1 Safety

Read these concise guidelines. Not following them may be dangerous or illegal.

ROAD SAFETY

Always keep your hands free to operate the vehicle while driving. Park your vehicle safely before using your device.

SWITCH OFF OR USE FLIGHT MODE IN AIRCRAFT

Wireless devices can cause interference in aircraft. Using them in aircraft is both dangerous and illegal. Switch off your device or switch to flight mode before on board.

SWITCH OFF IN HOSPITALS

Follow relevant regulations or rules. Switch your device off near medical equipment.

SWITCH OFF WHEN REFUELING

Switch off your device at a refueling point or near fuels or chemicals.

SWITCH OFF NEAR BLASTING

Don't use your device where blasting is in progress. Observe restrictions, and follow any regulations or rules.

INTERFERENCE

All wireless phones may be susceptible to interference, which could affect the performance.

USE PROPERLY

Use in the normal position explained in the product

documentation. Don't touch the antenna unnecessarily.

ACCESSORIES AND BATTERIES

Use only the approved accessories and batteries. Do not connect to incompatible products.

EMERGENCY CALLS

Ensure the phone is switched on and in service. Enter the emergency number, and then press the talk key. Give your location. Do not end the call without permission.

2 About your device

| | |

3 Start to use

3.1 Insert SIM card

The phone is a Dual SIM mobile phone allowing

you to use the facility of two networks.

To insert SIM card(s):

1. Switch off the mobile phone and remove the rear cover and battery.
2. Insert the SIM card correctly in the card slots.
3. Finally insert the battery and replace the rear cover of the mobile phone.

3.2 Insert Memory card

1. Power off the mobile phone and remove the rear cover and battery.
2. Insert the Micro SD card into the slot.
3. Finally insert the battery and the rear cover of the mobile phone.

Note: Use only compatible memory cards for use with this device. Incompatible memory cards may damage the card or the device and corrupt the data stored in the card.

3.3 Charge the Battery or Connect to a computer

You can charge your battery using the charger or connect the USB cable (supplied with this phone) to the computer.

Note: Please use the specific battery, otherwise it may cause explosion.

4 Basic functions

4.1 Basic operations

Long press the blank space in Home screen to add the shortcuts, widgets, folders to Home screen and change the wallpapers. Long press the icons in Home screen and drag it to the trash at the bottom. Press the third icon at the bottom of Home screen into application lists. Long press the application icon and drag it to home screen to create the shortcuts of the application.

4.2 Make calls

When the network provider icon appears on the standby screen, you can call out or answer calls. The indicator on the upper right part shall show the signal strength.

Quality of connection will be greatly influenced by obstructions. So movement in a small range may effectively improve the quality of connection.

4.2.1 Make domestic calls

Use virtual keyboard to enter phone numbers and then press Dial icon to call. If you need to change the phone number, please press the cancel key on the touch screen to delete (numbers entered). When the call is answered, the screen shall show the

connection status.

4.2.2 Call extension phone

Some of the extension phones can't be directly connected to. Use the virtual keyboard, enter switchboard number, open the option menu and choose "Add 2-sec pause", and then dial the extension phone number.

Type in as follows to call extension phone:

Zone description › switchboard number › temporarily held for 2s › extension phone number › call

4.2.3 Make international calls

If you need to make an international call, long press the 0 key on the virtual keyboard until there appears the sign "+" for international call prefix, which helps you call numbers from any country (For example, 86 for China) even if you don't know the international call prefix of that country.

You can make an international call according to the following typing order: + › country code › complete phone number › dialing icon (type in the prefix code(+), and then continue to enter the country code and complete phone number). Country code usually follows conventional practice: German is 49, Britain 44, Sweden 46 and so on.

When making international phone calls, the "0" in the city code should be omitted.

4.2.4 Make listed calls

Every dialed and received phone number is

recorded in the call history list. Recently dialed, answered and missed phone numbers are in order (latest to earliest) listed in the "all" log. You can also choose and check missed, answered and dialed list as needed. Follow the instructions below to check the list:

- Press Dial icon at standby screen to dial or check call history.
- Listed phone numbers can be called out by pressing the respective log.
- Press the small icon on the right side to enter the log detail interface. In the call history interface, users can long press to save or delete the number. In the details interface, the phone number saving function is preset.

4.3 Emergency calls

You can make emergency call as long as you are in the network coverage (check the signal strength indication bar on the upper right side of the handset screen). If your network provider doesn't provide roaming service in this area, there will be "Emergency Calls Available" on the screen. If you are in the network coverage, you can make emergency calls even without a SIM card.

4.4 Answer calls

Directly slide "answer key" to answer an

incoming call. If your headphone is connected to the handset, you can use the headphone key on the headphone to answer calls.

Cautions: A short press on the headphone key will answer the call while a long one will hang up the phone.

4.5 Call history

This handset can not only list all calls in reverse order, but also list a floating menu with all, answered; dialed, missed calls for checking call history of different kinds.

4.6 Call Connection option

This option can only be seen during a call. The waiting call, hold call, multi-party call functions require the support of the network. Please contact your service provider for details.

In the connection option page, you can do the following operations:

■ Hold

Temporarily hold the current one-line call.

■ End Call

End the current call.

■ Contacts

Enter the Contacts menu.

■ Dial pad

Enter the dialing screen during a call.

- **Speaker**

The voice passes through the speaker system

- **Mute**

Turn on/off Mute. When the mute is ON, the other person can't hear the sound from this handset.

- **Audio recording.**

Record the current call.

- **Conference**

In Conference call mode, you answer the incoming call and add it to the conference in accordance with the instructions; Hold multiparty conference; Have a private conversation with one party and hold other parties' call; Connect one party to the other and end the conference call; Put one party on hold; End current call and all hold on calls.

Cautions: menu items marked by * means happening only under certain situations. Users need to apply for opening the conference call service from their service provider.

5 Function menu

5.1 Browser

Press the browser icon to enter the browser interface and you can search for websites.

5.2 Calculator

The handset is provided with a calculator with basic functions. You can carry out the operation for plus, minus, multiply, and division by pressing icons on the screen. Slide the screen to the right , you can use more functions.

Cautions: the accuracy is limited and round-off error may occur.

5.3 Calendar

Enter the calendar menu and there shall appear a virtual calendar on the screen with the current date marked on background frame in a special color. Press the touch screen to browse date and the calendar information on the screen shall be correspondingly updated.

5.4 Call Log

Select Call history to view recent calls in SIM1 and in SIM2, including All calls, Outgoing calls, Incoming calls, Missed calls and Call time. Select any entries to calls, send message and send multimedia message.
