### 1. PRECAUTIONS

Read these simple guideline. Not following them may be dangerous or illegal. Read the complete user manual for further information.

	Do not switch your phone on when the use of wireless devices is prohibited or when the wireless device may cause interference or danger.
	Do not use your phone while driving.
	Follow relevant rules or regulations in hospitals and health care facilities. Switch your phone off near medical devices.
	Switch your phone off in aircraft. The radio signal from it may cause interference in signals of the aircraft.
	Switch your phone off near high-precision electronic devices. It may affect the performance of these devices.
	Do not attempt to disassemble your phone or its accessories. Only qualified personnel may service or repair the phone.
	Do not place your phone and its accessories in containers with strong electromagnetic field.
	Do not place magnetic storage media near your phone. Radiation from the phone may erase the information stored on them.
	Do not put your phone in a high-temperature place or use it in a place with flammable gas such as a petrol pumps.
	Keep your phone and its accessories away from children. Do not allow children to use your phone without guidance.
	Observe any laws or regulations on the use of phone. Respect others' privacy and legal rights when using your phone.
	Your device is not water resistant. Keep it dry.

### 2. KNOW YOUR PHONE

#### 2.1 Keys and parts

1	Center key	8	Display
2	Left soft key	9	Right soft key
3	Dial/Answer key	10	Ending/Power key
4	Headset port	11	Keypad
5	Charger/Data port	12	Microphone

## 5. APPENDIX

### 5.1. FAQ

#### ➢ The phone cannot be turned on

When the battery is very low, the phone may not be turned on properly. Please charge the battery.

#### My call is picked up by another phone

Check if call divert is set. If it is set, your incoming calls may be diverted to other numbers or devices.

#### 5.2. Error Message

##### Please insert SIM card

Make sure you have inserted SIM card. If you have installed it but it cannot be detected, please try clean the golden contacts of the SIM card by using a dry cloth. If it still is not working, please contact your network carrier.

#### No service

If you are in an area not covered by your network, or if a physical obstacle is present, such as in an enclosed area, the message "No service" will be displayed on your Standby screen and you will not be able to make or receive calls. You can try move closer to a window for better reception.

##### For emergency only

When you are outside your network but inside other network, you can only make emergency call.

##### No Valid SIM card

Your SIM card is locked or it has an error. Please insert the right SIM card or contact your service provider.

##### Enter PUK code

After three consecutive incorrect PIN code entries, the code is blocked, and you need the PUK code to unlock it. Contact your service provider. After seven consecutive incorrect PUK code entries, the SIM card cannot be used any more. Please contact your service provider to buy a new SIM card.

## 6. HEALTH AND SAFETY PRECAUTIONS

Please read these simple guidelines. Not following them may be dangerous or illegal.

### 6.1. SAR Compliance

Your phone is designed not to exceed the limits of emission of radio waves recommended by international guidelines.

SAR (specific absorption rate) is the measurement of body-absorbed RF quantity when the phone is in use. SAR value is ascertained according to the highest RF level generated during laboratory tests.

The SAR value of the phone may depend on factors such as proximity to the network tower, use of accessories or other accessories.

The highest SAR value of the device at the head and body are below 1.6W/kg respectively averaged over 1 gm. of human tissue.

### 6.2. SAR Recommendations

Use a wireless hands-free system (headphone, headset) with a low power Bluetooth emitter.

Please keep your calls short and use SMS whenever more convenient. This advice applies especially to children, adolescents and pregnant women

Prefer to use your cell phone when the signal quality is good.

People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.

Maintain a preferable distance of 15 mm from the device.

### 6.3. Recycle Your Handset

The WEEE logo (shown at the left) appears on the product (battery, handset, and charger) to indicate that this product must not be disposed of or dumped with your other household wastes. You are liable to dispose of

all your electronic or electrical waste equipment by relocating over to the specified collection point for recycling of such hazardous waste.

Specified collection points for recycling of such hazardous waste. Collection and proper recovery of your electronic waste equipment at the time of disposal will allow us to help preserve the environment. Recycling of the electronic waste equipment will ensure safety of human health and environment. For more information on best practices for disposal of electronic and electrical waste, please visit to our web site: [www.Lavamobiles.com](http://www.Lavamobiles.com)

### 6.4. Disclaimers
