for the first time, you must charge the battery. You can charge the device with the provided travel adapter or by connecting the device to a PC with PC data cable.

Charge with the travel adapter

1. Plug one end (micro-USB) of PC data cable into the multifunction jack.
2. Plug the other end of the PC data cable into USB port of travel adapter.
3. Plug the travel adapter into a power outlet.

Note

- You can use the device while it is charging, but it may take longer to fully charge the battery.
- While charging, the device may heat up, this is normal and should not affect your device's lifespan or performance.
- If your device is not charging properly, bring your device and the charger to service center.
- Improperly connecting the travel adapter can cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.

4. When the battery is fully charged, unplug the travel adapter from the device and then from the power outlet.

Caution: Do not remove the battery before removing the travel adapter. Doing this may cause damage to the device.

Charge with the PC data cable

Before charging, ensure that your PC is turned on.

1. Plug one end (micro-USB) of PC data cable into the multifunction jack.
2. Plug the other end of the PC data cable into USB port on a PC.

Note: Depending on the type of PC data cable you are using, it may take some time before charging begins.

Use a memory card**Insert a memory card**

To store additional multimedia files, you must insert a memory card.

Caution: We use approved industry standards for memory cards, but some brands may not be fully compatible with your device. Using an incompatible memory card may damage your device or the memory card and can corrupt data stored on the card.

Note

- You device supports only the FAT file structure for memory card. If you insert a card formatted with a different structure, your device will ask you to reformat the memory card.
- Frequent writing and erasing of data will shorten the lifespan of memory card.
- When you insert a memory card in your device, the file directory of memory card will appear in the sdcard folder under the internal memory.

1. Remove the back cover.
2. Insert a memory with the gold-colored contacts facing down.
3. Replace the back cover.

Remove the memory card

Before removing a memory card, first unmount it for safe removal.

1. In idle mode, open the application list and select **Settings** → **Storage** → **Unmount SD card**.
2. Remove the back cover.
3. Remove the memory card.
4. Replace the back cover.

Caution: Do not remove a memory card while the device is transferring or accessing information, as this could result in loss of data or damage to the memory card or device.

Format the memory card

Formatting your memory card on a PC may cause incompatibilities with your device. Format the memory card only on the device.

In idle mode, open the application list and select **Settings → Storage → Unmount SD card → Erase SD card**.

Caution: Before formatting the memory card, remember to make backup copies of all important data stored on your device. The manufacturer's warranty does not cover loss of data resulting from user actions.

Getting started

Key	Function
Menu	Open a list of options available on the current screen.
Home	Return to the idle screen. Open the list of recent applications (press and hold).
Back	Return to the previous screen.
Volume	Adjust the device's volume.
Power	Turn on the device (press and hold); Access the quick menus (press and hold); Lock the touch screen.

Turn your device on and off

To turn on your device, press and hold **[Power]**.

If you turn on your device for the first time, then set up your device by following the on-screen instructions. To turn off your device, press and hold **[Power]** and then select **Power off → OK**.

Note

- Follow all posted warnings and directions from official personnel when in areas where the use of wireless devices is restricted, such as airplanes and hospitals.
- To use you device's non network service only, switch to Flight mode. Press and hold **[Power]** and then select **Airplane mode**.

Use the touch screen

Your device's touch screen lets you easily select items or perform functions. Learn basic actions to use the touch screen.

Note

- To avoid scratching the touch screen, do not use sharp tools.
- Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause the touch screen to malfunction.
- Do not allow the touch screen to come into contact with water. The touch screen may malfunction in humid conditions or when exposed to water.
- For optimal use of the touch screen, remove the screen protection film before using your device.
- For best performance, tap the touch screen with your fingertip. The touch screen will not react to touches of sharp tools, such as a stylus or pen.

Control your touch screen with the following actions:

- **Tap:** Touch once with your finger to select or launch a menu, option, or application.
- **Tap and hold:** Tap an item and hold it for more than 2 seconds to open a pop-up option list.
- **Drag:** Tap and hold your finger on an item, and then drag your finger to move the item.
- **Double-tap:** Tap twice quickly with your finger to zoom in or out while viewing photos or maps.
- **Scroll:** Tap and drag your finger up, down, left, or right to move items on lists.

Note

- Your device turns off the touch screen when you do not use the device for a specified period. To turn on the screen, press **[Power]**.
- You can also adjust the backlight time. In idle mode, open the application list, select **Settings** → **Display** → **Screen timeout**.

Lock or unlock the touch screen and keys

You can lock the touch screen and keys to prevent any unwanted device operations.

- To lock, press **[Power]**.
- To unlock, turn on the screen by pressing **[Power]**, and then slide up to unlock.

Get to know the idle screen

When the device is in idle mode, you will see the idle screen. From the idle screen, you can view your device's status and access applications.

The idle screen has many panels. Scroll left or right to a panel of the idle screen.

Add items to the idle screen

You can customize the idle screen by adding shortcuts to applications or items in applications, widgets, or folders. To add items to the idle screen:

1. In idle mode, press **[Menu]** → **Add** or tap and hold the empty area on the idle screen.
2. Select the item category → an item:
 - **Widgets:** Add widgets to the idle screen.
 - **Folders:** Create a new folder or add folders for your contacts.
 - **Shortcuts:** Add shortcuts to items, such as application, bookmarks, and contacts.
 - **Wallpapers:** Set a background image.

Note: Available items may vary depending on the current idle screen mode.

Move items on the idle screen

1. Tap and hold the item to move until it magnified.
2. Drag the item to the location you want.

Remove items from the idle screen

1. Tap and hold an item to remove until it magnified and the trash bin appears at the bottom of the idle screen.
2. Drag the item to the trash bin.
3. When the item turns red, release the item.

Use the shortcuts panel

In idle mode or while using an application, tap the indicator icon area and drag your finger down to open the shortcuts panel. You can activate or deactivate wireless connections features and access a list of notifications, such as message, calls, events, or processing status. To hide the list, drag the bottom of the list up.

Scroll left or right to use the following options:

- **Brightness / Timeout:** Tap to adjust brightness and timeout.
- **Auto rotation / Wi-Fi / Bluetooth / Data conn. / Airplane mode:** Tap to Enable or disable the corresponding feature.
- **General / Silent / Meeting / Outdoor:** Tap to activate the profile.

Application

Access applications

1. In idle mode, tap  to access the application list.
2. Scroll left or right to access another application screen.
3. Select an application.

Note

- When you use applications provided by Google, you must have a Google account. If you do not have a Google account, sign up for a Google account.
- You can add a shortcut to an application by tapping and holding the application icon to the location list. You can move the icon to the location you want to on the idle screen.

4. Press **[Back]** to return to the previous screen; Press **[Home]** to return to the idle screen.

Note: Your device has a built-in motion sensor that detects its orientation. If you rotate the device while using some features, the interface will automatically switch to landscape view. To set the interface & not to rotate the content automatically when the device is rotated, select **Settings → Display**, clear the check box of **Auto-rotate screen**.

Access recent applications

1. Press and hold **[Home]** to open the list of applications you have accessed recently.
2. Select an application to access.

Use the task manager

Your device is a multitasking device. It can run more than one application at the same time. However, multitasking may cause hang-ups, freezing, memory problems, or additional power consumption. To avoid these problems, end unnecessary programs using the task manager.

1. In idle mode, open the application list and select **Settings → Applications → Manage applications**.
2. Select the label of **Running**. The list of all applications currently running on your device appears.
3. To close an application, select an application → **Stop**.

Enter text

You can enter text by selecting characters on the virtual keyboard.

Tips: Press and hold **[Menu]** to appear/hide the virtual keyboard.

Change the keyboard type

1. Tap the text input field and select **Input method**.
2. Select a keyboard type.

Use android keyboard

1. Tap the text input field and select **Input method** → **Android keyboard**.
2. Enter text by selecting alphanumeric keys.

Copy and paste text

While you are entering text, you can use the copy and paste feature to use text in other applications.

1. Double-tap the text field and then select **Select word** or **Select all**, from the option list.
2. Drag  or  across the text you want to highlight.
3. Select **Copy** to copy; or **Cut** to cut the text onto the clipboard.
4. In another application, double-tap the text field and then select **Paste** to insert the text from the clipboard into the text field.

Download files from the web

Caution: Files you download from the web can include viruses that will damage your device. To lessen your risk, only download files from sources you trust.

Note: Some media files include Digital Rights Management to protect copyrights. This protection may prevent you from downloading, copying, modifying, or transferring some files.

To download files from the web:

1. In idle mode, open the application list and select **Browser**.
2. Search for a file or application and download it.

Note: To install applications download from website other than Android Market, you must select Settings → **Security**, select the check box of **Unknown sources**.

Synchronize date

You can synchronize data with various web servers and back up or restore your data.

Once the synchronization is completed, your device stays connected to the web. If any change is made on the web, the updated information will appear on your device and will automatically begin synchronization, and vice versa.

Note: This feature may be unavailable depending on your region or service provider.

Set up a server account

1. In idle mode, open the application list and select **Settings** → **Accounts & sync**.
2. Select **Add account** → an account type.
3. Follow the on-screen instructions to complete the account setup.

Activate automatic sync

1. In idle mode, open the application list and select **Settings** → **Accounts & sync**.
2. Select the check box of **Auto-sync**.
3. Select an account.

4. Select the applications you want to synchronize. To exclude applications from automatic synchronization, clear the check boxes of the applications you want.

Synchronize data manually

1. In idle mode, open the application list and select **Settings** → **Accounts & sync**.
2. Select an account.
3. Select **Sync all**. Your device will start synchronizing the data you set for synchronization.

Communication

Calling

Learn to use calling functions, such as making and answering calls, using options available during a call or customizing and using call-related features.

Make a call

1. In idle mode, open the application list and select **Phone**.
2. Enter an area code and a phone number.
3. Tap  to make a call.
4. To end the call, select **End**.

Answer a call

1. When a call comes in, select **Answer**.

- Note**
- When a headset is plugged into the device, you can press the headset button to answer a call.
 - To mute the ringtone, press **[Volume]**.
2. To end the call, select **End**.

Reject a call

When a call comes in, select **Reject**.

Call an international number

1. In idle mode, open the application list and select **Phone**.
2. Tap and hold **0** to insert the **+** character.
3. Enter the complete number you want to dial (country code, area code, and phone number).
4. Tap  to make a call.

Use options during a voice call

You can use the following options during a voice call:

- To adjust the voice volume, press **[Volume]**.
- To turn off the mouthpiece so that the other party cannot hear you, select **Mute**.
- To place a call on hold, select **Hold**.
- To activate the speakerphone feature, select **Speaker**.
- To open the phonebook, select **Contacts**.
- To dial a second call, select **Add call**, and then dial a new number.
- To open the dialing screen, select **Dial Pad**.
- To record the conversation, press **[Menu] → Start recording**.
- To converse with the other party via a Bluetooth headset, press **[Menu] → Bluetooth**.

View call log

In idle mode, open the application list and select **Call Log**. The status bar will display  when you have missed calls.

- Tap  to view all call logs; Tap  to view dialed calls; Tap  to view answered calls; Tap  to view missed calls.
- Tap  to select resource of call log.
- Tap a call log to make a voice call.
- Tap  to view details. You can select the corresponding operations.
- Tap and hold a call log to select an option in pop-up menu.

Use additional features

You can use various other call-related features, such as Fixed Dialing Number (FDN) mode, or call diverting or barring.

Set call forwarding

Call diverting is a network dependent feature to send incoming calls to another number that you specify. You can set this feature separately for several conditions when you are not able to answer calls, such as when you are already on the phone or when you are outside of the service area. To set call forwarding for voice/video calls:

1. In idle mode, open the application list and select **Settings** → **Call settings** → **Voice Call** → **Call forwarding** → select SIM card.

2. Select a condition.
3. Enter a number to which calls will be forward and select **Enable**. Your settings will be sent to the network.

Set call barring

Call barring is a network dependent feature to restrict certain types of calling or prevent others from making calls with your device.

1. In idle mode, open the application list and select **Settings → Call settings → Voice Call → Call barring** → select SIM card.
2. Select a call type to restrict.
3. Enter a call barring password and select **OK**. Your settings will be sent to the network.

Set call waiting

Call waiting is a network dependent feature to alert you of an incoming call while you are already on a call.

In idle mode, open the application list and select **Settings → Call settings → Voice Call → Additional settings** → select SIM card. Select the check box of **Call waiting**. Your settings will be sent to the network.

Messaging

Learn to create and send text (SMS) or multimedia (MMS) message, and view or manage messages you have sent or received.

Note: You may incur additional charges for sending or receiving messages while outside your home service area. For details, contact you service provider.

Send a text message

-
1. In idle mode, open the application list and select **Messaging**.

2. Select **Compose new message**.
3. Select **To** field to enter a number manually or tap  to select one from phonebook.
4. Select **Type to compose** field to enter your message text.
5. Select **Send** to send the message.

Send a multimedia message

1. In idle mode, open the application list and select **Messaging**.
2. Select **Compose new message**.
3. Select **To** field to enter a number manually or tap  to select one from phonebook.
4. Press **[Menu] → Add subject →** select **Subject** to add a subject for the message.
5. Select **Type to compose** field to enter your message text.
6. Press **[Menu] → Attach** to add emotion or attachment.
7. Select **Send** to send the message.

View a text or multimedia message

1. In idle mode, open the application list and select **Messaging**.
2. The messages are grouped into message thread by contact, like a messenger.
 - Select a thread to view detail.
 - Tap and hold a thread or message to select an option in pop-up menu.

Listen to voice mail messages

If you have set missed calls to be diverted to the voice mail server, callers may leave voice messages when you

do not answer incoming calls. To access your voice mail inbox and listen to voice mail message:

1. In idle mode, open the application list and select **Phone**, and then tap and hold **1**.
2. Follow the instructions from the voice mail server.

Note: You need to save the voice mail server number before accessing the server. Your service provider can give you the number.

Email

Learn to send or view email message via your personal or company email account.

Set up an email account

1. In idle mode, open the application list and select **Email**.
2. Enter your email address and password.
3. Select **Next** (for general email accounts, such as Google Mail and Yahoo) or **Manual setup** (for other company email accounts).
4. Follow the on-screen instructions.

When you are finish setting up the email account, the email messages are downloaded to your device. If you create more than two accounts, you can switch between email accounts; Press **[Menu]** → **Accounts** and select one you want to retrieve message from.

Send an email message

1. In idle mode, open the application list and select **Email** → an email account.
2. Press **[Menu]** → **Compose**.
3. Select **To** field to enter an email address manually. Press **[Menu]** → **Add Cc/Bcc** to add more recipients.

4. Select **Subject** field to enter a subject.
5. Select **Compose Mail** field to enter your email text.
6. Press **[Menu] → Add attachment** to attach a file.
7. Select **Send** to send the email.

Note: If you are offline or outside your service area, the message will be held in the message thread list until you are online and in your service area.

View an email message

When you open an email account, you can view previously retrieved emails offline or connect to the email server to view new messages. After retrieving email messages, you can view them offline.

1. In idle mode, open the application list and select **Email →** an email account.
2. Press **[Menu] → Refresh** to update the message list.
3. Tap and hold a message in the list to select an option in pop-up menu.
4. Select an email message. From the message view, use the following options:
 - To reply to the message, select **Reply**.
 - To forward the message to other people, press **[Menu] → Forward**.
 - To delete the message, select **Delete**.
 - To display the pictures in the message, select **Show pictures**.

Contacts

Learn to create and manages a list of your personal or business contacts stored on the phone's memory card or a SIM card. You can save names, phone numbers, email address and more for your contacts.

Create a contact

To create a contact from dialing screen:

1. In idle mode, open the application list and select **Phone**.
2. Enter a phone number.
3. Tap  → **New**.
4. Select a memory location.
5. Enter contact information.
6. Select **Save** to add the contact to memory.

To create a contact from phonebook:

1. In idle mode, open the application list and select **Contacts**.
2. Tap  to add a contact.
3. Select a memory location.
4. Enter contact information.
5. Select **Save** to add the contact to memory.

Find a contact

1. In idle mode, open the application list and select **Contacts**.
2. Scroll up or down on the contact list or tap  to input a name to search.
3. Select a contact's name to view the details.

Delete a contact

1. In idle mode, open the application list and select **Contacts**.
2. Press **[Menu] → Delete contact**.
3. Select the check boxes of the contacts you want to delete.
4. Select **Delete → OK** to delete them.

Tip: Tap and hold a contact and then select **Delete contact** to delete the contact.

Contacts group

By creating groups of contacts, you can manage multiple contacts and send message or email to an entire group.

Create a group of contacts

1. In idle mode, open the application list and select **Contacts**.
2. Press **[Menu] → Groups**.
3. Select **Add group**.
4. Enter a name and select **Save**.

Add members into a group

1. In idle mode, open the application list and select **Contacts**.
2. Press **[Menu] → Groups → select a group**.
3. Select **Add members**.
4. Select the check boxes of the contacts you want to add.

5. Select **Save**.

Move members to a group

1. In idle mode, open the application list and select **Contacts**.
2. Press **[Menu] → Groups →** select a group.
3. Press **[Menu] → Move members**.
4. Select the check boxes of the contacts you want to move.
5. Select **Move →** Select the other group **→ OK**.

Remove members from a group

1. In idle mode, open the application list and select **Contacts**.
2. Press **[Menu] → Groups →** select a group.
3. Press **[Menu] → Remove members**.
4. Select the check boxes of the contacts you want to remove.

Set a speed dial number

1. In idle mode, open the application list and select **Contacts**.
2. Press **[Menu] → Speed Dial**.
3. Select a location number **→** select a contact.
4. Select a phone number (if necessary).

Tip: You can quickly dial this number by tapping and holding the location number on the dial screen.

Copy contacts

To copy contacts from a SIM card or phone to another SIM card or phone:

1. In idle mode, open the application list and select **Contacts**.
2. Press **[Menu]** → **More** → **Import/Export**.
3. Select a memory location → **Next**.
4. Select another memory location → **Next**.
5. Select the check boxes of the contacts you want to copy.
6. Select **Copy** → **OK**.

Import or export contacts

To import contact files (in vcf format) from a memory card to your device:

1. In idle mode, open the application list and select **Contacts**.
2. Press **[Menu]** → **more** → **Import/Export**.
3. Select **SD Card** → **Next**.
4. Select **Phone** → **Next**.
5. Select the check boxes of the files you want to import.
6. Select **Copy** → **OK**.

Entertainment

Camera

Learn how to capture and view photos and videos. To use camera, insert a memory card.

In idle mode, open the application list and select **Camera**.

Capture a photo

1. In idle mode, open the application list and select **Camera**.
2. Aim the lens at the subject and make any necessary adjustments
3. Tap  to take a photo. The photo is saved automatically..

Record a video

1. In idle mode, open the application list and select **Camera**.
2. Switch to the camcorder.
3. Aim the lens at the subject and make any necessary adjustments.
4. Tap  to start recording.
5. Tap  to stop recording. The video is saved automatically.

Gallery

Learn to view photos and play video saved in your device's memory or on a memory card.

View a photo

1. In idle mode, open the application list and select **Gallery**.
2. Select a folder.
3. To change the view mode, tap  or  at the top right of the screen.
4. Select a photo (with no icon) to view.

While viewing a photo, use the following options:

- To view more photos, scroll left or right.
- To zoom in, place two fingers on the screen and spread them apart. To zoom out, move your fingers closer together. You can also tap  or , or double-tap the screen.
- To view photos in a slideshow, select **Slideshow**.
- To delete a photo, select **Menu → Delete**.
- To share a photo with others, select **Menu → Share**.
- To use additional features with a photo, select **Menu → More** and use the following options:
 - ✓ **Details:** View the photo detail.
 - ✓ **Set as:** Set a photo as wallpaper or caller ID image for a contact.
 - ✓ **Crop:** Crop an image from a photo.
 - ✓ **Print:** Print a photo using Bluetooth connection.
 - ✓ **Rotate left:** Rotate a photo anti-clockwise.
 - ✓ **Rotate right:** Rotate a photo clockwise.

Play a video

1. In idle mode, open the application list and select **Gallery**.
2. Select a video (with the  icon) to play.
3. Control playback with following icons:

Icon	Function
	Pause playback; Tap  to resume playback.
	Scan backward in a file.
	Scan forward in a file.

Video Player

Learn to use the video player to play various kinds of videos.

Note

- Some files formats are not supported depending on the software of the device.
- If the size exceeds the memory available, an error may occur when you attempt to play it.
- Playback quality may vary by content type.
- Some files may not play properly depending on how they are encoded.

1. In idle mode, open the application list and select **Video Player**.
2. Select a video to play.
3. Control playback with following icons:

Icon	Function
	Pause playback; Tap  to resume playback.
	Scan backward in a file.
	Scan forward in a file.

Music

Learn to listen to your favorite music while on the go with the music player.

Note

- Some file formats are not supported depending on the software of the device.
- If the size exceeds the memory available, an error may occur when you attempt to play it.
- Playback quality may vary by content type.
- Some files may not play properly depending on how they are encoded.

Play music

After transferring music file to your memory card:

1. In idle mode, open the application list and select **Music**.

2. Select a music category.
3. Select a music file.
4. Control playback with following icons:

Icon	Function
	Pause playback; Tap  to resume playback.
	Skip backward; Scan backward in a file (tap and hold).
	Skip forward; Scan forward in a file (tap and hold).
	Show the current playlist.
	Activate shuffle mode.
	Change the repeat mode.

Create a playlist

1. In idle mode, open the application list and select **Music**.
2. Select a music category.
3. Tap and hold the artist, album, or song, and then select **Add to playlist**.
4. Select New → enter the playlist name → **Save** to one or all of songs of the selected artist or album to the playlist.

Tip: During playback, you can add the current song to a playlist by press **[Menu]** → **Add to playlist**.

Use a song as ringtone

To use a song as ringtone:

1. In idle mode, open the application list and select **Music**.
2. Select a music category.
3. Tap and hold a song and then select **Use as phone ringtone**.

Tip: During playback, you can use it as ringtone by press **[Menu]** → **Us as phone ringtone**.

FM radio

Learn to listen to music and news on the FM radio. To listen to the FM radio, you must connect a headset, which serves as the radio antenna.

Listen to the FM radio

1. Plug a headset into the device.

2. In idle mode, open the application list and select **FM Radio**. The FM radio scans and saves available stations automatically.

Note: The first time you turn on the FM radio, it will start automatic tuning.

Sound Recorder

Learn to operate your device's sound recorder.

Record a voice memo

1. In idle mode, open the application list and select **Sound Recorder**.
2. Tap  to start recording.
3. Speak into to mouthpiece.
4. When you are finished, tap  to stop and save the memos.
5. To record more voice memos, tap  again.

Play a voice memo

1. In idle mode, open the application list and select **Music**.
2. Select **Playlist → My recordings**.
3. Select a voice memo.

Web

Web services require a data connection. Contact your operator to choose the best data plan.

Browser

Learn to access and bookmark your favorite web pages.

Note • Available icons may vary depending on your region or service provider.

1. In idle mode, open the application list and select **Browser** to launch a specified homepage.
2. To access a specific webpage, select the URL input field, enter the web address (URL) of the webpage, and then tap .
3. To return to previous page, press **[Back]**.

While browsing a webpage, use the following options:

- To reload the current web pages, tap .
- To zoom in, place two fingers on the screen and spread them apart. To zoom out, move your fingers closer together.
- To view all windows, press **Windows**. Tap  to close the corresponding page.
- To go to the a next page in history, press **[Menu] → Forward**.
- To go to the a previous page in history, press **[Back]**.
- To bookmark the current webpage, press **[Menu] → Bookmarks → Add bookmark**.
- To search for text on the webpage, press **[Menu] → More → Find on page**.
- To send the webpage address (URL) of the webpage to others, press **[Menu] → Share page**.
- To view the web pages history, press **[Menu] → More → History**.

Connectivity**Bluetooth**

Bluetooth is a short-range wireless communications technology capable of exchanging information over a distance of about 7-8m without requiring a physical connection.

Turn on the Bluetooth wireless feature

In idle mode, open the application list and select **Settings→Wireless & networks→Bluetooth**, select the check box of **Bluetooth**.

Find and pair with other Bluetooth-enabled devices

1. In idle mode, open the application list and select **Settings → Bluetooth → Scan for devices**.
2. Select a device.
3. Enter a PIN for the Bluetooth wireless feature or the other devices' Bluetooth PIN, if it has one, and select **OK**. Alternatively, select **Accept** to match the PIN between your device and the other device.
4. When the owner of the other device enters the same PIN or accepts the connection, pairing is complete. If the pairing is successful, the device will automatically search for available services.

Note: Some devices, especially headsets or hands-free car kits, may have fixed Bluetooth PIN, such as 0000. If the other device has a PIN, you must enter it.

Send data via the Bluetooth wireless feature

1. Select a file or item from an appropriate application or **File Manager**.
2. Select an option for sending data via Bluetooth.

Note: The method for selecting an option may vary by data type.

3. Search for and pair with a Bluetooth-enable device.

Receive data using the Bluetooth wireless feature

1. In idle mode, open the application list and select **Settings** → **Bluetooth**→**Bluetooth settings**, select the check box of **Discoverable**. Your device is visible to other Bluetooth devices for 120 seconds.
2. When prompted, enter the PIN for the Bluetooth wireless feature and select **OK** (if necessary).
3. Select **Accept** to confirm that you are willing to receive data from the device.

Wi-Fi

Learn to use your device's wireless networking capabilities to activate and connect to any wireless local area network (WLAN) compatible with IEEE 802.11 a/b/g/n standards.

Activate the Wi-Fi feature

In idle mode, open the application list and select **Settings**→**Wireless & networks**→ **Wireless** , select the check box of **Wi-Fi**.

Note: An active Wi-Fi network running in the background will consume battery power. To preserve battery power, activate the Wi-Fi network only when needed.

Find and connect to a Wi-Fi network

1. In idle mode, open the application list and select **Settings** →**Wireless & networks**→ **Wi-Fi settings**. The device will automatically search for available Wi-Fi networks.

2. Select a network under **Wi-Fi network**.
3. Enter a password for the network (if necessary).
4. Select **Connect**.

Add a Wi-Fi network manually

1. In idle mode, open the application list and select **Settings → Wireless & networks → Wi-Fi settings → Add network**.
2. Enter the SSID for the network and select the security type.
3. Set the security settings depending on the selected security type.
4. Select **Save**.

Mobile network sharing

Learn to set your device as a wireless modem or wireless access point for PCs or other devices, and share your device's mobile connection.

Share your device's mobile network via USB

1. Using USB cable, connect the multifunction jack on your device to a PC.
2. In idle mode, open the application list and select **Settings → Wireless & networks → Tethering**. Select the check box of **USB tethering** to activate the USB tethering. Your device shares the mobile network connection on your PC.
3. To stop sharing the network connection, clear the check box of **USB tethering**.

Note: The sharing method for the network connection may differ depending on the PC's operating system.

VPN connections

You can create virtual private networks (VPN) and connect to your private network securely through a public network, such as the internet.

Note: Your device should already be configured with internet access. If you have trouble accessing the internet, you need to edit connections. If you are not sure about the connection information to enter, ask your service provider.

Set up VPN connections

1. In idle mode, open the application list and select **Settings → Wireless & networks → VPN settings → Add VPN**.
2. Select a VPN type.
3. Customize the connection information.

Note: Available options may vary depending on the VPN type.

- **VPN name:** Enter a name of the VPN server.
- **Set VPN server:** Enter the IP address of the VPN server.
- **Enable encryption:** Set to encrypt the VPN server.
- **Set IPSec pre-shared key:** Enter a pre-shared key.
- **Enable L2TP secret:** Set to use the L2TP secret password.
- **Set L2TP secret:** Enter the L2TP secret password.
- **Set user certificate:** Select a user certificate that the VPN server uses to identify you. You can import from the VPN server or download from the web.

- **Set CA certificate:** Select a certificate authority (CA) certificate that the VPN server uses to identify you. You can import from the VPN server or download from the web.
- **DNS search domains:** Enter the domain name server (DNS) address.
- When you are finished, press **[Menu] → Save**.

Connect to a private network

1. In idle mode, open the application list and select **Settings → Wireless & network → VPN settings**.
2. Select a private network to connect.
3. Enter the user name and password and select **Connect**.

Tools

Clock

Learn to set and control alarms.

Set a new alarm

1. In idle mode, open the application list and select **Clock**.
2. **Set alarm → Add alarm**.
3. Set alarm time and then select **Set** to set details.
4. When you are finished, select **Done**.

Stop an alarm

When the alarm sounds:

To stop the alarm, select **Dismiss**.

To repeat the alarm after 10 minutes, select **Snooze**.

Delete an alarm

1. In idle mode, open the application list and select **Clock**.
2. Press **[Menu] → Alarms**.
3. Tap and hold an alarm you want to delete and then select **Delete alarm → OK**.

Calculator

Learn to perform mathematical calculations directly on your device like a typical hand-held or desktop calculator.

1. In idle mode, open the application list and select **Calculator**.
2. Use the keys that correspond to the calculator display to perform basic mathematical operation. To use the scientific calculator, press **[Menu] → Advanced panel**.

File manager

Learn to quickly and easily access all of your images, videos, music, sound clips, and other types of files stored in memory card.

1. In idle mode, open the application list and select **File manager**.
2. Select a folder.
3. Select a file to open.

In a folder, press **[Menu]** to use the following options.

- To create a new folder, select **Create folder**.
- For additional operations of folders and files, press **[Menu] → Edit → select folders or files → press [Menu] → select an operation**.

Calendar

Learn to create and manage daily, weekly, or monthly events, and set alarms to remind yourself of important events.

Create an event

1. In idle mode, open the application list and select **Calendar**.
2. Press **[Menu] → More → New event**. Or tap and hold a date or time, and then select **New event**.
3. Enter the details of the events as required.
4. When you are finished, select **Done**.

View events

To change the calendar view:

1. In idle mode, open the application list and select **Calendar**.
2. Select a view mode from the top of the calendar.

To view events of a specific date:

1. In idle mode, open the application list and select **Calendar**.
2. Select a date on the calendar. In monthly view, days with scheduled events are indicated by a small rectangle. To select today's date, press **[Menu] → Today**.
3. Select an event to view its details.

Note: You can send the event to others by pressing **[Menu] → Share event →** an options.

Delete an event

1. In idle mode, open the application list and select **Calendar**.
2. Press **[Menu] → Agenda**.
3. Select an event you want to delete.
4. Press **[Menu] → Delete event → OK**.

Settings

To access the settings menu:

- In idle mode, open the application list and select **Settings**.
- In idle mode, press **[Menu] → Settings**.

Customization

Theme

Wallpaper

SIM management

- **SIM Information:** Select a SIM card to edit SIM name, enter phone number, set background color, or set display numbers.
- **Default SIM:** Select the default SIM card for voice call, messaging, and data connection.
- **General settings**
 - ✓ **Roaming:** Enable or disable data roaming, and select roaming reminder.
 - ✓ **Contacts & SIM:** Associate contacts with a specific SIM card.

Wireless & networks

Change the settings for wireless network connections.

- **Airplane mode:** Disables all wireless functions on your device. You can use only non-network services.
- **Wi-Fi:** Turn the Wi-Fi feature on or off.
- **Wi-Fi settings**
 - ✓ **Wi-Fi:** Turn the Wi-Fi feature on or off.
 - ✓ **Network notification:** Set the device to notify you when an open network is available.
 - ✓ **WPS Connect:** Connect to a Wi-Fi connection using a Wi-Fi Protected Setup.
 - ✓ **Add Wi-Fi network:** Add Wi-Fi access points manually.
 - ✓ **Enable proxy:** Enable or disable proxy.
 - ✓ **Proxy settings:** Enter host and port of proxy.
- **Bluetooth:** Turn the Bluetooth wireless feature on or off.
- **Bluetooth settings**
 - ✓ **Bluetooth:** Turn the Bluetooth wireless feature on or off.
 - ✓ **Device name:** Set a Bluetooth name for your device.
 - ✓ **Discoverable:** Set your device to be visible to other Bluetooth-enabled devices.
 - ✓ **Scan for devices:** Search for available Bluetooth-enabled devices.
- **Tethering**
 - ✓ **USB tethering:** Activate the USB tethering feature to share your device's mobile network connection with PCs via USB. When connect to a PC, your device is used as a wireless modem for the PC.
 - ✓ **Help:** Learn more about USB and Wi-Fi tethering.
- **VPN settings:** Set up a connection to virtual private networks (VPNs).

- **Mobile networks**

- ✓ **Data usage:** View the data usage.
- ✓ **Access Point Names:** Set up access point names (APNs).
- ✓ **Network operators:** Search for available networks and select a network for roaming.

- **GPRS transfer prefer:** Select GPRS transfer mode.

Call settings

Set the call. Different ways to answer the phone call or reject a call.

Select a call to set:

- **Voice call**

- ✓ **Voice mail:** Voice mail service and number.
- ✓ **Call forwarding:** Voice call forwarding settings.
- ✓ **Call barring:** Voice call barring settings.
- ✓ **Additional settings:** Phone number and call waiting settings.

- **Other settings**

- ✓ **Fixed Dialing Numbers:** Manage fixed dialing numbers.
- ✓ **Call cost:** Call cost information.
- ✓ **Cell Broadcast**
- ✓ **Minute reminder:** Turn on minute reminder at 50 seconds of every minute.
- ✓ **Phone settings**
- ✓ **TTY Setting**

User profiles

Tap  next to a profile to activate it.

Select a profile to customize it:

- **Vibrate:** Set when the device will vibrate for various events.
- **Volume:** Adjust the volume level for ringtone, alarm, and notifications.
- **Phone ringtone:** Select a ringtone to alert you on incoming calls.
- **Notification ringtone:** Select a ringtone to alert you to events, such as new messages.
- **Audible touch tone:** Set the device to sound when you touch the keys on the dialing screen.
- **Audible selection:** Set the device to sound when you select an application or option on the touch screen.
- **Screen lock sound:** Set the device to sound when you lock or unlock the touch screen.
- **Haptic feedback:** Set the device to vibrate when you touch the keys.

Note: Silent mode can only set up vibrate and haptic feedback.

Display

Change the settings for display.

- **Brightness:** Set the brightness of the display.
- **Auto-rotate screen:** Set whether or not to rotate the content automatically when the device is rotated.
- **Animation:** Set the device to display an animation when you switch between windows.
- **Screen timeout:** Set the length of time the device waits before turning off the display's backlight.

Location

- **Use wireless networks:** Set to use Wi-Fi network and/or mobile networks for finding your location.

Security

Change the settings for securing your device and the SIM card.

- **Set up screen lock:** Set an unlock security code. When you set your security code, this option changes to **Change screen lock**.
 - ✓ **None:** Disable the screen lock.
 - ✓ **Pattern:** Set an unlock pattern to unlock the screen.
 - ✓ **PIN:** Set a PIN (numeric) to unlock the screen.
 - ✓ **Password:** Set a password (alphanumeric) to unlock the screen.
- **Set up SIM card lock**
 - ✓ **Lock SIM card:** Activate or deactivate the PIN lock feature to require the PIN before using the device.
 - ✓ **Change SIM PIN:** Change the PIN used to access SIM data.
- **Visible passwords:** Set the device to display your password as you enter it.
- **Select device administrators:** View device administrators installed on your device. You can allow device administrators to apply new policies to your device.
- **Use secure credentials:** Use certificates and credentials to ensure the secure use of various applications.
- **Install from SD card:** Install encrypted certificates that are stored in the USB storage.
- **Set password:** Create and confirm a password for accessing credential.
- **Clear storage:** Erase the credential contents from the device and reset the password.

Applications

Change the settings for managing installed applications.

- **Unknown sources:** Select to download applications from any source. If you do not select this option, you can download applications only from Android Market.
- **Preferred install location:** Change the preferred installation location for new applications.
- **Manage applications:** Access the list of the applications installed on the device and check the application information.
- **Running services:** View the services you are using and access them to manage.
- **Storage use:** View available memory and the memory used by applications on your device.
- **Battery use:** View what has been using the battery.
- **Development**
 - ✓ **USB debugging:** Select to connect your device to a PC by using a USB cable. This is for application development.
 - ✓ **Stay awake:** Select to keep the screen on while charging.
 - ✓ **Allow mock locations:** Allow mock location and service information to be sent to a Location Manager Service for testing. This is for application development.

Accounts & sync

Change the settings for the auto sync feature or manage accounts for synchronization.

- **Background data:** Select this setting to use the auto sync feature. The auto sync feature will synchronize data in the background without opening applications.
- **Auto-sync:** Set the device to synchronize contact, calendar, and email data automatically.

Storage

View memory information for your device and memory card. You can also format the memory card.

Language & keyboard

Change the settings for text input.

- **Select language:** Select a display language for all menus and applications.
- **User dictionary:** You can add a word to user dictionary.
- **Android keyboard:** Android keyboard settings.
- **Select input method:** Select a default keyboard type for text input.

Voice input & output

Voice recognizer settings

Text-to-speech settings.

Accessibility

Accessibility services are special features for those with certain physical disabilities. Access and alter the following settings to improve the device accessibility.

- **Accessibility:** Activate an accessibility application you have downloaded.
- **Power button ends call:** Select to end call by pressing **[Power]** during a call.

Date & time

Access and alter the following settings to control how time and date are displayed on your device.

- **Automatic with network:** Automatically update the time when you move across time zones.
- **Set date:** Set the current date manually.
- **Select time zone:** Set your home time zone.
- **Set time:** Set the current time manually.
- **Use 24-hour format:** Set the time to be displayed in 24-hour format.

- **Select date format:** Select a date format.

Schedule power on/off

Set a specified time to power on or off the device.

About phone

Access the device information.

Saavn

This application allows you to search and play music online.

SIM Toolkit (STK)

Short for SIM Toolkit, it is a standard for providing value added services and e-commerce over the GSM networks, using the phone to make the necessary transactions. Services depend on your network service provider.
