2

Congratulations on your purchase and welcome to Prestigio.

To get the most from your product and enjoy all that Prestigio has to offer, please visit:

www.prestigio.com/catalogue/MultiPads

More details about your product, please visit:

www.prestigio.com/support

Do not cover the antenna area with your hands or other objects. This may cause connectivity problems or drain the battery.

Please read the "Legal and safety notices" in your package before use.

Insert a memory card

1. Insert a memory card with the gold contacts facing downwards.
2. Push the memory card into the slot until it locks in place.

- Some memory cards may not be fully compatible with the device. Using an incompatible card may damage the device or the memory card, or corrupt the data stored in it.

Frequent writing and erasing of data shortens the lifespan of memory cards.

Charge the battery

A new battery is partially charged. The battery icon at the upper-right corner shows the level of charging status.

1. Plug the small end of the USB cable into the micro USB port of the device, and plug the large end of the cable into travel charger.
2. After being fully charged, disconnect the device from the charger. First unplug the charger from the device, and then unplug it from the electric socket.

Always use authentic accessories to optimise your battery performance. Non-authentic accessories (eg. chargers) can damage your battery and even your tablet.

Optimise your battery performance

Here are some tips to help you optimise your battery performance.

- Always ensure that your tablet profile is appropriately set to meet your actual usage.
- If you are not using Bluetooth, Wi-Fi or other applications, turn them off.
- Adjust the intensity of your display screen's backlight to low or medium level and for the shortest duration.
- Avoid using or placing your tablet near magnetic objects (eg. a radio or television) or on metal surfaces, which will impact the network connection and ultimately drain power from your battery.

Power on your tablet

Press and hold the power button for a few seconds to power on your tablet.

1. After turning on the device for the first time, Prestigio Installer Wizard will appear on the screen. It offers you a few third-party apps, tap the apps you want to install on your tablet. Follow the on-screen instructions to install the apps.

2. It may take a few minutes for your tablet to install the apps.

To turn off your tablet, press and hold the power button, and then tap **Power off** on the pop-up screen.

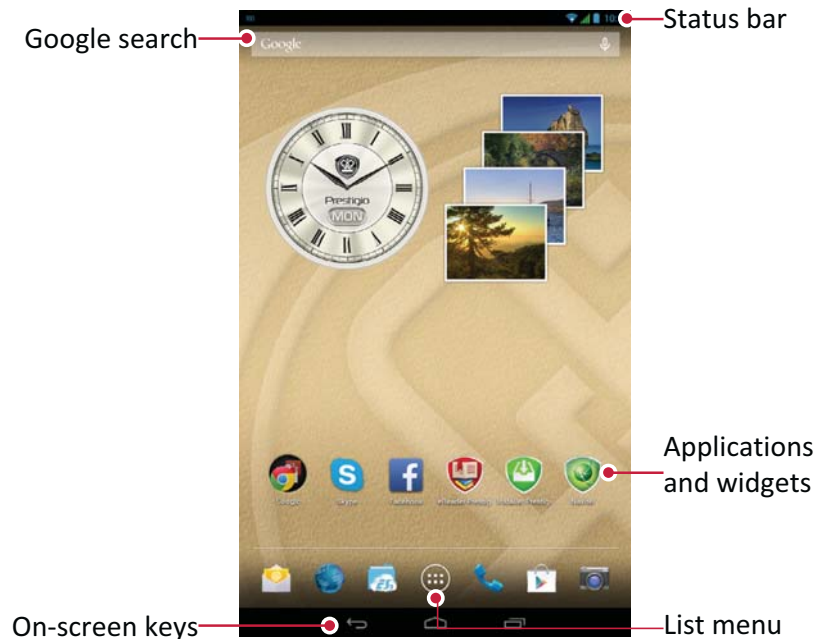

If you do not install apps provided by Prestigio Installer Wizard the first time, you can tap  on the Home screen to install these apps the next time.

14. Troubleshooting

The touch screen responds slowly or improperly

If your device has a touch screen and the touch screen is not responding properly, try the following:

- Remove any protective covers from the touch screen. Protective covers may prevent the device from recognising your inputs and are not recommended for touch screen devices.
- Ensure that your hands are clean and dry when tapping the touch screen.
- Restart your device to clear any temporary software bugs.
- Ensure that your device software is upgraded to the latest version.
- If the touch screen is scratched or damaged, take it to your local dealer.

Your battery seems to over heat

You might be using a charger that was not intended for use with your tablet. Make sure you always use the authentic accessory shipped with your tablet.

You can't receive and/or store JPEG pictures

A picture may not be accepted by your tablet if it is too large, if its name is too long, or if it doesn't have the correct file format.

When charging, the battery icon shows no bar and the outline is flashing

Only charge the battery in an environment where the temperature does not go below 0°C (32°F) or above 45°C (113°F). In other cases please contact your tablet supplier.

Your tablet doesn't work well in your car

A car contains many metallic parts that absorb electromagnetic waves which can affect the tablet's performance. A car kit is available to provide you with an external antenna and enables you to make and receive phone calls without handling the handset. Check with the local authorities whether or not you are allowed to use the tablet while driving.

Your tablet is not charging

If the battery is completely flat, it might take several minutes of precharge (up to 5 minutes in some cases) before the charging icon is displayed on the screen.

The picture captured with the tablet camera is not clear

Make sure that the camera lens on both sides is clean.

Your device freezes or has fatal errors

If your device freezes or hangs, you may need to close programs or reset the device to regain functionality. If your device is frozen and unresponsive, press and hold the Power button for 8-10 seconds. The device reboots automatically.

If this does not solve the problem, perform a factory data reset. On the list menu, tap Settings > Back up & reset > Factory data reset > Reset device > Erase everything.

A connection is not established when you connect the device to a computer

- Ensure that the USB cable you are using is compatible with your device.
- Ensure that you have the proper drivers installed and updated on your computer.
- If you are a Windows XP user, ensure that you have Windows XP Service Pack 3 or higher installed on your computer.
- Ensure that you have Windows Media Player 10 or higher installed on your computer.
