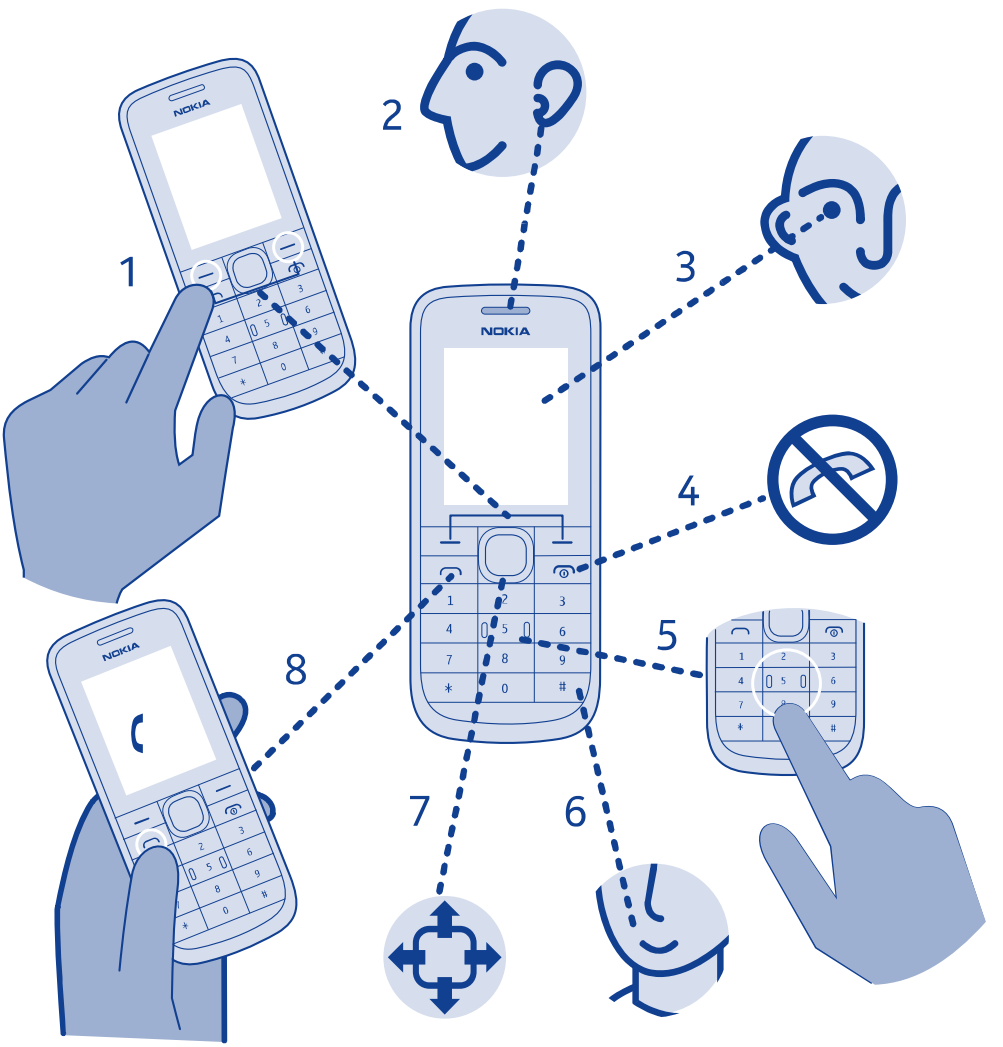
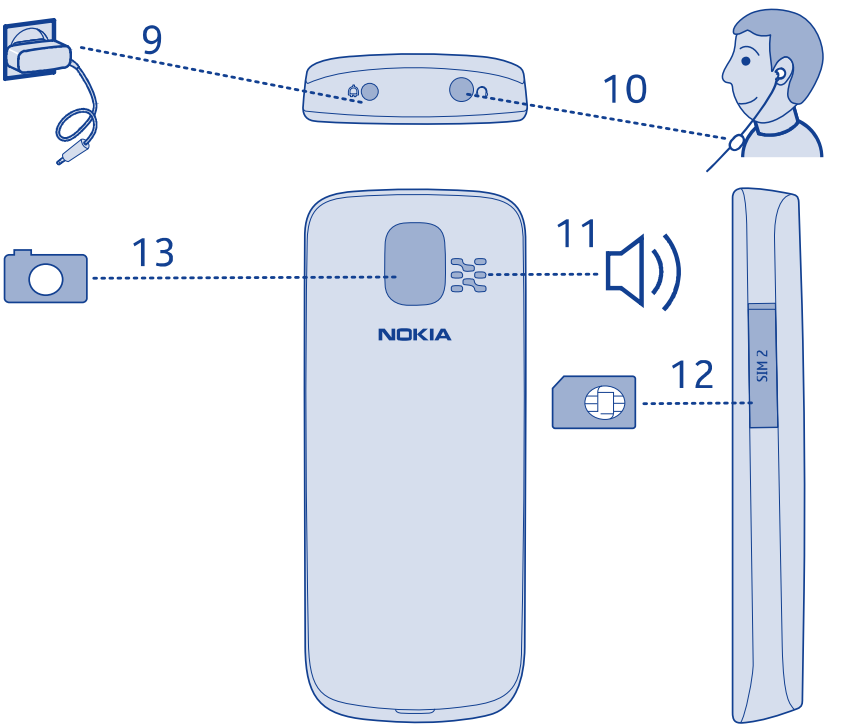
General information.....51

Keys and parts



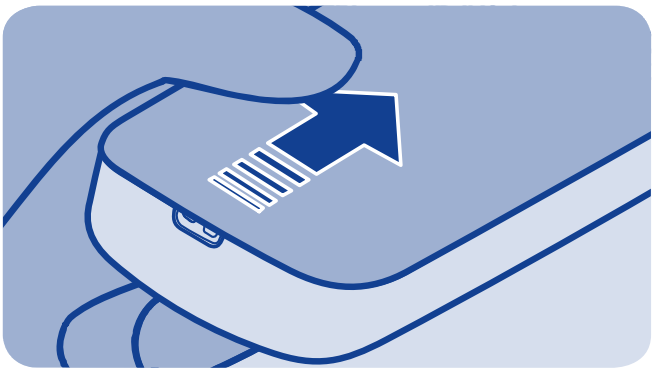
1 Selection keys
2 Earpiece
3 Screen
4 End/Power key
5 Keypad
6 Microphone
7 Scroll key
8 Call key



9 Charger connector
10 Headset connector (3.5 mm)
11 Loudspeaker
12 SIM card slot (SIM 2). See ➥ 5 in "Feature-specific instructions".
13 Camera lens. Before using the camera, remove the protective tape from the lens.

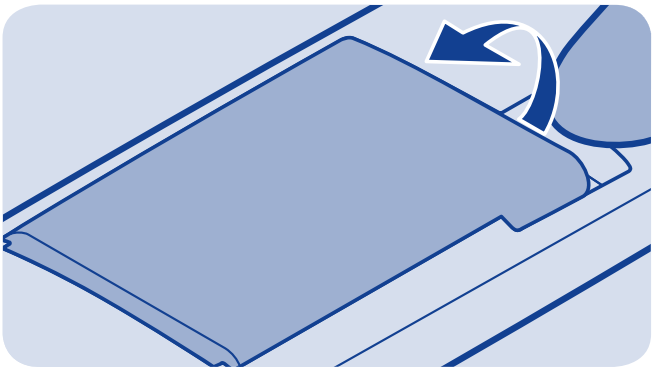
Insert a SIM card and battery

1



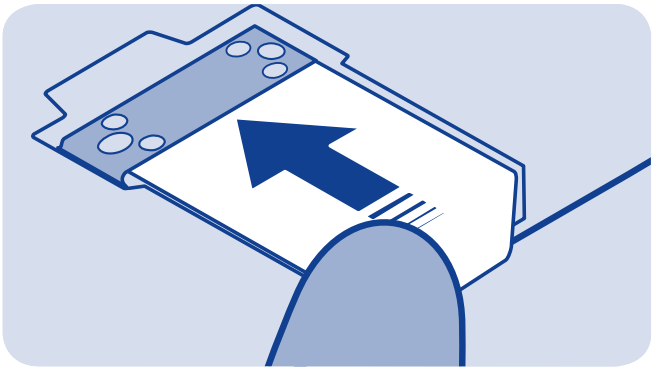
Switch the phone off, then remove the back cover.

2



If the battery is in the phone, lift it out.

3



Slide the SIM under the holder with the contact area face down. See ➥ 2.

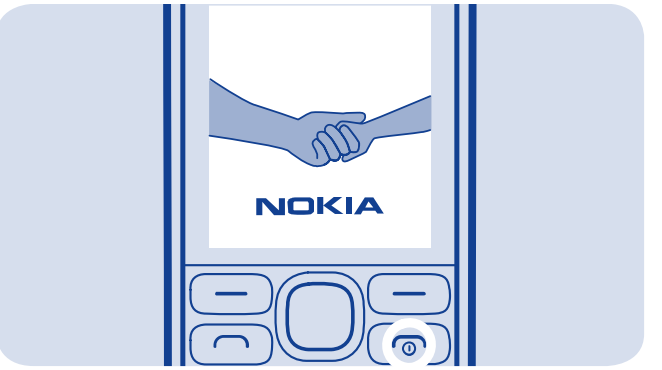
4

Line up the battery contacts, then push the battery in.

5

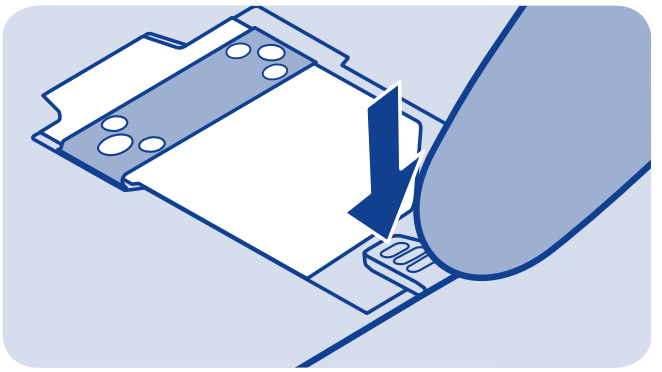
Slide the back cover down until it locks into place.

6



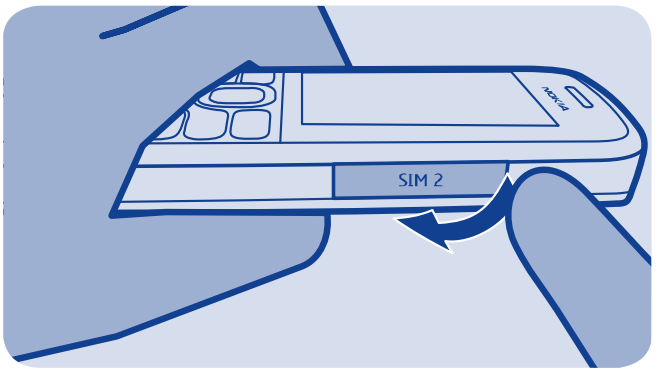
To switch on, press and hold ⏻ until the phone vibrates.

Insert or remove a second SIM card



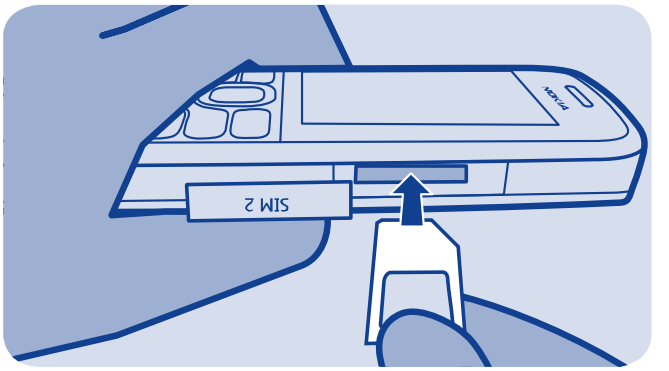
Tip: To remove the SIM, press the tongue down, then slide the SIM out.

1



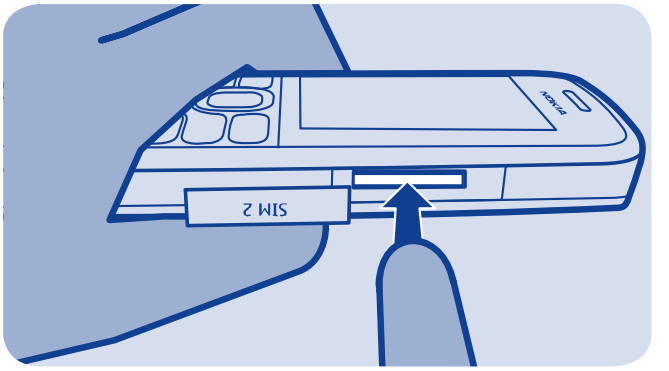
Open the SIM 2 SIM cover. See ➥ 6.

2



Put the SIM in with the contact area face up.

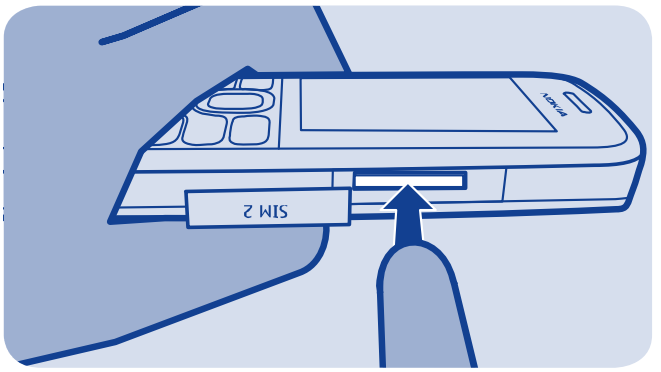
3



Push the card in until it locks into place. Close the cover.

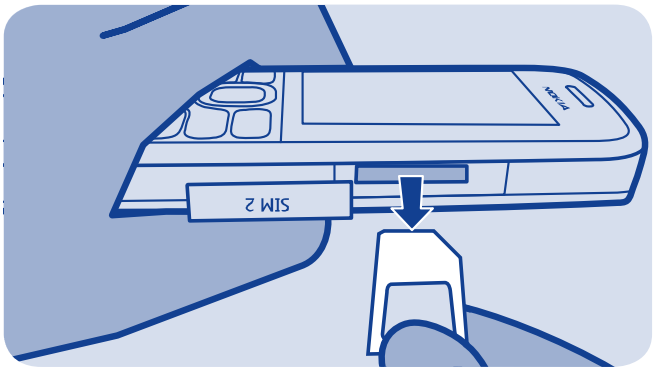
Insert a memory card

4



To remove the SIM, push the SIM in until it's free.

5

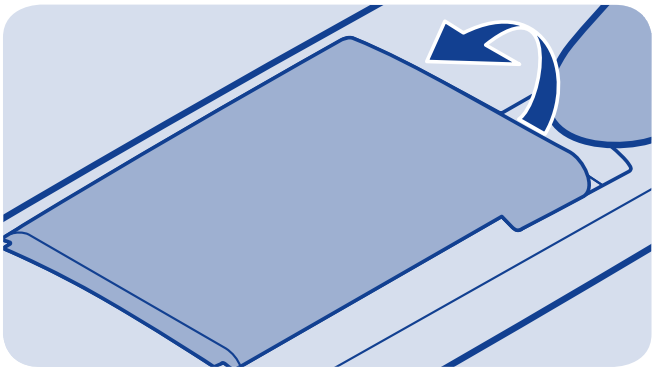


Pull the SIM out.

1

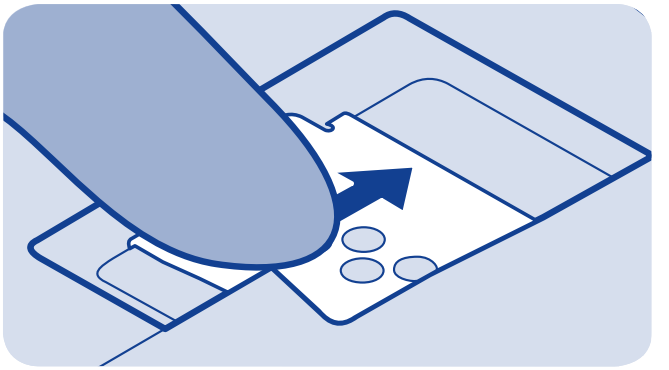
Switch the phone off, and remove the back cover.

2



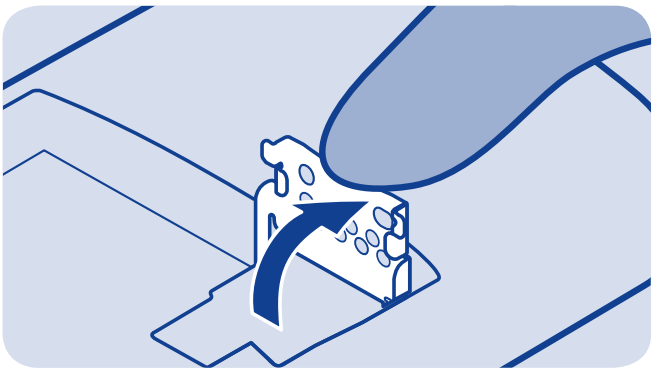
If the battery is in the phone, lift it out.

3



Slide the memory card holder towards the top of the phone.

4

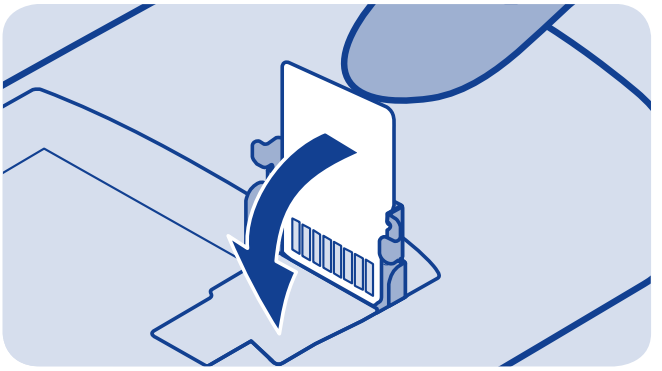


Lift the holder.

5

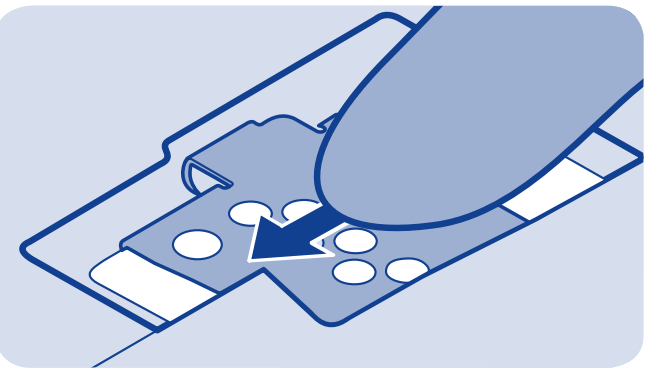
Put a compatible memory card in with the contact area face down.

6



Lower the holder.

7



Slide the holder to its original position.

8

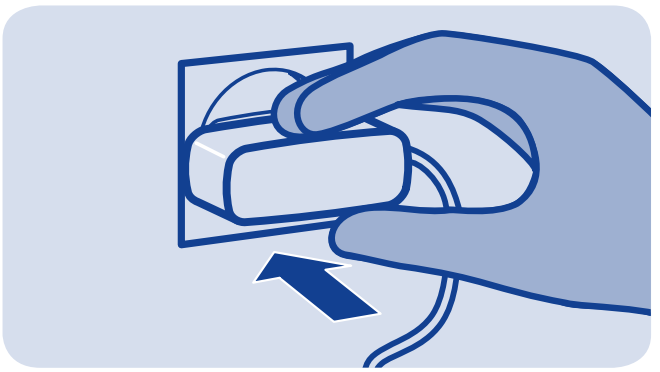
Line up the battery contacts, and push the battery in.

9

Slide the back cover down until it locks into place. See ➥ 1.

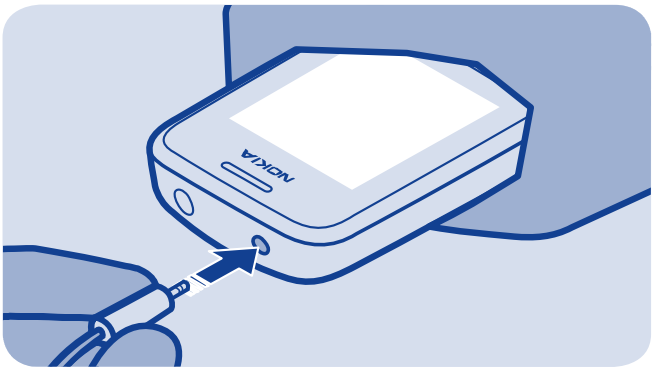
Charge the battery

1



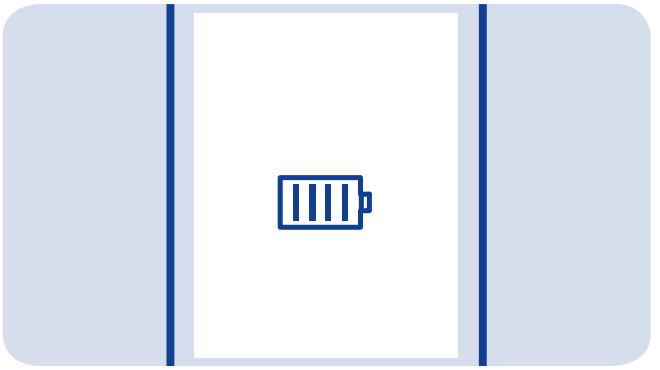
Plug the charger into a wall outlet.

2



Connect the charger to the phone. See ➥ 3.

3



Battery full? Unplug from the phone, then from the wall outlet.

Lock the keys

Lock the keys when not using your phone.

1

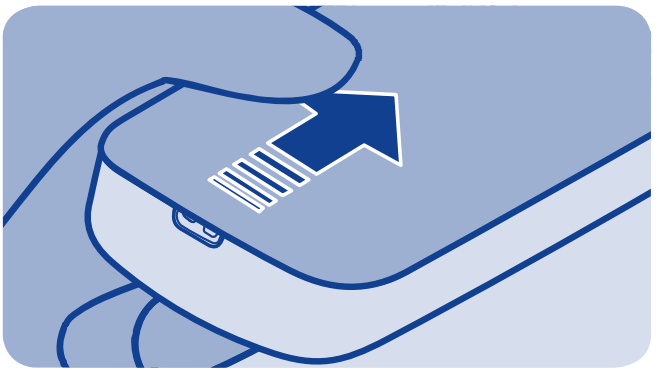
Select **Menu**, then press *.

2

To unlock, select **Unlock**, then press *.

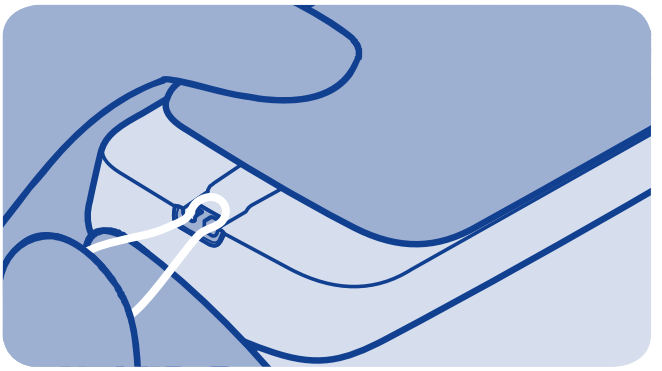
Attach a strap

1



Switch the phone off, and remove the back cover.

2



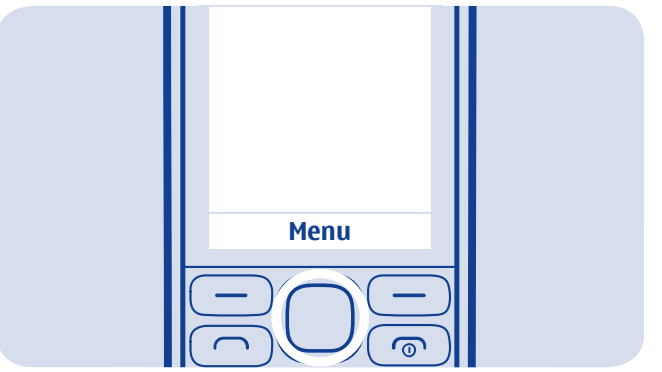
Loop the strap around the peg.

3

Slide the back cover down until it locks into place.

Explore your phone

1

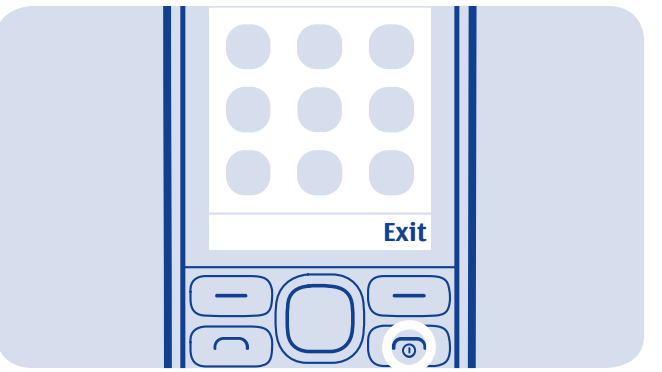


To see the features and apps in your phone, press **Menu**.

2

To go back to the previous view, press **Back**.

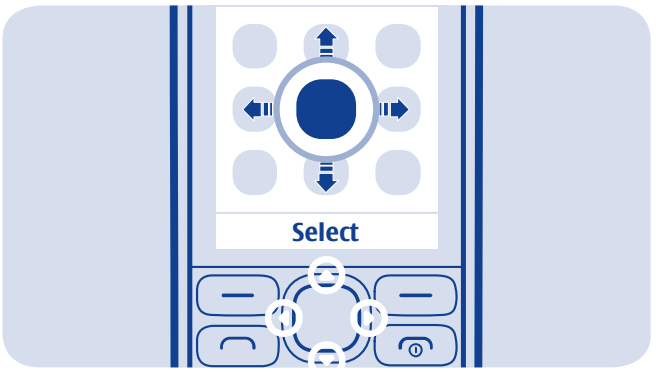
3



To go back to the home screen, press .

Set which SIM card to use

4



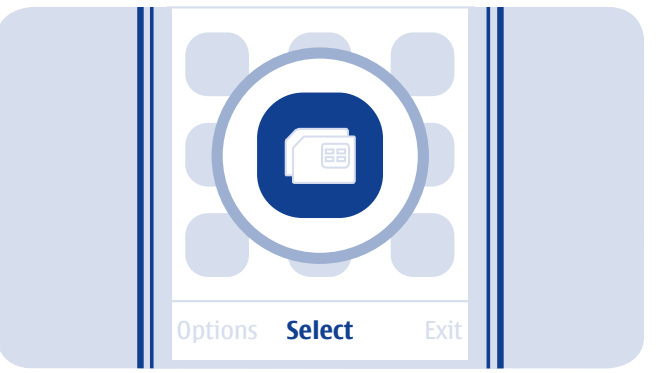
To go to an app or feature, press the scroll key up, down, left, or right.

Set the SIM for outgoing calls, messages, and connections.

5

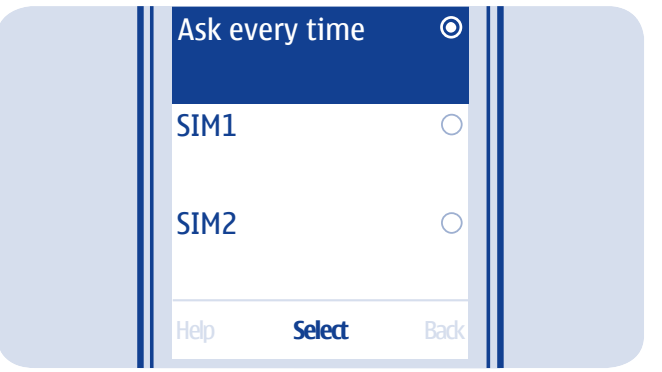
To open the app or select the feature, press **Select**.

1



Select **Menu** > **SIM manager**.

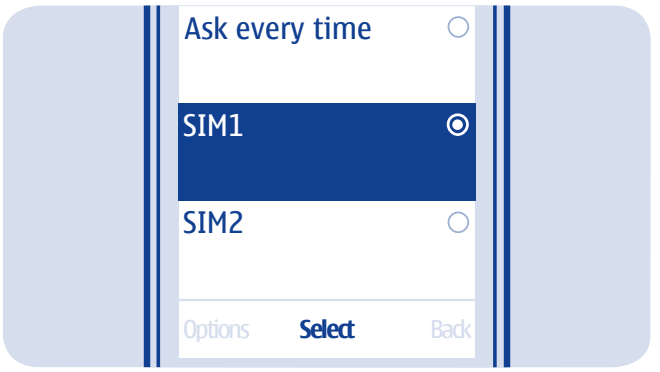
2



To decide every time which SIM to use, select **Ask every time**.

Copy content from your old phone

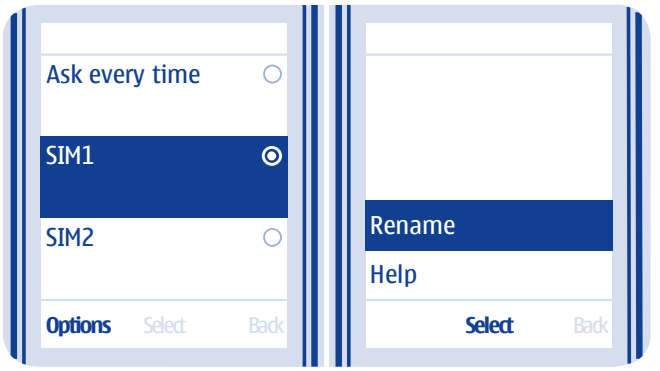
3



Select **SIM1** or **SIM2** to always use that SIM.

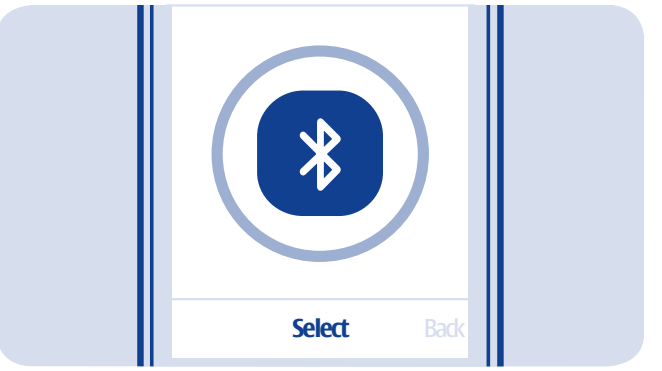
Easily get your contacts, calendar, and other stuff to your new phone.

4



To rename a SIM, select the card, then select **Options** > **Rename**.

1

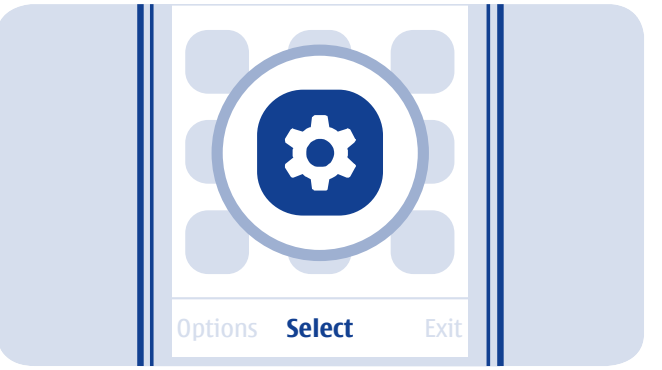


Switch Bluetooth on in both phones.

5

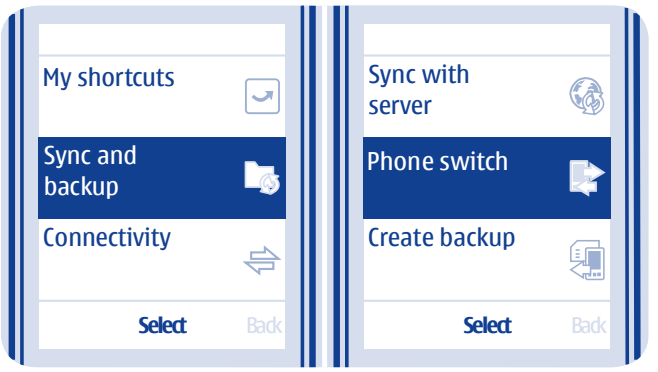
Write a name, then select **OK**.

2



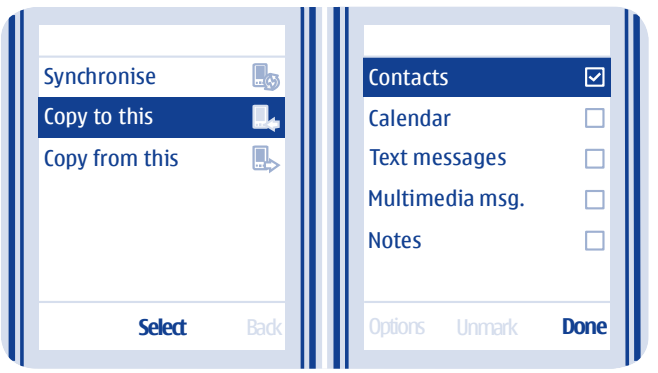
Select **Menu** > **Settings**.

3



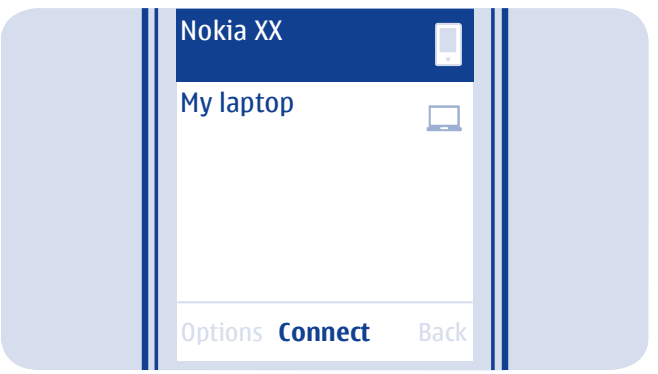
Select **Sync and backup** > **Phone switch**.

4



Select **Copy to this** and what you want to copy, then select **Done**.

5

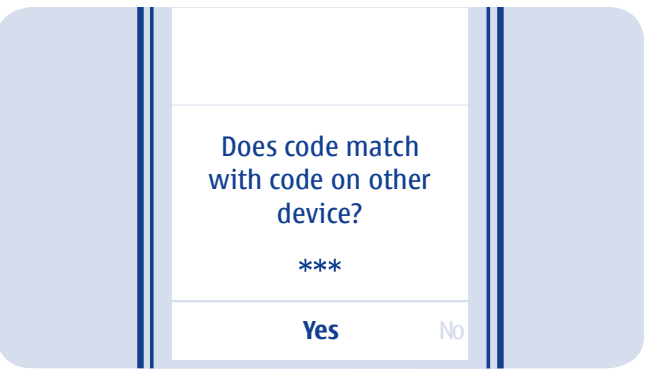


Select your old phone from the list of found devices.

6

If asked, create a one-time passcode (such as 123), then select **OK**.

7



Check that the codes match on both phones.

8

Follow the instructions shown on both phones.

Indicators on your phone

— You have unread messages sent to SIM1 or SIM2.

— You have unread messages sent to SIM1 and SIM2.

— You have unsent, cancelled, or failed messages from SIM1 or SIM2.

— You have unsent, cancelled, or failed messages from SIM1 and SIM2.

— The keys are locked.

— The phone doesn't ring when somebody calls or sends a message.

— An alarm is set.

— The phone is connected to a GPRS or EGPRS network using SIM1.

— A GPRS or EGPRS connection from SIM1 is open.

— The GPRS or EGPRS connection from SIM1 is on hold.

— Bluetooth is on.

— All incoming calls to SIM1 or SIM2 are forwarded to another number.

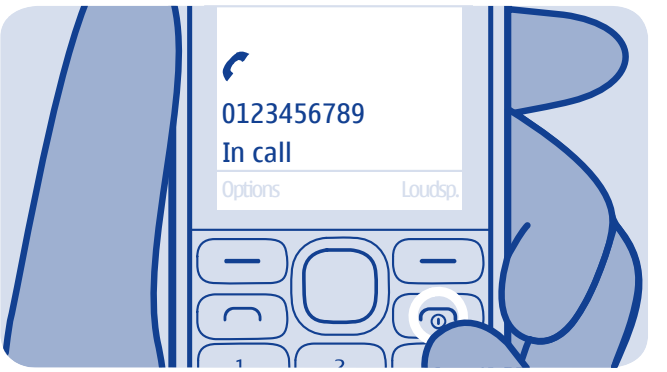
— All incoming calls to SIM1 and SIM2 are forwarded to another number.

— A headset is connected to the phone.

Make or answer a call

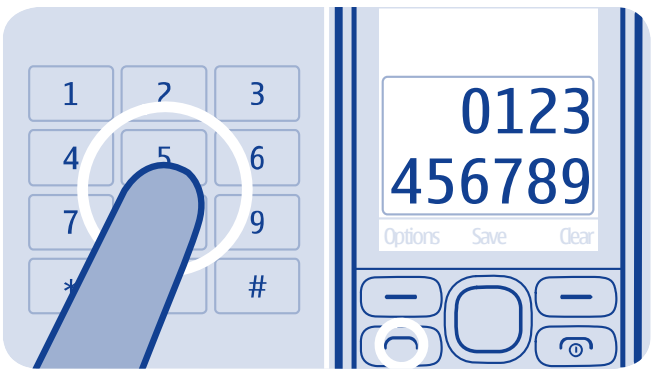
Call your friend. See ➥ 15.

3



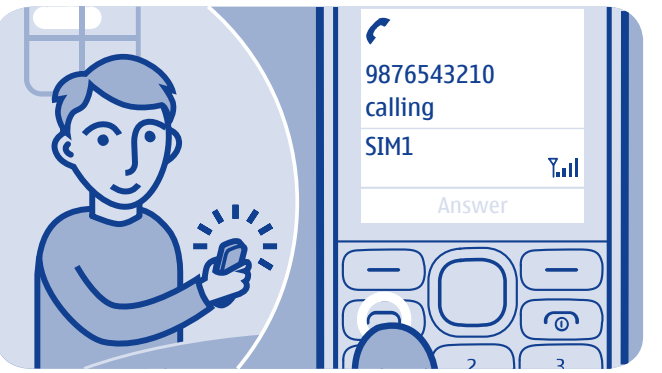
To end the call, press ⏻.

1



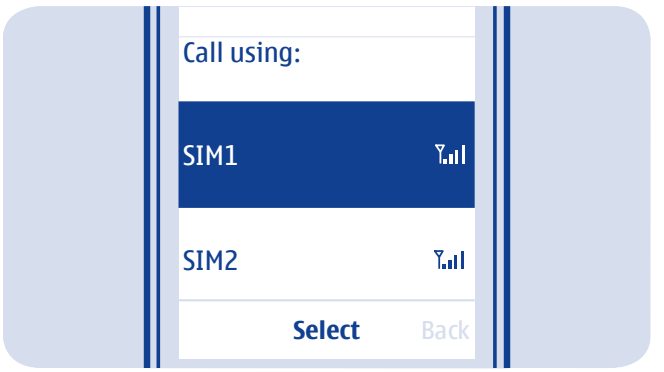
Type in the phone number, then press ⌒.

4



When your phone rings, press ⌒ to answer. See ➥ 16.

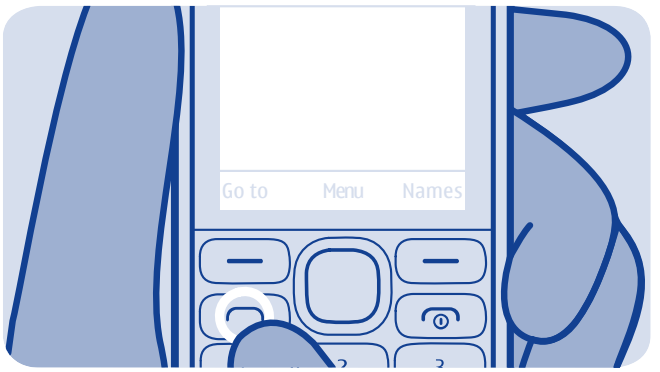
2



If asked, select which SIM to use.

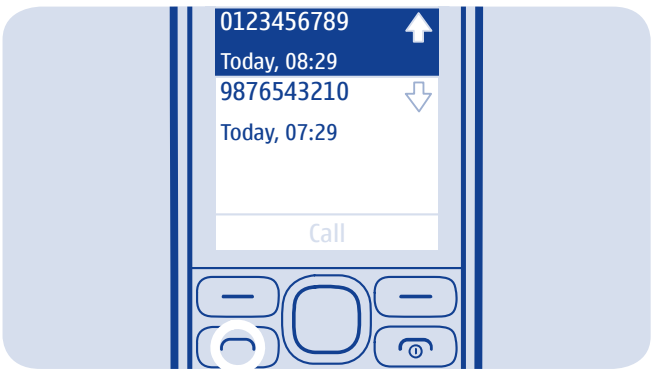
Call the last dialled number

1



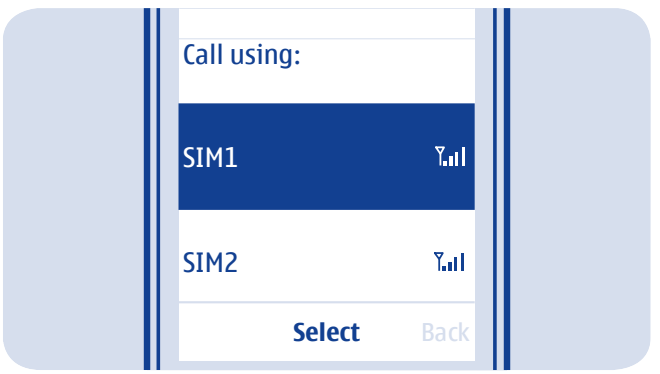
On the home screen, press ⌒.

2



Select the number, then press ⌒.

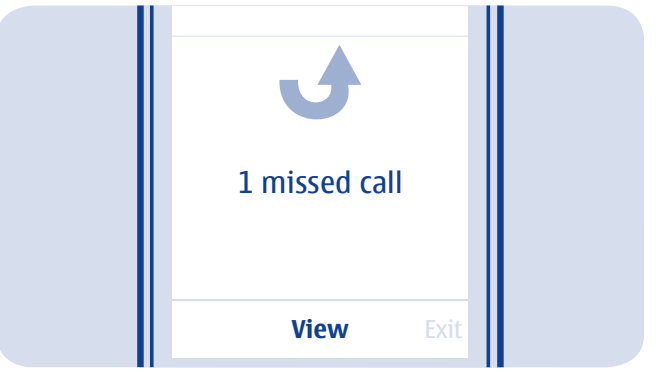
3



Select the SIM to use.

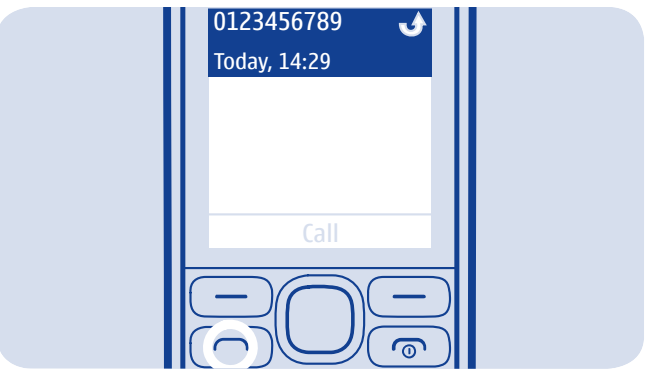
View your missed calls

1

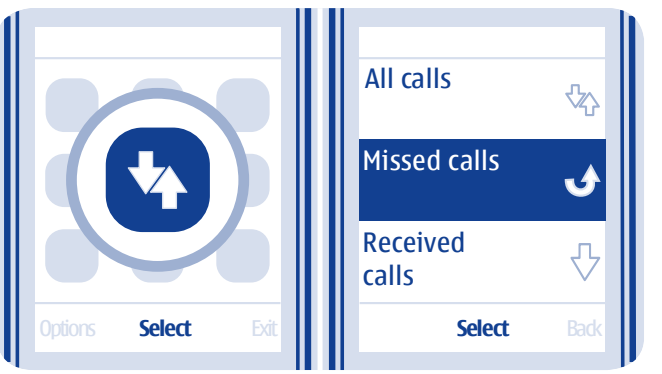


On the home screen, select **View**. See ➥ 4.

2



To call back, select the number, then press ⌒.



Tip: To view missed calls later, select **Menu** > **Log** > **Missed calls**.

Change the volume

Is the volume too loud during a call or when listening to the radio?

1

Scroll up or down.

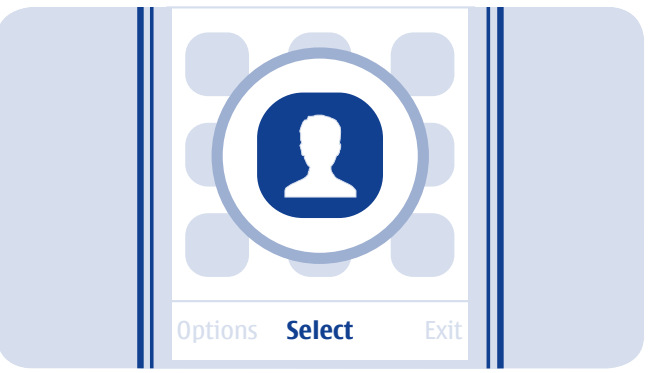
2

Better.

Save a name and phone number

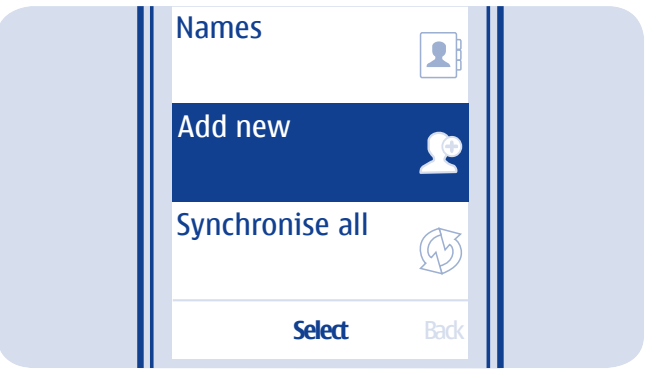
Add new contacts to your phone.

1



Select **Menu** > **Contacts**.

2



Select **Add new**. If asked, select where to save the contact.

3

Type in the phone number, then select **OK**.

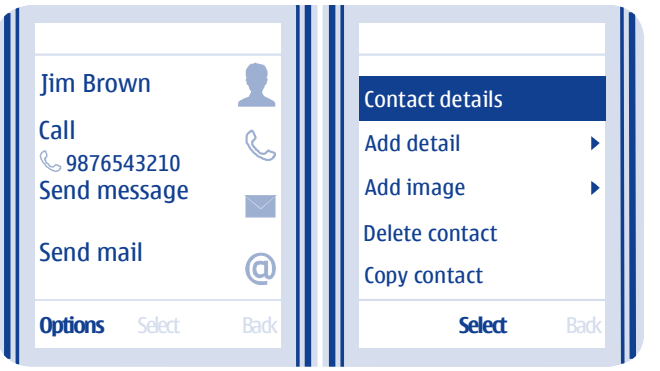
6

To search for a contact, start writing the contact's name in the search box.

4

Write the first and last name, then select **Save**.

7

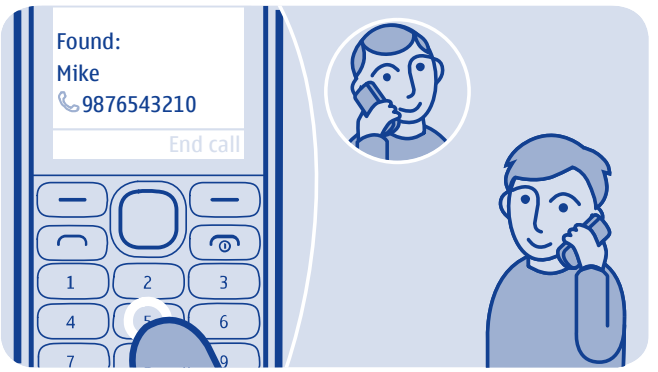


Select **Options** > **Contact details**.

5

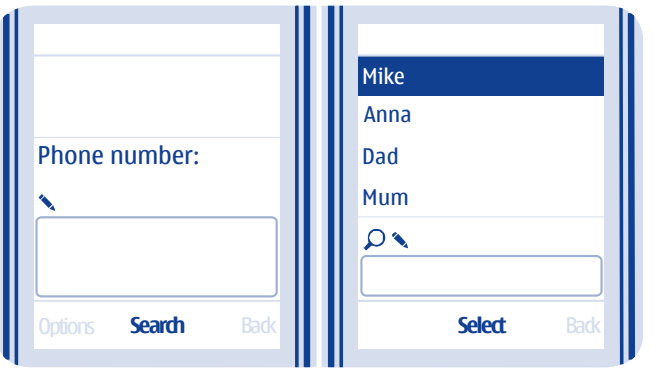
To edit details, select **Names** and a contact.

Make calls quickly



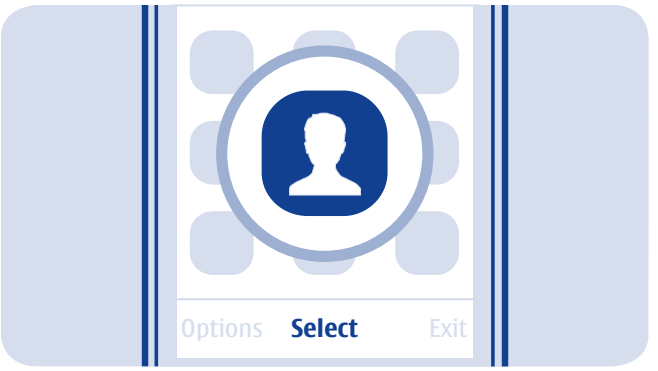
Call someone often? Set their number as a speed dial. See ➥ 7.

3



Select **Search** and a contact.

1



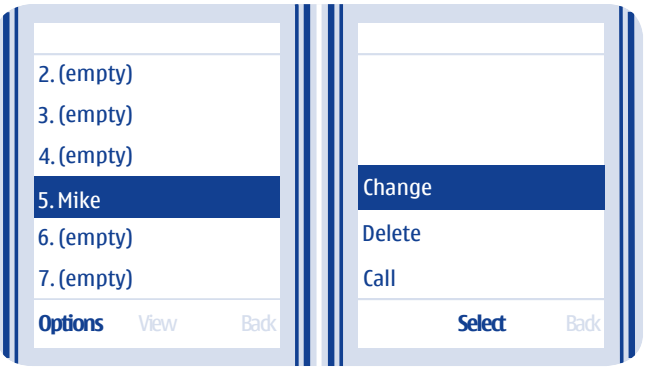
Select **Menu** > **Contacts**.

4

To call, press and hold a number key on the home screen.

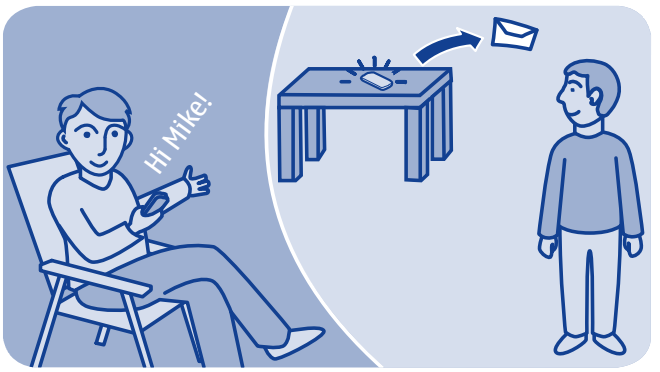
2

Select **More** > **Speed dials** and a free slot, then select **Assign**.



Tip: To change a speed dial, select **Options** > **Change**.

Send a message



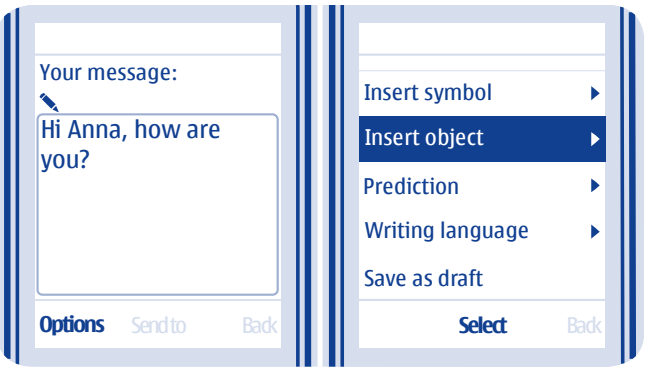
Keep in touch with people through messages. See ➥ 9.

3

Write your message.

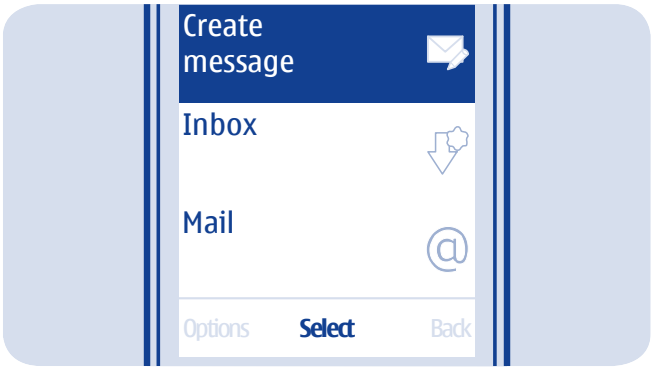
1

Select **Menu** > **Messaging**.



Tip: To add an attachment, select **Options** > **Insert object**. See ➥ 10, 11.

2



Select **Create message**.

4

To add a recipient, select **Send to** > **Contacts**.

Write text

5

Select **Send**. If asked, select which SIM to use. See ➥ 12, 11.

Press a key repeatedly until the letter is shown.

To type in a punctuation mark, press **1** repeatedly.

To type in a special character, press *, then select the character.

To switch between character cases, press **#**.

To use number mode, press and hold **#**, then select **Number mode**. To go back to letter mode, press and hold **#**.

If you want to quickly type in a single number, just press and hold the number key.

To switch predictive text on or off, select **Options** > **Prediction**, then select **On** or **Off**. Not all languages are supported.

To change the writing language, select **Options** > **Writing language**.

Check your voicemail

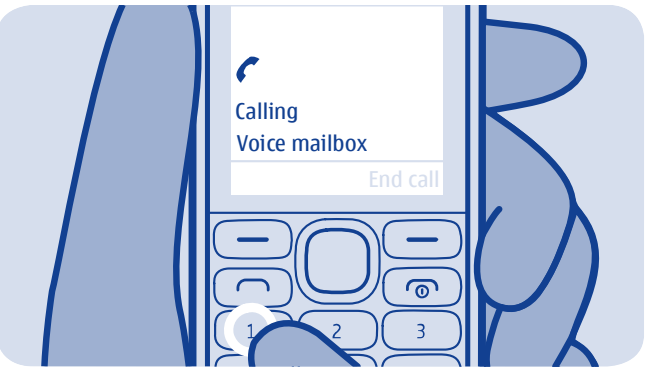
When you can't answer, you can forward calls to your voicemail.

3

When setting up voicemail, type in your voice mailbox number.

1

Select **Menu** > **Messaging**.

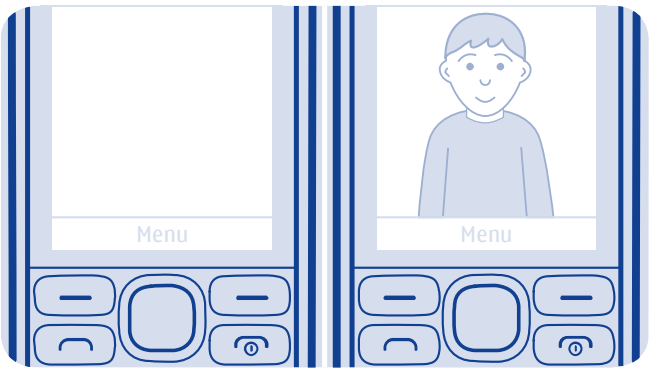


Tip: To quickly call your voicemail, press and hold **1** on the home screen.

2

Select **More** > **Voice messages** > **Listen to voice messages**.

Personalise your home screen

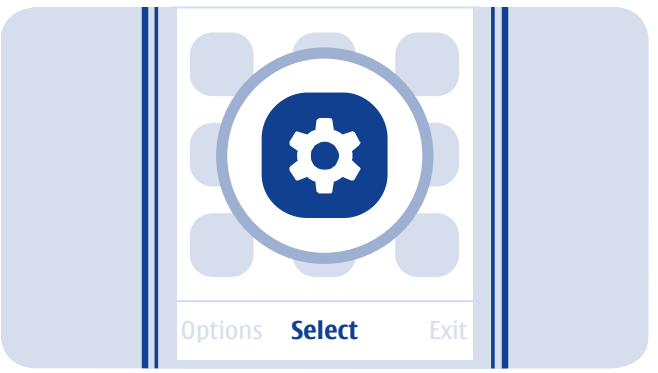


You can change the wallpaper, and rearrange items on the home screen.

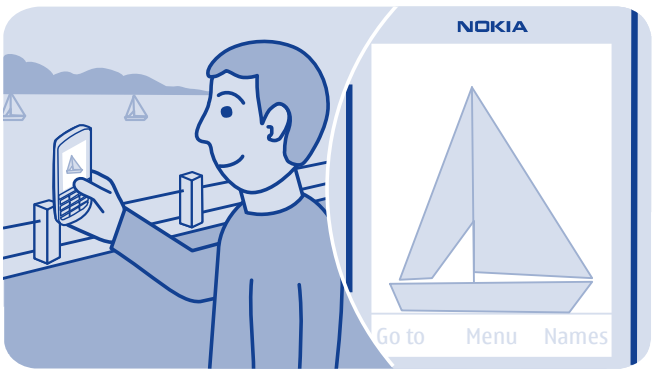
3

Select **OK** to open the folder, then select a photo.

1



Select **Menu** > **Settings**.

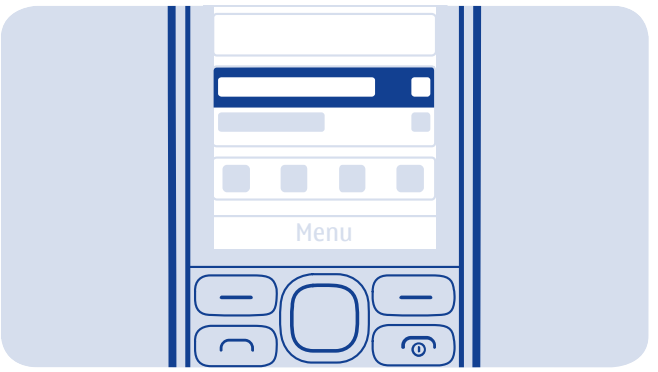


Tip: You can also take a photo on your phone camera, and use that.

2

Select **Display**, scroll to **Wallpaper**, then scroll to a folder.

Add shortcuts to your home screen



Add shortcuts to your favourite apps to your home screen.

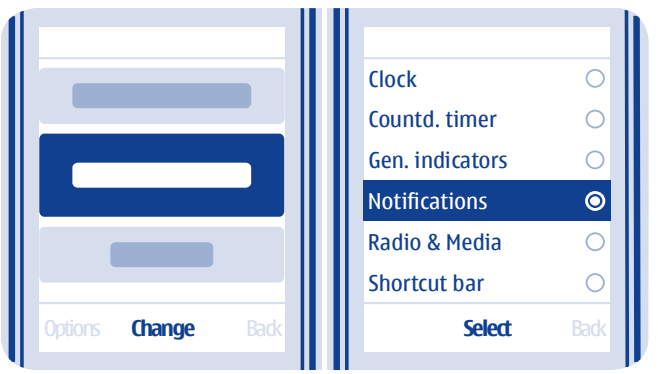
3

Select **Done** > **Yes**.

1

Scroll to a shortcut, then select **Options** > **Personalise**.

2

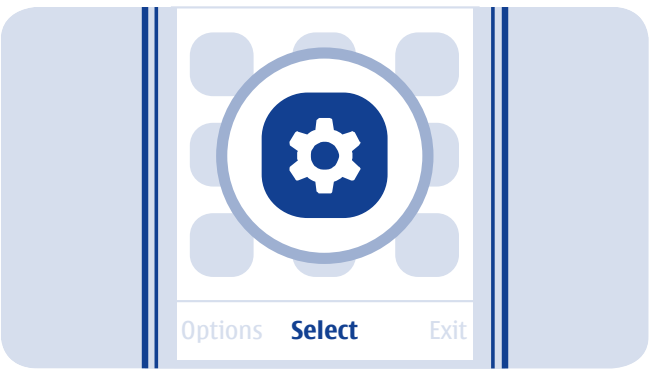


Select a bar, then select an item, such as a widget.

Change your ringtone

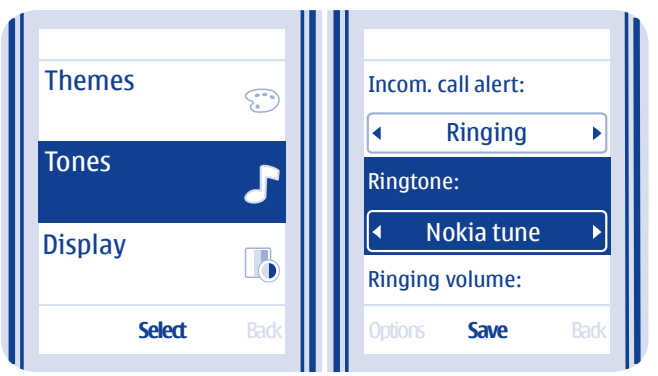
Set a different ringtone for each profile.

1



Select **Menu** > **Settings**.

2

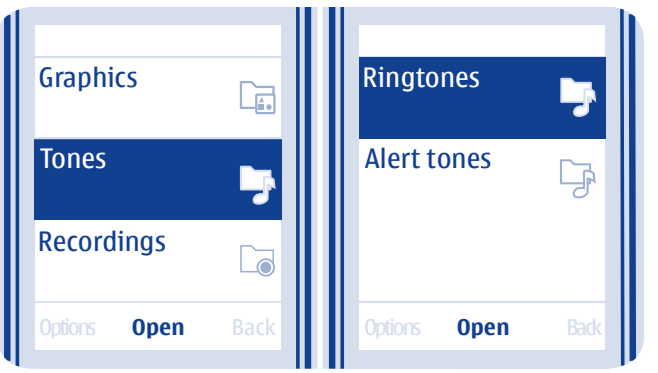


Select **Tones**, then scroll to **Ringtone:**.

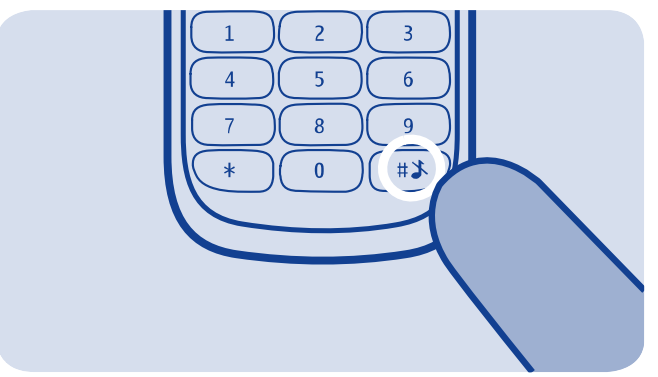
3

Scroll to **Open Gall.**, then select **Select**.

4



Select **Tones** > **Ringtones** and a ringtone.



Tip: To switch between the silent and normal profile, press and hold **#**.

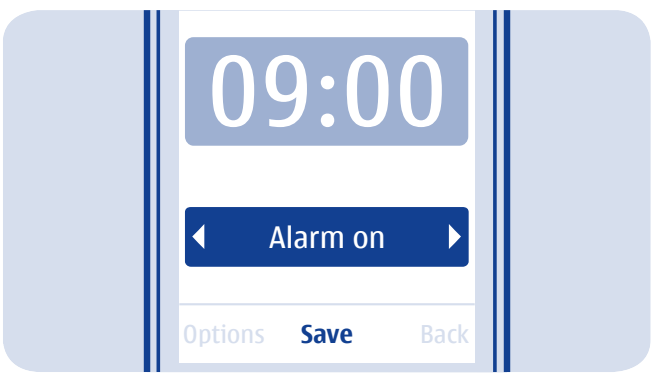
Set an alarm

Use your phone as an alarm clock.

1

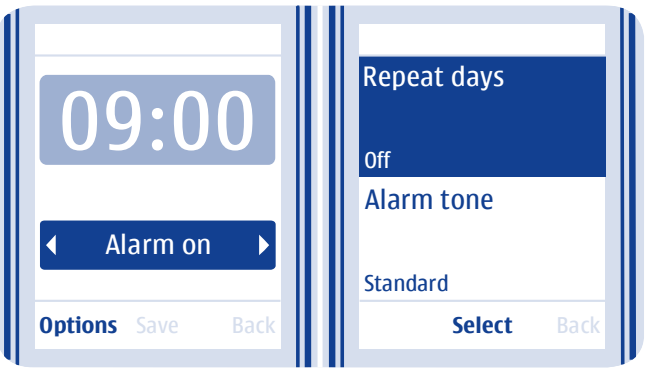
Select **Menu** > **Applications** > **Alarm clock**.

2



Set the alarm time, then select **Save**.

3

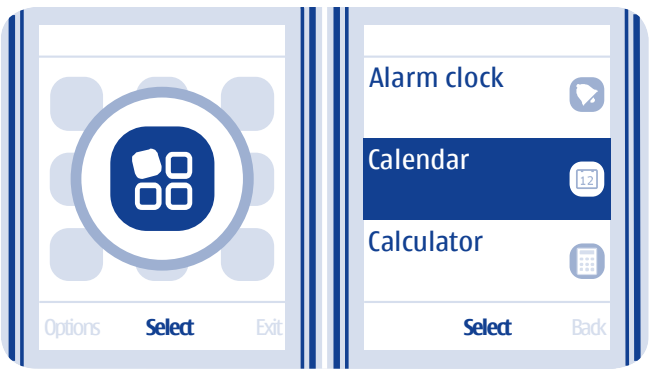


To repeat the alarm, select **Options** > **Repeat days** and the days, then select **Done**.

Add an appointment

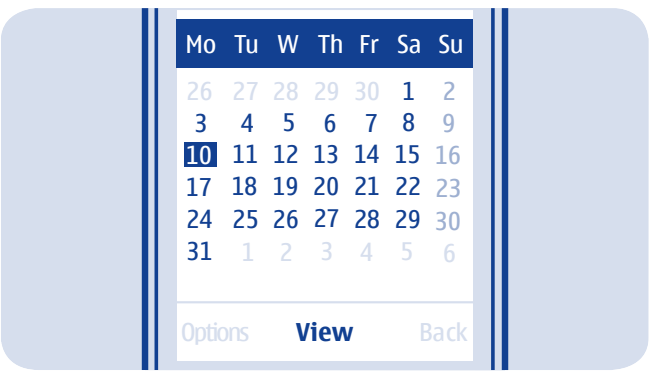
Need to remember an appointment? Add it to your calendar.

1



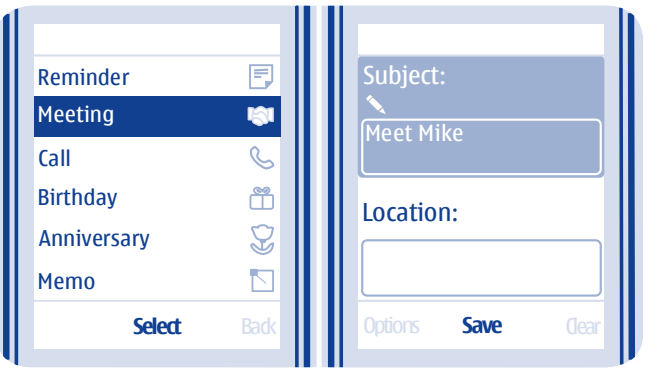
Select **Menu** > **Applications** > **Calendar**.

2



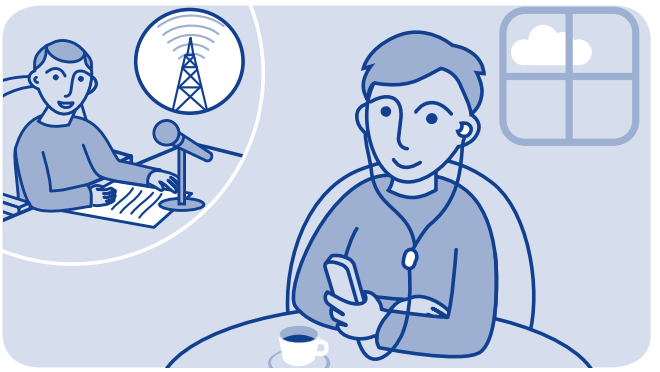
Select a date and **View** > **Add**.

3



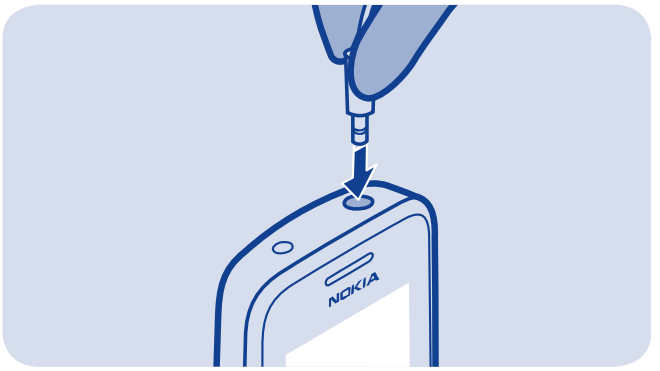
Select **Meeting**, fill in the fields, then select **Save**.

Listen to the radio



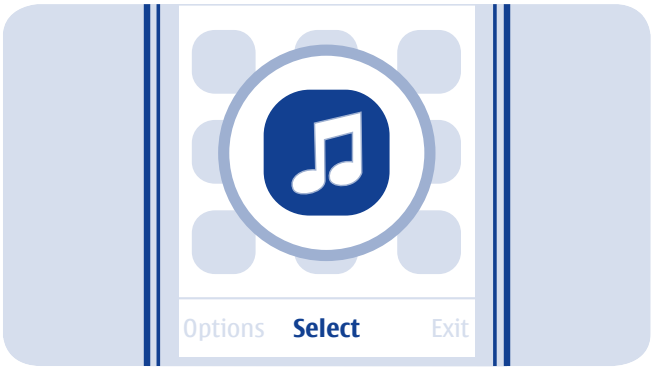
Listen to your favourite radio stations on your phone.

1



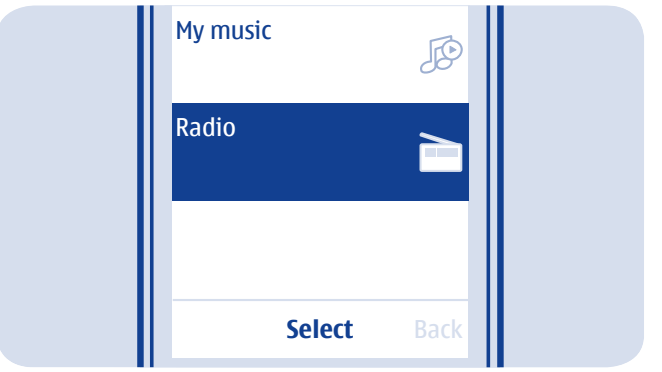
Connect a compatible headset. It acts as an antenna.

2



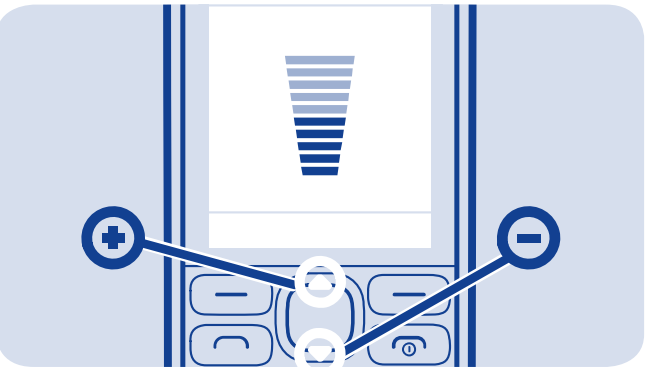
Select **Menu** > **Music**.

3



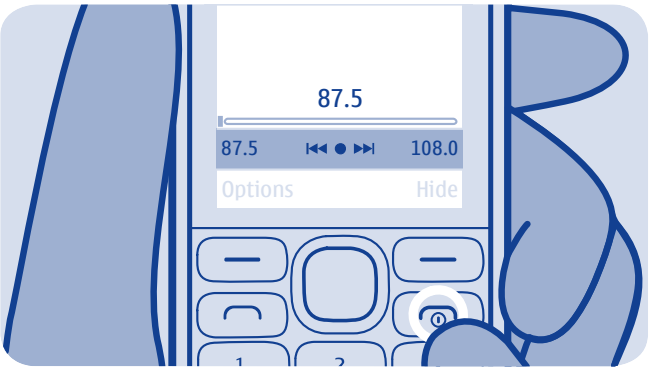
Select **Radio**.

4



To change the volume, scroll up or down.

5

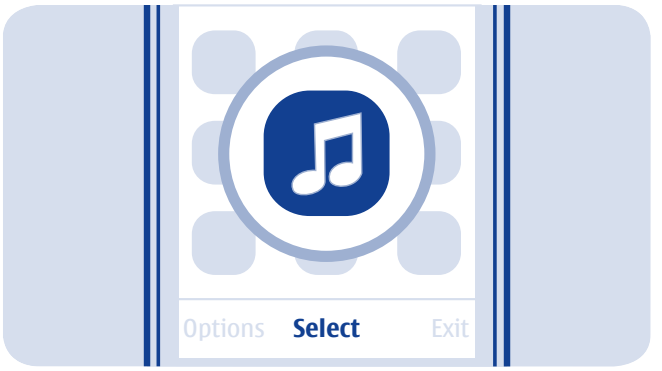


To close the radio, press ⏻.

Find and save radio stations

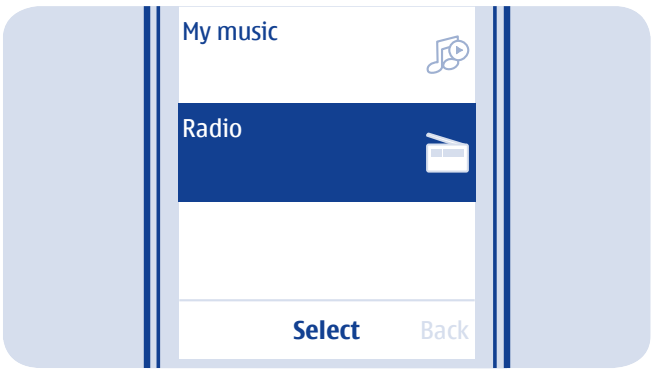
Search for your favourite radio stations

1



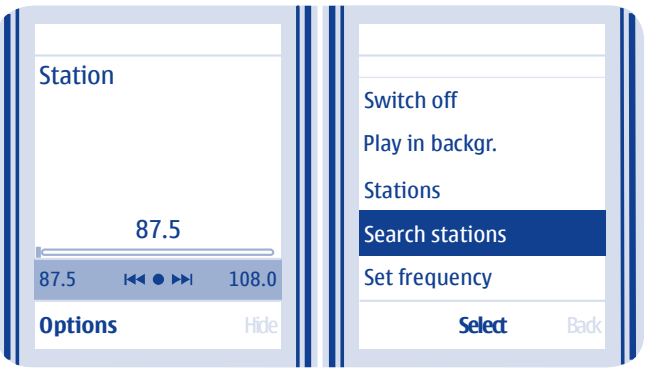
Select **Menu** > **Music**.

2



Select **Radio**.

3

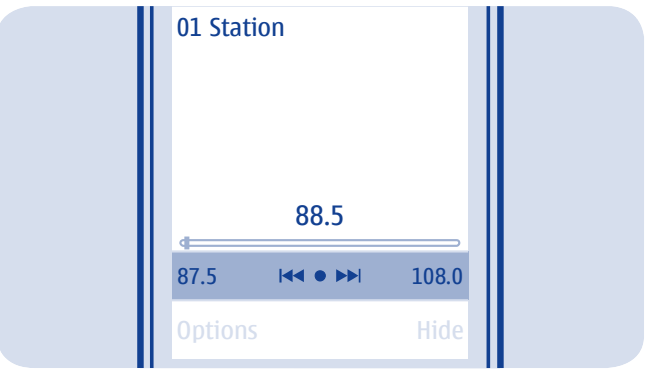


To search for all available stations, select **Options** > **Search stations**.

4

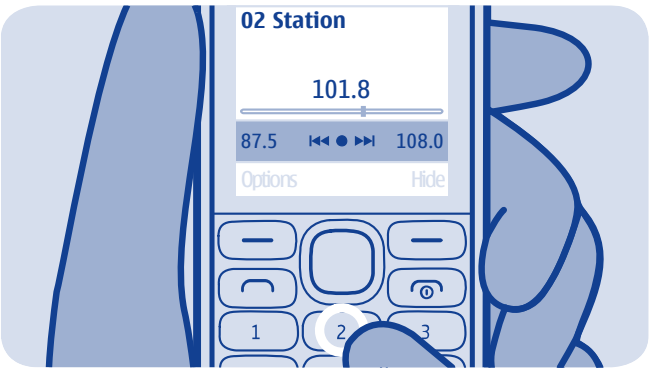
To save a station, select **Options** > **Save station**.

5

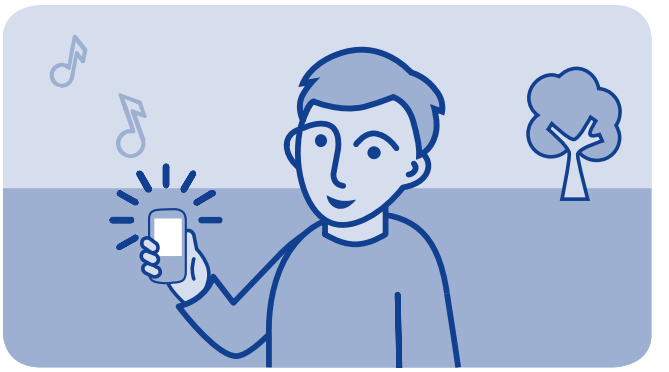


To switch to a saved station, scroll left or right.

Play a song



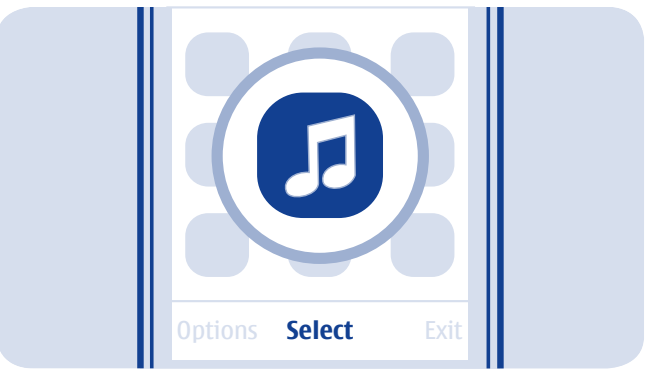
Tip: To switch to a saved station, you can also press a number key.



Listen to your favourite music on your phone.

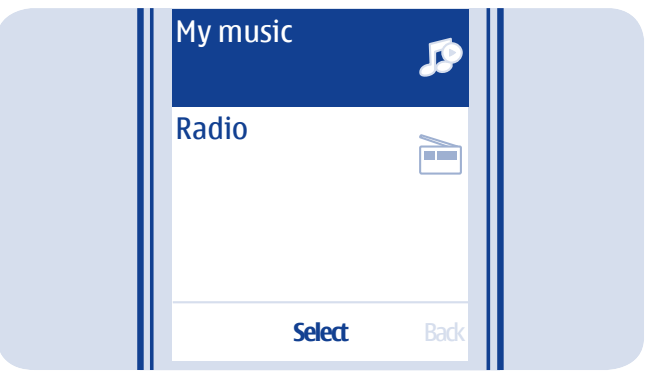
Tip: To rename a station, select the station and **Options** > **Rename**.

1



Select **Menu** > **Music**.

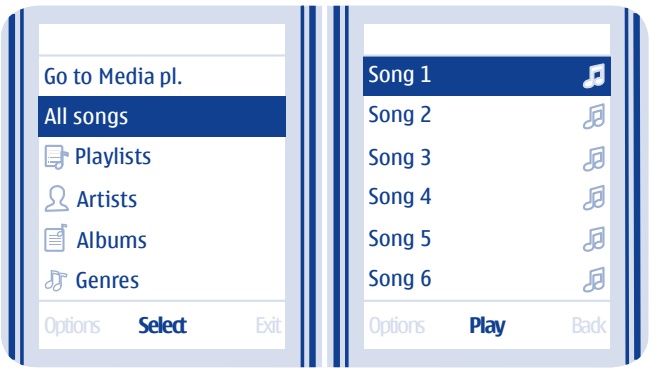
2



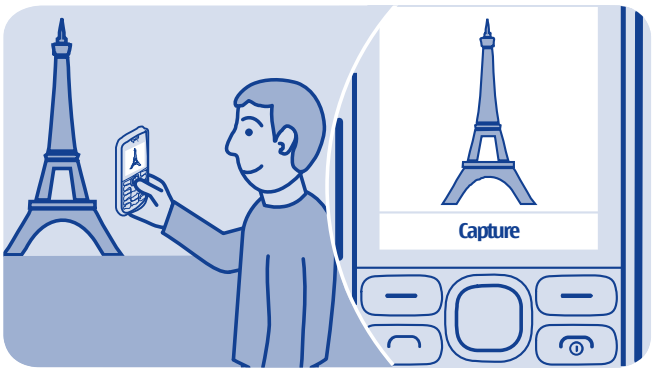
Select **My music**.

Take a photo

3

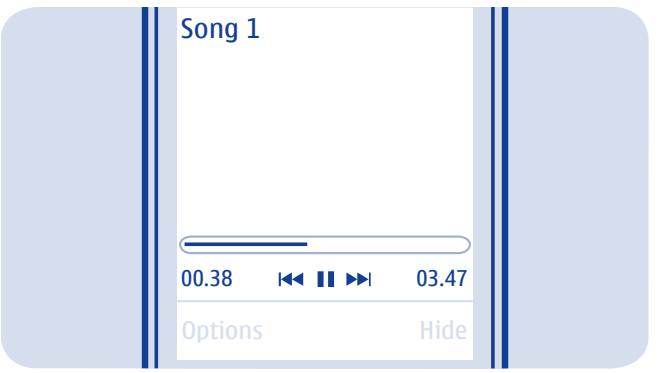


Select the song you want to play.



There's a camera in your phone - just aim and snap!

4

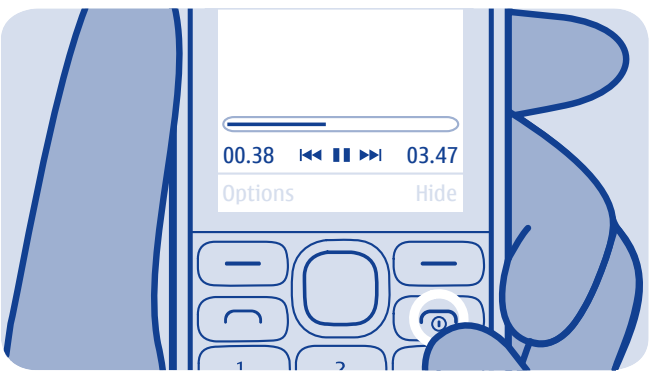


To pause or resume playing, press the scroll key.

1

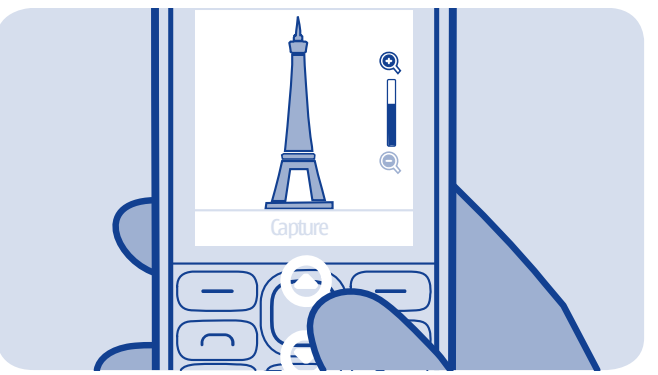
To open the camera, select **Menu** > **Photos** > **Camera**.

5



To close the music player, press ☎.

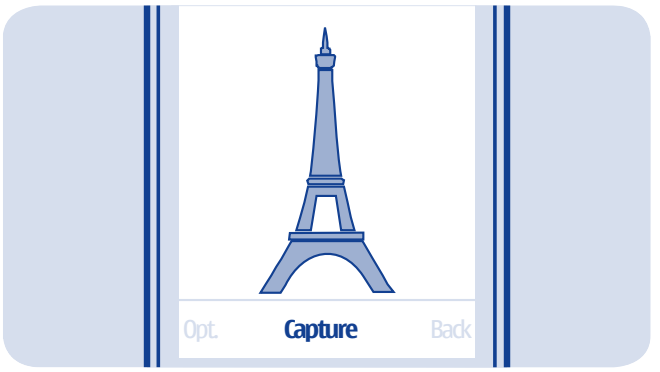
2



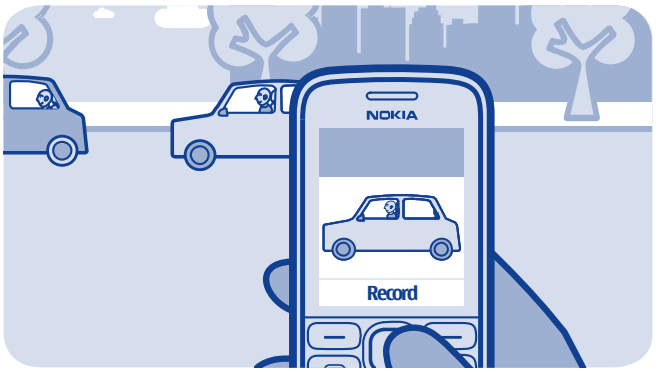
To zoom in or out, scroll up or down.

Record a video

3

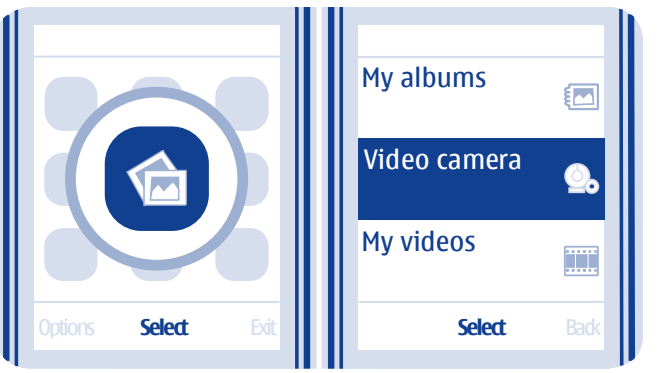


Select **Capture**.
The photos are saved in My photos.



Besides taking photos, you can also record videos with your phone.

1



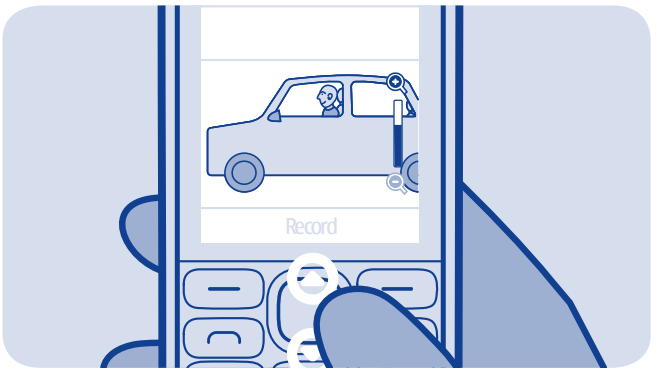
To open the camera, select **Menu** > **Photos** > **Video camera**.

2

To start recording, select **Record**.

Browse the web

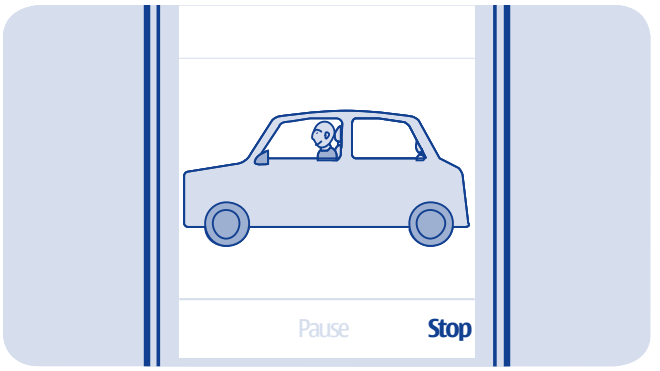
3



To zoom in or out, scroll up or down.

Catch up on the news, and visit your favourite websites.

4



To stop recording, press **Stop**. Videos are saved in My videos.

1

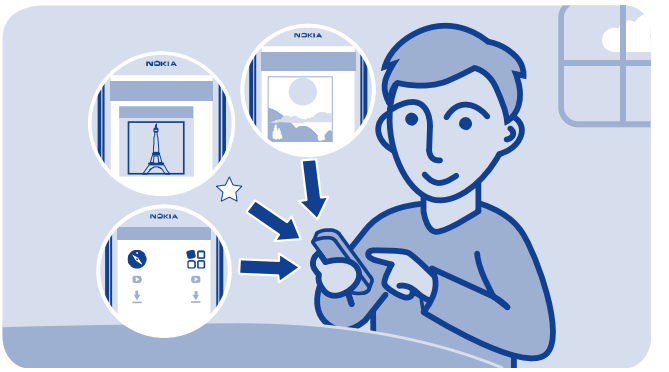
Select **Menu** > **Internet**.

2

To go to a website, write the web address in the address bar.

Add a bookmark

Tip: On the History tab, you can select **Options** > **Clear history**.

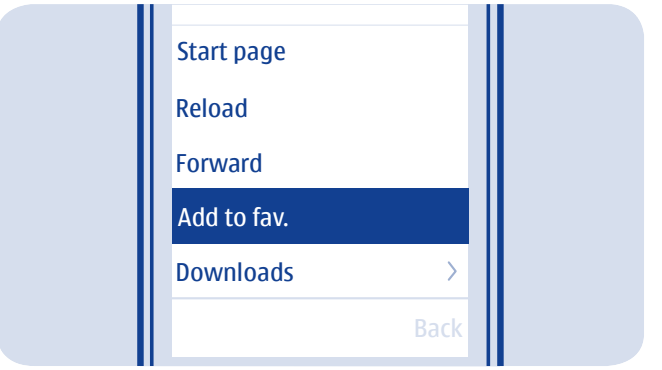


If you visit the same websites often, add them as bookmarks.

1

Select **Menu** > **Internet**.

2



While browsing, select **Options** > **Add to fav.**.

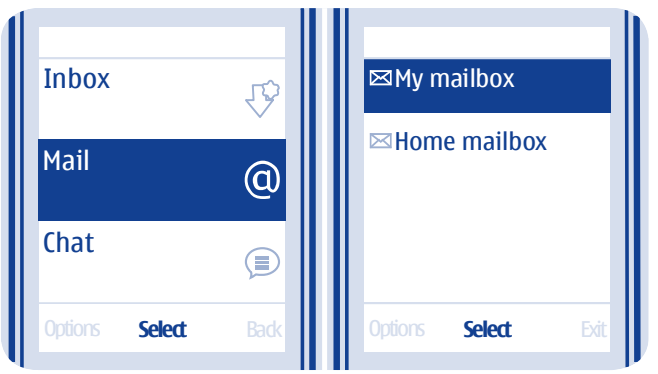
Set up your mail account

Want to use mail, but don't have a computer? You can use your phone.

1

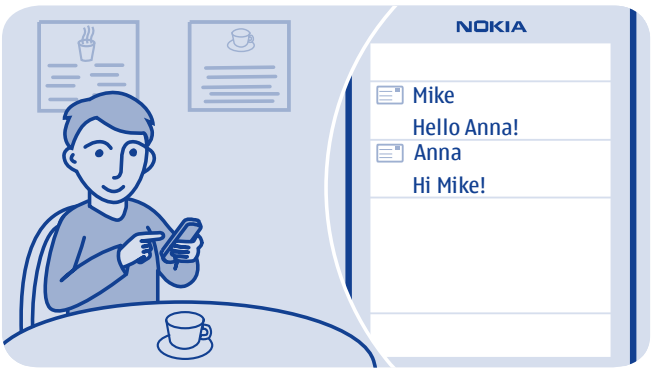
Select **Menu** > **Messaging**.

2



Select **Mail** and a mail service, then follow the instructions.

Send a mail

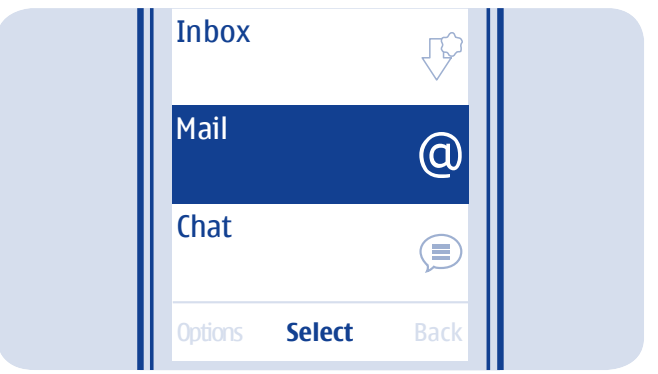


You can read and send mail while on the move.

1

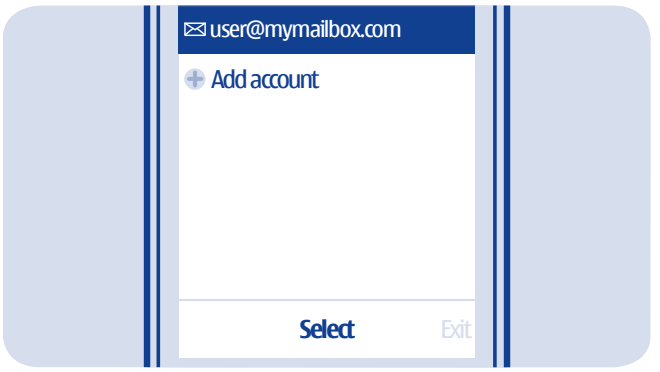
Select **Menu** > **Messaging**.

2



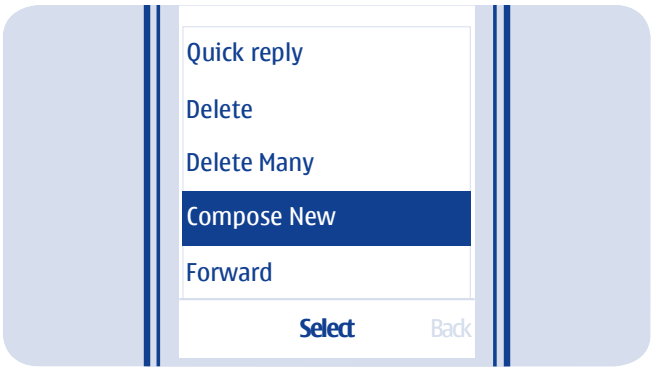
Select **Mail**. If asked, select which SIM to use.

3



Select a mail account.

4

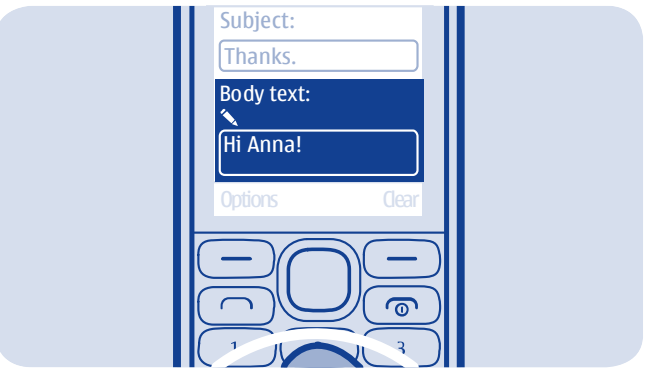


In the mailbox, select **Options** > **Compose New**.

5

To add a recipient, select **Insert**, or manually write the address.

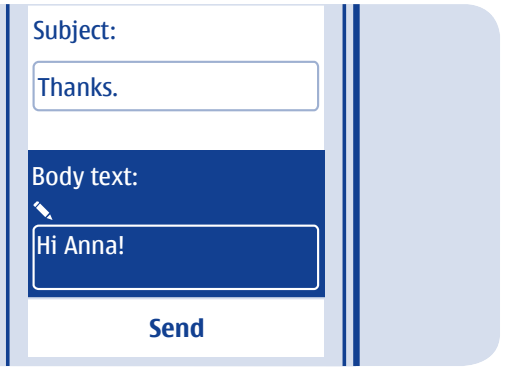
6



Write the subject and your message.

Tip: To attach a file, select **Options** > **Attach file**.

7



Select **Send**.

Chat with your friends

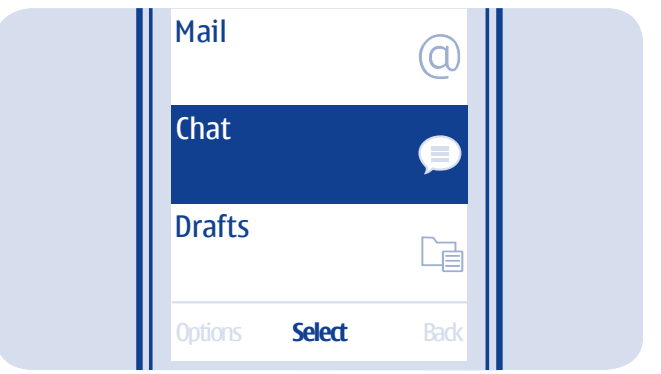
Tip: To reply to a mail, open the mail, then select **Options** > **Reply**.

You can chat with your friends online while on the move.

1

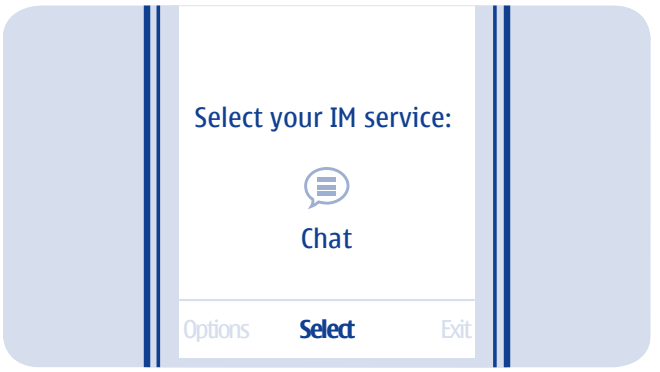
Select **Menu** > **Messaging**.

2



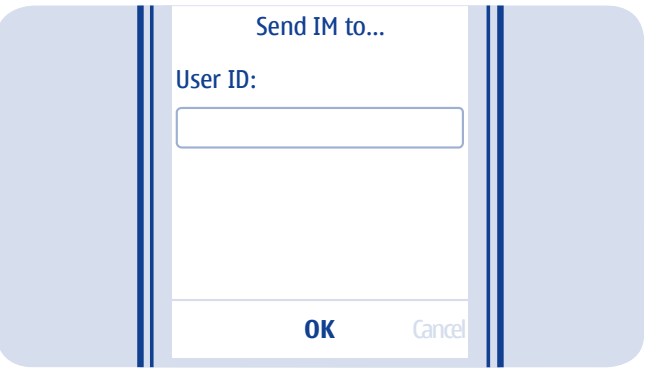
Select **Chat**. If asked, select which SIM to use.

3

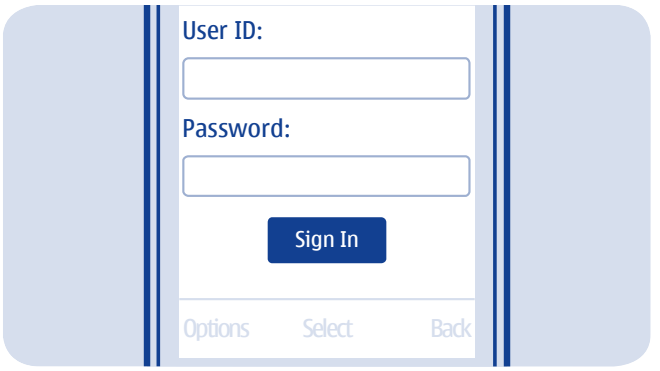


Select a service, then sign in.

5

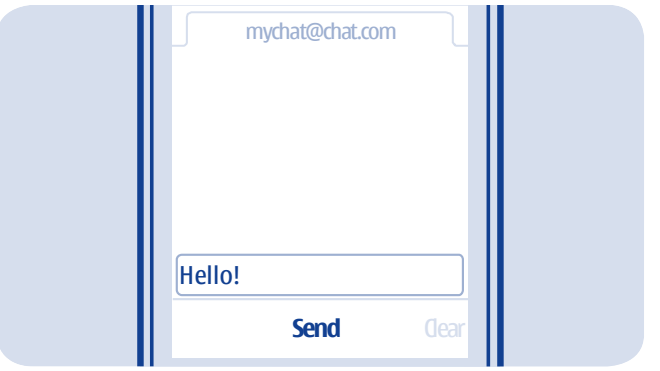


Type in the username.



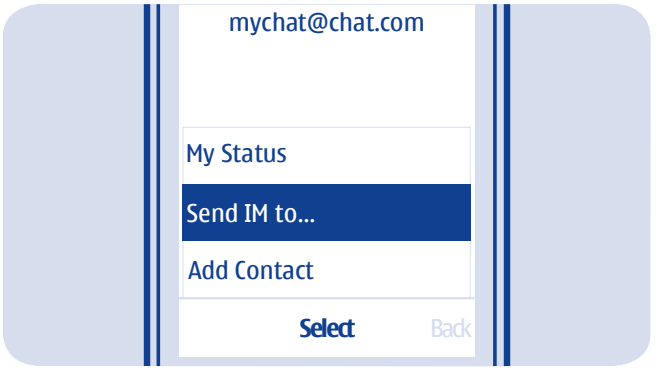
Tip: If you don't have a chat account, you can sign in to Nokia Chat.

6



Write your message in the text box, then select **Send**. See ➥ 8.

4



Select **Options** > **Send IM to...**.

7

When you want to continue a conversation, select the thread.

Nokia Life

Nokia Life is a set of services giving you relevant info on topics such as health, agriculture, education, and entertainment.

The updates are delivered in text messages to the Nokia Life inbox, in your local language.

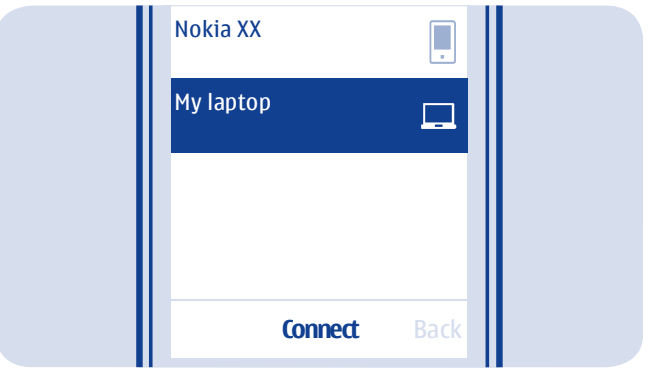
To get started, open the Nokia Life app, then accept the service disclaimer.

Nokia Life may not be available in all regions.

Send a photo using Bluetooth

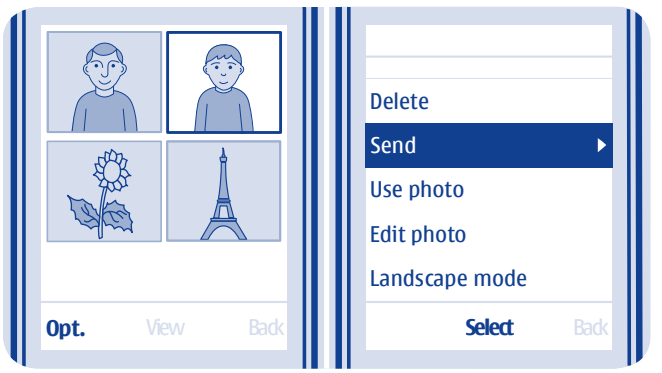
Send a photo you have taken to your PC. See ➥ 13.

3



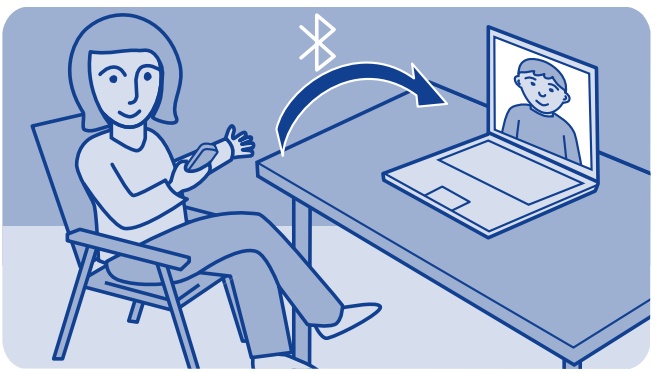
Select the device to connect to. If asked, type in the passcode.

1



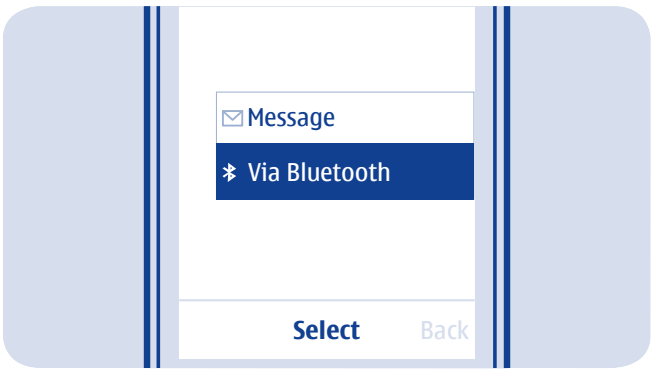
Select the photo and **Opt.** > **Send**.

4



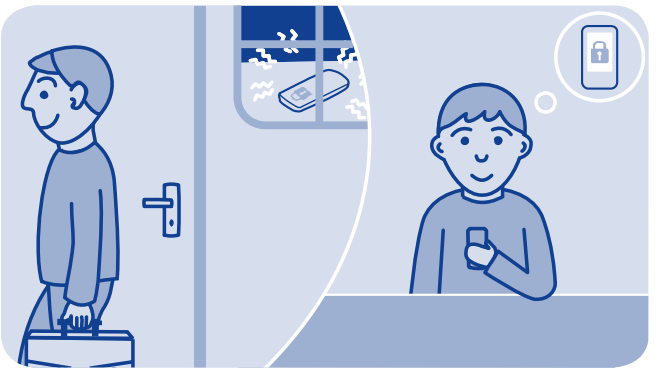
The photo is sent to your PC.

2



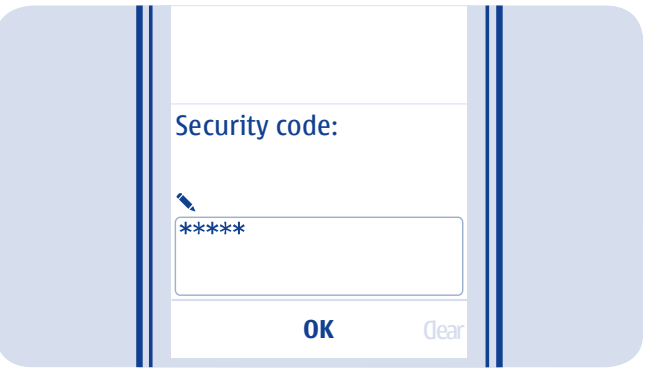
Select **Via Bluetooth**.

Lock your phone



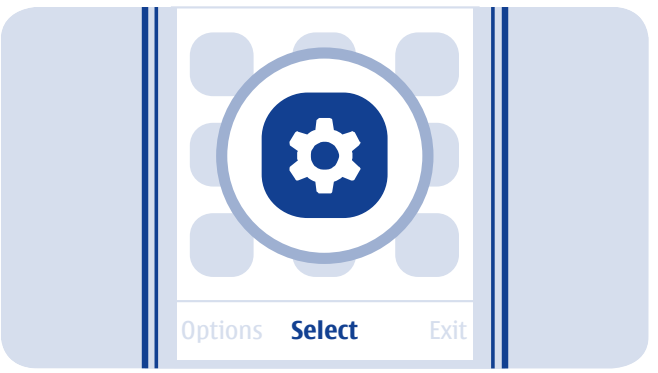
Set your phone to automatically lock itself when you're not using it.

3



Type in the security code.

1

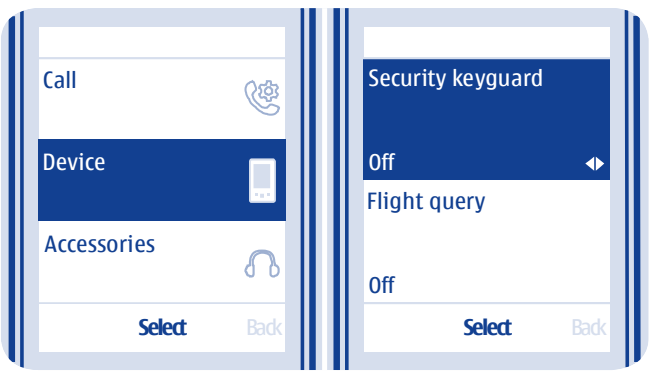


Select **Menu** > **Settings**.

4

To unlock, select **Unlock**, press *, then type in the security code.

2

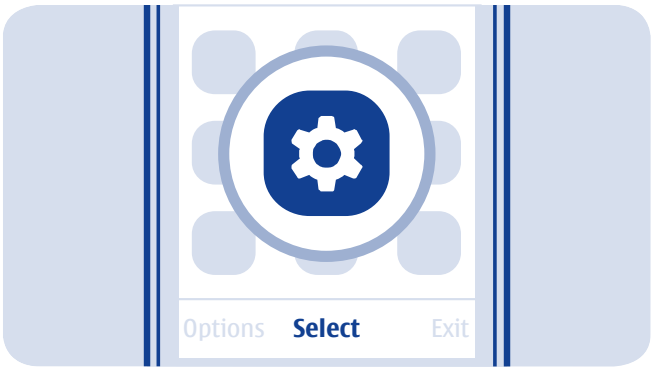


Select **Device**, then switch **Security keyguard** on.

Change the security code

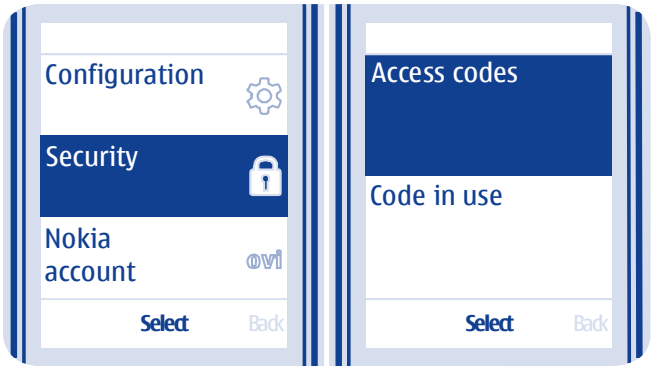
Create your own security code, so only you know how to unlock your phone.

1



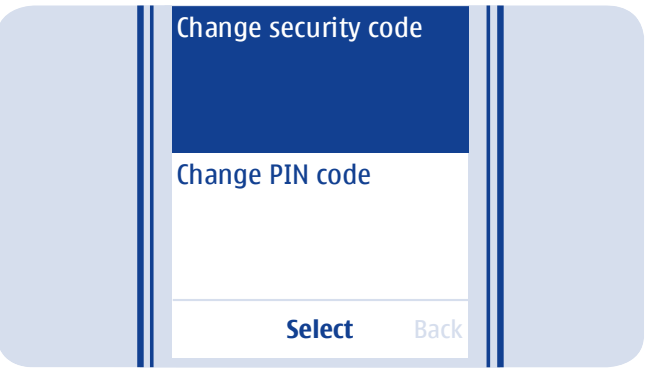
Select **Menu** > **Settings**.

2



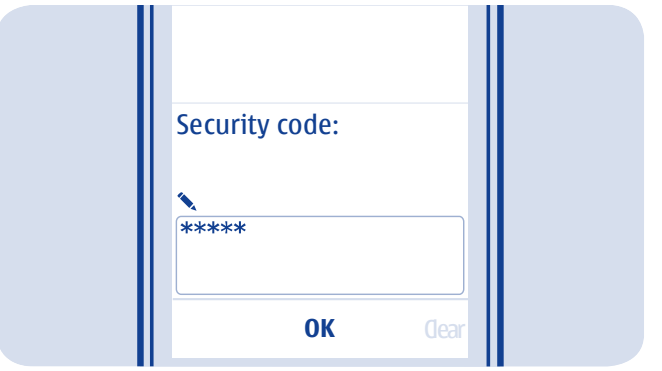
Select **Security** > **Access codes**.

3



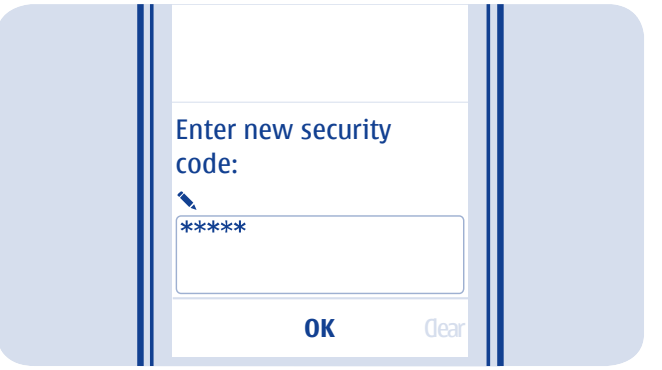
Select **Change security code**.

4



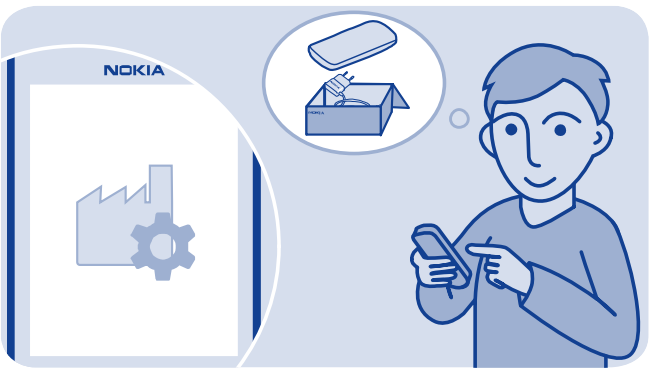
Type in the preset security code **12345**.

5



Type in a new code, using at least 5 numbers.

Restore original settings

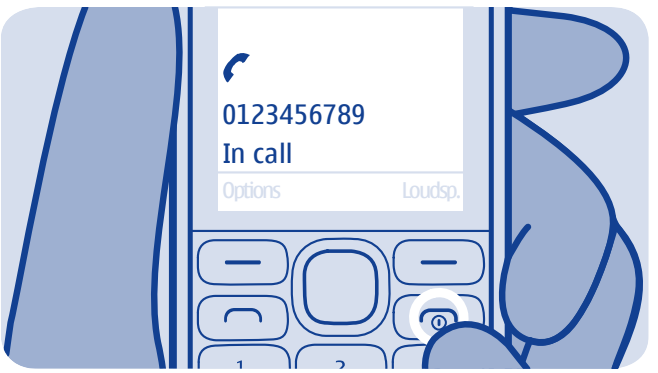


If your phone is not working properly, reset the settings.

3

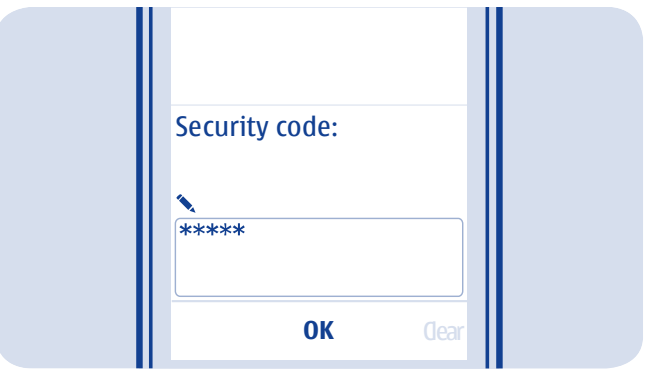
Select **Restore factory sett.** > **Restore sett. only**.

1



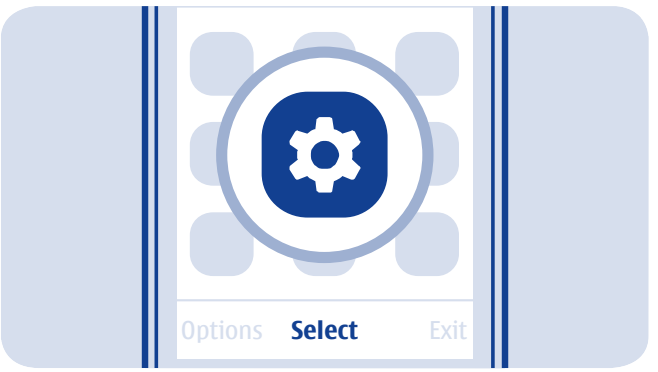
End all calls and connections.

4



Type in the security code, then select **OK**.

2



Select **Menu** > **Settings**.

5

Your phone switches off and on again. This may take longer than usual. See ➥ 14.

Support

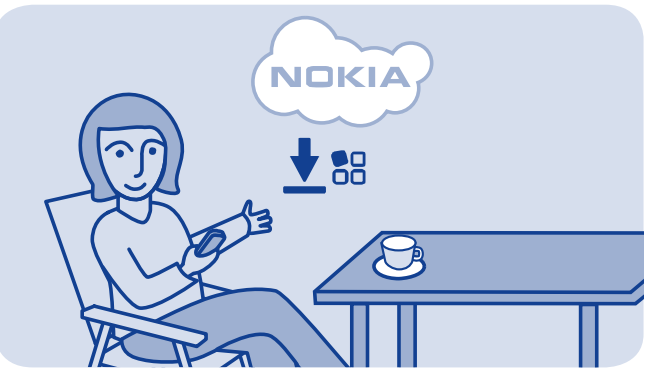
When you want to learn more about how to use your phone, or if you're unsure how your phone should work, read the user guide thoroughly.

If you have an issue, do the following:

- Reboot your phone. Switch off the phone, and remove the battery. After about a minute, replace the battery, and switch on the phone.
- Update your phone software
- Restore the original factory settings

If your issue remains unsolved, contact Nokia for repair options. Before sending your phone for repair, always back up your data, as all personal data in your phone may be deleted.

Update phone software using your phone



You can update your phone software wirelessly. You can also set your phone to automatically check for updates.

You can only update your software when using the SIM in the internal SIM holder.

Select **Menu** > **Settings** and **Device** > **Device updates**.

1. To check if there is an update, select **Download device software**.
2. To download and install an update, select **Download device software**, and follow the instructions shown on the phone.

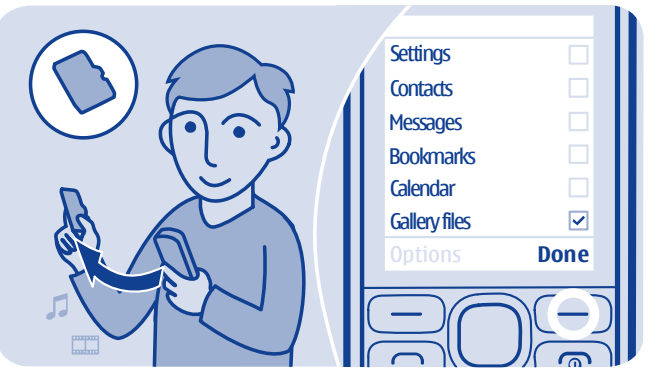
The update may take several minutes. If you encounter problems, contact your network service provider.

Check for updates automatically

Select **Automatic SW update check**, and set how often to check.

Your network service provider may send updates over the air directly to your phone. For more info on this network service, contact your network service provider.

Back up content to a memory card



Want to make sure you won't lose any important files? You can back up your phone memory to a compatible memory card.

Select **Menu** > **Settings** > **Sync and backup**.

1. Select **Create backup**.
2. Select what you want to back up, then select **Done**.

Restore a backup

Select **Restore from backup**.

Access codes

PIN or PIN2 code (4-8 digits)	These protect your SIM against unauthorised use or are required to access some features. You can set your phone to ask for the PIN code when you switch it on. If not supplied with your card or you forget the codes, contact your service provider. If you type in the code incorrectly three times in a row, you need to unblock the code with the PUK or PUK2 code.
PUK or PUK2 code (8 digits)	These are required to unblock a PIN or PIN2 code. If not supplied with your SIM, contact your service provider.
IMEI number (15 digits)	This is used to identify valid phones in the network. The number can also be used to block, for example, stolen phones. You may also need to give the number to Nokia Care services. To view your IMEI number, dial ***#06#**.
Lock code (security code) (min. 5 digits)	This helps you protect your phone against unauthorised use. You can set your phone to ask for the lock code that you define. The default lock code is 12345. Keep the code secret and in a safe place, separate from your phone.

	If you forget the code and your phone is locked, your phone will require service. Additional charges may apply, and all the personal data in your phone may be deleted. For more information, contact Nokia Care or your phone dealer.

Nokia original accessories

For availability of approved accessories, check with your dealer.

An extensive range of accessories is available for your device. For more details, see www.nokia-asia.com/accessories.

Practical rules about accessories

- Keep all accessories out of the reach of small children.
- When you disconnect the power cord of any accessory, grasp and pull the plug, not the cord.
- Check regularly that accessories installed in a vehicle are mounted and are operating properly.
- Installation of any complex car accessories must be made by qualified personnel only.

Battery

Type: BL-5C

Talk time:

Up to 5 hrs 40 min.

Standby:

Up to 515 hours.

Important: Battery talk and stand-by times are estimates and only possible under optimal network conditions. Actual battery talk and standby times depend on SIM cards, features used, battery age and condition, temperatures to which battery is exposed, network conditions, and many other factors, and may be significantly shorter than those specified above. Ringing tones, hands free call handling, use in digital mode, and other features will also consume the battery, and the amount of time a device is used for calls will affect its stand-by time. Likewise, the amount of time that the device is turned on and in the standby mode will affect its talk time.

General information

Read these simple guidelines. Not following them may be dangerous or illegal. For further info, read the complete user guide.

SWITCH OFF IN RESTRICTED AREAS
Switch the device off when mobile phone use is not allowed or when it may cause interference or danger, for example, in aircraft, in hospitals or near medical equipment, fuel, chemicals, or blasting areas. Obey all instructions in restricted areas.

ROAD SAFETY COMES FIRST
Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE
All wireless devices may be susceptible to interference, which could affect performance.

QUALIFIED SERVICE
Only qualified personnel may install or repair this product.

BATTERIES, CHARGERS, AND OTHER ACCESSORIES
Use only batteries, chargers, and other accessories approved by Nokia for use with this device. Do not connect incompatible products.

KEEP YOUR DEVICE DRY
Your device is not water-resistant. Keep it dry.

PROTECT YOUR HEARING
To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your device near your ear while the loudspeaker is in use.

Product and safety information

Feature-specific instructions
Avoid touching the antenna area while the antenna is in use. Contact with antennas affects the communication quality and may reduce battery life due to higher power level during operation.

➥ 1 Use only compatible memory cards approved by Nokia for use with this device. Incompatible cards may damage the card and the device and corrupt data stored on the card.

➥ 2 **Important:** This device is designed to be used with a standard SIM card (see figure) only. Use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card. Please consult your mobile operator for the use of a SIM card that has a mini-UICC cutout.

➥ 3 If the battery is completely discharged, it may take several minutes before the

charging indicator is displayed or before any calls can be made.

➥ 4 Missed and received calls are logged only if supported by the network, and the phone is switched on and within the network service area.

➥ 5 If you only have one SIM card, put the card into the SIM1 card holder. Some features and services may only be available when using the SIM card in the SIM1 card holder. If there is a SIM card only in the SIM2 card holder, you can only make emergency calls.

➥ 6 Both SIM cards are available at the same time when the device is not being used, but while one SIM card is active, for example, making a call, the other is unavailable.

➥ 7 You can only use speed dials for the contacts stored on your phone or on the SIM card in the internal SIM1 card holder.

➥ 8 Using services or downloading content may cause transfer of large amounts of data, which may result in data traffic costs.

➥ 9 You can send text messages that are longer than the character limit for a single message. Longer messages are sent as two or more messages. Your service provider may charge accordingly.

Characters with accents, other marks, or some language options, take more space, limiting the number of characters that can be sent in a single message.

➥ 10 If the item you insert in a multimedia message is too large for the network, the device may automatically reduce the size.

➥ 11 Only compatible devices can receive and show multimedia messages. Messages may look different in different devices.

➥ 12 Sending a message with an attachment may be more expensive than sending a normal text message. For more information, contact your service provider.

➥ 13 Operating the device in hidden mode is a safer way to avoid malicious software. Do not accept Bluetooth connection requests from sources you do not trust. You can also switch the Bluetooth function off when you are not using it.

➥ 14 Restoring settings does not affect documents or files stored on your phone.

➥ 15 To enter the + character, used for international calls, select * twice.

➥ 16 **Warning:** When the flight profile is activated, you cannot make or receive any calls, including emergency calls, or use other

features that require network coverage. To make a call, activate another profile.

Tips and Offers
To help you take maximum advantage of your phone and services, you receive free customised text messages from Nokia. The messages contain tips and tricks and support.

To stop receiving the messages, select **Unsubscribe**.

To provide the service described above, your mobile phone number, the serial number of your phone, and some identifiers of the mobile subscription are sent to Nokia when you use the phone for the first time. Some or all information may also be sent to Nokia when updating software. This information may be used as specified in the privacy policy, available at www.nokia.com.

Network services and costs
Your device is approved for use on the (E)GSM 900 and 1800 MHz networks. To use the device, you need a subscription with a service provider.

Using network services and downloading content to your device requires a network connection and may result in data traffic costs. Some product features require support from the network, and you may need to subscribe to them.

Take care of your device
Handle your device, battery, charger and accessories with care. The following suggestions help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits. If your device gets wet, remove the battery, and allow the device to dry.
- Do not use or store the device in dusty or dirty areas. Moving parts and electronic components can be damaged.
- Do not store the device in high temperatures. High temperatures can shorten the life of the device, damage the battery, and warp or melt plastics.
- Do not store the device in cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage electronic circuits.
- Do not attempt to open the device other than as instructed in the user guide.
- Unauthorised modifications may damage the device and violate regulations governing radio devices.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and mechanics.
- Only use a soft, clean, dry cloth to clean the surface of the device.
- Do not paint the device. Paint can clog moving parts and prevent proper operation.
- Switch off the device and remove the battery from time to time for optimum performance.
- Keep your device away from magnets or magnetic fields.

- To keep your important data safe, store it in at least two separate places, such as your device, memory card, or computer, or write down important information.

Recycle
Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Check how to recycle your Nokia products at www.nokia.com/recycling.

About Digital Rights Management
When using this device, obey all laws and respect local customs, privacy and legitimate rights of others, including copyrights. Copyright protection may prevent you from copying, modifying, or transferring pictures, music, and other content.

Content owners may use different types of digital rights management (DRM) technologies to protect their intellectual property, including copyrights. This device uses various types of DRM software to access DRM-protected content. With this device you can access content protected with WMDRM 10 and OMA DRM 1.0. If certain DRM software fails to protect the content, content owners may ask that such DRM software's ability to access new DRM-protected content be revoked. Revocation may also prevent renewal of such DRM-protected content already in your device. Revocation of such DRM software does not affect the use of content protected with other types of DRM or the use of non-DRM-protected content.

Digital rights management (DRM) protected content comes with an associated licence that defines your rights to use the content.

Other transfer methods may not transfer the licences which need to be restored with the content for you to be able to continue the use of OMA DRM-protected content after the device memory is formatted. You may also need to restore the licences if the files on your device become corrupted.

Batteries and chargers
Battery and charger information
Your device is intended for use with a BL-5C rechargeable battery. Nokia may make additional battery models available for this device. Always use original Nokia batteries.

This device is intended for use when supplied with power from the following chargers: AC-11. The exact Nokia charger model number may vary depending on the plug type, identified by E, X, AR, U, A, C, K, B, or N.

The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, replace the battery.

Important: Talk and standby times are estimates only. Actual times are affected by,

for example, network conditions, device settings, features being used, battery condition, and temperature.

Battery safety
Always switch the device off and disconnect the charger before removing the battery. When you unplug a charger or an accessory, hold and pull the plug, not the cord.

When your charger is not in use, unplug it from the electrical plug and the device. Do not leave a fully charged battery connected to a charger, as overcharging may shorten the battery's lifetime. If left unused, a fully charged battery will lose its charge over time.

Always keep the battery between 15°C and 25°C (59°F and 77°F). Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily.

Accidental short-circuiting can happen when a metallic object touches the metal strips on the battery, for example, if you carry a spare battery in your pocket. Short-circuiting may damage the battery or the connecting object.

Do not dispose of batteries in a fire as they may explode. Dispose of batteries according to local regulations. Recycle when possible. Do not dispose as household waste.

Do not dismantle, cut, open, crush, bend, puncture, or shred cells or batteries. If a battery leaks, do not let battery liquid touch skin or eyes. If this happens, immediately flush the affected areas with water, or seek medical help.

Do not modify, remanufacture, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids. Batteries may explode if damaged.

Use the battery and charger for their intended purposes only. Improper use, or use of unapproved batteries or incompatible chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery or charger is damaged, take it to a service centre for inspection before continuing to use it. Never use a damaged battery or charger. Only use the charger indoors.

Additional safety information
Make an emergency call
1. Make sure the device is switched on.
2. Check for adequate signal strength. You may also need to do the following:
- Insert a SIM card.
- Deactivate call restrictions you have activated for your device, such as call barring, fixed dialling, or closed user group.
- Make sure the flight profile is not activated.
3. Press the end key repeatedly, until the home screen is displayed.
4. Enter the official emergency number for your present location. Emergency call numbers vary by location.
5. Press the call key.

6. Give the necessary information as accurately as possible. Do not end the call until given permission to do so.

Important: Activate both cellular and internet calls, if your device supports internet calls. The device may attempt to make emergency calls both through cellular networks and through your internet call service provider. Connections in all conditions cannot be guaranteed. Never rely solely on any wireless device for essential communications like medical emergencies.

Small children
Your device and its accessories are not toys. They may contain small parts. Keep them out of the reach of small children.

Medical devices
Operation of radio transmitting equipment, including wireless phones, may interfere with the function of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external radio frequency energy.

Implanted medical devices
Manufacturers of medical devices recommend a minimum separation of 15.3 centimetres (6 inches) between a wireless device and an implanted medical device, such as a pacemaker or implanted cardioverter defibrillator, to avoid potential interference with the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15.3 centimetres (6 inches) from the medical device.
- Not carry the wireless device in a breast pocket.
- Hold the wireless device to the ear opposite the medical device.
- Turn the wireless device off if there is any reason to suspect that interference is taking place.
- Follow the manufacturer directions for the implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

Accessibility solutions
Nokia is committed to making mobile phones easy to use for all individuals, including those with disabilities. For more information, visit the Nokia website at www.nokiaaccessibility.com.

Hearing

Warning: When you use the headset, your ability to hear outside sounds may be affected. Do not use the headset where it can endanger your safety.

Some wireless devices may interfere with some hearing aids.

Nickel
The surface of this device is nickel-free.

Protect your device from harmful content
Your device may be exposed to viruses and other harmful content. Take the following precautions:

- Be cautious when opening messages. They may contain malicious software or otherwise be harmful to your device or computer.
- Be cautious when accepting connectivity requests, browsing the internet, or downloading content. Do not accept Bluetooth connections from sources you do not trust.
- Only install and use services and software from sources that you trust and that offer adequate security and protection.
- Install antivirus and other security software on your device and any connected computer. Only use one antivirus application at a time. Using more may affect performance and operation of the device and/or computer.
- If you access preinstalled bookmarks and links to third party internet sites, take the appropriate precautions. Nokia does not endorse or assume liability for such sites.

Operating environment
This device meets radio frequency exposure guidelines in the normal use position at the ear or at least 1.5 centimetres (5/8 inch) away from the body. Any carry case, belt clip, or holder for body-worn operation should not contain metal and should position the device the above-stated distance from your body.

To send data files or messages requires a quality connection to the network. Data files or messages may be delayed until such a connection is available. Follow the separation distance instructions until the transmission is completed.

Vehicles
Radio signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection, electronic antilock braking, electronic speed control, and air bag systems. For more info, check with the manufacturer of your vehicle or its equipment.

Only qualified personnel should install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate your warranty. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or accessories. Remember that air bags inflate with great force. Do not place your device or accessories in the air bag deployment area.

Potentially explosive environments
Switch off your device in any area with a potentially explosive atmosphere, for example near gas pumps at service stations. Sparks in such areas could cause an explosion or fire resulting in bodily injury or death. Observe restrictions in fuel service stations, storage, and distribution areas;

chemical plants; or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include areas where you would be advised to turn off your vehicle engine, below deck on boats, chemical transfer or storage facilities and where the air contains chemicals or particles such as grain, dust, or metal powders. You should check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) to determine if this device can be safely used in their vicinity.

Certification information (SAR)
This mobile device meets guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organisation ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The exposure guidelines for mobile devices employ a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit stated in the ICNIRP guidelines is 2.0 watts/kilogram (W/kg) averaged over 10 grams of tissue. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The actual SAR level of an operating device can be below the maximum value because the device is designed to use only the power required to reach the network. That amount changes depending on a number of factors such as how close you are to a network base station.

The highest SAR value under the ICNIRP guidelines for use of the device at the ear is 1.46 W/kg.

Use of device accessories may result in different SAR values. SAR values may vary depending on national reporting and testing requirements and the network band. Additional SAR information may be provided under product information at www.nokia.com.

All Nokia products comply with international and, where adopted, country specific standards and guidelines for limiting human exposure to electromagnetic fields. These international standards and guidelines were adopted after thorough reviews of the science. Those reviews do not establish a link between the use of mobile devices and adverse health effects when the device is operating within the international standards and guidelines. We are required by the India Department of Telecommunications to include in this user guide the following guidance on precautionary measures:

You can limit exposure to radio frequency energy by either using the device in good reception conditions or using a hands-free kit (e.g., Bluetooth headset, wired headset,

internal loudspeaker, etc). A further precautionary measure especially for children, pregnant women and adolescents would be to keep calls short and consider sending a text message (e.g., SMS) instead. You should always ensure that the SAR value of your mobile device is below the limit accepted by the India Department of Telecommunications. Information about the SAR level of Nokia devices can be obtained from Nokia's website at www.nokia.com.

Your mobile device is also designed to meet the requirements for exposure to radio waves accepted by the India Department of Telecommunications.

DECLARATION OF CONFORMITY

CE 0168

Hereby, NOKIA CORPORATION declares that this RM-827 product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. A copy of the Declaration of Conformity can be found at http://www.nokia.com/global/declaration/declaration-of-conformity.
