SAFETY PRECAUTIONS

Please read the following safety guidelines before using the device.

- Do not use the phone while you are driving.
- Do not place magnetic storage media near your phone. Radiation from the phone may erase the information stored on them.
- Keep your phone and its accessories away from children.
- Mobile phones can interfere with the functioning of medical devices such as hearing aids or pacemakers. People having active medical implants should keep their cell phone at least 15 cm away from the implant.
- Permanent hearing loss may occur if you use earphones or headphones at high volume.
- Use a wireless hands-free system (headphone/ headset) with a low power Bluetooth emitter.
- Make sure the cell phone has a low SAR.
- Keep your calls short or send a text message (SMS) instead. This advice applies specially to children adolescents and pregnant women.
- Use cell phone when the signal quality is good.

Notice:

- Do not dismantle the device or accessories otherwise, manufacturer is not liable to pay for damages as the device and accessories are not covered by warranty.
- Use only original batteries and charging devices.
- Please back up your important data timely and keep them properly. The company is not liable for any failure to call or loss of data due to mis-operation, poor signal or power cut, etc.
- All the screens in this manual are for reference only, and

some contents actually displayed may depend upon the presetting of the service provider or the network operator, or the SIM card. If any functions referred to in this manual are different from those of your device, please follow your device.

- Do not put use it in a place with flammable gas such as a petrol pumps. The temperature recommended for using the device is 5-35°C
- Do not touch the charger, power cable or socket with wet hands. This may cause an electric shock.

If your phone or any of its accessories do not function normally, then please visit your nearest authorized service facility. The qualified personnel will assist you, and if necessary, will arrange for the service.

SAR (Specific Absorption Rate)

Your device conforms to the Indian guidelines for exposure to radio waves. The limits are given in terms of a unit referred to as the Specific Absorption Rate (SAR), which is a measure of the amount of radio frequency energy absorbed by the body when using a mobile phone. The SAR value as per the Indian guidelines standard is 1.6 watts per kg (Watt/kg), averaged over a 6 minutes period and taken over a volume containing a mass of 1 gram of human tissue. The highest SAR value of this device when tested is **1.189Watt/kg**. You can check the SAR level of your device by dialing *727#.

UNDERSTANDING YOUR DEVICE

GENERAL INFO

Your device encloses features such as **Capacitive Touch, Wi-Fi, 3.2 MP Camera, Java, WAP/GPRS/EDGE, Audio/Video Player, S PushMail**, etc. This device is provided with two SIM slots for two different SIM cards. The SIM card inserted in the slot1 is called Master SIM, and the other one in the slot2 is known as Slave SIM.

STATUS ICONS

The table below lists various icons that might appear on the status bar while using the phone. Apart from the icons for signal strength level and the power, other icons are displayed as per the current mode and priority of the phone.

Indicates the network signal strength of Master SIM

Indicates the network signal strength of Slave SIM

Battery level of the device

Indicates that there is an unread message

Missed call notification

Music player is running

Headset is plugged in

SMART TOUCH SCREEN

The phone features a full touch, wide screen with access to utilities at just one-touch. The first row known as the status bar displays various icons, including signal strength, battery and time.

You can re-design and customize the desktop as per your desire. Just long press on the  icon to remove the already placed icons on the screen. You can add desired icons by selecting Add Widget icon from the home screen. *(Please refer to the image below)*

GETTING STARTED

Please switch off your device before inserting or removing the battery/SIM card or memory card.

INSTALLING CARDS & BATTERY

Please switch off your phone before inserting or removing the battery/SIM card or memory card.

Installing SIM Card and Battery

Your device is provided with two SIM slots for two different SIM cards. The SIM card inserted in the slot1 is called Master SIM, and the other one in the slot2 is known as Slave SIM.

- Remove the back cover of the device.
- Hold the device with the front facing downwards; pull the battery cover.
- Insert the SIM cards in the device.
- Attach the battery.
- Push the battery cover until it clicks into place.

Installing Memory Card

Your device supports T-Flash card, which is a multimedia memory card used to multiply the memory of the device. The T-flash card is small and

should be pulled out/installed carefully and prudently in order to avoid any kind of damage.

- Switch off your device.
- Remove the battery cover.
- Slide the T-Flash card into the slot.
- Attach the battery.
- Push the battery cover until it clicks into place.

Charging the Battery

The phone prompts a warning tone and message stating insufficient battery when the power of your phone is low. Please follow the instructions mentioned below to charge your phone:

Plug the connector of the charger into the jack of the phone.

Plug the charger into a standard AC wall outlet.

When  is shown on the screen, it indicates that there is not enough power and you should now charge your phone. When charging is complete, the battery icon will stop flashing.

Charging..... Fully Charged.....

You must fully charge the battery before using the phone for the first time. It is recommended to charge the battery for four hours before using the phone for the first time.

If the phone is turned on during charging, you can still make or

answer calls, but this will consume battery power, thus will extend the charging time of the phone.

TURN ON/OFF THE PHONE

To turn on/off the phone, press and hold the Power Key. If you have enabled the SIM Lock function then enter the PIN code (the 4 to 8 digits secret code of your SIM card). It is preconfigured and provided to you by your network operator or retailer. If you enter an incorrect PIN code 3 times in succession, your SIM card will be locked. To unlock it, you must obtain a code from your network operator.

Automatic Customer Registration

After 4 hours of usage a SMS from the phone will be sent automatically for the customer registration.

Standard SMS charges apply.

BASIC OPERATIONS

Make Calls

If the full network icons appear on the screen, then you can make or receive calls.

- In the standby mode, tap Dialer, enter the desired phone number (affix the international/national/ regional code or district code if necessary) and then tap M/S to make a call.
- In the standby mode, tap Contacts, to select a desired contact and make a call OR Enter the initials of the name to be searched and then tap to make a call.

To Dial International Number

The phone supports dialing the international emergency phone number, such as 112 and 911. Using your handset, you can dial an emergency call in any country or region under the normal situation regardless of SIM card inserted (when the phone is located within the coverage of the GSM

network).

- Input the emergency phone number and tap M/S to dial.
- Prefix the international symbol +.
- Enter the country code, area code and phone number.
- Tap M / S to make an International call.

The phone will select the main network automatically after powered on if it is located within the coverage of the main network. The phone can use other network, called as roaming, if the phone is not located within the coverage of the main network when the network operator protocol permits.

MAIN MENU

Menu guides you to various applications, features and utilities available in your device. In the idle mode, press menu key to access the Main Menu.

CONTACTS

This menu refers to the directory where in all the contacts are stored in an alphabetical order. You can view, edit, delete, send message and perform various other functions on each contact of your phonebook.

Add Contact

Go to contacts > add new contact > select the appropriate storage > enter the details > save

Search Contact

- Input the initials of the name to be searched.
- Select a desired entry from the list.

MESSAGES

New message

You can create and send SMS and MMS to a particular contact using this sub-menu.

Please ensure that you have network settings in your phone to open Facebook. Check network settings.

S PUSHMAIL

S PushMail is a Push Mail service that allows you to send / receive mails from / on your mobile phone. S PushMail provides one default email account to you which consist of your mobile number (ex. 9198XXXXXXXX@spushmail.com). So that if you don't have any email id you can use this email account and send / receive emails.

Requirement: You need one S PushMail enabled device & a GPRS activated SIM card. Please check with your operator and select the data package that best suits your usage.

How to use S PushMail:

- You need to register first to become S PushMail user. Click on the S PushMail icon given in your phone.

- Clicking on the S PushMail icon will start the registration process. It starts with information about S PushMail service and the terms of service page. Click on OK / ACCEPT on both screens to continue the registration process.
- If you have two SIM cards in your phone then please select the SIM which you want to use for S PushMail and press OK to proceed.
- Please select the Data Account as per your operator and APN and press OK.
- Now enter your mobile number and press OK. It will start the verification process. During this verification one SMS will be send from your mobile number to your mobile number to verify that the mobile number entered is correct. This verification process will happen in the background until it is completed. You will be charged for an SMS.
- Once the verification is done you will receive a welcome mail and another will contain your username and password which you can use for accessing your account details on www.spushmail.com.

How to add a new mail account:

- Go to the 1st tab located at bottom of S Pushmail and click on "Add mail account".
- Select the any option under it i.e. Gmail/Yahoo/Hotmail. If you own some other account then select last option "Others Account".
- Enter your account credential and click on "Done". Your account will be configured.

- Apart from email account you can also configure your Social networking account like Facebook and Twitter in Pushmail through the option “Add SNS account”.

IMPORTANT: You can add upto 5 mail account apart from default Pushmail Account

How to compose a new mail:

- Go to the 2nd tab located at bottom of S Pushmail and go to Option > Compose.
- You can either write the email id in TO, CC & BCC fields manually or to fill it automatically click on blank credential spaces. It will take you to the Contacts from where you can select the contacts. S PushMail will pick the email id from the Contacts entry of that contact. Please remember you must have email id entered in the contacts for the selected contact.
- To add attachments please go to Options and select Add Attachment. It will open File Manager from where you can attach the content that you want.
- S Pushmail can also be used to send SMS* through the existing internet data plan of your device. Just go to Compose > Enter Phone Number on the place of “TO” > Write Message and select send.
- This service is highly internet dependent.

IMPORTANT: Please note that yourmobilenumber@spushmail.com is your default email account. You can change the default email account by selecting created email id > Option > Set as default. You can check all

your required Pushmail details under “Setting” option (4th tab located at bottom of Pushmail screen).

ENVIRONMENTAL CONCERN

Help us save Our Environment...GO GREEN..!!

All our endeavors are directed towards providing environment friendly products to you. The material used in our devices are recyclable and can be reused to make new products. We strive to make products that are safe for our consumers as well as the environment. Come join hands with us and make world a better place to live.

Preserve natural resources for future generations by recycling your phone. The phone contains some metals, when recycled properly; these can be put back into circulation, decreasing the need for new metal mining. Recycling reduces the need for raw materials, saves energy, helps mitigate Global Warming and reduces pollution, reduces waste products in landfills; therefore preserving natural resources for the future and saving the planet.

Follow some simple steps and contribute towards saving the planet.

DOs

- Recycle your handset and its accessories.
- To protect natural resources and to promote re-use of the material, kindly separate batteries from other type of waste.

DONTs

- Do not dispose off your mobile and its battery in fire.
- Do not dispose your mobile with the regular waste.
- Do not over charge your handset. Remove the charger when

battery is full.

Don't trash your phone, instead RECYCLE it

This logo signifies that this product and/or its constituents should not be disposed off with other household waste.

Hazards of Improper handling, accidental breakage, damage and /or improper recycling of hazardous elements

If this product is improperly handled, broken or damaged or carelessly recycled or disposed off in the fire, can result in environmental and data security concerns, including the following:

- Affect nearly every system in the human body and result in birth defects, brain, heart, liver, kidney and skeletal system damage. They will also significantly affect the nervous and reproductive systems of the human body;
- When burned, create cancer-producing dioxins which are released into the air we breathe;
- If thrown in landfills, may leach into groundwater affecting your local community;
- In warm climates, the oxidation of mercury in the environment can be accelerated, leading to the creation of oxidized Hg atoms that are known to be associated with ozone depletion; and
- Improper recycling additionally results in data security issues, as private electronic information remains on hard drive, if not properly removed before disposal.

How to Recycle

Please get your electronics products recycled only through authorized recyclers, approved by Pollution Control Board. We provide facility of recycling of our products. For details of our collection centers, please visit our website or call our customer care. Help us to GO GREEN.
