ZTE Avid 916 USER GUIDE

Consumer Cellular[®]

Thank you for choosing Consumer Cellular!

We know you're excited to use your new ZTE Avid 916, and this user guide will help you get familiar with it, so you can start using it as soon as possible. Each section includes instructions and pictures to make it easy to start using your device. If you would like to learn more, turn to the back of this guide, where you'll find the **CONTACT US** section.

We're always happy to help you!

GETTING STARTED

INSTALLING A microSDXC CARD

The microSDXC card can be installed and removed while the phone is turned on. Unmount the microSDXC card before removing it.

- 1. Place your finger in the slot at the bottom of the back cover to lift and remove the cover.
- Hold your microSDXC card with the metal contacts facing down and slide it into the microSDXC card slot.

NOTE: Some applications may require a microSDXC card to store certain data on it and to work properly. Therefore, it is recommended that you keep a microSDXC card installed and not remove or replace it unnecessarily.

3. Press the cover gently back into place until you hear a click.

CHARGING THE BATTERY

Your phone's battery should have enough power for the phone to turn on, find a signal, and make a few calls. You should fully charge the battery as soon as possible.

If the battery is low, there will be a pop-up message on the screen. As you charge your phone, the lock screen will show you the exact battery level on the status bar each time you wake up your phone.

 NOTE: To charge your ZTE Avid 916, cannot be charged with sating this function will be indiced with your phone. The ZTE avid 916 cannot be charged with a standard Micro USB cannot be charged with a standard Micro USB cannot be charged. Disconnect the adapter to the charger viewer the battery is externely low, your may be unable to power on the phone affer of a standard AC will be adapter to the parent in the Status Bar. you'll see a charging iccon, such as [A] or [A] and prover of the parent in the Status Bar. you'll see a charging iccon, such as [A] or [A] and prover of the parent in the Status Bar. you'll see a charging iccon, such as [A] or [A] appearing the phone is on, you'll see a charging iccon, such as [A] or [A] appearing the phone is on, you'll see a charging iccon, such as [A] or [A] appearing the more the charging iccon, such as [A] or [A] appearing the phone is on, you'll see a charging iccon, such as [A] or [A] appearing the chargend at the phone after the adapter to the parent in the Status Bar. 	 Reduce the screen backlight time. Lower the screen brightness. Turn auto-sync and <i>Bluetooth</i> off when not in use. 	LOCKING/UNLOCKING THE SCREEN AND KEYS Your phone allows you to quickly lock the screen and keys (put the phone into Sleep mode) when not in use and also to turn the screen back on and unlock it when you need it.

GETTING STARTED	GETTING STARTED
Locking the screen and keys	• Swipe or Slide – To swipe or slide means to quickly drag your finger
To quickly turn the screen off and lock the keys, press the Power/Lock Key .	vertically or horizontally across the screen.
NOTE: To save battery power, the phone automatically turns off the screen after a certain period of time when you leave it idle. You will still be able to receive messages and calls while the phone screen is off.	 Drag – To drag, press and hold your finger with some pressure before you start to move your finger. While dragging, do not release your finger until you have reached the target position.
Unlocking the screen and keys 1. Press the Power/Lock Key to turn the screen on.	 Pinch – In some apps (such as Maps, Browser, and Gallery), you can zoom in and out by placing two fingers on the screen at once and pinching them together (to zoom out) or spreading them apart (to zoom in).
 Press and hold a plank area of the screen. You can also press and hold at the bottom right to open the Camera app. Or, double-tap a notification to open the related app. 	 Rotate the Screen – For most screens, you can automatically change the screen orientation from portrait to landscape by turning the phone sideways.
NOTE: If you have set an unlock pattern, PIN, or password for your phone	NOTES:
(see Personalizing – Protecting Your Phone With Screen Locks), you'll need to swipe up on the screen and draw the pattern or enter the PIN/password to unlock your screen.	 The Auto-rotate screen check box needs to be selected for the screen orientation to automatically change. Press the Home Key > > Settings > Display > Auto-rotate screen.
USING THE TOUCH SCREEN Your phone's touch screen lets you control actions through a variety of touch gestures.	 You can also access the screen rotation control by sliding down the Status Bar and tapping Auto Rotate.
 Tap – When you want to type using the on-screen keyboard, select on- screen items (such as application and settings icons), or press on-screen buttons, simply tap them with your finger. 	
• Press and Hold – To open the available options for an item (for example, a message or link in a web page), press and hold the item.

CONFIGURING ACCOUNT SYNC

Configuring Auto Sync Setting

1. Press the Home Key > > Settings > Accounts.

- 2. Tap and check or uncheck **Auto-sync data** to enable or disable automatic sync.
- When automatic sync is turned on, changes you make to information on your phone or on the web are automatically synced with each other.
- When automatic sync is turned off, you need to sync manually to collect emails, updates, or other recent information.

Syncing Manually

1. Press the Home Key > > Settings > Accounts.

- 2. Tap the account category and then the account you want to sync.
- 3. Tap 🚦 > Sync now.

Changing an Account's Sync Settings

1. Press the Home Key > > Settings > Accounts.

- Tap the account category and then the account. The Sync settings screen appears, showing a list of information the account can sync.
- Check or uncheck items as you need. Checked types of information on the phone and the web will be kept in sync when auto-sync is turned on. When auto-sync is disabled, tap a listing to sync that type of information between the phone and the web.

EMAIL

SETTING UP THE FIRST EMAIL ACCOUNT

- 1. Press the Home Key > > Email.
- 2. Tap an email type, and then enter your email address and password.
- 3. Tap **Next** to let the phone retrieve the network parameters automatically.

NOTE: If automatic setup fails, you can enter these details manually by tapping **Manual setup**.

4. Follow the on-screen instructions to finish setup.

Your phone will show the inbox of the email account and start to download email messages.

CHECKING YOUR EMAILS

Your phone can automatically check for new emails at the interval you set when setting up the account.

You can also check new emails manually by swiping down on the message list. Tap Load more messages at the bottom of the email list to download earlier messages.

CREATING A PAYMENT METHOD

You must have a payment method, such as Google Wallet, associated with your Google account to purchase items from the Play Store.

Do one of the following:

- On your computer, go to wallet.google.com to create a Google Wallet account.
- The first time you use your phone to buy an item from the Play Store, you will be prompted to enter your billing information to set up a payment method.

WARNING! When you've used a payment method once to purchase items from the Play Store app, the phone remembers your password, so you don't need to enter it the next time. For this reason, you should secure your phone to prevent others from using it without your permission.

MANAGING YOUR DOWNLOADED APPS

After you've downloaded and installed an app, you can rate it, view it in a list with your other downloaded apps, configure it to update itself automatically, and more.

VIEWING YOUR DOWNLOADED APPS

- 1. In the Play Store screen, tap \overline{m} > My apps & games.
- 2. Your list of installed apps opens. Tap an app to rate it, uninstall it, request a refund, and more.

GOOGLE PLAY STORE

UNINSTALLING AN APP

- 1. In the Play Store screen, tap \overline{m} > My apps & games.
- 2. Tap an app to open its details screen.
- 3. Tap UNINSTALL > OK.

About Phone

View phone status, legal information, and other information.

UPGRADING THE PHONE SOFTWARE

There are several ways to upgrade your phone software:

- 1. Use the online upgrade tool.
- Use the one-press upgrade package offered by your mobile service provider.
- Use your PC to download an upgrade package to your microSDXC card and install it to your phone from the card.

NOTE: Visit the ZTE official handset service support website (https://www.zteusa.com/support_page/) to learn more about the above upgrade methods, as well as which phones and methods are supported. TROUBLESHOOTING

TROUBLESHOOTING

If you encounter problems while using the phone, or if it performs abnormally, you can refer to the chart below. If your particular problem cannot be resolved using the information in the chart, contact Consumer Cellular customer support at (800) 686-4460.

Problem	Possible causes	Possible solution
	The network signal is too weak at your current location, (for example, in a basement or near a tall building), because wireless transmissions can not effectively reach it.	Move to a location where the network signal can be properly received.
Poor reception	The network is busy at the current time (for example, during peak times, there may be too much network traffic to handle additional calls).	Avoid using the phone at such times, or try again after waiting a short time.
	You are too far away from a base station for your service provider.	You can request a service area map from your service provider.
	Poor network link quality on the part of your service provider.	End the call and dial again. You may be switched to a better-quality network link or phone line.
	Poor local telephone line quality.	End the call and dial again. You may be switched to a better-quality network link or phone line.
Unable to select certain features	Your service provider does not support these features, or you have not applied for services that provide these features.	Contact your service provider.

Problem	Possible causes	Possible solution
	The battery or battery charger is damaged.	Call Consumer Cellular customer support at (800) 686-4460.
Battery not charging	The phone's temperature is below 32°F (0°C) or higher than 113°F (45°C).	Adjust the battery charging environment to avoid extreme temperatures.
	Poor contact between the battery and charger.	Check all connectors to make sure all connections have been properly made.
	The standby time is related to your service provider system configuration. The same phone used with different service providers' systems will not provide exactly the same length of standby time.	If you are located in an area where signaling is weak, temporarily power off the phone.
Shortened standby time	The battery is depleted. In high- temperature environments, battery life will be shortened.	Use a new battery.
	If you are not able to connect to the network, the phone will continue to send out signals as it attempts to locate a base station. Doing so consumes battery power and will consequently shorten standby time.	Change your location to one where the network is accessible, or temporarily turn off your phone.
Cannot turn your phone on	Battery power has been depleted.	Recharge the phone's battery.

TROUBLESHOOTING

Problem	Possible causes	Possible solution
	The nano-SIM card has malfunctioned or is damaged.	Call Consumer Cellular customer support at (800) 686-4460.
Nano-SIM card error	The nano-SIM card is inserted improperly.	Insert the nano-SIM card properly.
	Debris is on the nano-SIM card contacts.	Use a soft, dry cloth to clean the nano-SIM card contacts.
Cannot answer incoming calls	You have activated the call blocking feature.	Disable this feature. See Adjusting Your Call Settings – Barring.
	You have activated the call blocking feature.	Disable this feature. See Adjusting Your Call Settings – Barring.
carnot make outgoing calls	You have activated the Fixed dial numbers feature.	Disable this feature. See Adjusting Your Call Settings – Using Fixed Dialing Numbers.
	The nano-SIM card is invalid.	Call Consumer Cellular customer support at (800) 686-4460.
Unable to connect to the	You are not within the network's service area.	Check the service area with Consumer Cellular.
network	Poor signal.	Move to an open space, or if you are inside a building, move closer to a window.
PIN Code blocked	You have entered an incorrect PIN code three consecutive times.	Call Consumer Cellular customer support at (800) 686-4460.
Phone crashes.		Reset the phone to factory status.
reboots, freezes, or cannot be	Some third-party software is not compatible with your phone.	Uninstall the software that may be causing the problem.

FCC RF EXPOSURE INFORMATION (SAR) This phone is designed and manufactured not to exceed the emission limits for	For this device, the highest reported SAR value for usage against the head is 0.42 W/kg , for usage near the body is 0.49 W/kg .
exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.	While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirements.
During SAR testing, this device was set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage against the head with no separation, and near the body with the separation of 0.4 inches (10 mm). Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating	SAR compliance for body-worn operation is based on a separation distance of 0.4 inches (10 mm) between the unit and the human body. Carry this device at least 0.4 inches (10 mm) away from your body to ensure RF exposure level compliant or lower to the reported level. To support body-worn operation,
can be well below the maximum value. This is because the phone is designed to operate at multiple power lovels so as to use only the power required to	choose the perturbs of holsers, which do not contain the aim components, to maintain a separation of 0.4 inches (10 mm) between this device and your body.
to operate at initiative power revers so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.	RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and the usage of such body-worn accessory
The exposure standard for wireless devices employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is	should be avoided. FCC REGULATIONS
1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by	This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions; (1) This device may not cause harmful interference, and
the FCC with the device transmitting at its highest certified power level in all tested frequency bands.	(2) this device must accept any interference received, including interference that may cause undesired operation.
The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC ID: SRQ-2916BL .	This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions,

phones to assist hearing device users in finding phones that may be compatible FOR YOUR SAFETY thoroughly and in different locations, using your hearing aid or cochlear implant, noise. Some hearing devices are more immune than others to this interference been rated have a label on the box. These ratings are not guaranteed. Results aids and cochlear implants), users may detect a buzzing, humming, or whining to interference, you may not be able to use a rated phone successfully. Trying noise, and phones also vary in the amount of interference they generate. The with their hearing devices. Not all phones have been rated. Phones that have degree of your hearing loss. If your hearing device happens to be vulnerable out the phone with your hearing device is the best way to evaluate it for your use with hearing aids. It is important to try the different features of this phone or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service will vary, depending on the level of immunity of your hearing device and the wireless telephone industry has developed ratings for some of their mobile This phone has been tested and rated for use with hearing aids for some of to determine if you hear any interfering noise. Consult your service provider to generate less interference with hearing devices than phones that are not While some wireless phones are used near some hearing devices (hearing the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely abeled. M4 is the better/higher of the two ratings. provider or phone retailer. personal needs.

may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Contact Consumer Cellular support for help.

CAUTION: Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

HEARING AID COMPATIBILITY (HAC) REGULATIONS FOR MOBILE PHONES

In 2003, the FCC adopted rules to make digital wireless telephones compatible with hearing aids and cochlear implants. Although analog wireless phones do not usually cause interference with hearing aids or cochlear implants, digital wireless phones sometimes do because of electromagnetic energy emitted by the phone's antenna, backlight, or other components. Your phone is compliant with FCC HAC regulations (ANSI C63.19-2011).

FOR YOUR SAFETY

Aircraft

Turn off your wireless device whenever you are instructed to do so by airport or airline staff. Consult the airline staff about the use of wireless devices onboard the aircraft. If your device offers airplane mode, this must be enabled prior to boarding an aircraft.

Interference in Vehicles

Please note that because of possible interference with electronic equipment, some vehicle manufacturers forbid the use of mobile phones in their vehicles unless a hands-free kit with an external antenna is included in the installation.

EXPLOSIVE ENVIRONMENTS

Gas Stations and Explosive Atmospheres

In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as your phone or other radio equipment. Areas with potentially explosive atmospheres include fueling areas, below decks on boats, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

Blasting Caps and Areas

Power off your mobile phone or wireless device when in a blasting area, or in areas with signs posted directing to power off "two-way radios" or "electronic devices" to avoid interfering with blasting operations.

WARNING: This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm.

SPECIFICATIONS

Handset specifications are shown in the following table.

Operating system	Android [™] 5.1.1 (Lollipop)
Network capability	4G LTE
Dimensions	6.07" (H) × 2.99" (W) × 0.37" (D)
Weight	6.16 oz. (with battery)
Display	5.5" IPS; 1280 × 720, 267 PPI
Camera	8 MP rear-facing; 2 MP front-facing
Internal memory	8 GB ROM + 1.5 GB RAM
Removable memory card	Supports microSDXC card up to 64 GB
Continuous idle time	Up to 17 days
Continuous talk time	Up to 10 hours
Bluetooth	BT 4.2
HAC	M4/T3

NOTE: The phone's talk time and idle time are based on ideal working environments. The use of extended backlighting, browser, and network conditions can reduce battery life and talk/idle time.

SUPPORT

Email: Service@ConsumerCellular.com

Website: ConsumerCellular.com/Help

Telephone: (800) 686-4460

Need to test your cellphone?

You can place a FREE test call by dialing (888) 460-8781 from your cellular phone. If the call is completed correctly you will hear a recorded message telling you that your cellphone is working.

Check your minutes or change your plan.

With Consumer Cellular you are in control and can change your plan at any time. To check your usage and change your plan, visit ConsumerCellular.com/MyAccount or call (888) 373-1777 any time. The call is free.

WARRANTY

This product is guaranteed for a period of 12 months from the date of purchase. In the unlikely event of a fault occurring during this period, please contact the place of purchase. Proof of purchase is required for any service or support needed during the guarantee period.

This guarantee will not apply to a fault caused by an accident or a similar incident or damage, liquid ingress, negligence, abnormal usage, non-maintenance or any other circumstances on the user's part. Furthermore, this guarantee will not apply to any fault caused by a thunderstorm or any other voltage fluctuations. As a matter of precaution, we recommend disconnecting the charger during a thunderstorm. Batteries are consumables and are not included in any guarantee.

This guarantee does not apply if batteries other than ZTE original batteries are used.
