Conventions used in this guide

In this user guide, we use the following symbols to indicate useful and important information:

This is a note. A note often gives additional information, such as what happens when you choose to do or not to do a certain action. A note also provides information that may only be applicable to some situations.

This is a tip. A tip gives you an alternative way to do a particular step or procedure, or lets you know of an option that you may find helpful.

This indicates important information that you need in order to accomplish a certain task or to get a feature to work properly.

This provides safety precaution information, that is, information that you need to be careful about to prevent potential problems.

Getting started

Inside the box

You will find the following inside the box:

- HTC ChaCha

- Battery (preinstalled)

- microSD™ card (preinstalled)

- USB cable

- 3.5mm stereo headset

- Power adapter

- Quick start guide

- Safety and regulatory guide

WITH HTC SENSE

Top panel
1. 3.5mm headset jack
2. POWER

Bottom cover

Removing the bottom cover

Remove the bottom cover to access the battery, SIM card slot, and storage card slot.

1. Turn off HTC ChaCha and hold it securely with the front facing down.

2. With your right and left thumbs, push the bottom cover out to remove it.
Replacing the bottom cover

1. Slide the bottom cover onto the exposed area of your phone's back panel.

2. Push the bottom cover towards the phone. You'll hear a click when the bottom cover is locked in place.

SIM card

The SIM card contains your phone number, service details, and phonebook/message memory. Both 1.8V and 3V SIM cards can be used.

Inserting the SIM card

1. Take the bottom cover off.

2. Remove the battery.

3. With the SIM card's gold contacts facing down and its cut-off corner facing in, insert the SIM card into the SIM card slot.
Removing the SIM card

⚐ Make sure to switch off your phone before removing your SIM card.

1. Take the bottom cover off.

2. Remove the battery.

3. Push the SIM card in to eject it from the SIM card slot.

Storage card

Use the storage card to store your photos, videos, and music. You'll find the storage card already inserted in HTC ChaCha.

Removing the storage card

If your phone is on you must first "unmount" the storage card before removing it to prevent corrupting or damaging the files in the storage card.

1. Take the bottom cover off.
2. Remove the battery.
3. Push the storage card in to eject it from its slot.
4. Slide the storage card out from its slot.
Unmounting the storage card

When you need to remove the storage card while HTC ChaCha is on, unmount the storage card first to prevent corrupting or damaging the files in the storage card.

1. From the Home screen, press ☰, and then tap **Settings**.
2. Tap **SD & phone storage** > **Unmount SD card**.

Inserting the storage card

1. Take the bottom cover off.
2. Remove the battery.
3. Insert the storage card into the storage card slot with its gold contacts facing down and push it until it clicks into place.

Battery

HTC ChaCha uses a rechargeable battery. How long the battery can last before it needs recharging depends on how you use HTC ChaCha. Among these are the features and accessories you use (for example, leaving your Bluetooth™ connection always on uses more power). Long phone calls and frequent web browsing uses up a lot of battery power. Also, consider your location: poor signal strength from your mobile network and extreme temperature make the battery work harder.

Removing the battery thin film

Before using your phone for the first time, you need to remove the thin film wrapped around the phone's battery.

1. Take the bottom cover off.

2. Remove the battery.

3. Remove the thin film from the battery.

Removing the battery

1. Take the bottom cover off.

2. Lift the battery out from the right side.
Inserting the battery

1. Take the bottom cover off.

2. Insert the battery (with its exposed copper contacts first) into the battery compartment.
Charging the battery

The battery is partially charged when shipped. Before you turn on and start using HTC ChaCha, it is recommended that you charge the battery. Some batteries perform best after several full charge/discharge cycles.

> - The battery is already installed in HTC ChaCha when shipped. A thin film is inserted between the battery and the compartment. You need to remove this film before you can charge the battery.
>
> - Only the power adapter and USB sync cable provided in the box must be used to charge the battery.
>
> - Do not remove the battery from HTC ChaCha while you are charging it using the power or car adapter.

1. Plug the power adapter into the USB connector.
2. Plug in the power adapter to an electrical outlet to start charging the battery.

As the battery is being charged, the notification LED shows a solid orange light. The light turns to solid green when the battery is fully charged.

When you charge the battery and HTC ChaCha is on, the charging battery icon 🔋 is displayed in the status bar. After the battery has been fully charged, the charging battery icon turns to a full battery icon 🔋.

> As a safety precaution, the battery stops charging when it overheats.

Switching the power on or off

Switching the power on

Press the POWER button. Easy.

> ✎ When you turn on HTC ChaCha for the first time, you'll need to set it up.

Switching the power off

1. If the display is off, press the POWER button to turn it back on, then unlock the screen.

2. Press and hold the POWER button for a few seconds.

3. When the Power options menu appears, tap **Power off**.

Entering your PIN

Most SIM cards come with a PIN (personal identification number) set by your mobile operator. If you're asked for a PIN, enter it and then tap **OK**.

> ✎ If you enter the wrong PIN three times, your SIM card is blocked. No problem. Just contact your mobile operator and ask for the PUK (PIN Unblocking Key).

Finger gestures

Tap	When you want to press onscreen buttons or select items onscreen such as application and settings icons, simply tap them with your finger.
Press and hold	To open the available options for an item (for example, a contact or link in a web page), simply press and hold the item.
Swipe or slide	To swipe or slide means to quickly drag your finger vertically or horizontally across the screen.
Drag	Press and hold your finger with some pressure before you start to drag. While dragging, do not release your finger until you have reached the target position.
Flick	Flicking the screen is similar to swiping, except that you need to swipe your finger in light, quicker strokes. This finger gesture is always in a vertical direction, such as when flicking the contacts or message list.

| Rotate | For some screens, you can automatically change the screen orientation from landscape to portrait by turning HTC ChaCha sideways. |
| Pinch | In some apps, like Gallery or the web browser, you can "pinch" the screen using two fingers (for example, thumb and index finger) to zoom in or zoom out when viewing a picture or a web page. |

Setting up HTC ChaCha for the first time

When you switch on HTC ChaCha for the first time, you'll be asked to set it up. You can choose your language, how you want to connect to the Internet, and whether you want your current location to be automatically detected. If you still have personal contacts and calendar events stored on your old phone, you can easily transfer them to HTC ChaCha through Bluetooth as well.

Be sure to sign in to your Google™ Account so you can use Google apps like Gmail™ and Android Market™. You can also set up your other email accounts, favorite social networks like Facebook® and Twitter™, and more.

Just follow the onscreen instructions and you'll be up and running in no time.

Some features that need to connect to the Internet such as location-based services and auto-sync of your online accounts may incur extra data fees. Don't worry. You can enable or disable them in settings later on.

Facebook all the time

HTC ChaCha has been designed with Facebook fans in mind. You'll discover lots of nice Facebook features on your phone.

| Share everywhere | Easily post messages on your Facebook wall with a push of the Facebook share button 📘. Or, press and hold 📘 to check in to Facebook places and tell your friends what you're up to, and who you're with. |
| Share music | Press 📘 while listening to a track in the Music app to post a message to your Facebook wall with the track, album, and artist information.

If the song is on Amazon, track info and album art are also displayed along with a link that you can click to go to the online music store and buy the track. |
| View Facebook calendar events | View Facebook events on the Calendar. Birthday and event calendars are separated for convenience.

You can also add the Calendar widget to the Home screen to easily view Facebook birthday and event info. |

Share photos and videos	Press ![f] in Gallery to upload photos or videos to Facebook. You can easily add tags and descriptions, set the album to upload to, and set privacy restrictions for new albums.
Web and news page sharing	While viewing a webpage or news article, press ![f] to publish the page or article link to your Facebook wall.
Auto upload photos	Automatically upload photos you take with the camera to your Facebook page. You can upload pictures immediately, daily, or only when there's a Wi-Fi connection present.
Facebook chat	Keep in touch with all your close Facebook friends using Facebook chat.

Ways of getting contacts into HTC ChaCha

There are several ways you can add contacts to HTC ChaCha. You can sync HTC ChaCha with contacts from your Google Account, computer, Facebook, and more.

HTC Sync™	Sync the contacts from your old phone to your computer, and then use HTC Sync to sync HTC ChaCha with your computer's Microsoft® Outlook®, Outlook Express or Windows® Contacts.
Gmail	Google contacts are imported to HTC ChaCha after you sign in to your Google Account. You can also create more Google contacts right from HTC ChaCha.
Facebook	Log in to your Facebook account to import your Facebook friends' contact information.
Phone contacts	You can choose to create and store contacts directly in HTC ChaCha or transfer existing ones from your old phone.
SIM card	Copy all your SIM contacts to HTC ChaCha.
Microsoft Exchange ActiveSync®	HTC ChaCha syncs your work contacts from the Microsoft Exchange ActiveSync Server in your workplace.
Transfer	Use the Transfer app to transfer not only your contacts, but also calendar events and text messages from your old phone to HTC ChaCha.

Home screen

Your Home screen is where you make HTC ChaCha your own. It comes with a social clock widget that shows the latest message updates for your social networks. You can also add your favorite applications, shortcuts, folders and widgets so they're always just a tap away. To find out how, see Personalizing on page 29.

Extended Home screen

As you start to do more things with HTC ChaCha, you might find that one Home screen is not enough. No problem. You have four screens to start with, and you can add three more screens. It should be plenty.

- Slide your finger horizontally to the left or right and you'll discover more space for adding icons, widgets, and more.
- Press the large plus sign on an empty screen to add a widget or another screen. You can have up to seven screens total.

Press △ to return to the main Home screen (that is, the first home screen).

Using Leap view

To jump straight to the screen that you want, press △ or pinch the screen to show the Leap view. It reveals your available Home screens as thumbnails.

Just tap the one you want and you'll leap right there.

Basics

Adjusting the volume

Adjusting the ringer volume changes the volume level of the ringtone, while adjusting the media volume changes the volume level of sound notifications and music or video playback.

Adjusting the ringer volume

- Press the VOLUME UP or VOLUME DOWN button to adjust the ringer volume to your desired level. The Ringer volume window appears on the screen to display the volume levels.

- While in the lowest ringer volume level (Silent mode), press VOLUME DOWN once to switch to Vibrate mode. The vibrate mode icon ▨ appears in the status bar.

- While in Vibrate mode, press VOLUME UP once to switch to silent mode. The speaker mute icon ▨ displays in the status bar.

Adjusting the media volume

When playing music or watching video, press the VOLUME UP or VOLUME DOWN button to adjust the volume. The Media volume window appears on the screen to display the volume level.

Adjusting the earpiece volume for calls

During a call, press the VOLUME UP or VOLUME DOWN button.

Adjusting the volume via settings

1. From the Home screen, press ▤, and then tap **Settings** > **Sound** > **Volume**.

2. Drag the volume sliders to the left or right to adjust the volume levels of the ringtone, media playback, alarms, and notifications. A sample tone is briefly played with the volume being adjusted as you drag a slider.

3. If you want the same volume for your ringtone and notifications, select **Use incoming call volume for notifications**.

4. When you're done, tap **OK**.

Sleep mode

Sleep mode saves battery power by putting HTC ChaCha into a low power state while the display is off. It also stops accidental button presses when HTC ChaCha is in your bag. You'll still receive messages and calls though.

Switching to Sleep mode

Briefly press the POWER button to turn off the display and switch to Sleep mode. HTC ChaCha also automatically goes into Sleep mode when it's idle for a while.

Waking up from Sleep mode

To wake HTC ChaCha up manually, press the POWER button. You'll need to unlock the screen.

HTC ChaCha automatically wakes up when you have an incoming call.

Unlocking the screen

Pull the ring up to unlock the screen.
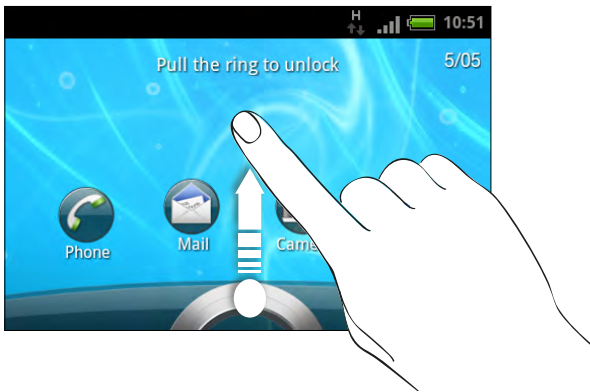

If you have set up a screen unlock pattern, pin, or password, you will be asked to draw the pattern on the screen or enter the PIN or password before it unlocks.

If you've set an event reminder or an alarm, you can drag ⦿ or ⊗ to the ring to snooze or dismiss the event or alarm.

Status and notifications

Status icons

Here's what each icon means:

Icon	Meaning	Icon	Meaning
	Signal strength		Battery is very low (10% remaining)
	GPRS connected		Silent mode
	GPRS in use		Vibrate mode
	EDGE connected		Microphone is mute
	EDGE in use		Speakerphone is on
	3G connected		Wired microphone headset connected
	3G in use		Wired headset connected
	HSDPA connected		Bluetooth is on
	HSDPA in use		Connected to a Bluetooth device
	Roaming		Airplane mode
	No signal		GPS is on
	No SIM card installed		Alarm is set
	Connected to a Wi-Fi network		Keyboard language
	Data synchronizing		FN key is pressed

	Network sharing is on		FN key is locked
	Battery is full		SHIFT key is pressed
	Battery is charging		SHIFT key is locked
	Battery is low (20% remaining)		

Notification icons

Notification icons on the status bar make it easy for you to keep on top of your messages, calendar events, and alarms.

Here's what each one means:

	New Gmail message		Call in progress
	New Microsoft Exchange ActiveSync or POP3/IMAP email		Missed call
	Problem with email delivery		Call on hold
	New SMS/MMS		Call forwarding on
	Problem with SMS/MMS delivery		Message forwarding on
	New Google Talk™ instant message		HTC ChaCha is connected to a computer via USB cable
	New voicemail		Wi-Fi is on and wireless networks are available
	Upcoming event		Portable Wi-Fi Hotspot is on
	New updates from your social networks		Uploading data (animated)
	Matched contacts suggestion		Downloading data (animated)

✳	Bluetooth pairing request	↥	Waiting to upload
↻	HTC ChaCha software update available	☑	Downloaded Android Market app installed successfully
▶	Song is playing	↓	Update available for an app downloaded from Android Market
📻	FM Radio app in use	🗂	Storage card is safe to remove or storage card is being prepared
⬤	Voice recording is on	🗂?	No storage card installed
◀	More (not displayed) notifications	🗂!	Storage card is low on free space
⚠	General notification		

Notification LED
The notification LED shows a:

- Solid green light when HTC ChaCha is connected to the power adapter or a computer and the battery is fully charged.

- Flashing green light when you have a pending notification.

- Solid orange light when the battery is being charged.

- Flashing red light when the battery level reaches very low.

Notifications panel

When you get a new notification, you can open the Notifications panel to see what event notification or new information you've received.

To open the Notifications panel, press and hold the status bar, then slide your finger downward.
If you have several notifications, you can scroll down the screen to see them all.

> You can also open the Notifications panel on the Home screen by pressing ☰ and then tapping **Notifications**.

Closing the Notifications panel

Press and hold the bottom bar of the Notifications panel, then slide your finger up the screen. Or just press ←.

Connecting HTC ChaCha to a computer

Whenever you connect HTC ChaCha to a computer using the USB cable, the Choose a connection type screen opens and lets you choose the type of USB connection.

Select one of the following choices, and then tap **Done**:

Charge only	Select this option if you only want to charge the battery while connected to your computer.
Disk drive	This mode is available only when there's a storage card installed on HTC ChaCha. Select this mode when you want to copy files between the storage card and your computer. When Disk drive mode is enabled while HTC ChaCha is connected to the computer, you will not be able to use apps on HTC ChaCha to access the storage card.
HTC Sync	Select this option to synchronize contacts, calendar, and other information between your computer and HTC ChaCha.

USB tethering	When you do not have an Internet connection on your computer, you can select this mode to share the mobile data connection of HTC ChaCha with your computer.
Internet pass-through	If you don't have a data plan or you don't have access to a Wi-Fi network, you can select this mode to share your computer's Internet connection with HTC ChaCha.

Copying files to or from the storage card

You can copy your music, photos, and other files to the storage card.

1. Connect HTC ChaCha to your computer using the supplied USB cable.

2. On the Choose a connection type screen, select **Disk drive**, and then tap **Done**. On your computer, the storage card is recognized as a removable disk.

3. Navigate to the removable disk and open it.

4. Do one of the following:

   - Copy the files from the computer to the storage card's root folder.
   - Copy the files from the storage card to a folder in your computer.

5. After copying the files, unmount the removable disk (that is, the connected HTC ChaCha) as required by your computer's operating system to safely remove HTC ChaCha.

6. Do one of the following:

   - Disconnect HTC ChaCha from the computer.
   - If you want to keep HTC ChaCha connected to the computer but want it to be able to access the storage card, open the Notifications panel, tap **Disk drive**, select an option except **Disk drive**, and then tap **Done**.

Copying text, looking up information, and sharing

In apps such as the web browser and Mail, you can select text and choose what you want to do with it.

Selecting text

1. Press and hold on a word.

2. Drag the start and end markers to highlight the surrounding text you want to select.

> To copy the address of a linked web page, press and hold the link, and then tap **Copy link URL**.

Copying and pasting text

1. After you have selected the text you want to copy, tap **Copy**.

   The selected text is then copied to the clipboard.

2. In a text entry field (for example while composing an email), press and hold at the point where you want to paste the text.

3. Tap **Paste**.

Searching or translating text

1. After you have selected the text you want to search for or translate, tap 🔍.

2. Tap one of the following tabs:

Google Search	Look for related information using Google Search, based on the text that you selected.
Wikipedia	Look for related information on Wikipedia®, based on the text that you selected.

	Google Translate
	Translate the text to another language.
	Google Dictionary
	Look up the selected text in the dictionary.

Sharing text

1. After you have selected the text you want to share, tap 🔗.

2. Choose where to paste and share the selected text, such as in an email message or Facebook status update.

Personalizing

Making HTC ChaCha truly yours

Make HTC ChaCha look and sound just the way you want it. Personalize it with a different wallpaper, skin, ringtone, and notification sound for events such as incoming text, email, and calendar reminders.

Tap the Personalize button [icon] right on the Home screen to get started.

Personalizing HTC ChaCha with scenes

HTC ChaCha becomes multiple phones in one when you use scenes. Scenes are personalized Home screen layouts that you can quickly apply. By switching between scenes, you instantly turn HTC ChaCha into your perfect weekend phone, travel phone, work phone, or pure play phone.

> Everytime you add or modify something on the Home screen, HTC ChaCha automatically saves your changes to the current scene selected.

Using a preset scene

HTC ChaCha features preset scenes, each preconfigured with a different wallpaper and collection of widgets that reflect different moments in your life. You can choose a scene that is suitable for work, play, travel, or your social life.

1. From the Home screen, tap [icon] > **Personalize display** > **Scene**.

2. Slide your finger on the screen from right to left to select the scene you want.

3. Tap **Apply**.

Creating a new scene

You'll start with an empty Home screen when you create a new scene.

1. From the Home screen, tap [icon] > **Personalize display** > **Scene**.

2. Press [icon], and then tap **New**.

3. Enter a new scene name, then tap **Done**.

4. Personalize the scene by adding widgets and other elements, arranging the Home screen layout, and changing the skin or wallpaper. All of your changes will be automatically saved to this scene.

Renaming a scene

1. From the Home screen, tap [icon] > **Personalize display** > **Scene**.

2. Slide your finger on the screen from right to left to select the scene you want to rename.

3. Press and hold a scene thumbnail, then tap **Rename**.

4. Enter a new scene name, then tap **Done**.

Deleting scenes

1. From the Home screen, tap [icon] > **Personalize display** > **Scene**.

2. Press [icon], and then tap **Delete**.

3. Slide your finger on the screen from right to left to browse through scenes, then tap one or more scenes you want to delete.

4. Tap **Delete**.

Changing your wallpaper

Personalizing your wallpaper with your favorite photo is a quick and easy way to give HTC ChaCha a fresh look. Browse the collection of wallpapers included in HTC ChaCha or choose from photos that you have taken with the camera. You can also change your Home screen to use an animated wallpaper.

1. From the Home screen, tap [icon] > **Personalize display** > **Wallpaper**.

2. Tap one of the following:

HTC wallpapers	Choose a preset wallpaper, then tap **Preview** > **Apply**.
Live wallpapers	Choose from preset animated wallpapers. Tap **Preview** to view the animation, and then tap **Apply**.
Gallery	Choose an existing photo. Crop the photo and then tap **Save**.

Applying a new skin

Personalize beyond the Home screen by applying a new skin. Skins are set to give a different look and feel to most onscreen buttons, application screens, option menus, and other items.

1. From the Home screen, tap [icon] > **Personalize display** > **Skin**.

2. Slide your finger on the screen from right to left to select the skin you want.

3. Tap **Apply**.

Personalizing your Home screen with widgets

Widgets put at-a-glance important information and media content up front on your Home screen. Some widgets are already added to your Home screen for your convenience. You can add more from the available selections of widgets.

Adding a widget to your Home screen

1. Go to a part of the Home screen where there's space to add a new widget.

2. Press and hold on the screen and then tap **Add items to Home** > **Widget**.

3. Select a widget that you want.

4. Most HTC widgets are available in a variety of designs and sizes to suit your needs. Slide your finger on the screen from right to left to view the different styles, and then tap **Select** to choose one.

You can also add widgets that allow you to quickly switch on or off certain settings such as Wi-Fi and Bluetooth. Scroll down the widgets list, tap **Settings**, and then tap the widget that you want.

Changing the settings of a widget

You can modify basic settings of some widgets (for example, the People and Mail widgets) from the Home screen.

1. Press and hold a widget on the Home screen. HTC ChaCha vibrates and you'll see a colored box around the widget. Don't lift your finger just yet.

2. Drag the widget to the **Edit** button (if it's enabled).
The relevant screen where you can change some settings for this widget then opens.

3. Customize the widget settings.

Adding icons and other shortcuts on your Home screen

Place app icons on your Home screen to open apps quicker. You can also add shortcuts to settings and specific information such as a bookmarked webpage, someone's phone number, a music playlist, route directions, and many other items, to your Home screen.

✎ The shortcuts available depend on the apps that are installed on HTC ChaCha.

1. Go to a part of the Home screen where there's space to add a new icon or shortcut.

2. Press and hold on the screen, tap **Add items to Home** and then tap **App** to add an app icon, or **Shortcut** to add a shortcut to a setting or information.

💡 To add an app icon on the Home screen, you can also press ⌂ , tap ▦ , and then press and hold an app icon. Without lifting your finger, drag the icon to an empty area on the Home screen, and then release it.

Adding folders on your Home screen

Use folders to group related apps and other shortcuts to keep your Home screen tidy and organized. You can also add information folders that show up-to-date information such as Bluetooth received files, your Facebook phonebook, and more.

Creating a new folder and adding items to it

1. Go to a part of the Home screen where there's space to add a new folder.

2. Press and hold on the screen and then tap **Add items to Home** > **Folder**.

3. Tap **New Folder**.

4. Press and hold an app icon or a shortcut that you want to move to the folder. HTC ChaCha then vibrates. Don't lift your finger just yet.

5. Drag the app icon or shortcut and drop it on top of the folder.
Simply tap the folder to open it so you can access the apps and shortcuts inside the folder.

Renaming a folder

1. Tap the folder to open it.

2. Press and hold the folder window's title bar.

3. Enter a new folder name and then tap **OK**.

Rearranging or removing widgets and icons on your Home screen

Rearrange the widgets and icons on your Home screen to make room for adding more items. You can also remove widgets and icons that you don't frequently use.

Moving a widget or icon

1. Press and hold the widget or icon you want to move. HTC ChaCha vibrates and you'll see a colored box around the widget or icon. Don't lift your finger just yet.

2. Drag the widget or icon to a new location on the screen.

- You can pause at the left or right edge of the screen to drag the widget or icon onto another Home screen panel.

- When you drag an icon to a spot that's occupied by another icon, the occupant automatically moves away to give room.

3. When the widget or icon is where you want it, lift your finger.

Removing a widget or icon

1. Press and hold the widget or icon you want to remove. HTC ChaCha vibrates and you'll see a colored box around the widget or icon. Don't lift your finger just yet.

2. Drag the widget or icon to the **Remove** button.

3. When the widget or icon also turns red, lift your finger.

Rearranging the Home screen

Reorder your Home screen panels in any way that fits how you use them. For example, move the panels with frequently-used widgets, shortcuts, and folders closer to the main Home screen.

> The upper-left thumbnail in Leap view is always the main Home screen.

1. Pinch the Home screen to show the Leap view.

2. Press and hold the thumbnail of the home screen you want to move. HTC ChaCha then vibrates. Don't lift your finger just yet.

3. Drag the thumbnail to its new position, and then lift your finger.

Using sound sets

Sound sets are different collections of ringtone, notification, and alarm sounds you can use to personalize the way HTC ChaCha alerts you. Using sound sets, you can instantly change from subtle ringtone and notification sounds while you're in the office into something fun when you're out with friends.

Choosing a preset sound set

1. From the Home screen, tap [icon] > **Personalize sound** > **Sound set**.

2. On the Sound sets screen, tap a sound set name.

3. You can tap [icon] to listen to the different sounds for that sound set.

4. Tap **Apply**.

Creating a sound set

1. From the Home screen, tap > **Personalize sound** > **Sound set**.

2. On the Sound sets screen, tap **Add**.

3. Enter a new sound set name, and then tap **Done**.

The newly created sound set is then added to the list of sound sets. You can assign different tones to the sound set to your preference.

Changing your ringtone, notifications, and sounds

Change your ringtone, notification sounds, and alarms to suit your mood or lifestyle. Choose different sounds from the preset selection or your storage card (except for notification sounds).

1. From the Home screen, tap > **Personalize sound** > **Sound set**.

2. Choose a sound set you want to customize or create a new one, and then tap **Apply**.

3. Change the ringtone, notification sound, and alarm from the Personalize screen.

   Go to the Messages, Mail, and Calendar apps to choose sounds for new messages, email, and calendar reminders respectively.

HTC ChaCha automatically saves your choices to the current sound set.

Deleting sound sets

1. From the Home screen, tap > **Personalize sound** > **Sound set**.

2. Press , and then tap **Delete**.

3. Tap one or more sound sets you want to delete.

4. Tap **Delete**.

Rearranging or hiding application tabs

You can rearrange the tabs in some apps to prioritize the types of information you frequently use or remove the tabs you don't really need.

1. Open an app that has the usual tabs on its screen (for example, the library screen in Music).
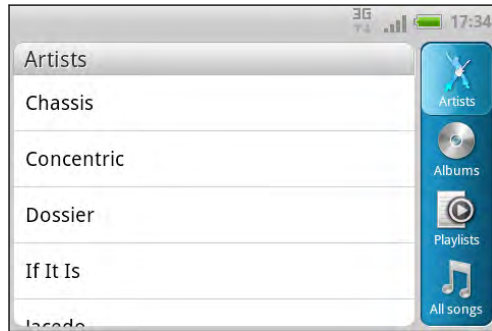

2. Press and hold a tab. When the screen changes and shows you an empty area, lift your finger.

3. Do any of the following:

Move a tab	Press and hold the tab you want to move, and then drag it to its new position.
Remove a tab	Press and hold a tab you want to hide, then drag it up. When you see a colored box, lift your finger.

4. When you're done, press ⬅.

Adding a tab back

1. Open the app from which you previously removed some tabs.

2. Press and hold a tab. When the screen changes and shows you some of your hidden tabs, lift your finger.

3. Press and hold the tab you want to show, then drag it down to where you want to position it again.
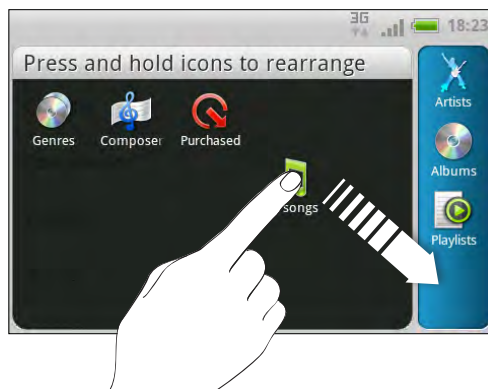

4. When you're done, press ⬅.

Phone calls

Different ways of making calls

Besides making calls from the phone dialer screen on HTC ChaCha, you can tap a number in a text message or email to call, or press a single number on the keypad to quickly call a contact.

Most SIM cards come with a PIN (personal identification number) set by your mobile operator. If you're asked for a PIN, enter it and then tap **OK**. If you enter the wrong PIN three times, your SIM card is blocked. Don't worry. Just contact your mobile operator and ask for the PUK (PIN Unblocking Key).

Making a call on the Phone dialer screen

You can either dial a number directly using the keypad, or use the Smart dial feature to search and call a stored contact or a number from your call history.

1. Press [—]. The Phone dialer screen opens.

You can also open the phone dialer screen any time while on the Home screen by pressing the keypad/keyboard keys.

2. Begin entering the first few digits of a phone number or characters of a contact name using the keypad and keyboard. To enter letters that are on the keypad or keys that are used for dialing (0-9 and +), press [FN] and then press the desired key. The Phone dialer screen then displays a list of matching numbers and names.

If you enter a wrong digit or letter, tap [⬅] to delete it. To erase the entire entry, press and hold [⬅]. You can also use the delete key on the keyboard to delete a wrong entry.

3. To browse through the filtered list, flick through the list or slide your finger up or down the list slowly.

4. To place a call, do one of the following:
   - Tap a phone number or contact from the list.
   - After entering a complete number, press [—].
   - To call a different phone number associated with the contact, you can tap [🔢] at the right side of the contact name. On the contact details screen, tap the number you want to call.

While dialing or when the call is in progress, the status bar displays the call in progress icon [📞].

What is Smart dial?

The phone dialer's Smart dial feature makes it quick and easy for you to place a call.

Simply enter the phone number or first few letters of the person's name you want to call. Smart dial automatically searches and filters your contacts list (stored on HTC ChaCha, the SIM card, and online accounts such as Google Account and Exchange ActiveSync) and the phone numbers from the call history.

Using Speed dial

Use Speed dial to call a phone number with a single tap. For example, if you assign a contact's number to the number 2 key, you can just press and hold 2 to dial the number.

> The number 1 key is generally reserved for your voicemail. Press and hold this key to call voicemail and retrieve your voicemail messages.

Assigning a speed dial key

1. Press ⬭.

2. Press ☰ and then tap **Speed dial** > **Add**.

3. Enter the name of the contact you want to add. When the name comes up in the list, tap the name.

4. On the Speed dial screen, choose the phone number of the contact to use, and a speed dial key to assign.

5. Tap **Save**.

> You can also set a speed dial key in People. Tap a contact, press ☰ , and then select **More** > **Set speed dial**.

Calling a phone number in a text message

1. Tap the phone number within the message.

2. Tap **Call**.

> To call the message sender, tap the received message, and then tap **Call** on the options menu.

Calling a phone number in an email

Want to call a number that's in an email? No problem.

1. In the email body, tap the phone number.

2. Edit the number if necessary.

3. Press ⬅️.

Making an emergency call

In some regions, you can make emergency calls from HTC ChaCha even if you don't have a SIM card installed or your SIM card has been blocked.

1. Press ⬅️.

2. Enter the emergency number for your locale, and then press ⬅️.

If you've enabled but forgotten your lock screen password, lock pattern, and/or the SIM lock, you can still make emergency calls by tapping **Emergency call** on the screen.

Receiving calls

When you receive a phone call from a contact, the Incoming call screen appears.

> You can use the polite ringer and pocket mode features for receiving calls. To find out how, see Changing sound settings on page 168.

Answering a call

Do one of the following:

- Press ⬅️.
- If the display is off when you get a call, the Lock screen appears. Press ⬅️ or pull the ring to unlock the screen and answer the call.
Rejecting a call

Do one of the following:

- Press (⚊).
- Press the POWER button twice to reject a call.

Muting the ringing sound without rejecting the call

Do one of the following:

- Press the VOLUME DOWN or VOLUME UP button.
- Press the POWER button.
- Place HTC ChaCha face down on a level surface.

> If HTC ChaCha is already facing down, it will still ring when there are subsequent incoming calls.

HTC Caller ID

Everytime you make a call or your friend gives you a ring, you get to see your friend's latest status update from social networks like Facebook or Twitter right on the call screen. You also won't miss people's birthdays. You'll see a birthday reminder, if your friend's birthday will occur sometime within the next seven days.
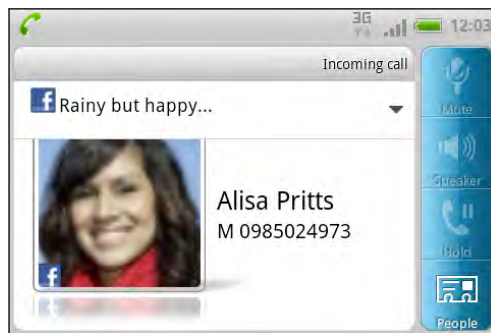

What can I do during a call?

When a call is in progress, use the buttons onscreen to mute or unmute the microphone or to turn the speakerphone on or off. You can also press ☰ and choose whether to add a call, place the call on hold, mute the microphone, and more.

Putting a call on hold

1. Tap **Hold** to put the call on hold. When you put a call on hold, the status bar displays the hold call icon 📳.

2. Tap **Hold** again to resume the call.

Switching between calls

If you're already on a call and accept another call, you can choose to switch between the two calls.

1. When you receive another call, tap **Answer** to accept the second call and put the first call on hold.

2. To switch between the calls, tap the person you want to talk to on the screen.
3. To end the current call and return to the other call, press ⬡.

Turning the speakerphone on during a call

⚠️ To decrease potential damage to your hearing, do not hold HTC ChaCha against your ear when the speakerphone is on.

Do one of the following:

- Flip HTC ChaCha over during a call (be sure that **Flip for speaker** is selected in ⌂ > ☰ > **Settings** > **Sound**).
- On the call screen, tap 🔊.

The speakerphone icon 📢 appears in the status bar when the speakerphone is on.

To turn the speakerphone off, just flip HTC ChaCha over again, facing it up. Or tap 🔊 again.

Muting the microphone during a call

On the call screen, tap 🎤 to toggle between turning the microphone on or off. When the microphone is turned off, the mute icon 🎤 appears in the status bar.

Ending a call

Do one of the following to end the call:

- Press ⬡.
- Slide open the Notifications panel, then tap ☎.

If the phone number of the person who called is not in your contacts list, you can choose to save the number to your contacts list after you hang up.

Setting up a conference call

Conference calling with your friends, family, or co-workers is easy. Make the first call (or accept a call), and then simply dial each subsequent call to add it to the conference.

Make sure your SIM card is enabled with conference calling service. Contact your mobile operator for details.

1. Make a call to the first conference call participant.

2. When connected, press ☰ , tap **Add call**, and then dial the number of the second participant. The first participant is put on hold when you dial the second participant.

3. When connected to the second participant, tap merge 👤 .

4. To add another participant to the conference call, tap 📞 on the conference call screen, and then dial the number of the contact you want to invite to the conference call.

5. When connected, tap 👤 to add the participant to the conference call.

6. To talk to a person in the conference call in private, tap 🔽 and then select **Private call** on the options menu.

7. When finished, press ⬤ .

Internet calls

When you're connected to a Wi-Fi network, you can make and receive calls through an Internet calling account.

Adding an Internet calling account

Before you add an Internet calling account, make sure that you've registered with an Internet calling service that supports voice calls over Session Initiation Protocol (SIP).

1. From the Home screen, press ☰ , and then tap **Settings** > **Call**.

2. Under Internet call settings, tap **Accounts**.

3. Tap **Add account**.

4. Enter your account details.

5. Press ← to save your account.

6. To set HTC ChaCha to receive Internet calls on your added account, tap the **Receive incoming calls** check box.

Making an Internet call

Make an Internet call to either your contact's Internet calling account or phone number.

Internet calls to phone numbers may incur additional fees or may not be supported by your mobile operator.

Call any of the following:

Internet calling account	- In People, tap a contact who has an Internet calling account, and then tap **Internet call**. - In Call History, tap an Internet call log.
Phone number	See Different ways of making calls on page 37. But first, set HTC ChaCha to use Internet calling for your outgoing calls. From the Home screen, press ≣, and then tap **Settings** > **Call**. Tap **Use Internet calling**, and then select either **For all calls** or **Ask for each call**.

Using Call history

Use Call History to check missed calls, your dialed numbers, and received calls.

Checking a missed call

You will see the missed call icon ⊠ in the status bar when you miss a call.

1. Slide open the Notifications panel to check who the caller is.

2. To return the call, tap the missed call notification. Then tap the caller's name or number on the Call History screen.

Checking calls in the Call History

From the Home screen, tap ⊞ > **Call History**.

You can also tap 🔄 on the phone dialer screen.

On the Call History screen, you can:

- Tap a name or number in the list to call.

- Press and hold a name or number in the list to display the options menu.

- Tap 🔄 to check only the call history of a particular contact.

- Press ≣, then tap **View** to display just a particular type of calls such as missed calls or outgoing calls.

Adding a new phone number to your contacts from Call History

1. On the Call History screen, press and hold the phone number that you want to save, and then tap **Save to People**.

2. Choose whether to create a new contact or save the number to an existing contact on HTC ChaCha.

3. Do any of the following:

   ▪ When creating a new contact, enter the contact name, contact type, and other information in the blank contact record that appears. The phone number is automatically added to the mobile field in the phone section. To store it as another type of number, for example a home number, tap the **Mobile** button.
   ▪ When saving the number to an existing contact, tap a contact stored on HTC ChaCha, and then select the number type.

4. Tap **Save**.

Clearing the Call History list

On the Call History screen, do one of the following:

Remove one name or number	Press and hold the name or number, and then tap **Delete from call history**.
Clear the entire list	Press ☰ , and then tap **Delete all**.

Using Home dialing

When you're on a trip abroad, it's easy to dial friends and family from home. Your home country code is automatically added when you make calls while roaming.

1. Press ⊂ ━ ⊃.

2. Enter the phone number from your home country that you wish to call.

✎ If you enter a leading zero, it will be removed. If you enter a plus (+) sign before the phone number, HTC ChaCha will dial normally.

The Home Dialing screen opens and shows the country code to be added before the phone number.

3. If you want to change the country code, choose the country that you want from the country selection box.

4. Tap **Done**, and then place the call.

Turning off Home dialing

If you prefer to manually enter complete phone numbers to call while roaming, you can turn off Home dialing.

1. From the Home screen, press ☰, and then tap **Settings** > **Call**.

2. Select the **Home country** check box.

Call services

HTC ChaCha can directly link to the mobile phone network, and enable you to access and change the settings of various phone services. Call services may include call forwarding, call waiting, voicemail, and more. Contact your mobile operator to find out about the availability of call services.

To open call services, press ☰ from the Home screen, and then tap **Settings** > **Call**.

Fixed Dialing Numbers	Restrict outgoing calls to a fixed set of numbers. To enable this feature, you must know your SIM card's PIN2 code.
Voicemail service	Shows the current voicemail service being used.
Voicemail settings	Specify another voicemail number aside from the voice mail number on your SIM card.
Clear voicemail notification	If you have a notification of a new voicemail, you can clear the notification with this option.
Phone settings	Modify your phone settings such as automatic saving of an unknown contact number when a call with that number ends.
Cell broadcast	Enable or disable receipt of cell broadcast messages.
Cell broadcast settings	Configure channels and language for cell broadcast messages.
Call forwarding	Select how you want to handle busy, unanswered, and unreachable calls. You can also set the call forwarding option for all incoming calls.
Call barring settings	Choose whether to block various categories of incoming and outgoing calls.
Additional settings	Enable or disable operator services such as caller ID and call waiting.
Home country	Enable or disable the Home dialing feature.
Home dialing	Set the country code to be automatically added before the phone numbers you dial while you're roaming.

Accounts	Add, modify, or remove Internet calling accounts. You can also choose whether to receive incoming Internet calls.
Use Internet calling	Select whether to use Internet calling for all calls you make or for Internet address calls only, or to be asked which you prefer for each call you make.

Turning Airplane mode on or off

In many countries, you are required by law to turn off wireless devices while on board an aircraft. A way to turn off wireless functions quickly is to switch HTC ChaCha to Airplane mode.

When you enable Airplane mode, all wireless radios on HTC ChaCha are turned off, including the call function, data services, Bluetooth, and Wi-Fi. When you disable Airplane mode, the call function is turned back on and the previous state of Bluetooth and Wi-Fi is restored.

To turn Airplane mode on or off, press and hold POWER, and then tap **Airplane mode**.

When enabled, the Airplane mode icon ✈ is displayed in the status bar.

Facebook everywhere

Facebook for HTC Sense

If you signed in to your Facebook account when you turned on and set up
HTC ChaCha for the first time, that means your Facebook account is linked to
Facebook for HTC Sense on HTC ChaCha.

With Facebook for HTC Sense, you can:

- See all your Facebook contacts and their instant status updates in People.
When you tap a contact on the All
tab, slide to the Updates and events
tab to see updates such as posted
status messages, uploads, and profile
changes.

When there is a notification of the
contact's birthday, you can tap the
notification to send a greeting.

- See Facebook photos right on the Gallery app.
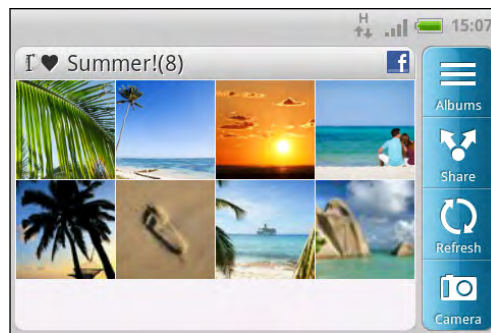

You can also upload one or more
photos to Facebook, then tag and
add captions that go with it.

When you're viewing the albums of a
Facebook friend, you can also share a
link to a particular album, or
comment on the album photos.

- Check your friends' Facebook status updates in Friend Stream.

- View your Facebook events and your friends' birthdays on the Calendar app.

Facebook app

The Facebook app lets you keep up and stay close with your friends in Facebook. It
offers most of the features that you are familiar with when using Facebook on your
computer.

With the Facebook app, you can:

- Share your thoughts and check other people's status updates.

- View your friends list and write on someone's wall.

- Comment on and like a friend's post.

- View someone's personal information, including photo albums.

- Check your Facebook notifications.

- Take a photo and upload it straight to your Facebook account.

Using the Facebook app

1. From the Home screen, tap ▦ > **Facebook**.

2. If this is your first time to use Facebook, follow the onscreen instructions to sign in to your Facebook account.

3. On the News Feed screen, tap facebook to access the other functions.

- While on the Facebook home screen, press ☰ , and then tap **Settings** to set refresh and notification options.

- On some Facebook screens, you can press and hold an item to open an options menu.

Adding the Facebook widget

Add the Facebook widget to the Home screen so you can easily post updates and check status updates of your friends.

Facebook sharing

The Facebook share button f on HTC ChaCha makes it easy to post messages to your Facebook wall or share your location.

- From the Home screen, press f to quickly post a message to your Facebook wall. You can attach a photo, a camera shot, or your location to your message.

- Press and hold f to share your location with your Facebook friends. You can also tag Facebook friends who are with you.

Sharing music

Share what you're currently listening to on your Facebook wall using the Facebook share button f .

1. From the Home screen, tap ▦ > **Music**.

2. Tap ☰ to go to the library.

3. In the library, tap the song that you want to share.

4. From the Now playing screen, press f . A message screen appears showing the song title, album, and artist. If the song is available on Amazon, the album art is displayed along with a link to the song's location on the Amazon website.

5. Enter your message and tap **Post**. The message will be displayed on your Facebook wall.

Sharing a web page

Want to recommend that great webpage you're reading on your Facebook wall? It's easy.

1. From the Home screen, tap ⊞ > **Internet**.

2. Browse to the page you want to share and press ⬜. The Post on wall screen appears with a description of the webpage and a representative thumbnail of the webpage. You can select a different thumbnail image from the webpage by tapping the arrow buttons.
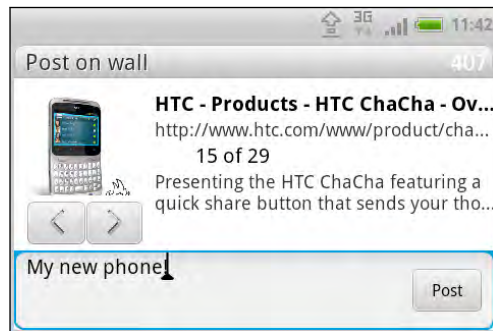

3. Enter your message and tap **Post**. The message is posted to your wall along with a link to the webpage and an image thumbnail.

Sharing a news article

Reading a great article and want to share it with your Facebook friends? Here's how.

1. From the Home screen, tap ⊞ > **News**.

2. While reading a news article, press ⬜. The Post on wall screen appears with the first line of the news article and a representative thumbnail of the webpage. You can select a different thumbnail image from the webpage by tapping the arrow buttons.

3. Enter your message and tap **Post**. The message is posted to your wall along with a link to the news article and an image thumbnail.

Posting messages to Facebook friends

Use the Facebook share button ⬜ to quickly post messages to Facebook friends and groups in Friend Stream.

1. From the Home screen, tap ⊞ > **Friend Stream**.

2. Press ☰ > **Friends** and then tap **Facebook**.

3. Do one of the following:

   ▪ On the Facebook - Friends tab, tap a friend and then press ⬜ to post a message to the friend's Facebook wall.

   ▪ On the Facebook - Groups tab, tap a group and then press ⬜ to post a message to each group's Facebook wall.

   ▪ On the Facebook - Pages tab, tap a page and then press ⬜ to post a message to each page's Facebook wall.

Using Facebook chat

Chat with your Facebook friends right from HTC ChaCha.

You must be signed in to Facebook before using Facebook chat.

1. From the Home screen, tap ▦ > **Fb Chat.** The Facebook chat screen opens where current conversations with your Facebook friends are shown, along with friend groups.

2. Do any of the following:

    - Tap the name of a friend to continue the conversation.
    - Tap the photo of a friend to view the person's Facebook profile, wall, and uploads.
    - Tap the History tab to view a list of previous conversations. The number on the tab icon shows how many messages are unread.
    - Press ☰ to choose to hide offline friends and select notification settings.

Adding the Fb Chat widget

Add the Fb Chat widget to the Home screen so you can easily chat with your Facebook friends.

Using Friend Stream

Friend Stream connects you to your social networks. Share and get updates from friends in popular networks like Facebook and Twitter in a single feed. With Friend Stream, you can easily track your friends' status messages, photo uploads, notifications, and more — or comment and post your own.

> ▢ ▪ You must be signed in to at least one social network account to use Friend Stream.
>
> ▪ To use your Facebook account on Friend Stream, you need to be signed in via Facebook for HTC Sense.

From the Home screen, tap ▦ > **Friend Stream**. Friend Stream opens on the All updates tab.
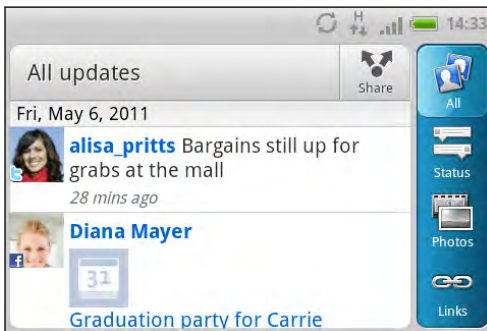

When you tap someone's status update, you can:

- ▪ View the tweet. If there's a web link shared, you'll also see the posted web page right below the tweet.

- ▪ Write a comment. Like someone's Facebook posts.

- ▪ Look at someone's album photos.

When you tap someone's photo or name, you can:

- ▪ Check the person's profile details.

- ▪ Look at the person's Facebook wall.

- ▪ Check the person's posted tweets.

Slide to the other tabs to view social network updates grouped as status updates only, photo and video uploads, links, social network notifications, and more.

Updating your status

You can update your status simultaneously on all the social network accounts you are signed in to.

1. On the All updates tab, tap **Share**.

2. Enter your status update.

3. If you do not want to send the status update to all your social network accounts, tap ▤ and clear the check boxes of the social networks to exclude.

4. Tap 📎 and then choose what you want to attach to your tweet or status update.

Picture	Select **From Camera** to take a photo and attach it or **From Gallery** to attach a photo.
Location	Add your current location or a location you pick on a map.
App recommendation	Choose an app you've installed from Android Market that you want to share with others. The URL from which the app can be downloaded will be inserted to your status.

5. Tap **Post**.

Commenting on and liking Facebook posts

Tap someone's status update on the All updates tab, and do any of the following:
- Tap a photo or the album name shown in the status update to view and comment on the album photos using the Gallery app.

- Tap **Like** to like the person's status update.

- Tap the text box, and then enter what you think about the person's status update.

Checking notifications from your social networks

Slide to the Notifications tab to easily see a single feed of your notifications from different social networks. It can be a comment on your Facebook post, a mention or direct message in Twitter, a tagged photo of you, and more.
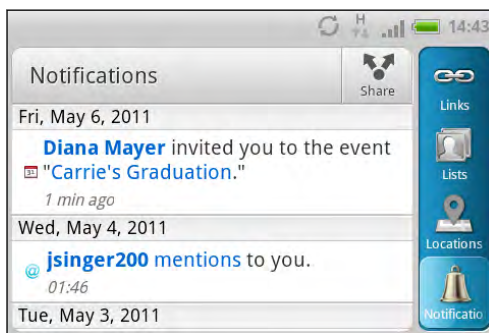

Sharing your location with your Facebook friends

Eating out in your fave restaurant? Tell your friends where you are.

⚑
- You must be signed in to Facebook for HTC Sense to use this feature in Friend Stream.

- In order to find your location, you also need to enable location sources in ⌂ > ☰ > **Settings** > **Location**.

1. On the Location tab, tap **Check in**.

2. Do any of the following:

   - Tap a place from the list.
   - Tap **Add a place**, type in your current location name and description, and then tap **Done**.

3. Tap **Check in**.

4. On the next screen, you can add your status message and even tag the friends you're with.

5. When done, tap **Check in**.

About the Friend Stream widget

Use the Friend Stream widget so you can easily update your status and view other people's status updates right on the Home screen. If you want to keep up with just one person's Facebook updates, you can add the Friend Channel widget. You can find it in the Friend Stream widget layout options.

Search and Web browser

Searching HTC ChaCha and the Web

You can search for information on HTC ChaCha and on the Web by using Google Search. Some applications, such as People or Mail, have their own search function, which you can use to search only within those applications.

Setting search options

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Search** > **Google search**.

3. Choose the settings that you want.

Show web suggestions	Display suggestions for Google web searches below the search box as you type.
Use My Location	Include your location in searches to get local search results.
Search history	Use suggestions from the web-based Google search history, from your Google Account. Tap **Manage search history** to view or manage the web search history associated with your Google Account on the web browser.

4. Press ←.

5. Tap **Searchable items**, and then select the items you want included when doing a search.

Performing searches on the Web and HTC ChaCha

1. From the Home screen, press 🔍 .

2. Choose where you want to search.

   Initially, the Google search box displays the **All** icon 🅖, indicating that it's configured to search on both the Web and HTC ChaCha. You can target your searches to just the Web only or to just a single application's information on HTC ChaCha. Tap 🅖 and then tap ◎ to set the searchable items.

3. In the search box, enter the words you want to search for. As you type, matching items on HTC ChaCha and suggestions from Google web search are shown as a list.

4. Do one of the following:

    § If what you're searching for is in the list of suggestions, tap it in the list. The item opens in the appropriate application.
    § To edit an item in the list, tap ✎ . The item will appear in the search box, where you can edit it.
    § If what you're searching for is not in the list, tap → to search the Web. The web browser opens, displaying the results of a Google search.

Quickly looking up information on the Web

Quick Lookup helps you learn about something right on the spot. When you enter a new word or phrase, you can easily look it up in popular websites or search services such as Google Search and Wikipedia.

1. From the Home screen, tap ▦ > **Quick Lookup**.

2. Slide to the tab which has the information type you want to search. Then in the search box, enter what you want to search for.

3. Tap 🔍 .

> After looking up the item on one tab, you can slide to other tabs to automatically look up the same term there.

Translating words to other languages

1. From the Home screen, tap ▦ > **Quick Lookup**.

2. Slide to the Google Translate tab.

3. Under From language, choose the original language, then enter the word or phrase you want to translate.

4. Under To language, choose from the languages available for translation.

5. Tap **Translate**.

Using the web browser

> You must have an active data connection or Wi-Fi connection to access the Internet.

Do one of the following to open the web browser and start surfing the Web:

§ On the Home screen, tap **Internet**.
§ From the Home screen, tap ▦ > **Internet**.

Going to a webpage

1. From the browser screen, press ☰ and then tap the URL box on top of the screen.

2. Enter the webpage address using the keyboard. As you enter the address, matching webpage addresses will appear on the screen.

3. Do one of the following:

   - Tap an address to go directly to that webpage.
   - Continue typing in the webpage address, then tap →.

Navigating and zooming on a webpage

- You can swipe your finger on the screen to navigate and view other areas of the webpage.

- Tap the screen twice quickly to zoom in, then tap the screen twice quickly again to zoom out. You can also use your fingers to spread or pinch the screen to zoom in and out.

Selecting a link on a webpage

You can tap a link to open it, or press and hold a link for more options.

Link	What to do
Webpage address (URLs)	• Tap the link to open the webpage. • Press and hold the link to open a menu that allows you to open, bookmark, copy to the clipboard, or share the link.
Email address	• Tap to send an email message to the email address. • Press and hold, then tap **Copy** on the menu to copy the email address to the clipboard. You can paste the email address later when creating a new contact or sending a new email message.

Selecting an address or phone number on a webpage

You can map an address or call a phone number on a webpage.

Link	What to do
Location address	Tap the address to copy it or map it using Google Maps™.
Phone number	Tap the phone number to copy, call, send a text message to that number, or save the number to a contact in People.

Opening a new browser window

Open multiple browser windows to make it easier for you to switch from one website to another.

1. While viewing a webpage, press ☰ and then tap **Windows**.

2. Tap ➕.

A new browser window opens.

Switching between browser windows

1. While viewing a webpage, do one of the following:

    ▪ Press ☰ and then tap **Windows**.
    ▪ Pinch the screen (zoom out) until you see the other browser windows.

2. Select the browser window you want to view by sliding your finger on the screen from right to left.
3. Tap a webpage to display it in full screen.

Tap ✖ to close a webpage.

Downloading from the Web

Do more than just browsing the Web. You can download files such as photos and music as well as apps using the web browser.

▪ Make sure you have your storage card inserted on HTC ChaCha. All downloaded files will be saved to your storage card.

▪ Before downloading an app, check first its compatibility with HTC ChaCha to make sure it can be installed.

Downloading apps from the Web

You can download apps directly from your favorite websites. Apps downloaded from the Web can be from unknown sources. To protect HTC ChaCha and your personal data, we strongly recommend that you download and install only apps you trust.

1. Open your web browser, then go to the website where you can download the app you want.

2. Follow the website's instructions for downloading the app.

Before you can install the downloaded app, you need to set HTC ChaCha to allow installation of third-party apps. From the Home screen, press ☰, then tap **Settings** > **Applications** > **Unknown sources**.

Viewing your downloads

While viewing a webpage, press ☰ and then tap **More** > **Downloads**.

Viewing bookmarks and previously visited pages

You can store as many bookmarks as you want on HTC ChaCha. You can also access a convenient list of the sites you have visited, or quickly view the pages that you access most often.

Bookmarking a webpage

1. While viewing a webpage, press ☰, and then tap **Add bookmark**.

2. To bookmark the web page under a certain category (such as sports or dining), tap **Add tags** and enter a tag name. This groups similar web pages so you can easily locate them.

3. Edit the bookmark name if needed, and then tap **Done**.

Opening a bookmark

1. While viewing a webpage, press ☰, and then tap **Bookmarks**.

2. Do one of the following:

   - On the Bookmarks tab 🔖, navigate to the bookmark you want to open, and then tap it.
   - On the Tags tab 🏷, open a tag group, navigate to the bookmark you want to open, and then tap it.

Editing a bookmark

1. While viewing a webpage, press ☰, and then tap **Bookmarks**.

2. On the Bookmarks tab 🔖, press ☰ and then tap **Edit**.

3. Tap the bookmark you want to edit.

4. Enter your changes, and then tap **Edit**.

Viewing a previously visited page

1. While viewing a webpage, press ☰, and then tap **Bookmarks**.

2. On the History tab 🔵, navigate to the page you want to view and then tap the page.

Clearing the list of previously visited pages

1. While viewing a webpage, press ☰, and then tap **Bookmarks**.

2. On the History tab 🔵, press ☰, and then tap **Clear history**.

Viewing a page that you often visit

1. While viewing a webpage, press ☰, and then tap **Bookmarks**.

2. On the Most visited tab ❤️, navigate to the page you want to view, and then tap the page.

Clearing the list of most visited pages

1. While viewing a webpage, press ☰, and then tap **Bookmarks**.

2. On the Most visited tab ❤️, press ☰, and then tap **Clear all**.

Changing the view of bookmarks or most visited pages

1. While viewing a webpage, press ☰, and then tap **Bookmarks**.

2. On the Bookmarks tab 🔖 or the Most visited tab ❤️, press ☰, and then tap **Thumbnails**, **List**, or **Grid** to change the view.

   For example, if you are in Thumbnails view and you want to view bookmarks in a grid, press ☰ and tap **List**, then press ☰ and tap **Grid**.

Setting browser options

Customize the web browser to suit your browsing lifestyle. Set display, privacy, and security options when using the web browser.

From the browser screen, press ☰, and then tap **More** > **Settings**.

Setting your home page

1. From the browser screen, press ☰, and then tap **More** > **Settings** > **Set home page**.

2. Select the home page you want to use.

Browsing full versions of all websites

Some websites display a mobile version of their pages on phone web browsers. You can choose to view the full version of all pages, even for these sites.

From the browser screen, press ☰ , tap **More** > **Settings**, and then clear the **Mobile view** check box.

Choosing when to show Flash content

Choose which Flash® content you want to see on a webpage, and when you want to view it.

1. From the browser screen, press ☰ , and then tap **More** > **Settings** > **Enable plugins**.

2. Tap **On demand**.

After selecting **On demand**, you can show the Flash content by tapping ⬇ on the webpage.

Accounts and sync

About online accounts

HTC ChaCha can sync with popular online social networking and email accounts.

The information you can get includes:

- Gmail, Exchange ActiveSync, and other POP3/IMAP email.

- Google and Exchange ActiveSync contacts, as well as your friends' contact information in Facebook and their Twitter profiles.

- Calendar events from your Google Account(s), from Exchange ActiveSync, and from your Facebook account.

- Status updates and links shared by your friends and yourself on social networks such as Facebook and Twitter.

- Flickr™ and Facebook photo uploads.

> You can set up your Exchange ActiveSync and POP3/IMAP email accounts on HTC ChaCha either in the Mail app or the Accounts & sync settings.

Synchronizing with a Google Account

Signing in to your Google Account lets you sync Gmail and your Google contacts and calendars between HTC ChaCha and the Web. You also need to sign in to a Google Account to use Google apps such as Google Talk and Android Market.

> If you skipped adding a Google Account when you first set up HTC ChaCha, you may encounter problems when using some Google apps. If these problems persist, you may need to factory reset HTC ChaCha and enter your Google Account details when you set up HTC ChaCha again.

Adding more Google Accounts

You can add more than one Google Account. However, subsequent Google Accounts can only sync contacts, emails, and calendar events. Other Google services use the first Google Account you added.

1. From the Home screen, press ![icon], and then tap **Settings** > **Accounts & sync**.

2. Tap **Add account** > **Google**.

3. Follow the onscreen instructions to sign in to an account or create a new account.

> **Forgot your Google Account password?**
>
> If you have forgotten your Google Account password, you can try to recover it by going to the Google website.
>
> 1. On HTC ChaCha or on your computer, open your web browser and go to https://www.google.com/accounts/ForgotPasswd.
>
> 2. Enter the email address or username that you use to sign in to your Google Account and click **Submit**.
>
> 3. Follow the instructions on the screen to reset your password.
>
> If you don't have an alternate email address or cannot access the email account you used to create your Google Account, you can reset your Google Account after 24 hours by answering the security question for password recovery.

Adding a social network account

Skipped signing in to your social network accounts (such as Facebook, Twitter, or Flickr) when you first turned on and set up HTC ChaCha? You can still add these accounts.

1. From the Home screen, press ☰, and then tap **Settings** > **Accounts & sync**.

2. Tap **Add account**, and then tap the account type you want to add.

3. Follow the onscreen instructions to enter the account information.

Your social network account is then added to the list on the Accounts & sync screen. Depending on how you configured the account, the new information may start synchronizing with HTC ChaCha.

Managing your online accounts

Changing general sync settings

1. From the Home screen, press ☰, and then tap **Settings** > **Accounts & sync**.

2. Select or clear the following:

Background data	If this is selected, apps can send and receive online account information even if you are not currently using them.
Auto-sync	If this is selected, apps can use the sync schedule defined in the account settings. If this is cleared, you will need to sync accounts manually.

Synchronizing an account manually

1. From the Home screen, press ☰, and then tap **Settings** > **Accounts & sync**.

2. Tap the account that you want to sync.

3. Tap **Sync now**.

Changing account settings

You can change settings such as the sync frequency and the types of information synchronized, the kinds of notification you receive, and the way that account information is displayed.

1. From the Home screen, press ☰, and then tap **Settings** > **Accounts & sync**.

2. On the Accounts & sync screen, tap the account that you want to edit.

3. Tap the type of information you want to sync or select an item to edit its settings.

Removing an account

You can remove an account to delete it and all information associated with it from HTC ChaCha, for example email, contacts, or settings. Removing an account does not delete information from the online service itself.

> You cannot remove some accounts, such as the first Google account you signed into, except by deleting all personal information from HTC ChaCha with a hard reset.

1. From the Home screen, press ☰, and then tap **Settings** > **Accounts & sync**.

2. Tap the account that you want to remove.

3. Tap **Remove account**, and then confirm that you want to remove the account.

People

Transferring contacts from your old phone

Easily transfer contacts from your old phone to HTC ChaCha through Bluetooth. Depending on your old phone's model, you may also transfer other types of data such as calendar events and text messages to HTC ChaCha.

1. From the Home screen, tap ▦ > **Transfer** .

2. Tap **Next** to begin.

3. Choose your old phone's name and model.

4. On your old phone, turn Bluetooth on and set it to discoverable mode.

5. On HTC ChaCha, tap **Next** to continue. HTC ChaCha automatically turns Bluetooth on and searches for Bluetooth devices.

6. From the device list, choose your old phone and then tap **Next**. HTC ChaCha then tries to pair with your old phone. You'll see a security passkey on the screen.

7. On your old phone, enter this passkey or simply confirm it.

8. Select the **Contacts** check box (and other supported types of data you want to import), and then tap **Next**.

9. When HTC ChaCha finishes importing data, tap **Done**.

About the People app

With the People app, easily manage your communications with your contacts via phone, messaging, and email. You can also link your contacts to their social network accounts like Facebook and Twitter to see their updates and events from these accounts all in one place.

And that's not all. If you have the same contacts from different sources, People lets you merge their contact information so you won't have duplicated entries in your contacts list.

1. From the Home screen, tap ▦ > **People**.

2. Tap one of the following tabs:

	All
	Gives you access to all contacts on HTC ChaCha, online accounts, and more.
	Groups
	Lets you assign contacts to groups so you can easily send an SMS, MMS, or email message to a whole group.
	Call History
	Lists all your dialed numbers and received and missed calls.

Your contacts list

The People app's All tab ![icon] lists all contacts stored on HTC ChaCha and from the online accounts you're logged in to. When you open the People app after you've just logged in to a new account, you'll be asked whether to add contacts from that account to your contacts list.

Your contacts list also displays the contacts stored on your SIM card (usually marked with the SIM card icon ![icon]).
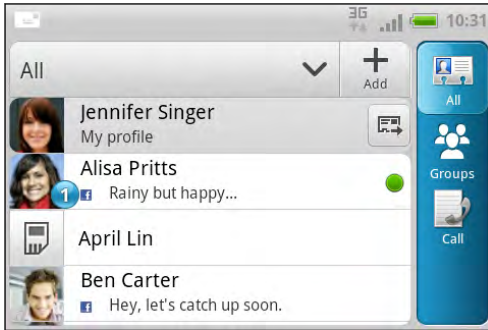

From the All tab, you can:

- Open your profile and edit your own contact information.

- Create, edit, or find contacts.

- See status updates from friends in your social network accounts such as Facebook and Twitter.

- Tap a contact's name to open the contact details screen for that contact.

- See a notification icon such as ![1] when a contact has sent you something such as new email messages, posted live feeds, or when it's the contact's birthday.

- Check out who's online in Google Talk. Online status icons are displayed if you're signed in to Google Talk on HTC ChaCha. For example, ![icon] means the contact is available to chat.

Filtering your contacts list

You can choose to only display contacts from particular account types (for example, Google contacts or Facebook contacts).

1. From the Home screen, tap ![icon] > **People**.

2. On the All tab, you can:

   - Tap the arrow or the title area below the status bar to open a selection menu of your online accounts, and then tap the account whose contacts you want to display.

   - Press ![icon], tap **View**, and then choose the types of contacts you want to show in your contacts list.

     You can also choose how you want to display and sort your contacts.

Setting up your profile

Store your personal contact information to easily send it to other people.

1. From the Home screen, tap ⊞ > **People**.

2. On the All tab:

   - Tap **Me**, and then choose whether to link your profile to an existing contact entry that already contains your personal information or edit your profile.
   - You'll see your account name or email address if you're logged in to any of your online accounts such as your Google Account or Facebook for HTC Sense. Tap your name or email address, press ≣, and then tap **Edit**.

3. Enter or edit your name and contact details.

4. Tap ▥ or your photo, and then choose whether to take your self-portrait or use another photo for your profile.

5. Tap **Save**.

Importing contacts from your SIM card

When you import SIM contacts, you can either store them on HTC ChaCha or add them to your Google contacts or Exchange ActiveSync contacts, if you have set up the relevant accounts.

1. From the Home screen, tap ⊞ > **People**.

2. On the All tab, press ≣, and then tap **Import/Export** > **Import from SIM card**.

3. If you have Google or Exchange ActiveSync accounts set up on HTC ChaCha, tap the type for the imported contacts.

4. Do one of the following:

   - Tap one or more SIM contacts you want to import.
   - To import all contacts, press ≣, and then tap **Select all**.

5. Tap **Save**.

Adding a new contact

1. From the Home screen, tap ⊞ > **People**.

2. On the All tab, tap **Add**.

3. Select the Contact type, for example Google or Microsoft Exchange ActiveSync. This determines which account the contact will sync with.

> Some fields may not be supported when you're adding contacts to your SIM card.

4. Tap the **Name** field, enter the first and last name of the contact, then tap **OK**.

5. Enter the contact information in the fields provided.

6. Tap **Save**.

Searching for a contact

1. From the Home screen, tap ▦ > **People**.

2. Press 🔍 , then enter the first few letters of a contact's name. Matching contacts are displayed.

3. Tap the contact to open his or her contact details screen.

Importing a contact from an Exchange ActiveSync account

You can search for a work contact from your Exchange ActiveSync account, and then copy it on HTC ChaCha.

You need to have your Exchange ActiveSync account set up on HTC ChaCha first.

1. From the Home screen, tap ▦ > **People**.

2. Press 🔍 , and then enter the name.

3. Tap 🔍 . Under Company contacts, matching names are listed.

4. Tap the name of the contact you want copied on HTC ChaCha, and then tap **Save to People**.

Merging contact information

If you have the same contacts on HTC ChaCha, Google Account, and social network accounts such as Facebook and Twitter, HTC ChaCha will try to combine them automatically or let you decide which contacts to combine. Combining the same contacts avoids duplicated entries in your contacts list.

Accepting matched contacts suggestions

When HTC ChaCha finds contacts that can be merged, you'll see a link icon [icon] in the notifications area of the status bar.

1. Slide the Notifications panel down, and then tap **Matched contacts suggestion**. You'll see a list of suggested contacts to merge.
2. To merge, tap [icon].

3. Tap **OK**.

> If you don't want to merge any of your contacts, tap **Dismiss all**.

Viewing a list of all your linked contacts

1. From the Home screen, tap [icon] > **People**.

2. On the All tab, press [icon], and then tap **Linked contacts** (or **More** > **Linked contacts**). The All linked contacts screen then opens where you can see the account types and information merged.

3. You can choose to break the link of an account type or relink.

4. When you're done, tap **OK**.

Manually merging contact information

1. From the Home screen, tap [icon] > **People**.

2. On the All tab, tap the name of the contact (not the icon or photo) you want to link.

3. Tap [icon] or [Link 2] (if there are suggested links).

4. On the screen, you can:

    - Under **Suggest links**, tap [icon] to link the contact to an account.
    - Under **Add contact**, tap one of the options to link to another contact.

Breaking the link

1. From the Home screen, tap [icon] > **People**.

2. On the All tab, tap the name of the contact (not the icon or photo) whose link you want to break.

3. Tap [icon].

4. Under the **Linked contacts** section, tap [icon] beside an account type to break the link.

Backing up your contacts to the storage card

1. From the Home screen, tap [icon] > **People**.

2. Press [icon], and then tap **Import/Export** > **Export to SD card**.

3. Select an account or type of contacts to export, then tap **OK**.

Importing contacts from the storage card

You can only import contacts that were exported to the storage card using the **Export to SD card** feature.

1. From the Home screen, tap [icon] > **People**.

2. Press [icon], and then tap **Import/Export** > **Import from SD card**.

3. If you have Google or Exchange ActiveSync accounts set up on HTC ChaCha, tap the type for the imported contacts.

Contact information and conversations

When you tap a contact on the People screen, the contact details screen opens, showing you the information you've stored or linked for that contact.

The contact details screen has the following tabs:

Details

Shows the information you have stored for the contact. Get in touch with the contact directly by tapping any of the displayed methods. For example, if the contact has a stored work phone number, tap **Call work**.

Messages

Shows your exchanged SMS messages with the contact. You can reply to the contact's message directly from this tab.

Mail

Shows all the email you have received from the contact. Tap an email to view it.

From this tab, you can also directly create a new email to send to the contact.

Updates and events

Shows the contact's updates and events from social network accounts you've linked like Facebook, Twitter, and Flickr.

If you see a notification of the contact's birthday under the Events section, you can tap the notification and choose how you want to greet your contact, such as to write on the person's Facebook wall.

Gallery

Shows the linked contact's Facebook and Flickr albums and photos.

Call History

Lists all your incoming, outgoing, and missed calls to and from the contact.

Editing a contact's information

1. From the Home screen, tap ▦ > **People**.
2. On the All tab, press and hold the contact, and then tap **Edit contact**.

The contact details of your Facebook and Twitter contacts cannot be edited.

3. Enter the new information for the contact.
4. Tap **Save**.

Deleting contacts

1. From the Home screen, tap ▦ > **People**.
2. On the All tab, press ☰, and then tap **Delete**.
3. Select the contacts you want to remove, and then tap **Delete**.
4. When prompted, tap **OK**.

Sending contact information as a vCard

Easily share your own contact information or any contact on HTC ChaCha.

1. From the Home screen, tap ▦ > **People**.

2. On the All tab, do the following:

To send	Do this
Someone's contact information	Press and hold the name of the contact (not the icon or photo) whose contact information you want to send, and then tap **Send contact as vCard**.
Your contact information	1. Tap **[Your name] My profile**. 2. Press ☰, and then tap **Send my profile**.

3. Choose how you want to send it.
4. Select the type of information you want to send, and then tap **Send**.

Contact groups

Assign contacts to groups so you can easily send a message or email to a whole group. You can also sync groups on HTC ChaCha with the groups in your Google account, accessible via your computer's web browser. We've also added the Frequent group as a special group type that automatically stores the contacts you dial or get calls from the most.

Creating a group

1. From the Home screen, tap ▦ > **People**.

2. On the Groups tab, tap **Add**.

3. Enter a name for the group, and then tap **Add contact to group**.

4. Select the contacts you want to add to the group, and then tap **Save**

💡 If your contacts list is long, you can use the search bar to search for contacts quickly.

5. Tap ▥ to select a photo for the group.

6. Tap **Save**.

Editing a contact group

1. From the Home screen, tap ▦ > **People**.

2. On the Group tab, press and hold the group, and then tap **Edit group**.

3. You can:

    - Tap the group name to change the name. You can only change the name for groups that you have created.
    - Tap the icon to the left of the group name to change or remove the group photo.
    - To add contacts to the group, tap **Add contact to group**, select the contacts you want to add, and then tap **Save**.
    - To remove a contact from the group, tap ⊗ at the right side of the contact name.

4. Tap **Save**.

Sending a message or email to a group

✎ You will be charged by your mobile provider for each message sent. For example, if you send a message to a group of five people, you will be charged for five messages.

1. From the Home screen, tap ▦ > **People**.

2. On the Group tab, tap the group you want to send a message or email to.

3. Go to the Group action tab, and then do one of the following:

    - Tap **Send group message** to send a message to the group.
    - Tap **Send group mail** to send an email to the group.

Rearranging your contact groups

1. From the Home screen, tap ▦ > **People**.

2. On the Groups tab, press ☰, and then tap **Rearrange**.

3. Press and hold ≣ at the end of the group you want to move. When the row is highlighted, drag it to its new position.

4. Tap **Save**.

Rearranging the members of a contact group

1. From the Home screen, tap ⊞ > **People**.

2. On the Groups tab, tap the group to see its members.

3. Press ≣ , and then tap **Rearrange**.

4. Press and hold ≣ at the end of the contact's name you want to move. When the row is highlighted, drag it to its new position.

5. Tap **Save**.

Deleting groups

✎ You can only delete groups that you have created.

1. From the Home screen, tap ⊞ > **People**.

2. On the Groups tab, you can:

   ▪ Press and hold a group you want to delete, and then tap **Delete group**.

   ▪ Press ≣ and then tap **Delete groups** to choose several contact groups to remove.

Adding People widgets

Stay in touch with different circles of friends or colleagues in your life. You can add several People widgets on the Home screen, with a different group of contacts on each widget.
1. From the Home screen, tap   > **Add items to Home** > **Widget** > **People**.

2. Choose the widget style, and then tap **Select**.

3. Select the group you want to add as a widget.

4. Drag the widget to a blank space on a Home screen. When the widget is where you want it, lift your finger.

5. Repeat the above steps to add another People widget.

Setting the default communication method

Depending on how you often reach your contacts, you can choose a different communication method for each of the contacts on the People widget.

1. On the Home screen, go to the People widget.

2. Tap a contact's name or status update (not the photo) on the widget to open the person's contact details screen.

3. Tap **Set default action**, and then tap the communication method you want for the contact.

4. Press   to return to the People widget on the Home screen.

Changing the default communication method

1. On the Home screen, go to the People widget.

2. Tap a contact's name or status update on the widget to open the person's contact details screen.

3. Tap **Set default action**.

4. On the Select default action screen, tap the communication method you want for the contact.

5. Press   to return to the People widget on the Home screen.

Getting in touch with a contact

1. On the Home screen, go to the People widget.

2. Tap a contact's photo (not the name or status update) on the widget. The default communication method you've set for this contact will be performed.

> On the People widget:
>
> - Tap a contact's name or status update to open the contact details screen for that contact.
>
> - Tap > to open the People app and view all your contacts.

Camera

Camera basics

Whether traveling for business or fun, enjoy taking photos and videos of your trip and encounters with HTC ChaCha.

⚐ Be sure to plug in your storage card before you start. Photos and videos captured with the camera will be stored onto your storage card.

- To open the camera in photo mode and take photos, tap ▦ from the Home screen, and then tap **Camera**.
- To open the camera directly in video mode so you can immediately start capturing videos, tap ▦ from the Home screen, and then tap **Camcorder**.

Auto uploading pictures to Facebook and Flickr

The first time you open the camera in photo mode, you are prompted to set up Auto Upload. When Auto Upload is enabled, shots that you take with the camera are automatically uploaded to Facebook or Flickr.

⚐ You must be logged in to your Facebook or Flickr account before using Auto Upload.

1. When prompted to enable Auto Upload, tap **Yes**.

✎ If you tap **No**, you can set up Auto Upload later. In the Camera app, press ☰ and then tap **Auto Upload**.

2. Choose when and where to upload to. You can also choose privacy settings.

Viewfinder screen

You'll find the following onscreen controls on the Viewfinder screen:

	Zoom bar
	Auto focus indicator
	Shutter release/Record button
	Photo/Video mode switch
or	Switch to front or main camera button
	Flash button
	Gallery button

Zooming

Before taking a photo or video, you can first use the onscreen zoom bar to zoom in or out of your subject.

Simply slide your finger up or down the zoom bar to zoom in or out.

When you're recording video, the zoom bar is always shown onscreen. You can freely zoom in or out while recording.

Auto focusing

Whenever you point the camera at a different subject or location, it shows the auto focus indicator at the center of the Viewfinder screen.

Let the camera auto focus on the center of the screen. Or you can tap another area on the screen that you want to focus on.

Using the front camera

Take a picture or shoot a video of yourself using the front camera.

To switch to the front camera, on the camera screen, tap ![icon] or ![icon]. To switch back to the main camera, tap ![icon] or ![icon] again.

> ✎ Some camera features are not available when you're using the front camera, such as auto focusing, zooming, and face detection.

Taking a photo

1. From the Home screen, tap ![icon] > **Camera**.

2. Before taking the photo, you can zoom in or out first on your subject.

3. Tap the flash button repeatedly to choose a flash mode depending on your lighting conditions.

![icon]	Auto flash
![icon]	Flash on
![icon]	Flash off

4. Choose the resolution and other camera settings you want to use.

5. Choose an effect to apply to your photo.

6. Point the camera and focus on your subject.

   If you're taking a photo of a group of people, the camera will automatically recognize faces and adjust the focus. You'll see boxes on people's faces.
> 💡 Make sure the **Auto focus** and **Face detection** check boxes are selected in the camera settings.

7. When you're ready to take the photo, tap ![icon].

8. Choose what you want to do with the photo you've just taken.

Recording video

1. From the Home screen, tap ▦ > **Camcorder**.

2. Choose the video quality and other camera settings you want to use.

3. Choose an effect to apply to your video.

4. Frame your subject on the Viewfinder screen.

5. Tap ⬤ to start recording.

6. You can freely zoom in or out while recording video.

7. You can change focus to a different subject or area by just tapping it on the Viewfinder screen.

8. Tap the flash button to switch the camera light on or off during recording.

⚡	Light on
⚡	Light off

9. To stop recording, tap ⬤ again.

10. Choose what you want to do with the video you've just recorded.

Adding effects

Want to make your photos look more interesting? Easy. Use the available camera effects to make your photos look like they've been taken through special lenses and filters. You can also add certain effects to videos.

Choose an effect first before you start taking a photo or video.

1. Press ≣ and then tap **Effect**.

2. Scroll through the available effects and tap one that you like.

After capturing

After capturing a photo or video, the Review screen will display the photo or the starting image of the video that you have just captured. Tap the onscreen buttons to choose what you want to do next.

🖼️	Return to the Viewfinder screen.
🗑️	Delete the photo or video
	Send the photo or video to your computer or another device using Bluetooth, send it by email, or select a social network where you want to upload it to.
	Choose how you want to use the photo, such as to use it as your wallpaper
	Watch the video.

Changing camera settings

Open the menu panel to access and change camera settings.

To open the camera settings, press ☰ .

> Some camera features are not available when you're using the front camera, such as auto focusing, zooming, using flash, and face detection.

Self-timer (photo mode only)	Set a time delay before your camera automatically takes the photo.
Effect	Apply effects to your photos and videos.
Image adjustments	Slide your finger across each of the slider bars to adjust the exposure, contrast, saturation, and sharpness.
White balance	White balance enables the camera to capture colors more accurately by adjusting to your current lighting environment.
Resolution/Video quality	Choose a photo or video resolution to use.
ISO (photo mode only)	Choose an ISO level or set it back to **Auto**. Higher ISO numbers are better for taking pictures in low light conditions.
Review duration	Set the time for a captured photo or video to be displayed on the Review screen before the camera changes back to the Viewfinder screen.
Widescreen (photo mode only)	When this check box is selected (default), photo resolutions available for selection are in 3:2 ratio and you can use the entire Viewfinder screen to frame your subject. When not selected, photo resolutions available for selection are in standard 4:3 ratio.
Geo-tag photos (photo mode only)	Select to store GPS location in your captured photos.
Mirror mode (front camera only)	Select to show the mirror image on the viewfinder screen.
Auto enhance (photo mode only)	Select to reduce noise when using a high ISO setting and to automatically adjust photo brightness.

Auto focus (photo mode only)	Enables or disables centered auto focus.
Face detection (photo mode only)	Select to automatically recognize faces and adjust the focus when you take people photos. Face detection will be turned off if you disable auto focus.
Record with audio (video mode only)	Select to record audio when capturing videos.
Shutter sound	Select to play a sound when you press the shutter release or record button.
Grid (photo mode only)	Select to display a grid on the Viewfinder screen so you can easily frame and center your subject before taking the photo.
Auto upload (photo mode only)	Lets you automatically upload photos to Facebook or Flickr. You can set the upload frequency, select the album to upload to, and set the privacy level.
Reset to default	Change the camera settings back to default.

Photos, videos, and music

Gallery

About the Gallery app

Relive the fun while viewing photos and videos of your latest travels or your pet's newest tricks. Get an audience by tagging your Facebook and Flickr friends.

> To start using Gallery, check first if you have photos or videos copied on your storage card.

What's more, you can edit and add effects to your photos. You can also easily use a photo as your contact icon, location icon, or wallpaper.

Selecting an album

From the Home screen, tap ![icon] > **Gallery**. The Gallery app opens on the Albums screen where your photos and videos are organized by albums for easy viewing.
The following are preset albums:

- **Camera shots** lets you view photos and videos that are stored in the camera's folder.

- **My favorites** lets you group photos and videos that you set as your favorites.

- **All photos** lets you view all photos that are stored in all the folders on the storage card.

- **All videos** lets you view all videos that are stored in all the folders on the storage card.

- **All downloads** lets you view photos and videos that you downloaded.

Folders in your storage card that contain photos and videos will also be treated as albums and will be listed below the preset albums. The actual folder names will be used as the album names.

> If there are photos or videos under the root path of your storage card (that are not contained in folders), they will be grouped under the **Other** album.

Viewing photos

After you've selected an album, you can browse through your photos and videos.

Slide your finger up or down to scroll through the thumbnails. Tap a photo or video to view it in full screen.
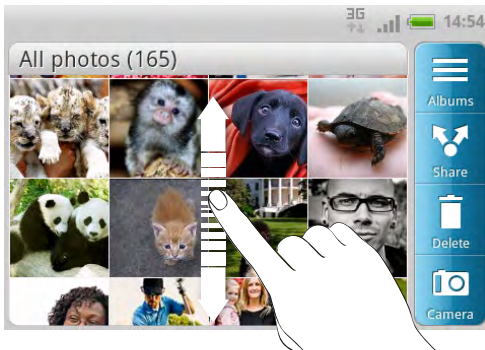

> While viewing a photo in full screen, you can press ☰ , and then tap **Show on map** to see the location where you took the photo. (**Show on map** is available when you've enabled **Geo-tag photos** in Camera.)

Zooming in or out on a photo

There are two ways you can zoom in or out of a photo.

- Tap the screen twice quickly to zoom in, then tap the screen twice quickly again to zoom out.

- Press your thumb and index finger on the screen and then spread your fingers apart to zoom in; pinch your fingers together to zoom out.
Watching a video

While browsing an album, tap a video to play it.

- Use the onscreen controls to play or pause the video.
- Tap ⬜ to toggle between full and best-fit screens.

Editing your photos

Do basic editing tasks on your photos such as rotate and crop. You can also enhance your photos by applying effects such as high contrast, vintage, and more.

Rotating a photo

1. On the Gallery app's Albums screen, tap an album.

2. Press and hold on the photo that you want to rotate.

3. In the menu that opens, tap **Edit**, and then tap either **Rotate left** or **Rotate right**.

Cropping a photo

1. On the Gallery app's Albums screen, tap an album.

2. Press and hold on the photo that you want to crop.

3. In the menu that opens, tap **Edit**, and then tap **Crop**. You'll see a crop box around the photo.

4. To adjust the crop box size, press and hold the edge of the box.

5. When directional arrows appear, drag your finger inward or outward to resize the crop box.

6. To move the crop box to the part of the photo that you want to crop, drag the crop box to the desired position.

7. Tap **Save** to keep the changes.

The cropped photo is saved as a copy. The original photo remains unedited.

Adding effects

1. On the Gallery app's Albums screen, tap an album.

2. Press and hold on the photo that you want to add effects to.

3. In the menu that opens, tap **Edit**, and then tap **Effects**. On the panel that opens, you'll see options available to you.

4. Tap an effect to apply on the photo.

5. Tap **Save** to keep the changes.

The enhanced photo is saved as a copy. The original photo remains unedited.

Sending your photos and videos

Send photos and videos via email or MMS to your computer or another device using Bluetooth.

Sending photos or videos by email

You can send several photos, videos, or both in an email message. They are added as file attachments in your email.

1. From the Home screen, tap 🔳 > **Gallery**.

2. Tap the album that has the photos or videos you want to share.

3. Tap 📷 and then tap **Gmail** or **Mail**.

4. Select the photos or videos you want to share and then tap **Next**.

5. Compose your message and then tap 📧 (Gmail) or **Send** (Mail).

> ✎ If you selected **Mail** and you have multiple email accounts, the default email account will be used.

Sending a photo or video by MMS

1. From the Home screen, tap 🔳 > **Gallery**.

2. Tap the album that has the photos or videos you want to share.

3. Tap 📷 and then tap **Messages**.

4. Tap the photo or video you want to send. The photo or video is automatically added into the MMS message.

5. To add another photo or video to your slideshow attachment, tap 📎 and then tap **Picture** or **Video**.

6. Compose your message and then tap **Send**.

Sending photos or videos using Bluetooth

You can select several photos, videos, or both and send them to someone's device or your computer using Bluetooth.

1. From the Home screen, tap ▦ > **Gallery**.

2. Tap the album that has the photos or videos you want to share.

3. Tap ▨ and then tap **Bluetooth**.

4. Select the photos or videos you want to share and then tap **Next**.

In the next few steps, you'll be asked to turn on Bluetooth on HTC ChaCha and connect to the receiving Bluetooth device so the files can be sent.

Sharing your photos and videos on the Web

Using the Gallery app, you can share photos and videos on your social networks.

> You can also use the Camera or Camcorder app to share a photo or video right after you've captured it.

Sharing photos or videos on Facebook

> You need to be logged in to your account to be able to upload photos or videos.

1. From the Home screen, tap ▦ > **Gallery**.

2. Tap the album that has the photos or videos you want to share.

3. Press ⨍.

4. Select the photos or videos you want to share and then tap **Next**.

5. Select which album to upload to and set privacy settings for the uploaded photos or videos.

6. Tap **Add tag and description**, and then enter a different caption on each photo or video.

7. To tag friends on your photos, tap **Tag this photo**. You can then tap the part where your friend is, and then select who you want to tag from the list. Slide to the left to continue tagging friends.

8. Tap **Done**.

9. Tap **Save**.

Sharing photos and videos on Flickr

⚐ You need to be logged in to your Flickr account to be able to upload photos or videos.

1. From the Home screen, tap ▦ > **Gallery**.
2. Tap the album that has the photos or videos you want to share.
3. Tap 🔧 and then tap **Flickr**.
4. Select the photos or videos you want to share and then tap **Next**.
5. Select which album to upload to and set privacy settings for the uploaded photos or videos.
6. Tap **Add tag and description**, and then enter a different title and description on each photo or video.
7. To tag friends on your photos, tap **Tag this photo**. You can then tap the part where your friend is, and then select who you want to tag from the list. Slide to the left to continue tagging friends.
8. Tap **Done**.
9. Tap **Save**.

Sharing photos on Picasa

⚐ You need to be signed in to a Google Account to be able to upload photos to the Picasa™ photo organizing service.

1. From the Home screen, tap ▦ > **Gallery**.
2. Tap the album that has the photos you want to share.
3. Tap 🔧 and then tap **Picasa**.
4. Select the photos you want to share and then tap **Next**.
5. Enter a caption for the photos you're uploading.
6. Select the online album where you want to upload the photos, or tap ➕ to create a new album.
7. Tap **Upload**.

You can view the photos online at http://picasaweb.google.com.

Viewing photos in your social networks

Right in the Gallery app, check what you and your friends have uploaded to your social networks (Facebook and Flickr only).

Viewing photos on Facebook

You need to be logged in to your Facebook account to view Facebook photos.

1. From the Home screen, tap ▦ > **Gallery**.

2. Tap the **Facebook** tab.

3. Tap your account name or your friend's account on the list to view the photos in the account.

You can view photos in your online albums in the same way as you view photos on your storage card.

Viewing photos on Flickr

You need to be logged in to your Flickr account to view Flickr photos.

1. From the Home screen, tap ▦ > **Gallery**.

2. Tap the **Flickr** tab. You may be asked to give authorization for the app to connect to the Flickr website. If this happens, you need to give authorization to access your Flickr account.

3. Tap your account name or your friend's account on the list to view the photos in the account.

You can view photos in your online albums in the same way as you view photos on your storage card.

Commenting on photos in your social networks

Add comments to your uploaded photos as well as your friends' photos.

1. Do one of the following:

   - While browsing online albums, press and hold a photo and then tap **Add comment**.
   - While viewing a photo in full screen, tap anywhere on the screen, and then tap 📝.

2. Tap the box that says "Write a comment."

3. Enter your text, and then tap **Comment**.

Music

Listening to music

Enjoy listening to songs and music on HTC ChaCha using the Music app.

> ⚑ You need to copy music files to your storage card first to use the Music app to play music.

1. From the Home screen, tap ▦ > **Music**. The Music app opens in the Now playing screen.

2. Swipe your finger left or right across the screen to go to the next or previous music album.

3. Tap the onscreen icons to control music playback, select a song to play, repeat songs, and more.
⤬	Turn shuffle on or off. (Shuffle is off when button is gray.)
▬◇▬	Press and drag your finger across the progress bar to jump to any part of the song.
☰	Go to the library.
♫⊙	Switch between showing the Now playing list and Now playing screen. You can rearrange songs in the Now playing list.
⟳	Cycle through the repeat modes: repeat all songs, repeat current song, and don't repeat.

Playing music from the Lock screen

When you're listening to music and the screen turns off, press POWER to turn the screen back on and control the music playback directly on the Lock screen.

If you don't see the playback controls on the Lock screen, swipe your finger from left to right on the box onscreen.
You can also pause music playback right from the Notifications panel.

About the Music widget

You can use the Music widget to play music right from your Home screen.

Browsing music in the library

1. Tap ☰ on the Music app's Now playing screen or Now playing list to go to the library. In the library, your music is organized by categories such as Artists and Albums. Choose a category by tapping one of the tabs on the screen.

2. Tap a song in a category to play it. The Now playing list is updated with the song list from your selected category.

You can add, remove, or rearrange the tabs in the library.

Creating a playlist

Personalize your music experience by creating music playlists. Make a playlist containing just your favorite songs or create one to match your mood for the day. You can make as many playlists as you like.

1. From the Home screen, tap ▦ > **Music**.

2. Tap ☰ to go to the library.

3. In the library, tap or slide on the tabs to go to the **Playlists** category.

4. Tap **Add**.

5. Enter a playlist name, and then tap **Add**.

6. Choose a category.

7. Select the check boxes of songs you want to add to the playlist and then tap **Add**.

8. Tap **Save**.

Playing the songs in a playlist

1. In the library, tap or slide on the tabs to go to the **Playlists** category.

2. Tap a playlist to open it.

3. Tap the first song or any song in the playlist.

When you tap a song in the list to play it, the Now playing screen is updated with the songs from your playlist.

Managing playlists

After creating a playlist, you can add more songs to it, rearrange their order, and more.

1. In the library, tap or slide on the tabs to go to the **Playlists** category.

2. Tap a playlist to open it.

3. Press ☰ , and then choose what you want to do:

Add more songs to a playlist	1. Tap **Add songs**. 2. Go to the Songs category or any other category. 3. Select the songs you want to add to the playlist and then tap **Add**.
Rearrange songs	1. Tap **Change order**. 2. Press and hold ☰ at the end of the song title you want to move. When the row is highlighted, drag it to its new position, then release.
Delete songs from a playlist	1. Tap **Remove songs**. 2. Select the songs you want to delete and then tap **Remove**.
Change playlist name	Tap **Rename playlist**.

Deleting playlists

1. In the library, tap or slide on the tabs to go to the **Playlists** category.

2. Press ☰ and then tap **Delete playlists**.

3. Select the playlists to delete and then tap **Delete**.

Setting a song as a ringtone

You can choose a song from the Music app's library and set it as your regular ringtone or a ringtone for a certain contact.

1. From the Home screen, tap ▦ > **Music**.

2. Tap ☰ to go to the library.

3. In the library, choose the song that you want to use as ringtone and then play it back.

4. On the Now playing screen, press ☰ and then tap **Set as ringtone** (or **More** > **Set as ringtone**) .

5. In the **Set as ringtone** options menu, tap **Phone ringtone** or **Contact ringtone**. If you select **Contact ringtone**, you need to choose the contacts you want to associate the song with in the next screen.

Checking if the song was added as a ringtone

1. From the Home screen, press ☰, and then tap **Settings**.

2. On the Settings screen, tap **Sound** > **Phone ringtone**.

The song should be in the ringtone list and selected.

Sharing music using Bluetooth

You can choose a song from the Music app's library and send it to someone's device or your computer using Bluetooth.

1. From the Home screen, tap ▦ > **Music**.

2. Tap ☰ to go to the library.

3. In the library, choose the song that you want to send via Bluetooth and then play it back.

4. On the Now playing screen, press ☰ and then tap **Share** (or **More** > **Share**).

5. Tap **Bluetooth**.

In the next few steps, you'll be asked to turn on Bluetooth on HTC ChaCha and connect to the receiving Bluetooth device so the music can be sent.

Market and other apps

Finding and installing apps from Android Market

Android Market is the place to go to find new apps for HTC ChaCha. Choose from a wide variety of free and paid apps ranging from productivity apps, entertainment, to games.

✎ Paid apps are currently only available in certain countries.

Finding and installing an app

When you install apps and use them on HTC ChaCha, they may require access to your personal information or access to certain functions or settings. Download and install only apps that you trust.

⚐ Be cautious when downloading apps that have access to functions or a significant amount of your data on HTC ChaCha. You're responsible for the results of using downloaded apps.

You need a Google Checkout account to purchase items on Android Market.

1. From the Home screen, tap ▦ > **Market**.

2. Do any of the following to find an app:

Browse featured apps	Scroll through the list of featured apps.
Browse apps by categories	Tap **Apps** or **Games**, and then tap a category. Under a category, you can filter the apps by **Top paid**, **Top free** or **Just in**.
Search for an app	Tap 🔍, enter the name or type of app you're looking for, and then tap 🔍.

3. When you find the app that you like, tap it and read its description and user reviews.

4. To download or purchase the app, **FREE** (for free apps) or the price button under **Buy** (for paid apps).

5. If you agree to the conditions, tap **OK** to begin downloading and installing the app.

> You can uninstall an app for a refund within a limited time after your purchase. To know more about the refund policy for paid apps, please visit the Android Market Help site (http://market.android.com/support).

Opening an installed app

Do one of the following:

- If you see this icon ☑ on the status bar, open the Notifications panel, and then tap the app.
- From the Home screen, tap ▦ > **Market**. Press ☰ and then tap **My apps**. On the My apps screen, tap the app, and then tap **Open**.
- From the Home screen, tap ▦. On the All apps screen, slide to the Downloaded tab, and then tap the app.

Uninstalling an app

You can uninstall any app that you have downloaded and installed from Android Market.

1. From the Home screen, tap ▦ > **Market**.

2. Press ☰ and then tap **My apps**.

3. Tap the app you want to uninstall, and then tap **Uninstall**.

4. When asked, tap **OK**.

5. Choose the reason for removing the app, and then tap **OK**.

Getting help

If you need help or have questions about Android Market, press ☰, and then tap **Help**. The web browser will take you to the Android Market Help site.

Using the Clock

About the HTC Clock widget

Use the HTC Clock widget to see the current time and your social network updates.

Using the Clock app

Get more from the Clock app than just the regular date and time. Use HTC ChaCha as a desk clock complete with weather information or as a world clock so you can see what time it is in several cities across the globe. You can also use it as an alarm clock, stopwatch, and countdown timer.

To open the Clock app, do one of the following:

- Tap the Clock widget on the Home screen.
- From the Home screen, tap ▦ and then tap **Clock**.

Tap or slide your finger on the tabs to switch between the different functions of the Clock app.

Using Desk Clock

The Desk Clock displays the current date, time, and weather. It also shows an alarm clock indicator and the battery level.

- Tap the weather image or information to open the Weather app where you can see weather forecasts for the next few days.
- Tap ☾ to dim the screen slightly on the Desk Clock.

  To light up the screen again, tap anywhere on the screen.

- Tap ▣ to dim the screen completely and go into screensaver mode.

  When in screensaver mode, the Desk Clock shows the time and date only and their position changes on the screen every few minutes. To light up the screen again, tap anywhere on the screen.

Using World Clock

Use the Clock app's World Clock tab to check the current time in several places around the globe simultaneously. You can also set your home city, add more cities to the world clock list, and manually set your time zone, date, and time.

Setting your home city

1. On the World Clock tab, press ☰ and then tap **Home settings**.

2. Enter your home city's name. As you enter letters, the list is filtered to show matching cities and countries.

3. Scroll through the list and tap your home city.

Setting the time zone, date, and time

To set the time zone, date, and time on HTC ChaCha manually, you need to turn off auto time sync first.

1. On the World Clock tab, press ☰ and then tap **Local time settings**.

2. Clear the **Automatic** check box, and then set the time zone, date, and time as required.

From the Home screen, you can also press ☰ and then tap **Settings > Date & time** to open the Date & time settings screen.

Adding a city to the World Clock screen

Add more cities to the World Clock screen so you can instantly check the date and time in these cities.

1. On the World Clock tab, tap **Add**.

2. Enter the city name you want to add. As you enter letters, the list is filtered to show matching cities and countries.

3. Scroll through the matching list and tap the city that you want to add.

Setting an alarm

You can use the Clock app's Alarms tab to set up one or more wake-up alarms.

1. On the Alarms tab, select the check box of an alarm and then tap that alarm.

2. On the Set alarms screen, drag your finger up or down to roll the time scroll wheels and set the alarm time.

3. Scroll through the Set alarms screen to see all the available alarm options. You can:

    - Enter the alarm **Description** and choose the **Alarm sound** to use.
    - Tap **Repeat**. Select which days of the week to sound the alarm, and then tap **OK**.
    - Select the **Vibrate** check box if you want HTC ChaCha to also vibrate when the alarm goes off.

4. When you're finished setting the alarm, tap **Done**.

- To turn off an alarm, clear the check box of that alarm.

- If you need to set more than three alarms, press ☰ while you're on the Alarms screen and then tap **Add alarm**.

Deleting an alarm

1. On the Alarms tab, press ☰ and then tap **Delete**.

2. Select the alarms you want to delete and then tap **Delete**.

Changing alarm sound settings

On the Alarms tab, press ☰ and then tap **Settings**. You can change the following settings:

Alarm in silent mode	Selected by default, this option allows the alarm to sound even when the volume is set to silent. Clear this check box if you want to silence the alarm when HTC ChaCha is in silent mode.
Alarm volume	Set the volume level that you want for the alarm.
Snooze duration	Set how long to snooze between alarms.
Side button behavior	Choose what happens to the alarm when pressing the side button (VOLUME UP/VOLUME DOWN). You can set the button to snooze, dismiss the alarm, or disable the button. The side button works only when the screen is not locked.

Checking Weather

You can use the Weather app and widget to check the current weather and weather forecasts for the next four days. In addition to your current location, you can view weather forecasts for other cities around the globe. Your settings in the Weather app also control the weather information that is shown in the Clock and Calendar.

> To automatically update your current location's weather in the Weather app and widget as well as Clock and Calendar:
>
> - HTC ChaCha must be connected to the Internet.
>
> - The My location service must be enabled. If you didn't enable it when you first set up HTC ChaCha, you can do so in **Settings** > **Location**.

1. From the Home screen, tap ▦ > **Weather**.

2. Do any of the following:

    - Swipe your finger up or down the screen to check the weather in other cities,.
    - Tap 🔄 to update the weather information at any time.
    - Tap the update time or **More details online** on the Weather screen to see more weather details on the Web.

Adding a city to the Weather screen

Add more cities to the Weather screen so you can instantly check the weather forecasts in these cities. In addition to your current location, the Weather screen can display up to fifteen cities.

1. On the Weather screen, tap ➕.

2. Enter the location you want to add. As you type, the list is filtered to show the possible locations based on the letters you entered.

3. Tap the desired city to select it.

Changing the order of cities on the Weather screen

1. On the Weather screen, press ☰ and then tap **Rearrange**.

2. Press and hold ≡ at the end of the item you want to move. When the row is highlighted in green, drag it to its new position, then release.

3. Tap **Done**.

Deleting cities from the Weather screen

1. On the Weather screen, press ☰ and then tap **Delete**.

2. Select the cities you want to remove and then tap **Delete**.

Changing Weather options

1. On the Weather screen, press ☰ and then tap **Settings**.

2. You can change the following weather settings:

Update when opened	Select this check box to refresh weather updates every time you open the Weather app.
Update automatically	Select this check box to automatically download weather updates.
Update schedule	Set an auto update schedule.
Temperature scale	Choose whether to display the temperature in Celsius or Fahrenheit.
Sound effects	Choose whether to play sound effects related to the weather conditions.

About the Weather widget

Use the Weather widget to instantly check weather forecasts of your current location and other cities without having to open the Weather app. The Weather widget comes in different looks and styles.

You can add this widget to the Home screen, if it's not yet added.

Keeping track of your stocks

Use the Stocks app to get the latest stock updates for stock quotes and market indices you follow.

1. From the Home screen, tap ▦ > **Stocks**.

2. On the Stocks main screen, do any of the following:

   - Tap an item to view from the list of stock quotes and market indices.
   - Tap ↻ to update the stock information.
   - Tap ✚ to add a stock quote or stock market index.
   - To change the stock list order, press ☰, and then tap **Rearrange**. Press and hold ☰ at the end of the item you want to move, then drag it to its new position.

3. When you've selected a particular stock quote or stock market index, you can:

   - View an item's trade information as well as its price chart for a specific period.
   - Tap another date period to view an item's past trade information.

Adding a stock quote or stock market index

1. On the Stocks main screen, tap ✚ .

2. Enter the stock quote or stock market index on the text field, and then tap 🔍 .

3. Tap the stock quote or stock market index you want to add.

💡 To delete an item, press ☰ while on the Stocks main screen, and then tap **Delete**. Select the items you want to delete, and then tap **Delete**.

Changing update schedule and color settings

⚑ Downloading stock information automatically may incur additional fees from your mobile operator.

On the Stocks main screen, press ☰, and then tap **Settings**. Do any of the following:

Tap	To
Update when opened	Update the stock information every time you open the Stocks app.
Scheduled sync	Set automatic downloads of stock information.

Tap	To
Update schedule	Choose a time interval for checking updates.
Set color for price raise	Change the color for displaying stock price increases to either red or green, depending on what's being used in your country.

Listening to FM Radio

Tune in and listen to chart-topping pop songs using the FM Radio app.

⚐   You need to connect a headset first to the audio jack of HTC ChaCha to use FM Radio. FM Radio uses the stereo headset as the FM radio antenna.

From the Home screen, tap ▦ > **FM Radio**.

The first time you open FM Radio, it automatically scans for available FM stations, saves them as presets, and plays the first FM station found.

Tuning in to an FM station

There are several things you can do while you're on the FM Radio screen:

- Tap ☰ to view the All presets list, and then select a station you want to listen to.
- Tap ◀ to go to the previous available FM station, or ▶ to go to the next available FM station.
- Drag the slider to tune in to a frequency on the FM band.
- Tap ❮ to fine tune the radio frequency by -0.1 MHz or ❯ to fine tune the radio frequency by +0.1 MHz.
- Tap ➕ to add a preset name for the current station you are tuned into.
- Press the VOLUME UP and VOLUME DOWN buttons to adjust the volume.
- To repeat scanning and saving of FM stations, press ☰, and then tap **Scan & Save**.
- Press ☰ to mute the sound or to change the sound output to **Mono** or **Stereo**. You can also switch the sound output between the **Speaker** and **Headset**.

Closing or turning off FM Radio

You can continue listening to the radio while using other apps on HTC ChaCha or close the FM Radio app completely.

To	Do this
To close the FM Radio screen	Press ↩. FM Radio continues to run in the background. To go back to the FM Radio screen, slide open the Notifications panel, and then tap **FM Radio**.

To	Do this
To turn off completely and close FM Radio	Tap ⏻ on the FM Radio screen.

Recording your voice

Don't just think out loud. Use Voice Recorder to quickly capture your thoughts. You can also record your voice and set it as a ringtone.

> ⚑　You need to have a storage card on HTC ChaCha to use Voice Recorder.

1. From the Home screen, tap ▦ > **Voice Recorder**.

2. Hold the microphone near your mouth.

3. Tap 🔴 to start recording a voice clip.

> ✎　Voice Recorder can run on the background while you do other things on HTC ChaCha, except when you open other apps that also use audio functions. To go back to the Voice Recorder screen, slide open the Notifications panel, and then tap **Voice Recorder**.

4. Tap ◻ to stop recording.

5. Type a name for the voice clip and tap **Save**.

6. To play back the voice clip, tap ▶.

7. To show options for sharing, deleting, or renaming the voice clip, press ≣.

Sharing a voice clip

1. On the Voice Recorder screen, tap ≣.

2. Press and hold the voice clip you want to share, and then tap ⬆.

3. From the available options, choose how you want to share the voice clip.

Setting a voice clip as a ringtone

1. On the Voice Recorder screen, tap ≣.

2. Press and hold the voice clip you want to set as a ringtone, and then tap **Set as ringtone**.

Sharing games and apps

Having fun with a game or app that you found from Android Market? Share your favorite games and apps instantly with your circle of friends.

> For your friends to link to the app and download it from Android Market, they must be using an Android phone.

1. From the Home screen, tap ▦.

2. Press ☰ , and then tap **Share**. You'll then see the list of games and apps that you downloaded and installed from Android Market.

3. Tap an app, and then choose how to share it.

When your friends see the link in your sent message, email, or status update, they can simply tap the link to go directly to the game or app in Android Market to download it.

> - While entering your status update in Friend Stream, you can also tap 📎 to choose from games or apps that you want to share in your social networks.
>
> - If you've already created a new text or email message, press ☰ and then tap **Attach** > **App recommendation** to choose from your list of installed games and apps.

Chatting in Google Talk

Google Talk is Google's instant messaging program. It lets you communicate with other people that also use Google Talk. If you signed in to your Google Account when you first set up HTC ChaCha, you are already signed in to Google Talk.

To open Google Talk, on the Home screen tap ▦ > **Talk**.

Chatting with a friend

1. In Google Talk, tap a friend in the Friends list.

2. Enter your message in the text box. You can also insert a smiley by pressing ☰ , and then tapping **More** > **Insert smiley**.

3. Tap **Send**.

4. While chatting, press ☰ and then tap any of these options:

Chat off record	Your Google Talk messages are stored in the **Chats** folder of your Gmail account. Tap this option if you don't want to store your chat messages.
Switch chats	If you have more than one chat going, tap to switch chat with another friend.
Friends list	Return to the Friends list.

Add to chat	Add another friend to your chat. The friend you invited and the friend you're currently chatting will receive an invitation to a group chat. Each one who accepts the invitation joins the group chat.
End chat	End your current chat.
More	Clear the chat history, insert a smiley or view your friend's contact details.

Accepting a chat invitation

When a friend sends you a Google Talk message, you receive a notification. Their entry in the Friends list displays the message.

Do one of the following:

- In the Friends list, tap the friend who sent you the invitation to chat.
- Open the Notifications panel, and then tap the chat notification.

Changing your online status and picture

1. In Google Talk's Friends list, tap your name to open the Set Status screen.

2. Enter your new status message or choose a custom status from the list.

3. Tap the online status beside your picture, and then select the status you want on the menu.

4. Tap your picture, and then do one of the following:

    - Tap **Remove** to remove your photo.
    - Tap **Change** to select another picture.

5. Tap **Done**.

Your online status, message, and picture appear in your contacts' Friends list and in other apps where your Google Talk status are displayed.

Adding and managing friends

The Friends list is where you add and manage your friends in Google Talk.

In Google Talk's Friends list, you can:

Invite a friend	1. Press ≡, and then tap **Add friend**. 2. Enter the Google Talk instant messaging ID or Gmail address of the friend you want to add. 3. Tap **Send invitation**.
View all friends	Initially, only those friends that you often chat with — the most popular — are shown in the Friends list. To view all your friends, press ≡, and then tap **All friends**. To view only friends that you often chat with, press ≡, and then tap **Most popular**.

Make a friend popular	1. Press ☰, and then tap **All friends**.
	2. Press and hold a friend's name, and then tap **Always show friend**.
Block a friend	You can block a friend from sending you messages. When blocked, your friend is removed from the Friends list and is added to the Blocked friends list.
	1. Press ☰, and then tap **All friends**.
	2. Press and hold a friend's name, and then tap **Block friend**.
Unblock a friend	Press ☰, and then tap **More** > **Blocked**.
View all invited friends	Press ☰, and then tap **More** > **Invites**. Friends who have not yet accepted your invitation are listed on the screen.

Changing settings or signing out

In Google Talk's Friends list, press ☰ and then tap:

- **Settings** to change the app and notification settings.
- **Sign out** to sign out.

Tweeting on the go using Peep

You can post and read tweets, send and receive direct messages, search for new Twitter users to follow using the Peep app. Peep is a Twitter client that lets you enjoy "tweeting" on HTC ChaCha. You can also link your contacts in People to their Twitter profiles (if you're following them).

If you did not sign in to your Twitter account when you first turned on HTC ChaCha, you can do one of the following:
- Sign in to your Twitter account from Peep. From the Home screen, tap ⊞ > **Peep**, then follow the onscreen instructions.

- Add the Twitter for HTC Sense account in **Settings** > **Accounts & sync**.

> Twitter for HTC Sense and Peep share the same login credentials. This means that when you use Peep for tweeting, you can also link your contacts to their Twitter profiles via Twitter for HTC Sense.

From the Home screen, tap ⊞ > **Peep**. Peep opens in the All tweets tab.
	Tap to compose and send a tweet.
d_mayer200	Tap a person's name to check profile details and all of his or her tweets.
	If you have linked the contact in People, tap the photo or icon to open a menu where you can quickly choose how to communicate with the contact.
jsinger200 I've been and I think you might	Press and hold a tweet to open an options menu to reply, send a direct message, retweet, and more.
	View all the tweets from people you follow and tweets that you have posted.
	View all tweets that mention your username using the "@[your username]" convention.

	View all private/direct messages that you have received or sent.
	View tweets that you have marked as favorites.

Sending a tweet

1. On the All tweets tab, tap **Share**.

2. Type your tweet.

3. Add a picture or location to your tweet.

   - Tap [icon] to post a picture from Gallery or Camera to your default photo hosting site and add the link to the picture in your tweet.
   - Tap [icon] to insert your location into the tweet. You can choose to add a map link, insert your location name, or insert your position coordinates.

4. Tap **Post**.

Sending a direct message

You can only send a direct message to someone who is following you.

1. In any of the tabs, press [icon], and then tap **New message**.

2. Tap the text box at the top of the screen, and then enter the name. As you enter characters, the names of the Twitter users that match the characters you enter will appear. Tap the name when you see it.

3. Enter your message, and then tap **Post**.

You can also send a direct message when you press and hold a tweet of the person you want to send the direct message to, and then tap **Send direct message** on the options menu.

Setting Peep options

In any of the tabs in Peep, press [icon], and then tap **More** > **Settings**. You can set these options:

Account settings	Sign out of your Twitter account.
General settings	Choose whether to show the screen name or the real name of the people you follow.
Send & receive	Set the frequency to check for new tweets and set the number of tweets to download.
Services	Set your photo hosting site, photo quality, location options, and URL shortening host.
Notification settings	Select when and how you want to be notified.

Searching for Twitter users to follow

1. In any of the tabs in Peep, press the 🔍 button.

2. Type a Twitter name in the search box. You can also narrow down the search when you tap 🐦 > **Users**.

3. Tap 🔍.

4. In the list of search results, tap the Twitter user you want to follow.

5. Press ☰, and then tap **Follow**.

Unfollowing a Twitter user

1. On the All tweets tab, tap the Twitter user you want to stop following.

2. Press ☰, and then tap **Unfollow**.

Messages

Opening Messages

Keep in touch with important people in your life. Use the Messages app to compose and send text (SMS) and multimedia messages (MMS).

From the Home screen, tap ▦ > **Messages**. The All messages screen opens, where all your sent and received messages are neatly grouped into conversations, by contact name or phone number.
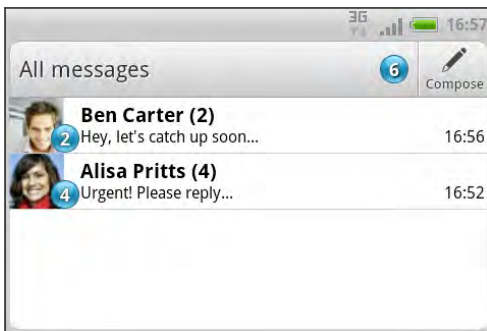

- Scroll up or down the list of conversations by swiping your finger on the screen.

- Tap a contact name or number to view the exchange of messages.

> ✎ You can also view your messages on the Home screen with the Messages widget.

Sending a text message (SMS)

1. From the Home screen, tap ▦ > **Messages**.

2. Tap **Compose**.

3. Fill in one or more recipients. You can:

   - Enter the first few letters of a contact name or starting digits of a mobile number. As you type, matching names with phone numbers from your stored contacts are displayed. Tap a name or one of the contact's numbers.
   - Tap 👤, and then select the phone numbers of the contacts to whom you want to send the message. You can also select contact groups as recipients. When you have selected all the message recipients, tap **OK**.
   - Enter the complete phone numbers directly in the To field.

4. Tap the box that says **Add text**, and then enter your message.

---
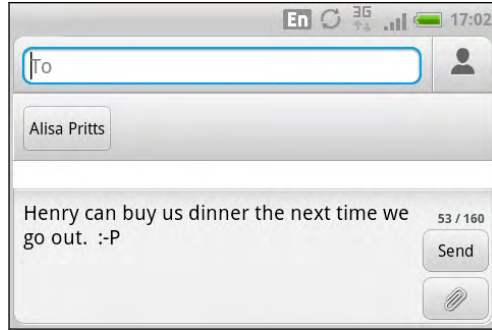

§ There is a limit on the number of characters for a single text message (displayed above the **Send** button). If you exceed the limit, your text message will be delivered as one but will be billed as more than one message.

§ Your text message automatically becomes a multimedia message if you enter an email address as the recipient, add a message subject, attach an item, or compose a very long message.

---

5. Tap **Send**, or press ← to save the message as a draft.

Sending a multimedia message (MMS)

1. From the Home screen, tap ⊞ > **Messages**.

2. Tap **Compose**.

3. Fill in one or more recipients. You can:

   § Enter the first few letters of a contact name or starting digits of a mobile number. As you type, matching names with phone numbers and email addresses from your stored contacts are displayed. Tap a contact's number or email address. Email addresses will be displayed when **Show email address** is selected in Recipient list settings.

   § Tap 👤, and then select the phone numbers of the contacts to whom you want to send the message. You can also select contact groups as recipients. When you have selected all the message recipients, tap **OK**.

   § Enter the complete phone numbers or email address directly in the **To** field.

4. To add a subject line, press ☰ and then tap **Add subject**.

5. Tap the box that says **Add text**, and then enter your message.

6. Tap 📎 and then choose the type of attachment.

Picture	Select **Camera** to take a photo and attach it, or **Gallery** to attach a photo from your storage card.
Video	Select **Camcorder** to capture a video and attach it, or **Videos** to attach a video from your storage card.

Audio	Select **Voice Recorder** to make a voice recording and attach it, or **Music & sounds** to attach a music file or voice recording from your storage card.
App recommendation	Choose an app you've installed from Android Market that you want to share with others. The URL from which the app can be downloaded will be inserted to your message.
Location	Add your current location (requires GPS to be turned on), or a location you pick on a map to your message.
Contact (vCard)	Select a contact, and then select the information to attach.
Appointment (vCalendar)	Select the calendar event you want to attach.

7. To see options for replacing or reviewing your attachment, tap ⊙. You can also press ☰, then tap **Discard** to start over.

8. Tap **Send**, or press ⬅ to save the message as a draft.

Creating a slideshow

1. After you've added either a photo, video, or audio in the multimedia message you're composing, tap 📎 > **Slideshow**.

2. Do any of the following:

Add a slide	Tap 📎 , and then choose to add a photo or a video.
Add music or a voice recording to a slide	Right after adding a slide, tap 📎 > **Audio**.
Add a caption to a slide	Tap **Add text** and then enter your caption.
Edit a slide	Tap ⊙, and then choose to replace, remove, or set the duration of the slide.
Preview the slideshow	Press ☰, and then tap **Preview** (or **More** > **Preview**). Tap once on the preview screen to see playback controls.

3. When finished, tap **Send**, or press ⬅ to save the message as a draft.

Resuming a draft message

1. On the All messages screen, press ☰, and then tap **Drafts**.

2. Tap the message and then resume editing it.

3. Tap **Send**.

Viewing and replying to a message

Depending on your notification settings, HTC ChaCha plays a sound, vibrates, or displays the message briefly in the status bar when you receive a new message. A new message icon [icon] is also displayed in the status bar.

1. To open and read the message, you can:

   § Press and hold the status bar, and then slide your finger down to open the Notifications panel. Then tap the new message notification.

   § Open the Messages app to access and read the message.

2. While reading the message, you can:

Reply with a text message	Tap the box that says **Add text**, enter your reply message, and then tap **Send**.
Reply with a multimedia message	Tap the box that says **Add text**, enter your reply message, tap [icon] to choose an attachment for your message, and then tap **Send**.
Call or save a phone number contained in the message	Tap the phone number. Then choose whether to dial the number or add it to your contacts.
Open a link in the message	Tap the link to open it in the web browser.
Send to or save an email address contained in the message	Tap the email address. Then choose whether to send an email, send a multimedia message, or save the email address to your contacts.
Forward a message	Tap the message to open the options menu, and then tap **Forward**.
Check message details	Tap the message to open the options menu, and then tap **View message details**.

Replying to another phone number of the contact

When a contact has multiple phone numbers stored on HTC ChaCha, you'll see the particular phone number used within the message. There's also a bold letter before the phone number to indicate the number type (for example, **M** stands for **Mobile**).
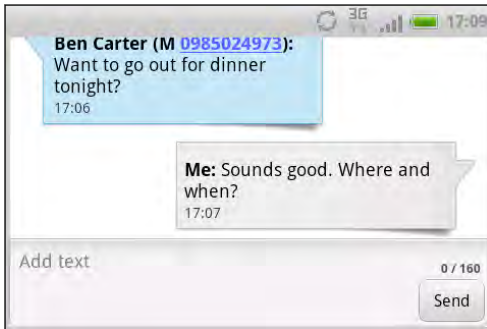

Keep in mind that your response will be sent to the phone number of the latest message you've received from this contact.

1. On the All messages screen, tap a contact (or phone number) to display the exchange of messages with that contact.

2. Tap the box that says **Add text**, then enter your reply message.

3. Press ▤ and then tap **More** > **Recipient phone number**.

4. Select another phone number of this contact, and then tap **OK**.

Viewing and saving an attachment from a multimedia message

If you are concerned about the size of your data downloads, check the multimedia message size first before you download it.

When **Auto-retrieve** in MMS settings is disabled, only the message header is downloaded. To download the entire message, tap the **Download** button at the right side of the message.

- If there's a media attachment such as a photo or video in a received message, tap it to view the content.

- If the attachment is a contact (vCard), tap it to view the contact information, then tap **Save** to add to your contacts.

- If the attachment is an appointment or event (vCalendar), tap it to choose the calendar where to save it, and then tap **Import**.

- To save the attachment to your storage card, press and hold the multimedia message, and then choose to save the type of attachment from the options menu.

Push messages

Push messages contain a web link. Often, the link will be to download a file that you have requested from your service provider.

When you receive a push message, a notification icon ![icon] is displayed in the status bar.

Opening and reading a new push message

1. Press and hold the status bar, and then slide the status bar down to open the Notifications panel.

2. Tap the new message.

3. Tap **Visit website**.

Viewing all your push messages

1. From the Home screen, tap ![icon] > **Messages**.

2. Press ![icon], and then tap **Push messages**.

> ✎ You can only see this option if you've previously received push messages.

Managing message conversations

Protecting a message from deletion

You can lock a message so that it will not be deleted even if you delete the other messages in the conversation.

1. On the All messages screen, tap a contact (or phone number) to display the exchange of messages with that contact.

2. Tap the message that you want to lock.

3. Tap **Lock message** on the options menu. A lock icon ![icon] is displayed at the right hand side of the message.

Copying a message to your SIM card

1. On the All messages screen, tap a contact (or phone number) to display the exchange of messages with that contact.

2. Tap the message, and then tap **Copy to SIM**. A SIM card icon ![icon] is displayed at the right hand side of the message.

Deleting a single message

1. On the All messages screen, tap a contact (or phone number) to display the exchange of messages with that contact.

2. Tap the message that you want to delete.

3. If the message is locked, tap **Unlock message** on the options menu, and then tap the message to display the options menu again.

4. Tap **Delete message** on the options menu.

5. When prompted to confirm, tap **OK**.

Deleting several messages within a conversation

1. On the All messages screen, tap a contact (or phone number) to display the exchange of messages with that contact.

2. Press ☰ and then tap **Delete** (or **More** > **Delete**).

3. Tap **Delete by selection**.

You can also tap **Delete by phone number** if the contact used multiple phone numbers throughout the conversation and you want to delete the messages sent from a particular number.

4. Select the messages you want to delete and then tap **Delete**.

Deleting a conversation

1. Do any of the following:

   - On the All messages screen, press and hold a contact (or phone number) whose messages you want to delete, and then tap **Delete**
   - While looking at the exchange of messages in a conversation, press ☰ and then tap **Delete** > **Delete thread** (or **More** > **Delete** > **Delete thread**).

     Any locked messages in the conversation thread will not be deleted unless you select the **Delete locked messages** check box.

2. When prompted to confirm, tap **OK** to delete the entire thread.

Deleting several conversations

1. On the All messages screen, press ☰ and then tap **Delete**.

2. Select the conversation threads you want to delete.

3. Tap **Delete**. Any locked messages will not be deleted.

Setting message options

On the All messages screen, press ▤ and then tap **Settings**.

Notifications	§ Receive a notification in the status bar and set HTC ChaCha to vibrate or play a sound when a message arrives or when a message is not sent successfully, and choose a notification sound.
	§ Allow HTC ChaCha to show pop-up notifications on the screen when messages are sent successfully or not, or disable this option.
Text messages (SMS)	§ Receive a report on the delivery status of your message.
	§ View or change the message service center number used. (We recommend that you don't change the number here as it may cause problems in receiving and sending messages.)
	§ View or delete text messages stored on your SIM card, or copy SIM card messages to device memory.
Multimedia messages (MMS)	§ Receive a report on the delivery status of your message.
	§ Receive a report whether each recipient has read the message or deleted it without reading.
	§ Automatically download complete MMS messages including the message body and attachments in your service area and when roaming.
	§ Set the message priority and maximum file size of MMS messages. If the MMS message file size is exceeded, the message won't be sent.
General	§ Search and display the sent message history, call history, and email addresses of stored contacts when you're adding message recipients.
	§ Choose the maximum number of text or MMS messages to store in each conversation thread (excluding locked messages), and enable automatic deletion of unlocked older messages when set limits are reached.
	§ Forward received text and MMS messages to another phone number or email address. (This may incur extra fees.)

Email

Gmail

Using Gmail

When you first set up HTC ChaCha, make sure you sign into your Google Account to use Gmail. If you didn't do so, go to the **Accounts & sync** setting to sign in.

You can also set up more than one Google Account on HTC ChaCha, and then switch between accounts in Gmail.

Viewing your Gmail Inbox

All your received emails are delivered to your Inbox.

From the Home screen, tap 🔳 > **Gmail**. Your Gmail inbox then opens.
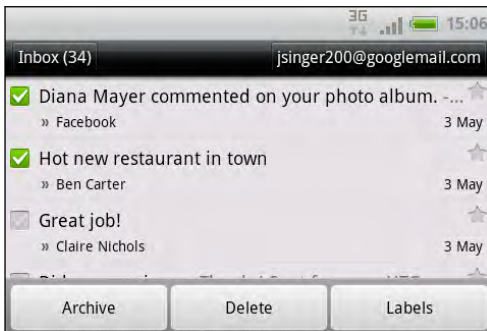

Archive or delete multiple conversations	Tap ☑ before the email or conversation. Then tap the onscreen buttons at the bottom to choose what to do with the selected messages or conversations.
Display drafts, sent messages, and other labels	Tap **Inbox** at the top left of the screen, and then tap another label (such as **Sent**, **Drafts**, or your created label) to view its messages and conversations.
Switch to your other Gmail account	Tap the current account at the top right of the screen, and then tap another account you want to switch to.
Refresh the Inbox	Press ☰, and then tap **Refresh**.

Sending a new message

1. In the Gmail inbox, press ☰ and then tap **Compose**.

2. If you've set up multiple Google Accounts on HTC ChaCha, choose which Gmail address you want to use for sending your email. Tap the box that shows your current Gmail address, and then tap another address that you want to use for sending.

3. Enter the message recipient's email address in the **To** field. If you are sending the email to several recipients, separate the email addresses with a comma.

> ✏ If you want to send a carbon copy (Cc) or a blind carbon copy (Bcc) of the email to other recipients, press ☰ and then tap **Add Cc/Bcc**.

4. Enter the email subject, and then compose your email.

5. If you want to attach a picture, press ☰ and then tap **Attach**.

6. Locate and then tap the picture you want to attach.

7. After composing your message, tap ![icon].

While composing the message, tap ![icon] to save it as a draft. Or press ![icon] to discard the message.

Replying to or forwarding an email message

1. In the Gmail inbox, tap the email message or conversation.

2. To reply to the sender, tap ![icon]. Or, tap ![icon] and choose whether to **Reply all** or **Forward**.

3. Do one of the following:

    -   If you selected **Reply** or **Reply all**, enter your reply message.
    -   If you selected **Forward**, specify the message recipients.

Tap **Respond inline** if you want to interleave your new message with the received email. But this removes any attachments or formatting in the original email.

4. Tap ![icon].

Getting help

To find out more about using Gmail, press ![icon], and then tap **More** > **Help**. The web browser will take you to the Google Mobile Help site.

Mail

About the Mail app

Use the Mail app to add your webmail and other POP3 or IMAP email accounts. You can also set up and use your Exchange ActiveSync email on HTC ChaCha.

You can add the Mail widget to view your POP3/IMAP or Exchange ActiveSync emails on the Home screen.

Adding a POP3/IMAP email account

1. From the Home screen, tap ![icon] > **Mail**.

2. Do one of the following:

    -   If this is your first time to add an email account in Mail, tap **Other (POP3/ IMAP)** on the Choose a mail provider screen.
    -   If you've already added an email account in Mail, press ![icon], and then tap **More** > **New account**. If the Choose a mail provider screen is displayed, tap **Other (POP3/IMAP)**.

3. Enter the email address and password for your email account and then tap **Next**.

4. If the account type you want to set up is not in the internal database, you'll be asked to enter more details.

5. Enter the account name and your name and then tap **Finish**.

Adding a Microsoft Exchange ActiveSync account

You can add one or more Microsoft Exchange ActiveSync accounts on HTC ChaCha. You can sync with Microsoft Exchange Server 2003 Service Pack (SP2) or later.

You can add up to 15 Exchange ActiveSync accounts on HTC ChaCha.

1. From the Home screen, tap 　 > **Mail**.

2. Do one of the following:

   - If this is your first time to add an email account in Mail, tap **Microsoft Exchange ActiveSync** on the Choose a mail provider screen.
   - If you've already added an email account in Mail, press 　, and then tap **More** > **New account**. If the Choose a mail provider screen is displayed, tap **Microsoft Exchange ActiveSync**.

3. Enter the Exchange ActiveSync account details, and then tap **Next**. If your corporate Exchange Server does not support auto-detect, you'll need to enter your Exchange Server settings after you tap **Next**. Ask your Exchange Server administrator for details.

4. Choose the types of information you want to sync. Also choose how often you want to update and sync email to HTC ChaCha, then tap **Next**.

5. Enter the account name, then tap **Finish**.

Checking your Mail inbox

When you open the Mail app, it displays the inbox of one of your email accounts that you've set up on HTC ChaCha.

To switch between email accounts, tap the bar that shows the current email account, and then tap another account.

Viewing the unified inbox of all your email accounts

You can view email messages from all your accounts just in one place without having to switch to different accounts.

Just tap the bar that shows the current email account, and then tap **All accounts**. Email messages are color coded so you can easily distinguish which email accounts they belong to.

Up to 15 email accounts can be shown in the unified inbox.

Switching between different views of your inbox

If you have lots of email messages, it may take you some time to browse through the long list and find a single email or related email messages. Use the tabs of the Mail app to sort your emails into different categories.

To skim through your email messages easier, tap one of the following tabs to change the view of your inbox:

Received

Displays email messages as individual items.

Threads

Displays email messages as conversations, grouped according to the subject line. Tap a subject in the list to show the email conversation.

Favorites

Displays all email messages from a contact group. To choose which contact group to display, press ☰ , tap **View**, and then select a group.

Unread

Displays unread messages.

Marked (Exchange ActiveSync only)

Displays all flagged messages.

Invites or **Meeting invitations** (Exchange ActiveSync only)

Displays meeting invitations which you have not yet accepted or declined.

Attached

Displays all messages that have attachments.

Refreshing an email account

Whatever your automatic synchronization settings are, you can also synchronize your sent and received emails manually at any time.

- While in the account you want to synchronize, press ≣, and then tap **Refresh**.
- If you have several email accounts, you can refresh them all at the same time. Go to the unified inbox first. Then press ≣ and tap **Refresh**.

Sorting email messages

You can sort email messages by date received, priority, subject, sender, or size.

On the inbox, press ≣, tap **Sort**, and select from the sorting options.

Quickly browsing your inbox

If you have a long list of email messages in your inbox, it may not be easy to browse the list and find an email that you want. You can quickly browse through your inbox by using finger gestures.

1. Choose a sorting order for displaying your email messages.

2. Press and hold two fingers on any email message, and then drag upward or downward without lifting your fingers. Your screen then jumps to the set of email messages based on your chosen sorting order.

Managing email messages

Deleting an email message

1. On the inbox, press and hold the message you want to delete.

2. On the options menu, tap **Delete**.

Selecting several email messages

1. Tap the check boxes of email messages to select them.

2. Choose what you want to do with the selected messages: **Mark read** (or mark **Mark unread**), **Delete**, or **Move to** another folder.

> You cannot move email messages when you're in the unified (All accounts) inbox.

Moving several email messages to another folder

1. Switch to the email account you want to use.

2. Tap the check boxes of email messages you want to move.

3. Tap **Move**, and then tap the folder where to move the email messages.

Moving an email message after reading

1. In the open message, tap **Move to**.

2. Tap the folder where you want to move the email message.

Deleting all messages

1. First tap the check box of any email message.

2. Press ☰ , and then tap **Select all**.

3. Tap **Delete**.

Switching to other mail folders

1. Press ☰ , and then tap **Folders**.

2. Tap the mail folder whose messages you want to view.

Sending an email message

1. From the Home screen, tap ▦ > **Mail**.

2. Switch to the email account that you want to use for sending email.

3. On the email account inbox, tap **Compose**.

4. Fill in one or more recipients. You can:

    - Enter email addresses directly in the **To** field, separating them with a
      comma. As you enter email addresses, any matching addresses from your
      contacts list are displayed. Tap a match to enter that address directly.
    - Tap the 👤 icon, and then choose the contacts to whom you want to send
      the message. You can also select contact groups as recipients, or search
      and add contacts from the company directory if you have set up an
      Exchange ActiveSync account on HTC ChaCha.

💡 If you want to send a carbon copy (Cc) or a blind carbon copy (Bcc) of the email to other recipients, press ☰ , and then tap **Show Cc/Bcc**.

5. Enter the subject, and then compose your message.

6. To add an attachment, press ☰ , tap **Attach**, and choose from the following
    options:

Picture	Select **Camera** to take a photo and attach it, or **Gallery** to attach a photo from your storage card.
Video	Select **Camcorder** to capture a video and attach it, or **Videos** to attach a video from your storage card.
Audio	Select **Voice Recorder** to make a voice recording and attach it, or **Files** to attach a music file or voice recording from your storage card.

App recommendation	Choose an app you've installed from Android Market that you want to tell other people about. The URL from which the app can be downloaded will be inserted in your email.
Location	You can attach location information. Send your current location (requires GPS to be turned on) or a location you pick on a map.
Document	Attach a PDF file or an Office document such as a text file or a spreadsheet.
Contact (vCard)	Attach someone's contact information.
Appointment (vCalendar)	Attach a calendar event.
File	Attach any file from your storage card.

7. Tap **Send** to send the message immediately, or tap **Save** to send it later.

If there's no Wi-Fi or data connection available or Airplane mode is on when you send your email, the email will be saved to the Outbox folder. Once there's Wi-Fi or data connection available, the saved email will be sent automatically next time HTC ChaCha syncs.

Resuming a draft email message

1. In the email account inbox, press ☰, and then tap **Folders** > **Drafts**.

2. Tap the message.

3. When you finish editing the message, tap **Send**.

Reading and replying to an email message

1. From the Home screen, tap ▦ > **Mail**.

2. Switch to the email account you want to use.

3. On the email account inbox, tap the email you want to read.

4. Do any of the following:

Reply to the message	Tap **Reply** or **Reply all**..
Forward the message	Tap **Forward**.
Delete the message	Press ☰ and then tap **Delete**.
Mark the message as unread	Press ☰, and then tap **Mark unread**.

Setting the priority for an email message

You can set the priority for an email message that you send.

1. While composing the message, press ▤ .

2. Tap **Set priority**.

3. Select the priority for the message.

If you selected **High** or **Low** priority, the priority appears below the subject line of the message.

Working with Exchange ActiveSync email

You can read, reply, send, and manage your work email in the same easy way as with a POP3/IMAP account. In addition, you can also use some powerful Exchange features.

Flagging an email

- While viewing the inbox, press and hold an email message, and then tap **Flag this message**. A red icon ⚑ appears next to an email after you have flagged it.

- While reading an email, you can also tap the flag icon in the email.

Setting your Out of the office status

1. Switch to your Exchange ActiveSync account.

2. Press ▤ and then tap **More** > **Out of the office**.

3. Tap the box, and then select **Out of the office**.

4. Set the dates and times for the period when you will be out of the office.

5. Enter the auto-reply message.

6. Tap **Save**.

Sending a meeting request

1. Switch to your Exchange ActiveSync account.

2. Go to the Invites tab, and then tap **Compose**.

3. Enter the meeting details.

4. Tap **Send**.

Changing email account settings

1. Switch to the email account whose settings you want to change.

2. Press ▤ , and then tap **More** > **Settings**.

3. Select from the following:

Account settings	Change the email account settings such as the name, email address, password, and description.
General settings	Set the font size when reading emails, enable, disable or set the signature, set the account as the default email account, and set where to save email attachments.
Send & Receive	Set the sync settings for incoming and outgoing emails such as maximum size limit, update schedule, and more.
Notification settings	Set email notification settings.
Delete account	Tap to delete the email account.

4. Press ← to save your changes.

Deleting an email account

1. Switch to the email account you want to delete.

2. Press ≡, and then tap **More** > **Settings** > **Delete account**.

Calendar

About Calendar

Never miss an important date again. Use the Calendar app to schedule your events, meetings, and appointments.

You can set up HTC ChaCha to stay in sync with the following types of calendars:

- On HTC ChaCha, sign in to your Google Account so you can sync the Calendar app with your Google Calendar online. You can add multiple Google Accounts.

- If you're using Microsoft Outlook on your computer, you can set up HTC Sync on your computer to sync Outlook Calendar with the Calendar app.

- If you have a Microsoft Exchange ActiveSync account and you've added it on HTC ChaCha, you can sync the Calendar app with your Exchange ActiveSync calendar events.

- Sign in to your Facebook account so you can invite friends to your events, and also see their birthdays and upcoming events in Calendar.

Creating an event

You can create events that sync with your Google Calendar, your computer's Outlook Calendar, or Exchange ActiveSync calendar, as well as events that appear on HTC ChaCha only.

1. From the Home screen, tap ▦ > **Calendar**.

2. On any Calendar view, tap **New event**.

3. If you have more than one calendar, select a calendar in which to add the event:

     - Select your Google Account to create a Google Calendar event. If you have several Google calendars on the Web, select one in which to add your event.
     - Select **PC Sync** to create calendar events on HTC ChaCha. You can sync them with your computer's Outlook Calendar using HTC Sync.
     - Select your Exchange ActiveSync account to create an Exchange ActiveSync calendar event.

4. Enter a name for the event.

5. To specify the date and time of the event, do one of the following:

     - If there is a time frame for the event, tap the **From** and **To** date and time to set them.
     - If it is a whole-day event, such as a birthday, set the **From** and **To** date, then select the **All day** check box.

6. Enter the event location and description.

7. Set the reminder time.

> You can add another reminder time in a Google Calendar event. Press ≡ and then tap **Add reminder**.

8. If the event occurs on a regular basis, tap the **Repetition** box and then choose how often the event occurs.

9. Tap **Save**.

Inviting guests to your event (Google Calendar only)

After you invite guests to your event, an invitation email will be sent using your Google Account.

If you want to invite guests to your event, you need to create and add the event in your Google Calendar.

1. Open Calendar and create a new event. Tap the **Calendar** field and then select your Google Account (or one of your other Google Calendars).

2. Add details about the event, such as date and time, location, and more.

3. In the To field, enter the email addresses of everyone you want to invite to the event. Separate multiple addresses with commas (,). If the people to whom you send invitations use Google Calendar, they'll receive an invitation in Calendar and by email.

4. Tap **Save** to add the event to your Google Calendar.

Sending a meeting request using Calendar (Exchange ActiveSync only)

If you have an Exchange ActiveSync account set up on HTC ChaCha, you can use Calendar to create a meeting appointment and send a meeting request email to the people you want to invite to your meeting.

1. Open Calendar and create a new event. Tap the **Calendar** field and then select your Exchange ActiveSync account.

2. Add details about the meeting, such as date and time, location, and more.

3. Press ≡ and then tap **Meeting invitation**.

4. Tap 👤 and choose attendees from your contacts or the company directory.

5. Enter your message and then tap **Send**.

Changing Calendar views

When you open Calendar, it displays the month view by default. You can also use agenda, day, or week view.

To change between views, press ☰, and then choose the type of view that you want.

Using month view

In month view, you will see markers on days that have events.

Do any of the following in month view:

- Tap a day to view the events for that day.
- Press and hold a day to open an options menu from which you can also choose to create an event or switch to either day or agenda view.
- Slide your finger up or down the screen to view earlier or later months.

Using day and agenda views

Day view displays a list of the events of one day. Agenda view shows a list of all your events in chronological order.

- The colored bars on the left side of the events indicate the type of calendar the event is part of. To find out what each color represents, press ☰ and then tap **More** > **Calendars**.
- When in day view, slide left or right across the screen to view earlier or later days.

Using week view

Week view displays a chart of the events of one week.

When in week view, you can:

- Press and hold on a time slot to create a new event at that time.
- Tap an event (shown as colored blocks) to view its details.
- Slide left or right across the screen to view earlier or later weeks.

Managing Calendar events

Viewing an event

You can view your own events as well as events that other people have shared with you.

1. In day view or agenda view, tap an event. The Event details screen then opens and shows the summary of the event.

2. Depending on the event information, do any of the following:

   - Find the event's location in Maps.
   - Call any phone number included in the event location or description.
   - Check the participants of the event.
   - If the event was sent as a meeting invitation, respond to the invitation.
   - If it's an Exchange ActiveSync calendar event, reply by email to the organizer or to all the guests. Press ☰, and then either tap **Reply** or **Reply all**.
   - Select any text and look it up on the Web.
   - Tap the reminder time to change it. Press ← to save changes.

Editing an event

You can edit events that you have created.

1. While viewing an event, press ☰, and then tap **Edit event**.

2. Make your changes to the event.

3. When you're done editing, tap **Save**.

Deleting an event

Do any of the following:

- While viewing the summary of an event on the Event details screen, press ☰ and then tap **Delete event**.
- In day, agenda or week view, press and hold an event and then tap **Delete**.
- When editing an event, tap **Delete**.

If the event repeats, you'll be asked whether you want to delete just that occurrence, this and all future occurrences, or all past and future occurrences in your Calendar.

Sharing an event (vCalendar)

You can share a calendar event as a vCalendar using Bluetooth or by sending it as a file attachment with your email or message.

1. While viewing an event, press ☰ , and then tap **Forward**.

2. Do one of the following:

    § Tap **Bluetooth**. You'll be asked to turn on Bluetooth on HTC ChaCha and connect to the receiving Bluetooth device.

    § Tap **Mail**. A new message window opens and automatically includes the vCalendar as an attachment. Your default email account will be used to send the message.

    § Tap **Message**. A new message window opens and automatically includes the vCalendar as a multimedia attachment.

Dismissing or snoozing event reminders

If you have set at least one reminder for an event, the upcoming event icon 🗓 will appear in the notifications area of the status bar to remind you of the upcoming event.

1. Tap the status bar, then slide your finger down the screen to open the Notifications panel.

2. Do one of the following:

    § Tap **Clear** to dismiss event reminders and all other notifications. Other types of notifications such as new messages and missed calls will also be deleted.

    § After sliding open the Notifications panel, tap the calendar event reminder. You'll then see a list of all pending event reminders. Tap **Snooze all** to snooze all event reminders for five minutes, or tap **Dismiss all** to dismiss all event reminders.

    § Press ← to keep the reminders pending in the notifications area of the status bar.

Displaying and synchronizing reminders

You can select which calendars to show or hide, and which ones to keep synchronized.

Showing or hiding calendars

In any Calendar view, press ☰, tap **More** > **Calendars**, and then select or clear a calendar to show or hide it.

> ▪ Calendars are kept synchronized on HTC ChaCha, whether or not you hide them.
>
> ▪ Tap **All calendars** to display all calendars.

Adding a Google calendar to sync with

You can choose which Google calendars to keep synchronized on HTC ChaCha.

> You can't create a new Google calendar on HTC ChaCha. You can only sync with Google calendars that you created or subscribed to on the Web.

1. In any Calendar view, press ☰ and then tap **More** > **Calendars**.
2. Press ☰ again and then tap **Add calendars**.
3. Select a Google calendar to add to your calendars list, and then tap **OK**.
4. Press ← to update Calendar.

Stop synchronizing a Google calendar

You can choose which Google calendars to stop synchronizing.

1. In any Calendar view, press ☰ and then tap **More** > **Calendars**.
2. Press ☰ again and then tap **Remove calendars**.
3. Select a Google calendar to remove from your calendars list, and then tap **OK**.
4. Press ← to update **Calendar**.

The calendars that you remove from your calendars list will no longer be synchronized on HTC ChaCha, but you remain subscribed to them and can work with them in Google Calendar on the Web.

Changing Calendar settings

You can change Calendar settings to specify how it displays events and how it notifies you of upcoming events.

In any Calendar view, press ☰ and then tap **Settings** (or **More** > **Settings**).

Reminder settings

All calendars	Select this check box to use the same event reminder settings for all types of calendars. If you clear this check box, you can set different reminder settings for each calendar.
Set alerts & notifications	Configure event reminders to open an alert, send you a notification, or turn off event notifications on HTC ChaCha.

Default reminder time	Choose how soon before an event you want to be notified.
Select ringtone	Choose a ringtone to sound when you receive an event reminder.
Hide declined events	Choose whether to show or hide events for which you've declined invitations.

Calendar view settings

Start in	Choose the default view to display when you open Calendar.
First day of week	Set the month and week views to start on a Sunday or Monday.
Include weather	Select this check box to show weather information in the day view events list.
City	If weather is included, by default, day view displays your current location's weather. You can change it to display the weather of another city.

About the Calendar widget

You can add a Calendar widget to your Home screen. The widgets offer different calendar views.

Tapping a day or event on the widget brings you to the Calendar app.

Maps and location

Location settings

Turning on location services

In order to find your location on HTC ChaCha, you need to enable location sources.

1. From the Home screen, press ☰ and then tap **Settings** > **Location**.

2. Select one or both of the following:

Use wireless networks	Uses Wi-Fi or your mobile data connection to find your approximate location.
Use GPS satellites	Finds your exact GPS location. This requires a clear view of the sky and more battery power.

Google Maps

About Google Maps

Google Maps lets you track your current location, view real-time traffic situations, and receive detailed directions to your destination. It also provides a search tool where you can locate places of interest or an address on a map, or view locations at street level.

> ▪ You need an active mobile data or Wi-Fi connection to use Google Maps.
>
> ▪ To find your location with Google Maps, you need to enable location sources.
>
> ▪ The Google Maps app does not cover every country or city.

Getting around maps

When you open Google Maps, you can easily find your location on the map or check out nearby places by panning and zooming in and out on the map.

> To find your location with Google Maps, you need to enable location sources.

1. From the Home screen, tap ▦ > **Maps**.

2. Tap ◎ to show your current location. The blue marker ▸ shows your location on the map.

3. Do any of the following:

Move around	Swipe your finger to any direction on the screen to view nearby places on the map.
Zoom in	▪ Place your thumb and index fingers on top of the area that you want to zoom in, and then spread your fingers across the map. ▪ Tap ⊕. ▪ Double-tap the area on the map that you want to zoom in.
Zoom out	▪ Pinch your thumb and index finger on the map to zoom out. ▪ Tap ⊖.
View information for a random location	1. Press and hold a location on the map. A balloon opens over the location, with the address and a thumbnail from street view (if available). 2. Tap the balloon to see more information. You can get directions to the location, check for nearby places of interest, and more.

Searching for a location

In Google Maps, you can search for a location, such as an address or a type of business or establishment (for example, museums).

1. In Maps, enter the place you want to search for in the search box.

2. Tap [Q] to search for the location you entered or tap a suggested search item. The search results are displayed as markers on the map.

3. Do any of the following:

    - Tap a marker to see if that is what you're looking for, tap the balloon if it is.
    - Tap [≣] to show the search results as a list, and then tap the location.

    Details about the selected location displays on the screen.

4. Do any of the following:

    - Tap the onscreen buttons to view the location on a map, get directions, view the location in Street View, if available, and more. Scroll down the screen to view more options.
    - Swipe left or right across the screen to view the information for the next or previous search result.

Clearing the map

After searching on a map, you can clear away the various markers drawn on it.

Press ☰ , and then tap **Clear Map**.

Searching for a place of interest near you

Use Places to find places of interest near your current location. Places uses Google Maps to search common places that you would want to find, such as the nearest gas station or ATM kiosk.

> Before using Places, you need to enable location sources.

1. From the Home screen, tap [▦] > **Places**.

2. Tap the place you want to search.

3. Do any of the following:

    - When one or two places of interest are found, the search results are displayed as markers on the map. You can tap the marker, and then tap the balloon to view more information about the place.
    - When several places are found, the search results display in a list. Tap a place to show its location on a map, and then tap its balloon to view more information about the place.

Getting directions

Get detailed directions to your destination. Google Maps can provide directions for travel by foot, public transportation, or car.

1. While viewing a map, press ☰, and then tap **Directions**.

2. Do any of the following:

    ▪ Use your current location as the starting point, or enter a location from where to start in the first text box. Then enter your destination in the second text box.

    ▪ Tap 🖰 to select an address from your contacts or a point that you tap on a map.
3. Choose how you want to get to your destination by tapping the car, public transit, or walk button.

4. Tap **Go**. The next screen displays the directions to your destination in a list.

> If the place you've set as your destination has several locations available, choose which one to go to.

5. Tap an item to view the directions on the map.

6. Tap the arrow buttons on the map to follow the directions.

When you're finished viewing or following the directions, press ☰ and then tap **Clear Map** to reset the map. Your destination is automatically saved in the Google Maps history.

Getting help

Get help and more information about Maps.

To open the help, press ▤ , and then tap **More** > **Help**. The web browser opens and takes you to the Google Maps Help site.

Finding your friends with Google Latitude (available by country)

Google Latitude® user location service lets you and your friends share locations and status messages with each other. It also lets you get directions to your friends' locations, send text and email messages, and more.

Your location is not shared automatically. You must join Latitude, and then invite your friends to view your location or accept their invitations. Only friends that you have explicitly invited or accepted can see your location.

Opening and joining Latitude

1. From the Home screen, tap ⊞ > **Maps**.

2. While viewing a map, press ▤ and then tap **Join Latitude**.

3. After you've joined Latitude and closed the application, you can do any of the following to open it from the Home screen:

    - Tap ⊞ > **Latitude**.
    - Open Maps, press ▤ , and then tap **Latitude**.

HTC Sync

About HTC Sync

You have your new vacation photos on HTC ChaCha while your business calendar is on your computer. Why not make these types of files and information available on both devices?

With HTC Sync, you can:

- Sync your contacts between your Microsoft Outlook, Outlook Express or Windows Contacts on your computer and HTC ChaCha.

- Sync your calendar events between the Outlook or Windows Calendar on your computer and HTC ChaCha.

- Bring your photos, videos, documents, songs, and playlists to HTC ChaCha and enjoy them on the go.

- Easily import your captured photos and videos from HTC ChaCha to your computer.

- Store the same bookmarks on both your computer and HTC ChaCha web browsers.

- Install third-party mobile phone apps (not downloaded from Android Market) from your computer.

- You need a storage card inserted into HTC ChaCha to be able to sync multimedia files, maps, and documents.

- The available categories and options depend on the device you've connected to your computer.

Installing HTC Sync

- § Install HTC Sync on a computer running Windows 7, Windows Vista, or Windows XP.

- § HTC Sync requires USB 2.0 on your computer to connect and sync with HTC ChaCha.

- § For trouble-free installation, first quit all running programs and temporarily exit from your anti-virus program before you start installing HTC Sync.

Copy the HTC Sync installer from the storage card to your computer and use it to install.

After installing HTC Sync, the HTC Sync icon is added to your computer's system tray (check the bottom-right side of your computer screen). You can double-click this icon to open HTC Sync.

Setting up HTC Sync to recognize HTC ChaCha

1. Connect HTC ChaCha to your computer using the USB cable that came in the box.

2. When HTC ChaCha prompts you to choose a type of USB connection, tap **HTC Sync**, and then tap **Done**. Wait for HTC Sync to recognize HTC ChaCha.

3. On the Device setup screen, enter a name for HTC ChaCha.

4. Click **Save**. The Device panel then opens.

To change the name of HTC ChaCha later, click **Overview** > **Device setup**.

Getting to know the workspace

On the Device panel, you can set your sync options, see general information about HTC ChaCha, check the used and available space on your storage card, and begin synchronization.

> The available categories and options depend on the device you've connected to your computer.

- § You can click a category of items to see its sync options on the right side of the Device panel.

    Clicking **Overview** displays basic software information and storage card usage, and lets you change the name of HTC ChaCha, or install third-party applications to HTC ChaCha.

- § The **Sync now** button lets you start syncing the categories and options you've selected.

- § The estimated storage usage bar beside the **Sync now** button shows you the estimated storage card space that will be used when there are new items to be synchronized and added to HTC ChaCha.

Setting up synchronization

You can choose the types of files and information you want to sync between HTC ChaCha and your computer.

Music sync options

Bring the music tracks and songs you play on your computer to HTC ChaCha. If you have playlists created in iTunes® or Windows Media® Player, you can sync these too and enjoy them on the go.

> You can sync audio files in these formats: *.aac, *.amr, *.m4a, *.mid, *.midi, *.mp3, *.wav, *.wma

1. On the Device panel, click Music, and then click the **On** button. Turning Music sync on means you want this category included every time you sync your computer and HTC ChaCha.

2. Select **Sync music files from**, and then click **Add**.

3. Choose a folder that contains your audio files, and then click **OK**.

4. Select **Sync music files from iTunes and Windows Media Player** if you're using iTunes or Windows Media Player on your computer, then choose the playlists you want to sync on HTC ChaCha.

Gallery sync options

You can automatically sync photos and videos between HTC ChaCha and a computer.

> You can sync photos and videos in these formats:
>
> - Photos: *.bmp, *.gif, *.jpeg, *.jpg, *.png
>
> - Videos: *.3gp, *.3g2, *.mp4, *.wmv

1. On the Device panel, click **Gallery**, and then click the **On** button. Turning Gallery sync on means you want this category included every time you sync your computer and HTC ChaCha.

2. To automatically import your camera shots to your computer during synchronization, select **Copy device Camera Shots to PC**. Photos and videos from your storage card will be saved to the `\My Photos\Device Camera Shots` folder on your computer.

3. Select **Sync PC photos & videos from**, and then click **Add**.

4. Choose a folder that contains your multimedia files, and then click **OK**. All supported image and video files added to this folder will be copied to the storage card during synchronization.

Calendar sync options

HTC ChaCha can sync appointments and events with your calendar in Outlook (Outlook XP, Outlook 2003 or Outlook 2007) or Windows Calendar.

1. On the Device panel, click **Calendar**, and then click the **On** button. Turning Calendar sync on means you want this category included every time you sync your computer and HTC ChaCha.

2. Select the application you want to sync calendar events with.

3. Choose from which point you want to start synchronizing your calendar events.

4. In cases when conflicting information is found on both HTC ChaCha and the computer, choose which information you want to keep.

> Only the calendar fields supported on HTC ChaCha will be synchronized.

People sync options

Sync HTC ChaCha contacts with your Outlook (Outlook XP, Outlook 2003 or Outlook 2007), Outlook Express, or Windows Contacts.

If you have contacts to sync from your SIM card, you have to import these first to HTC ChaCha storage.

1. On the Device panel, click **People**, and then click the **On** button. Turning People sync on means you want this category included every time you sync your computer and HTC ChaCha.

2. Choose the application you want to sync your contacts with.

3. In cases when conflicting information is found on both HTC ChaCha and the computer, choose which information you want to keep.

Only the contact fields supported on HTC ChaCha will be synchronized.

Bookmarks sync options

Sync web browser bookmarks between HTC ChaCha and a computer.

If you are using Google Chrome™ or Firefox® Internet browser and have selected it to sync with HTC ChaCha, make sure to close all browser windows before you begin synchronization.

1. Using your favorite web browser on your computer, create a favorites folder named **HTC bookmarks**. Make sure to save your favorite bookmarks in this folder to be able to sync them with HTC ChaCha.

2. On HTC Sync's Device panel, click **Bookmarks**, and then click the **On** button. Turning Bookmarks sync on means you want this category included every time you sync your computer and HTC ChaCha.

3. Choose the web browser that stores the bookmarks to sync with HTC ChaCha.

When conflicting information is found on both HTC ChaCha and computer, HTC Sync keeps the information from your computer.

Documents sync options

You can sync files and documents from your computer to HTC ChaCha. You can also sync email attachments that you stored on the HTC ChaCha storage card to your computer.

§ To open a document on HTC ChaCha, you'll need a compatible app.

§ To sync email attachments stored on the storage card to your computer, you must set up an Exchange ActiveSync or POP3/IMAP email account from the Mail app on HTC ChaCha.

1. On the Device panel, click **Documents**, and then click the **On** button. Turning Documents sync on means you want this category included every time you sync your computer andHTC ChaCha.

2. To sync email attachments that you've stored on the storage card, select **Copy all download Mail documents to PC**.

3. Select **Sync PC documents from**, and then click **Add**.

4. Choose a folder that contains the documents you want to sync on HTC ChaCha, and then click **OK**.

Email attachments from the storage card will be saved to the `\My Documents\` folder on your computer. Documents from your computer will be saved to the `\My Documents\` folder on your storage card.

Synchronizing HTC ChaCha

Check the estimated usage bar beside the **Sync now** button for the estimated file size of new items to sync on HTC ChaCha.

When there's not enough space left on your storage card, you'll see a warning icon and you won't be able to sync.

1. After selecting and customizing the categories you want to sync, click **Sync now**.

2. After synchronization is complete, click **Disconnect**.

3. Safely remove HTC ChaCha as required by your computer's operating system.

The next time you connect HTC ChaCha to your computer, synchronization automatically begins based on your sync settings.

Installing an app from your computer to HTC ChaCha

If you have application files (`*.apk`) on your computer, you can use HTC Sync to install them to HTC ChaCha. We strongly recommend you install only applications that you trust.

> Before you begin, make sure that HTC ChaCha is set to allow applications from your computer to be installed toHTC ChaCha. To do this, press ☰ while on the Home screen, tap **Settings** > **Applications**, and then select the **Unknown sources** check box.

1. On the Device panel, click **Overview**.

2. Click **Application installer**.

3. Browse for the application file on your computer, and then click **Open**. The installation process starts on HTC ChaCha.

4. Check the screen on HTC ChaCha to see if there are additional instructions to complete the installation.

5. After installation is complete, you can click **Disconnect**.

6. Safely remove HTC ChaCha as required by your computer's operating system.

Synchronizing another device with your computer

You can switch from one device to another, if you have more than one device to sync.

1. Connect another device to your computer, then set up HTC Sync to recognize it.

2. Click the device you want to set up or begin synchronization. The Device panel then opens, where you can separately customize your sync settings for this device.

To switch to another device to sync, click **Devices**, and then click the device's name or image.

Downloading the latest HTC Sync upgrade

Visit the HTC support website (www.htc.com/support/) from time to time to check for the most recent HTC Sync upgrade so you can download and install it on your computer.

After installing the latest upgrade, set up HTC Sync again to recognize and sync with HTC ChaCha.

Keyboard

About the keyboard

Besides making it easy to make phone calls with the keypad, you can enter text, numbers, and symbols using the hardware keyboard. The input mode you are currently using is displayed in the status bar.

Using the keyboard keys

Press these keys to enter uppercase letters, numbers, special characters, and symbols, as well as open the Camera app or send messages:
Shift key

- Press once and then press a letter key to type that letter in uppercase.

- Press twice to lock the key and type a series of uppercase letters. The cursor changes when you lock the Shift key: Welcome to HTC .

  To unlock the key, press ⇧ once again.

Function key

- Press once to type the character shown beside the letter or punctuation keys. For example, if you need to type the dollar sign ($), press FN, and then press the U key.

- Press twice to lock the key and type a series of numbers and characters. The cursor changes when you lock the Function key: Jim's number is 0900 .

  To unlock the Function key, press FN once again.

- To select a different keyboard language and access hardware keyboard settings, press FN, and then press ⊔.

- To open the Camera app, press FN, and then press ⊡.

- To send a message in email, text messaging, Friend Stream, or Facebook chat, press FN and then press ↵.

	Symbol key
	Press to open the symbols panel and insert a symbol or special character in your text.
	Arrow keys
	Press the Arrow keys for directional movement.

About predictive text

Predictive text suggests words while you type. As you enter letters, predictive text analyzes your key presses and provides a list of words for you to choose from. Predictive text is not enabled by default.

Enabling predictive text

1. From the Home screen, press ☰ , and then tap **Settings** > **Language & keyboard** > **Touch Input**.

2. Tap **Hardware keyboard settings**.

3. Tap the **Prediction** check box.

Entering words with predictive text

The keyboard's predictive text feature helps you type quickly and accurately.

> You must first enable predictive text in ☰ > **Settings** > **Language & keyboard** > **Hardware keyboard settings** before using predictive text input.

To enter a word in predictive mode, do any of the following:
- If you see the word you want highlighted in green or orange, just tap the space bar to insert the word into your text.

- If you see the word you want shown in the suggestions before you have finished typing the entire word, tap the word to insert it into your text.

- If an arrow is shown to the right of the suggestion list, tap the arrow to see more suggestions.

Setting a second language for the keyboard

Aside from the keyboard language you are currently using, you can set the predictive text to be bilingual. As you type, you'll get word suggestions in two languages that you've selected.

1. From the Home screen, press ▤, and then tap **Settings** > **Language & keyboard** > **Touch Input**.

2. Tap **Bilingual prediction**, and then choose the language you want.

Adding a word to the predictive text dictionary

HTC ChaCha comes with a list of words that it references for predictive text suggestions. While entering text, if you tap any word on the suggestion list, it is automatically added to the predictive text dictionary if it was not in the dictionary already.

You can also add a word to the list manually.

1. From the Home screen, press ▤, and then tap **Settings** > **Language & keyboard** > **Touch Input**.

2. Tap **Personal dictionary** > **Edit personal dictionary** > **Add**.

3. Enter the word to add, and then tap **OK**.

Editing or deleting a word in the predictive text dictionary

You can edit or remove words that you previously added to the predictive text dictionary.

1. From the Home screen, press ▤, and then tap **Settings** > **Language & keyboard** > **Touch Input**.

2. Tap **Personal dictionary** > **Edit personal dictionary**.

    - To edit a word, tap the word itself.
    - To delete words from the dictionary, press ▤ and tap **Delete**. Then choose the words to remove and tap **Delete**.

Backing up your personal dictionary to your storage card

If you have a storage card installed, you can back up the new words you've added to the predictive text dictionary.

1. From the Home screen, press ▤, and then tap **Settings** > **Language & keyboard** > **Touch Input**.

2. Tap **Personal dictionary** > **Sync personal dictionary** > **Copy to storage card**.

3. When prompted, tap **OK**.

Importing your personal dictionary from your storage card

1. From the Home screen, press ≡, and then tap **Settings** > **Language & keyboard**
   > **Touch Input**.

2. Tap **Personal dictionary** > **Sync personal dictionary** > **Restore from storage**
   card.

3. When prompted, tap **OK**.

Entering text by speaking

No time to type? Try speaking the words to enter them in most text fields that let you
use the keyboard.

⚑

- Make sure to select the language you'll be using in the **Voice input & output**
  settings.

- Since HTC ChaCha uses Google's speech-recognition service, you need to be
  connected to the Internet to enter text by speaking.

1. Press and hold 🎤. HTC ChaCha cues you to speak.

2. Tell HTC ChaCha what you want to be typed in.

Setting the voice input language

1. From the Home screen, press ≡, then tap **Settings** > **Voice input & output** >
   Voice recognizer settings.

2. Tap **Language**, then choose the language you want.

✎

Available languages depend on the voice input languages supported by Google.

Adjusting input settings

To open Touch Input settings, from the Home screen, press ≡, and then tap **Settings**
> **Language & keyboard** > **Touch Input**.

Hardware keyboard settings	Turn predictive text on or off.
Bilingual prediction	Select a secondary keyboard language to use.

Text input	▪ Turn on or off predictive text, spell correction, and word completion.
	▪ Enable audible or vibration feedback when typing.
	▪ Calibrate the touch keyboard accuracy.
Personal dictionary	Add, edit, or remove words in the predictive text dictionary.

Internet connections

Data connection

When you turn on HTC ChaCha for the first time, it will be automatically set up to use your mobile operator's data connection (if the SIM card is inserted).

Checking the data connection you're using

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Tap **Mobile networks** > **Network operators** or **Access Point Names**.

Turning the data connection on or off

Turning your data connection off can help save battery life and save money on data charges. However, if you don't have data connection turned on and you're also not connected to a Wi-Fi network, you won't receive automatic updates to your email, social network accounts, and other synchronized information.

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Select the **Mobile network** check box to turn on the data connection; clear the check box to turn off the data connection.

Adding a new access point

Before you add another data connection, have the access point name and settings (including username and password if required) from your mobile operator ready.

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Tap **Mobile networks** > **Access Point Names**.

3. On the APNs screen, press ☰ and then tap **New APN**.

4. On the Edit access point screen, enter the APN settings. Tap an APN setting item to edit it.

5. Press ☰ and then tap **Save**.

Enabling data roaming

Connect to your mobile operator's partner networks and access data services when you're out of your mobile operator's coverage area.

> ⚠️ Using data services while roaming will be costly. Check with your mobile operator for data roaming rates before you use data roaming.

1. From the Home screen, press ≣ , and then tap **Settings** > **Wireless & networks**.

2. Tap **Mobile networks**, and then select the **Data roaming** check box.

Select the **Data roaming sound** check box if you'd like HTC ChaCha to play a sound so you'll know when it's connecting to a roaming network.

Wi-Fi

To use Wi-Fi, you need access to a wireless access point or "hotspot". The availability and strength of the Wi-Fi signal will vary depending on objects, such as buildings or simply a wall between rooms, the Wi-Fi signal has to pass through.

Turning Wi-Fi on and connecting to a wireless network

1. From the Home screen, press ≣ , and then tap **Settings** > **Wireless & networks**.

2. Select the **Wi-Fi** check box to turn Wi-Fi on. HTC ChaCha then scans for available wireless networks.

3. Tap **Wi-Fi settings**. The network names and security settings of detected Wi-Fi networks are displayed in the Wi-Fi networks section.

4. If the wireless network you want to connect to is not in the list of detected networks, scroll down the screen, and then tap **Add Wi-Fi network**. Enter the wireless network settings, and then tap **Save**.

5. Tap the Wi-Fi network you want to connect to. If you selected an open network, you will be automatically connected to the network.

6. If you selected a network that is secured with WEP, enter the key and then tap **Connect**.

When HTC ChaCha is connected to the wireless network, the Wi-Fi icon 📶 appears in the status bar and tells you the approximate signal strength (number of bands that light up).

The next time HTC ChaCha connects to a previously accessed secured wireless network, you won't be asked to enter the key or other security information again, unless you reset HTC ChaCha to its factory default settings.

Connecting to a Wi-Fi network with EAP-TLS security

You may need to install a network certificate (*.p12) to HTC ChaCha before you can connect to a Wi-Fi network with EAP-TLS authentication protocol.

1. Save the certificate file to the root folder of the storage card.

2. From the Home screen, press ☰, and then tap **Settings** > **Security**.

3. Tap **Install from SD card**.

4. Select the network certificate needed to connect to the EAP-TLS network.

5. Turn on Wi-Fi and connect to a wireless network.

Checking the wireless network status

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. On the Wireless & networks screen, tap **Wi-Fi settings**, and then tap the wireless network that HTC ChaCha is currently connected to.

A message box is then displayed showing the Wi-Fi network name, status, speed, signal strength, and more.

> If you want to remove the settings for this network, tap **Forget**. If you want to reconnect to a wireless network that you have removed, you'll need to choose the wireless network from the list of available Wi-Fi networks again. If it is a secured wireless network, you'll need to enter the wireless network credentials again.

Connecting to another Wi-Fi network

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Tap **Wi-Fi settings**. Detected Wi-Fi networks are displayed in the Wi-Fi networks section.

3. To manually scan for available Wi-Fi networks, on the Wi-Fi screen, press ☰, and then tap **Scan**.

4. Tap another Wi-Fi network to connect to it.

Connecting to a virtual private network (VPN)

Add, set up, and manage virtual private networks (VPNs) so you can connect and access resources inside a secured local network, such as your corporate network.

Depending on the type of VPN you're using at work, you may be asked to enter your login credentials and install security certificates before you can connect to your company's local network. You can get this information from your network administrator.

Also, HTC ChaCha must first establish a Wi-Fi or data connection before you can start a VPN connection.

Setting up secure credential storage

If your network administrator tells you to download and install security certificates, you must first set up secure credential storage on HTC ChaCha.

1. From the Home screen, press ☰, and then tap **Settings > Security**.

2. Tap **Set password**.

3. Enter a new password for the credential storage.

4. Scroll down and confirm the password, and then tap **OK**.

5. Select the **Use secure credentials** check box.

You can then download and install the certificates needed to access your local network. Your network administrator can tell you how to do this.

Adding a VPN connection

1. From the Home screen, press ☰, and then tap **Settings > Wireless & networks**.

2. Tap **VPN settings > Add VPN**, and then tap the type of VPN you want to add.

3. Tap the VPN settings and set them up according to the security details your network administrator gave you.

4. Press ☰, and then tap **Save**.

The VPN is then added to the VPNs section of the VPN settings screen.

Connecting to a VPN

1. From the Home screen, press ☰, and then tap **Settings > Wireless & networks**.

2. Tap **VPN settings**.

3. In the VPNs section, tap the VPN that you want to connect to.

4. When asked, enter your log in credentials, and then tap **Connect**. When you're connected, the VPN connected icon ⬚ appears in the notification area of the title bar.

You can then open the web browser to access resources such as your corporate network intranet.

Disconnecting from a VPN

1. Press and hold the title bar, and then slide down your finger to open the Notifications panel.

2. Tap the VPN connection to return to the VPN settings screen, and then tap the VPN connection to disconnect from it.

When HTC ChaCha has disconnected from the VPN, the VPN disconnected icon ⬚ is displayed in the notification area of the title bar.

Using HTC ChaCha as a modem (USB tethering)

No Internet connection available for your computer? No problem. Use the data connection on HTC ChaCha to connect to the Internet.

⚐ ▪ You need your SIM card inserted on HTC ChaCha to use the data connection.

▪ To use HTC ChaCha as a modem, you need to install HTC Sync on your computer first.

1. Make sure the data connection on HTC ChaCha is turned on.

2. Connect HTC ChaCha to the computer using the provided USB cable.

3. On the Connect to PC screen, select **USB tethering**, and then tap **Done**.

Connecting HTC ChaCha to the Internet through a computer (Internet Pass-through)

If you don't have a data plan for HTC ChaCha or you don't have access to a Wi-Fi network, you can still go online on HTC ChaCha by using your computer's Internet connection.

⚐ Before you can use your computer as a modem, be sure to install HTC Sync on your computer first.

1. Make sure your computer is connected to the Internet.

✎ Two things to check for your computer's Internet connection. One, you may need to turn off your local network's firewall. Two, if your computer connects to the Internet via PPP (e.g. Dial UP, xDSL, or VPN), Internet Pass-through will only support TCP protocol.

2. Connect HTC ChaCha to the computer using the provided USB cable.

3. On the Choose a connection type screen, select **Internet pass-through**, and then tap **Done**.

Using HTC ChaCha as a wireless router

Share your data connection with other devices by turning HTC ChaCha into a wireless router.

Make sure the data connection on HTC ChaCha is turned on before you use it as a wireless router.

1. From the Home screen, press ![menu icon], and then tap **Settings** > **Wireless & networks**.

2. Tap **Portable Wi-Fi hotspot settings**.

3. Enter a router name or use the default router name.

4. Choose the type of Security and set the password (key) for your wireless router. If you selected **None** in Security, you don't need to enter a password.

> The password is the key other people need to enter on their device so they can connect and use HTC ChaCha as a wireless router.

5. Select the **Portable Wi-Fi hotspot** check box to turn on the wireless router.

HTC ChaCha is ready to be used as a wireless router when you see ![3G icon] on the status bar.

Bluetooth

Bluetooth basics

Turning Bluetooth on or off

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Select or clear the **Bluetooth** check box.

An even easier way to turn Bluetooth on or off is with the Bluetooth widget on the Home screen.

Turn off Bluetooth when not in use to save battery power, or in places where using a wireless device is prohibited, such as on board an aircraft and in hospitals.

Changing the device name

The device name identifies HTC ChaCha to other devices.

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Tap **Bluetooth settings**.

3. If the **Bluetooth** check box is not selected, select it to turn Bluetooth on.

4. Tap **Device name**.

5. Enter the new name for HTC ChaCha in the dialog box, and then tap **OK**.

Connecting a Bluetooth headset or car kit

You can listen to music over a Bluetooth stereo headset, or have hands-free conversations using a compatible Bluetooth headset or car kit. It's the same procedure to set up stereo audio and hands-free.

- For you to listen to music with your headset or car kit, the headset or car kit must support the A2DP Bluetooth profile.

- Before you connect your headset, you need to make it discoverable so HTC ChaCha can find it. You can find out how to do this by referring to your headset manual.

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Tap **Bluetooth settings**.

3. If the **Bluetooth** check box is not selected, select it to turn Bluetooth on.

4. Make sure that the headset is discoverable.

5. Tap **Scan for devices**. HTC ChaCha will start to scan for Bluetooth devices within range.

6. When you see the name of your headset displayed in the Bluetooth devices section, tap the name. HTC ChaCha then automatically tries to pair with the headset.

7. If automatic pairing fails, enter the passcode supplied with your headset.

The pairing and connection status is displayed below the hands-free headset or car kit name in the Bluetooth devices section. When the Bluetooth headset or car kit is connected to HTC ChaCha, the Bluetooth connected icon ⁜ is displayed in the status bar. Depending on the type of headset or car kit you have connected, you can then start using the headset or car kit to listen to music and/or make and receive phone calls.

Reconnecting a headset or car kit

Normally, you can easily reconnect your headset by switching on Bluetooth on HTC ChaCha, and then turning on the headset. However, you might have to connect manually if your headset has been used with another Bluetooth device.

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Tap **Bluetooth settings**.

3. If the **Bluetooth** check box is not selected, select it to turn Bluetooth on.

4. Make sure that the headset is discoverable.

5. Tap the headset's name in the Bluetooth devices section.

6. If prompted to enter a passcode, try `0000` or `1234`, or consult the headset/car kit documentation to find the passcode.

If you still cannot reconnect to the headset or car kit, follow the instructions in Unpairing from a Bluetooth device on page 160, and then follow the steps under Connecting a Bluetooth headset or car kit on page 158.

Disconnecting or unpairing from a Bluetooth device

Disconnecting a Bluetooth device

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Tap **Bluetooth settings**.

3. In the Bluetooth devices section, press and hold the device to disconnect.

4. Tap **Disconnect**.

Unpairing from a Bluetooth device

You can make HTC ChaCha forget its pairing connection with another Bluetooth device. Doing so may require you to enter or confirm a passcode again if you want to reconnect to the other device.

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Tap **Bluetooth settings**.

3. In the Bluetooth devices section, press and hold the device to unpair.

4. Tap **Disconnect & unpair**, or tap **Unpair** if the Bluetooth device is currently not connected to HTC ChaCha.

Sending information using Bluetooth

You can use Bluetooth to send information from HTC ChaCha to another Bluetooth enabled device such as a phone or notebook computer. You can send the following types of information, depending on the device you are sending to:

- Images and videos

- Calendar events

- Contacts

- Audio files

⚑ Before you begin, set the receiving device to discoverable mode. You may also need to set it to "Receive Beams" or "Receive Files". Refer to the device's documentation for instructions on receiving information over Bluetooth.

1. On HTC ChaCha, open the app that contains the information or file you want to send.

2. Follow the steps for the type of item you want to send:

Captured photo or video	After capturing, on the Camera preview screen, tap 🔀, and then tap **Bluetooth**.
Photos or videos	1. On the Gallery app, choose an album. 2. Tap 🔀, and then tap **Bluetooth**. 3. Choose the photos and videos you want to share, and then tap **Next**.
Contact	1. On the People app, tap a contact to view the contact's details. 2. Press ☰ and then tap **Send contact**. 3. Tap the down arrow icon, and then select **Bluetooth**. 4. Choose which details to share, and then tap **Send**.

Calendar appointment or event	In Day view, Agenda view, or Week view, press and hold the event, and then tap **Share vCalendar** > **Bluetooth**.
Music track	With the track displayed on the Music app's Now playing screen, press ☰, and then tap **Share** > **Bluetooth**.
Voice recording	On the main Voice Recorder screen, tap 🔵, and then tap **Bluetooth**.

3. Turn on Bluetooth if you're asked to do so.

4. If you haven't paired with the receiving device before, tap **Scan for devices**.

5. Tap the name of the receiving device.

6. If prompted, accept the pairing request on HTC ChaCha and on the receiving device. Also enter the same passcode or confirm the auto-generated passcode on both devices.

7. On the receiving device, accept the file.

Where sent information is saved

When you send information using Bluetooth, the location where it's saved depends on the type of information and the receiving device.

If you send a calendar event or contact, it is normally added directly to the corresponding application on the receiving device. For example, if you send a calendar event to a compatible phone, the event is shown in that phone's calendar application.

If you send another file type to a Windows computer, it is normally saved in the Bluetooth Exchange folder within your personal document folders.

- On Windows XP, the path may be: `C:\Documents and Settings\[your username]\My Documents\Bluetooth Exchange`

- On Windows Vista, the path may be: `C:\Users\[your username]\Documents`

- On Windows 7, the path may be: `C:\Users\[your username]\My Documents\Bluetooth Exchange Folder`

If you send a file to another device, the saved location may depend on the file type. For example, if you send an image file to another mobile phone, it may be saved in a folder named "Images".

Receiving information using Bluetooth

HTC ChaCha lets you receive various files with Bluetooth, including photos, music tracks, and documents such as PDFs.

1. From the Home screen, press ☰, and then tap **Settings** > **Wireless & networks**.

2. Tap **Bluetooth settings**.

3. If the **Bluetooth** check box is not selected, select it to turn Bluetooth on.

4. Select the **Discoverable** check box.

5. On the sending device, send one or more files to HTC ChaCha. Refer to the device's documentation for instructions on sending information over Bluetooth.

6. If asked, accept the pairing request on HTC ChaCha and on the receiving device. Also enter the same passcode or confirm the auto-generated passcode on both devices.

    You'll then get a Bluetooth authorization request.

7. If you want to automatically receive files from the sending device in future, select the **Always** check box.

8. Tap **Accept** or **OK**.

9. When HTC ChaCha receives a file transfer request notification, slide down the Notifications panel, tap the incoming file notification, and then tap **Accept**.

10. When a file is transferred, a notification is displayed. To open the file immediately, slide down the Notifications panel, and then tap the relevant notification.

When you open a received file, what happens next depends on the file type:

- Media files and documents are usually opened directly in a compatible app. For example, if you open a music track, it starts playing in the Music app.

- For a vCalendar file, choose the calendar where you want to save the event, and then tap **Import**. The vCalendar is added to your Calendar events.

- For a vCard contact file, you can choose to import one, several, or all of those contacts to your contacts list.

Adding the Bluetooth received folder to the Home screen

You can add a folder to the Home screen that shows all files you have received with Bluetooth.

1. From the Home screen tap [icon] > **Add items to Home**.

2. Tap **Folder** > **Bluetooth received**.

3. Press and hold the Bluetooth received folder icon, and drag it to the Home screen position you want.

To view the folder contents, tap the folder icon. To open a file, tap the file name.

Security

Protecting your SIM card with a PIN

Add another layer of security for HTC ChaCha by assigning a PIN (personal identification number) to your SIM.

Make sure you have the default SIM PIN provided by your mobile operator before continuing.

1. From the Home screen, press ▤, and then tap **Settings** > **Security**.

2. Tap **Set up SIM card lock**, then select **Lock SIM card**.

3. Enter the default SIM card PIN, and then tap **OK**.

4. To change the SIM card PIN, tap **Change SIM PIN**.

Restoring a SIM card that has been locked out

If you enter the wrong PIN more times than the maximum number of attempts allowed, your SIM card will become "PUK-locked."

You need a PUK code to restore access to HTC ChaCha. This code may have been provided by your mobile operator when you received your SIM card.

1. On the Phone dialer screen, enter the PUK code, and then tap **Next**.

2. Enter the new PIN you want to use, and then tap **Next**.

3. Enter the new PIN again, and then tap **OK**.

Protecting HTC ChaCha with a screen lock pattern, PIN, or password

Protect your personal information and prevent others from using HTC ChaCha without your permission by setting a screen lock pattern, PIN or password.

Your screen lock will be asked every time HTC ChaCha is turned on or when it's idle for a certain period of time.

1. From the Home screen, press ▤, and then tap **Settings** > **Security**.

2. Tap **Set up screen lock**.

3. Tap one of the following:

None	Disable the screen lock you've previously created.
Pattern	Set a screen lock pattern by following the onscreen instructions.
PIN	Set a numeric password of at least four digits.
Password	Set an alpha-numeric password.

4. On the Security screen, tap **Lock phone after**, then specify the idle time you can allow before the screen is locked.

> You can also clear the **Use visible pattern** or **Visible passwords** on the Security screen if you don't want your screen lock to display as you enter it onscreen.

Changing your screen lock

1. From the Home screen, press ≡ , and then tap **Settings** > **Security**.

2. Tap **Change screen lock**.

3. Enter your current screen lock to confirm that you want to change it.

4. Choose a different screen lock type, then enter your new pattern, PIN, or password. Or tap **None** if you don't want to use a screen lock.

Forgot your screen lock pattern?

If you've forgotten your screen lock pattern, you have up to five attempts to try and unlock HTC ChaCha.

If this fails, you can unlock HTC ChaCha by entering your Google Account user name and password.

1. On the unlock screen, enter your lock pattern.

2. After the fifth attempt, when you're asked to wait for 30 seconds, tap **OK**.

3. If the display goes off, press the POWER button to turn the display back on, and then unlock the screen.

4. Tap the **Forgot pattern?** button when it appears.

5. Enter your Google Account name and password, and then tap **Sign in**. You'll then be asked to create a new screen lock pattern. If you no longer want to do so, tap **Cancel**.

Settings

Settings on HTC ChaCha

Control and customize phone settings on the Settings screen.

From the Home screen, press ☰, and then tap **Settings**.

Personalize	Make HTC ChaCha truly yours with the various personalization options available.
Wireless & networks	Set up wireless connections, such as Wi-Fi, data connection, and Bluetooth, enable Airplane mode, and more.
Call	Set up call services such as voicemail, call forwarding, call waiting, and caller ID.
Sound	▪ Choose sounds to use for the ringtones and notifications. ▪ Adjust media playback volume. ▪ Set to lower the ring volume when you move HTC ChaCha when it's ringing, make it ring louder when inside a bag or pocket, and turn on the speakerphone when you flip it over.
Display	Set up display settings such as automatic screen orientation, brightness, screen timeout, and more.
Accounts & sync	▪ Log in or out of your social network accounts, Google Account, and Exchange ActiveSync account. ▪ You can also manage synchronization and other settings for your accounts.
Location	Select the sources to use when determining your location.
Search	Select items to include when you do a search and set Google search options.
Privacy	Choose to automatically back up some settings (e.g. Wi-Fi passwords or Bookmarks) to Google servers using your Google Account so you can restore them when needed.
Connect to PC	▪ Set the default USB connection type to use whenever you connect HTC ChaCha to your computer. ▪ Or, select the **Ask me** check box to set HTC ChaCha to always display the screen for selecting the USB connection type.
Security	Set a screen lock, enable the SIM card lock, or manage the credential storage.

Power	Turn on power saver to automatically switch to power saving mode when the battery level goes down to the level that you set.
Applications	Manage running applications, move applications to or from the storage card, and install or uninstall programs.
SD & phone storage	▪ Check the available space in the internal storage and your storage card. ▪ From this screen, be sure to unmount your storage card before you remove it from HTC ChaCha. ▪ You can also do a factory reset.
Date & time	Set the date and time, time zone, and date or time format.
Language & keyboard	Set the operating system language and region. You can also set keyboard options.
Accessibility	Use these settings when you've downloaded and installed an accessibility tool, such as a screen reader that provides voice feedback. You can turn accessibility functions or services on or off.
Voice input & output	Set up the voice input options. Also, if you've installed a text-to-speech (voice data) application, use this to set the text-to-speech settings.
About phone	▪ Turn on or off scheduled checks for system software updates, or manually check for updates. ▪ Turn **Tell HTC** on or off. When enabled, you're helping us know if HTC ChaCha encounters a technical problem. ▪ View different information about HTC ChaCha, such as the mobile network type, signal strength, battery level, and more.

Changing display settings

Adjusting the screen brightness manually

1. From the Home screen, press ≡, and then tap **Settings**.

2. Tap **Display** > **Brightness**

3. Clear the **Automatic brightness** check box.

4. Drag the brightness slider to the left to decrease or to the right to increase the screen brightness.

5. Tap **OK**.

Adjusting the time before the screen turns off

After a period of inactivity, the screen turns off to conserve battery power. You can set the idle time before the screen turns off.

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Display** > **Screen timeout**.

3. Tap the time before the screen turns off.

Turning automatic screen rotation off

By default, the screen orientation automatically adjusts depending on how you hold HTC ChaCha.

> ✎ Automatic rotation is not supported in all application screens.

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Display**.

3. Clear the **Auto-rotate screen** check box.

Recalibrating the G-sensor

Recalibrate the screen if you feel that the screen orientation does not respond properly to the way you hold HTC ChaCha.

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Display** > **G-Sensor calibration**.

3. Place HTC ChaCha on a flat and level surface, and then tap **Calibrate**.

4. After the recalibration process, tap **OK**.

Keeping the screen on while charging HTC ChaCha

You can keep the screen from turning off while you're charging HTC ChaCha.

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Applications** > **Development**.

3. Select the **Stay awake** check box.

Switching animation effects on or off

You can turn off the animation or enable only some animations when switching between screens.

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Display** > **Animation**.

3. On the options menu, select the animation setting you want.

Changing sound settings

Switching between silent, vibration, and normal modes

Do one of the following:

- To change back from silent to normal mode, simply press the VOLUME UP button.
- To change back from vibration to normal mode, press the VOLUME UP button twice.
- From the Home screen, press ☰, and then tap **Settings** > **Sound** > **Sound profile**.

> Add the Profile widget to your Home screen to quickly switch between modes.

Enabling or disabling audible selection

You can choose to play a sound when you're selecting items onscreen.

1. From the Home screen, press ☰, and then tap **Settings**.
2. Tap **Sound**.
3. Select the **Audible selection** check box.

Lowering the ring volume automatically

HTC ChaCha has a quiet ring feature that automatically lowers the ring volume when you move it.

1. From the Home screen, press ☰, and then tap **Settings**.
2. Tap **Sound**.
3. Select or clear the **Quiet ring on pickup** check box.

Making HTC ChaCha ring louder with Pocket mode

To help avoid missing incoming calls when HTC ChaCha is in your pocket or bag, the pocket mode feature gradually increases the ring volume and vibrates when you receive a call. When not in your pocket or bag, HTC ChaCha will ring at the normal volume you set.

1. From the Home screen, press ☰, and then tap **Settings**.
2. Tap **Sound**.
3. Select or clear the **Pocket mode** check box.

Switching to speakerphone automatically

You can switch to speakerphone by simply flipping HTC ChaCha over.

1. From the Home screen, press ☰ , and then tap **Settings**.

2. Tap **Sound**.

3. Select or clear the **Flip for speaker** check box.

Changing the language

When you turn HTC ChaCha on for the first time, you're asked to choose the language you want to use. If you want, you can still change the language after you set up HTC ChaCha. Changing the language adjusts the keyboard layout, date and time formatting, and more.

The languages available to choose from may depend on the version of HTC ChaCha you have.

1. From the Home screen, press ☰ , and then tap **Settings**.

2. Tap **Language & keyboard** > **Select language**.

3. Tap the language and corresponding region you want to use.

4. Press ⌂ to return to the Home screen. The new language will be applied after a few seconds.

Optimizing battery life

You can set HTC ChaCha to automatically switch to power saving mode when the battery level reaches a certain level.

1. From the Home screen, press ☰ , and then tap **Settings**.

2. Tap **Power**.

3. Select the **Enable power saver** check box.

4. Tap **Turn power saver on at**, and then select when to switch to power saver mode.

5. Tap **Power saver settings**, and then set and select the behavior when HTC ChaCha switches to power saving mode.

Using the GSM network of your mobile operator

Switch to using the GSM network of your mobile operator if you're not using a data connection to connect to the Internet. Connecting to your mobile operator's GSM network consumes less battery power.

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Wireless & networks** > **Mobile networks** > **Network Mode**.

3. Tap **GSM only**.

Checking the power usage of applications

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **About phone** > **Battery** > **Battery use**.

Managing memory

Checking how much phone memory is available for use

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **SD & phone storage**. The available phone memory is displayed in the Internal storage section.

Checking the available storage card space

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **SD & phone storage**. The total and available storage card space is displayed in the SD card section.

Clearing application cache and data

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Applications** > **Manage applications**.

3. On the All tab, tap an application.

4. On the screen, tap **Clear data** and/or **Clear cache**.

Uninstalling third-party applications

You cannot uninstall applications that are preinstalled on HTC ChaCha.

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Applications** > **Manage applications**.

3. On the Downloaded tab, tap the application you want to uninstall.

4. Tap **Uninstall**.

Moving applications to or from the storage card

Move downloaded applications to the storage card if the internal storage on
HTC ChaCha is getting low. Or, if your storage card is getting full, you can also move
applications from the storage card to the internal storage.

> You can only move applications that are not preinstalled on HTC ChaCha.

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **Applications** > **Manage applications**.

3. On the Downloaded tab, tap the application you want to move.

4. Choose whether to move the application to the storage card or to HTC ChaCha.

Checking information about HTC ChaCha

1. From the Home screen, press ☰, and then tap **Settings**.

2. Tap **About phone**.

3. Select one of the following:

Software updates	Enable or disable the automatic check feature for software updates for HTC ChaCha. You can also tap **Check now** to manually check for software updates.
Tell HTC	Turn **Tell HTC** on or off. When enabled, you're helping us know if HTC ChaCha encounters a technical problem. You can also choose when you want to send error reports.
Network	Check information about your mobile operator and its service status.
Phone identity	Check information about HTC ChaCha and the SIM card you're using.
Battery	Check information about the battery such as its current battery level, status, and what programs are using the battery.
Hardware information	Check the Wi-Fi MAC and Bluetooth addresses.
Software information	Check the version and other information about the Android platform being used by HTC ChaCha. You can also check the version of the web browser.
Legal information	Read legal information from HTC and Google, and licenses used by HTC ChaCha.

Update and reset

Software updates

From time to time, software updates for HTC ChaCha may be available. HTC ChaCha can check and then notify you if there's a new update. You can then download and install the software update using the Wi-Fi or data connection. You can also manually check if there's an available software update.

Depending on the type of update, the update may erase all your personal data and customized settings, and also remove any applications you've installed. Make sure that you've backed up the information and files you want to keep.

> Checking and downloading software updates may incur additional data transfer fees from your mobile operator.

Installing an update

Make sure HTC ChaCha has a storage card inserted. The update will be downloaded to the storage card.

1. Do any of the following after HTC ChaCha receives a software update:

   - If the display is on and you're not using any application, the **Install system software update** dialog box appears on screen. Select **Install now**, and then tap **OK**.
   - If you're in a call, the update notification icon appears in the status bar. After the call, slide open the Notifications panel, and then tap the update notification.

2. Wait for the update to download and install on HTC ChaCha. When the update is finished, HTC ChaCha will automatically restart.

Checking for updates manually

1. From the Home screen, press ≣, and then tap **Settings**.

2. Tap **About phone** > **Software updates** > **Check now**.

Restarting HTC ChaCha

If HTC ChaCha is running slower than normal, an application is not performing properly, or HTC ChaCha becomes unresponsive, try restarting HTC ChaCha and see if that helps solve the problem.

1. If the display is off, press the POWER button to turn it back on.

2. Unlock the display.

3. Press and hold the POWER button, and then tap Restart.

4. When asked to confirm, tap Restart.

> ✎ If these steps don't work, you can remove and replace the battery, and then turn HTC ChaCha on to restart it.

Resetting HTC ChaCha

Do a factory reset to return HTC ChaCha to its original state before the first time you turned it on.

If you're passing HTC ChaCha on to someone else or HTC ChaCha has a persistent problem that cannot be solved, you can perform a factory reset (also called a hard reset). Factory reset is not a step to be taken lightly. It'll permanently delete all your data and customized settings, and will remove any applications you've downloaded and installed. Be sure to back up any data and files you want to keep before you do a factory reset.

Performing a factory reset via settings

The most convenient way to do a factory reset is via the settings.

1. From the Home screen, press ☰, and then tap Settings.

2. Tap SD & phone storage > Factory data reset.

3. Tap Reset phone, and then tap Erase everything.

Performing a factory reset using hardware buttons

If you can't turn HTC ChaCha on or access settings, you can still perform a factory reset by using the hardware buttons on HTC ChaCha.

1. Remove the battery, wait for a few seconds, then reinsert the battery.

2. Press and hold the VOLUME DOWN button, and then briefly press the POWER button.

3. Wait for the screen with the three Android images to appear, and then release the VOLUME DOWN button.

4. Press VOLUME DOWN to select FACTORY RESET, and then press the POWER button.
