

Declaration of Conformity with the requirements of the e-waste (Management and Handling) Rules, 2011, adopted by Notification S.O.1939(E) of Ministry of Environment and Forests.

This Product is in conformity with the requirements of Rule 13 of the e-waste (Management and Handling) Rules, 2011.

The content of hazardous substance in the product, along with the exemption of the applications listed in SCHEDULE II of the (Management and Handling) Rules, 2011 are:

1. Lead (Pb) - not over 0.1 % by weight;
2. Cadmium (Cd) - not over 0.01 % by weight;
3. Mercury (Hg) - not over 0.1 % by weight;
4. Hexavalent chromium (Cr⁶⁺) - not over 0.1 % by weight;
5. Polybrominated biphenyls (PBBs) - not over 0.1 % by weight;
6. Polybrominated diphenyl ethers (PBDEs) - not over 0.1 % by weight;

USER'S MANUAL Z41 Lite+

VIDEOCON 

www.videoconmobiles.com

There are 3 easy steps to begin playing your part:

Step 1: Grab your old and useless phone (or its accessories).

Step 2: Locate a Videocon collection point near you, available at <http://www.videoconmobiles.com>

Step 3: Drop your old phone into the designated collection boxes.

Participate in this initiative to help make the world a safer and healthier place for all of mankind.

Product disposal Guidelines:

For the purpose of recycling, to facilitate effective utilization of resources, please return this product to a nearby authorized Collection Center/Registered Dismantler/Recycler/Service Center, when disposing of this product. In case of further assistance, you may contact nearest authorized service center. Please see the Company website for further information of collection centers etc.

than needed. In addition, use of unauthorized antennas may result in non-compliance with the local regulatory requirements in your country. The above instructions apply to your phone, battery, charger and other accessories. If any of them does not work properly, please send it to a qualified service provider.

E-Waste Management

What is E-waste?

'E-waste' means waste electrical and electronic equipment (WEEE).

How harmful is e-waste?

E-wastes are considered dangerous, as certain components of some electronic products contain materials that are hazardous, depending on their condition and density. If improperly disposed, they can leach lead and other harmful substances into soil and groundwater. Govt. of India vide notification dated May 12, 2011 has announced E-waste (Management and Handling) Rules, 2011 ("Rules"). According to these Rules, the consumer now has the legal responsibility to dispose of the waste electrical and electronic equipment (popularly known as "WEEE") in the prescribed manner and not by just throwing it into a dustbin or giving/selling it to scrap dealers.

instructions will help you comply with the terms of the warranty and enjoy this product for many years:

- Keep the phone and all its parts and accessories out of the reach of children.
- Keep the phone dry, all kinds of liquid will erode the electronic circuit.
- Do not use or store the phone in a dusty place to avoid damaging the removable parts.
- Keep the phone away from hot places, high temperature can shorten the life of electronic device, warp or melt certain plastic and damage batteries.
- Do not attempt to open or disassemble the phone, non-expert handling may damage it.
- Do not drop, crush or shake the phone to avoid damaging the internal circuit board.
- Do not use harsh chemicals, cleaning solvents or strong detergent to clean the phone.
- Do not paint the phone or the paint may obstruct the removable parts and affect operation.
- Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone. Do not hold the external antenna when the phone is in use. Holding the external antenna affects call quality and may cause the phone to operate at a higher power level.

Legal Notices

All rights reserved. Any unauthorized use including reproduction, transfer, distribution, copying or modification of the information including design, trademarks, logo and trade name violate Videocon's copyright, trademark or other proprietary right may result in legal action.

VIDEOCON operates on a policy of continuous development. VIDEOCON reserves the right to make changes to the information, material and products, including without limitation and, the term and conditions of the disclaimer at anytime without notice. Continued use of VIDEOCON'S product shall constitute acceptance of such charges.

VIDEOCON shall not be liable for any claims, expenses, loss and profit or damages (including direct, indirect, special or consequential damages) arising from use or reliance on product, error in information, third party use or any other matter related to VIDEOCON product, even if VIDEOCON is aware of the possibility of such claims, expenses, damages or losses.

To the maximum extent permitted by applicable law, VIDEOCON is provided “as is” without warranties, conditions, representations or guaranties of any kind, either expressed, implied, statutory or otherwise, including but not limited to, any implied warranties or conditions of merchantability, satisfactory quality, title, non infringement or fitness for a particular purpose.

VIDEOCON reserves the right to revise this document or withdraw it at any time without prior notice. VIDEOCON does not warrant the operation of its offerings will be uninterrupted or error free. The availability of particular products may vary by region.

Please check with Videocon executive. No oral or written information or advice given by VIDEOCON authorized representative shall create a warranty.

This disclaimer of warranty constitutes an essential part of the license agreement. Customers are advised to not solely rely on Videocon service for any reason.

The availability of particular products may vary by region. Please check with Videocon Executive.

- Charge the battery using the USB cable only if the recommended wall charger isn't readily available.
- Avoid keeping the device on vibrate mode.

Phone Layout

Care and maintenance

Thank you for choosing our phone. Should you encounter any problem with the phone, please contact our dealer or qualified service provider. Your phone is a finely designed and crafted product. Please use it with care. The following

1. Take the USB cable from the device packaging, and attach it to power adapter. Now connect the power adapter into a standard AC wall outlet.
2. Connect the mini USB connector on the cable into its designated port in the device. The battery level indicator on the device screen will start scrolling horizontally to indicate that the battery is being charged.

Note: Exercise extreme caution while connecting the charger to the device. The connectors on the charger and on the phone may get damaged if too much force is applied while connecting them. If the battery is completely discharged, it may take a while before the on-screen charging indicator starts scrolling.

3. When the battery is fully charged, the battery level indicator on the device screen will stop scrolling.

4. Once the charging is complete, disconnect the charger from the device and then from the wall outlet.

Battery Use

To extend the battery life of your device:

- Use the standard wall charger to charge the battery for the first time.
- During the first 3-4 charge cycles, charge the battery until the battery indicator on the display stops scrolling.
- Avoid partial charging. Also, wait for the battery to discharge completely before charging it again.

Safety Precautions

Please comply with these precautions to avoid putting yourself or other around you in a dangerous or illegal situation, and ensure peak performance of your device.

Icon	Description
	ROAD SAFETY Do not use your phone while driving.
	INTERFERENCE All wireless devices could affect your device performance.
	HOSPITALS Switch off your device near hospitals and medical equipment.
	AIRCRAFT Switch off your device in aircraft. Wireless devices can cause interference in aircraft.

	REFUELLING Switch off the device when refueling. Do not use the device at refueling point.
	BLASTING AREAS Switch off the device near blasting areas.
	USE SENSIBLY Use in normal condition, as explained in the User's manual. Do not touch the antenna unnecessarily.
	QUALIFIED SERVICE Only qualified personnel may install or repair phone.
	BATTERIES Use only approved batteries. Do not connect incompatible products.

3.Insert the SIM cards and Micro SD card into their respective slots as shown below.

4.Place the battery, align the contacts of the battery with the corresponding connectors in the battery compartment & place the back cover.

Charge the battery

To charge the device battery:

Images shown in user manual may differ from the actual device. All specifications and features mentioned herein are subject to change without prior notice.

Getting Started

Assembling the device

1. Locate the groove at the bottom of the device and gently remove the back cover by pulling it up from the device.

2. Remove battery as shown below.

WATER-RESISTANCE

Your device is not water-resistant. Keep it dry.

Important safety measures

Your phone is designed to comply with all the necessary precautions and requirements and should be treated with care. The suggested safety measures will help you to use this product without causing you any health hazards.

- When buying a cell phone, make sure it has a low SAR (Specific Absorption Rate).
- Use a wireless hands-free system (headset) with a low power Bluetooth emitter.
- Either keep calls short or send a SMS instead. This advice applies especially to children, adolescents and pregnant women.
- Whenever possible, use cell phone only when the signal quality is good.

- People having active medical implants should keep their cell phone at least 15cm away from the implant.
- **The FCC advice:** “Many people mistakenly assume that using a cell phone with a lower reported SAR value necessarily decreases a user’s exposure to RF emissions, or is somehow “safer” than using a cell phone with a high SAR value. While SAR values are an important tool in judging the maximum possible exposure to RF energy from a particular model of cell phone, a single SAR value does not provide sufficient information about the amount of RF exposure under typical usage conditions to reliably compare individual cell phone models.”
- **World Health Organization (WHO) Advice:** Organizations such as the World Health Organization and the US Food and Drug Administration have stated that if people are concerned and want to reduce their exposure they could use a hands-free device to keep the phone away from the head and body during phone calls, or reduce the amount of time spent on the phone.

warranties, including but not limited to, warranties of merchantability or fitness for a particular purpose. VIDEOCON does not guarantee the accuracy, validity, timeliness, legality, or completeness of any content or service made available through this device and under no circumstances, including negligence, shall VIDEOCON be liable, whether in contract or tort, for any direct, indirect, incidental, special or consequential damages, attorney fees, expenses, or any other damages arising out of, or in connection with, any information contained in, or as a result of the use of any content or service by you or any third party, even if advised of the possibility of such damages. Third party services may be terminated or interrupted at any time, and VIDEOCON makes no representation or warranty that any content or service will remain available for any period of time. Content and services are transmitted by third parties by means of networks and transmission facilities over which VIDEOCON has no control. without limiting the generality of this disclaimer, VIDEOCON expressly disclaims any responsibility or liability for any interruption or suspension of any content or service made available through this device. VIDEOCON is neither responsible nor liable for customer service related to the content and services. Any question or request for service relating to the content or services should be made directly to the respective content and service providers.

These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The limits include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health. The exposure standard for mobile phones employs a unit of measurement known as SAR (Specific Absorption Rate). The SAR limit recommended by the Govt. Of India is 1.6 Watt/kg taken over a volume containing a mass of 1 gram of tissue. The highest SAR value for Z41 Lite+ is 1.020 W/Kg. Press *#07# to check the SAR value on your phone display.

"It is recommended to install the third party applications on memory card rather than phone memory for best performance."**Memory Capacity** - Memory capacity is dependent on Operating System usage. Available storage capacity may be less as it includes pre-installed operating system, such as Android and/or pre-installed applications, or media content, shared video/system memory."

SAR

Your phone meets the SAR requirements for exposure to radio waves, recommended by Govt. of India. Your mobile phone is a radio transmitter and receiver. It is designed and manufactured so as not to exceed the limits for exposure to radio-frequency (RF) energy, as recommended by the Govt. of India.
