E-Waste Management

What is E-Waste?

E-Waste means waste Electrical & Electronic Equipment (WEEE).

How Harmful is E-Waste?

E-Wastes are considered dangerous as certain components of some electronic products contain material that are hazardous, depending on their condition and density. If improperly disposed, they can leach lead and other harmful substance into soil & ground water.

Govt. of India vide notification dated May 12, 2011 has announced E-Waste (Management & Handling) Rules, 2011 ("Rules"). According to these rules, the consumer now has the legal responsibility to dispose of the waste electrical and electronic equipment (popularly known as "WEEE") in the prescribed manner and not by just throwing it into a dustbin or giving/selling it to scrap dealer.

V RECYCLE is an initiative by Videocon where we recycle your old and no longer useful tablets.

There are three easy steps to begin playing your part:

Step 1: Grab your old and useless tablet (or its accessories).

Step 2: Locate a Videocon collection point near you, available at <http://www.videoconmobiles.com>

Step 3: Drop your tablet into the designated collection boxes.

Participate in this initiative to help make the world safer & healthier place for all the mankind.

specified charger should be used.
 2. It is normal for the device's surface to become warm during charging or long periods of use.
 3. All devices are factory tested before release.
 4. If you do not use this set for a long time, please charge/release it once one month to avoid deep discharge.
 5. The damage caused by battery over-consuming is not included in the warranty.

● Battery Saving

To save battery running life, please see below key points. With below suggestions, battery can run longer time after fully charged each time.

1. When device is not in use, press power button once to go to sleep mode.
2. Shut down the applications when not in use.
3. Turn off WLAN when not in use.
4. Shut off application sync selection
5. Set a shorter time for display backlight
6. Reduce brightness of display

● Power On

Keep pressing power button over 2 seconds, device will start up opening screen; Android system is activating and enter the main screen.

● Sleep Mode

After device is on, press power button once and it goes to sleep mode. The screen is now on standby and under low battery consumption. To wake up device, press one more time power button.

● Power off and Forced Shut down

When you are not using the device, keep pressing power key to power set OFF; if key is pressed continuously will

display "shut down", select "Yes" to power off unit completely. If device is hanging, use a small pin to press Reset hole, it will forced shut down and the device will power on again.

● Operation of Touch Panel

	Click Use finger to touch, so as to select or activate function, or select menu or turn on applications.		Slide Slide up, down, left or right for fast scrolling browsing page and display screen		Double Click Double click to enlarge or shrink the display size of picture or under browsing webpage.
	Tap and Hold Tap over 2 seconds; it will turn on option list		Drag Drag an icon and relocate the position		Enlarge/Shrink Use two fingers at a time on touch panel, to enlarge/shrink display

● Home Screen

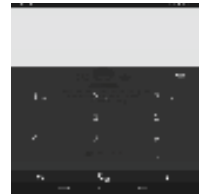

● How to Enter in User Guide In Android Tablet?

1. Go to APPS screen
2. Drag the screen & go to second page of APPS screen
3. Click on User Guide option shown in picture at right side (Icon with circle)
4. After you will find two options for User Guide & service Center Directory, Select as your choice & get know more better about Android Tablet.

● Installation Of SIM Card

1. Unlock your V-TAB Esteem
2. Insert SIM card in SIM slot of V-TAB Esteem
3. Now power off/shut down V-TAB Esteem
4. Now click on power button to Power on V-TAB Esteem
5. After V-TAB Esteem is restarted SIM Card gets detected in it.
6. V-TAB Esteem is now ready to make Calls and use data connectivity through SIM card

● SAR

Your device meets the SAR requirements for exposure to radio waves, recommended by Govt. Of India. Your mobile device is a radio transmitter and receiver. It is designed and manufactured so as not to exceed the limits for exposure to radio frequency (RF) energy, as recommended by the Govt of India.

These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The limits include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

The exposure standard for mobile devices employs a unit of measurement known as SAR (Specific Absorption Rate). The SAR limit recommended by Govt. of India is 1.6 watt/kg taken over a volume containing a mass of 1 gram of tissue. The highest SAR value for V-TAB Esteem is 1.382 W/kg.

Dial *#07# to check the SAR value on your device display.
